mail or deliver, and obtain a signed receipt therefor, a written offer of reinstatement upon the same terms and conditions available to respondent's other dealers, to any distributor or dealer located in an area where resale prices were not or could not be lawfully controlled who was terminated by respondent from January 1, 1972 to the effective date of this order unless respondent can establish that the dealer terminated does not or did not at the time of termination have good credit or that the dealer does not have reasonably adequate facilities for selling respondent's products, and forthwith reinstate any such distributor or dealer who within thirty (30) days thereafter requests, in writing, reinstatement.

III. *It is further ordered*, That respondent:

1. Notify the Commission at least thirty (30) days prior to any proposed change in the respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation of or dissolution of subsidiaries or any other such change in the corporation which may affect compliance obligations arising out of the Order.

2. For a period of three (3) years from the date this Order becomes final, establish and maintain a file of all records referring or relating to respondent's refusal during such period to sell its products to any dealer, which file shall contain a record of a communication to each such dealer explaining respondent's refusal to sell, and which file will be made available for Commission inspection on reasonable notice; and, annually, for a period of three (3) years from the date hereof, submit a report to the Commission's New York Regional Office listing the names and addresses of all dealers with whom respondent has refused to deal during the preceding year, a description of the reason for the refusal and the date of the refusal.

IV. *It is further ordered*, That in the event the Commission issues any Order which is less restrictive than the provisions of Paragraphs I, II, or III of this Order, in any proceeding involving alleged resale price maintenance of a manufacturer or supplier of audio components subject to investigation by the Commission pursuant to File No. 741 0042, then the Commission shall, upon the application of U.S. Pioneer Electronics Corp. reconsider this Order and may reopen this proceeding in order to make whatever revisions, if any, are necessary to bring the foregoing paragraphs into conformity with the less stringent restrictions imposed upon respondent's competitors.

It is further ordered, That the respondent herein shall within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

The Decision and Order was issued by the Commission October 24, 1975.

CHARLES A. TOBIN,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Hair Replacement Research Center, Inc., a corporation, trading also as Hair Replacement Research Consultants, and Salvatore Saporito, individually and as an officer of said corporation.

Consent order requiring a Bloomfield, N.J., seller of hairpieces, implant hair replacement services and related products to bald persons, among other things to cease making false and misleading claims with respect to their hair implant process, and failing to disclose that their implant process involves surgical implantation of synthetic sutures which can cause pain, infection, scarring, and other disorders. Further, respondents are required to advise prospective customers to consult with a physician prior to contracting to undergo the process, and to provide customers a three-day cooling off period during which they may cancel their contract with full refund of their

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

It is ordered, That respondent Hair Replacement Research Center, Inc., a corporation, trading also as Hair Replacement Research Consultants, and or under any other name or names, its successors and assigns and its officers, and Salvatore Saporito, individually and as an officer of said corporation, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device or through franchisees or licensees, in connection with the advertising, offering for sale, sale, or distribution of the implant replacement system or other hair replacement product or process involving surgery (hereinafter sometimes referred to as the "System"), in commerce, as "commerce" is defined in the Federal Trade Commission Act, or by the United States mails within the meaning of Section 12(a)(1) of the Federal Trade Commission Act do forthwith cease and desist from representing, directly or by implication:

1. That the System does not involve wearing a device or cosmetic which is like a hairpiece or toupee;

2. That after the System has been applied, the hair applied becomes part of the anatomy like natural hair, and has the following characteristics of natural hair.

a. The same appearance in all applications as natural hair, upon normal observation, and upon extreme close-up examination;

b. It may be cared for like natural hair where care involves possible pulling on the hair;

c. The wearer may engage in physical activity and movement with the same disregard for his hair as he would if he had natural hair.

3. That after the System has been applied, the wearer can care for it himself, and will not have to seek professional or skilled assistance in maintaining the System, and that the customer will not incur maintenance costs over and above the cost of applying the System.

It is further ordered, That respondents, in advertising, offering for sale, selling or distributing the System, disclose clearly and conspicuously that:

1. The System involves a surgical procedure resulting in the implantation of synthetic sutures in the scalp, to which hair is affixed.

2. By virtue of the surgical procedure involving implantation of synthetic sutures in the scalp, and by virtue of the synthetic suture remaining in the scalp, there is a risk of discomfort, pain, infection, scarring, and other skin disorders.

3. Continuing special care of the System is necessary to minimize the probabilities and risks referred to in Subparagraph Two of this Paragraph, and such care may involve additional costs for medications and assistance.

[1] Copies of the Complaint, Decision and Order, filed with the original document.

4. The purchaser is advised to consult with his personal physician about the System before deciding whether to purchase it.

Respondents shall set forth the above disclosures separately and conspicuously from the balance of each advertisement or presentation used in connection with the advertising, offering for sale, sale, or distribution of the System, and shall devote no less than 15% of each advertisement or presentation to such disclosures. *Provided, however*, That in advertisements which consist of less than ten column inches in newspapers and periodicals, and in radio and television advertisements with a running time of one minute or less, respondents may substitute the following statement, in lieu of the above requirements:

Warning: This application involves surgery whereby synthetic sutures are placed in the scalp. Discomfort, pain, and medical problems may occur. Continuing care is necessary. Consult your own physician.

No less than 15% of such advertisements shall be devoted to this disclosure, such disclosure shall be set forth clearly and conspicuously from the balance of each of such advertisements, and if such disclosure is in a newspaper or periodical, it shall be in at least eleven point type.

It is further ordered, That respondents, in connection with the sale of the System, provide prospective purchasers with a separate disclosure sheet containing the information required in the immediately preceding Paragraph of this Order, Subparagraphs One (1) through Four (4) thereof, and that respondents require that, prior to executing any contract to purchase said System, such prospective purchasers, sign and date the disclosure sheet after the sentence, "I have read the foregoing disclosures and understand what they mean," and that Hair Replacement Research Center, Inc. provide a copy of said disclosure sheet to the customers and retain such signed disclosure sheet for at least three years.

It is further ordered, That, in connection with the sale of the System, no contract for application of the System shall become binding on the purchaser prior to midnight of the third day, excluding Sundays and legal holidays, after the day on which said contract for application of the System was executed, and that:

1. Respondents shall clearly and conspicuously disclose, orally prior to the time of sale, and in writing on any contract, promissory note or other instrument executed by the purchaser in connection with the sale of the System, that the purchaser may rescind or cancel any obligation incurred by mailing or delivering a notice of cancellation to the office responsible for the sale prior to midnight of the third day, excluding Sundays and legal holidays, after the day on which said contract for application of the System was executed.

2. Respondents shall provide a separate and clearly understandable form which the purchaser may use as a notice of cancellation.

3. Respondents shall not negotiate any contract, promissory note, or other instrument of indebtedness to a finance company or other third party prior to midnight of the fifth day, excluding Sundays and legal holidays, after the day on which said contract for application of the System was executed.

It is further ordered, That respondents, in connection with the advertising, offering for sale, sale, or distribution of the System, serve a copy of this Order upon each present and every future licensee or franchisee, and upon each physician participating in application of respondents' System, and obtain written acknowledgment of the receipt thereof; and that respondents obtain from each present and future licensee or franchisee an agreement in writing, (1) to abide by the terms of this Order, and (2) to cancellation of their license or franchise for failure to do so; and that respondents cancel the license or franchise of any licensee or franchisee that fails to abide by the terms of this Order. Respondents shall retain such acknowledgments and agreements for so long as such persons or firms continue to participate in the application or sale or respondents' System.

It is further ordered, That respondents, in connection with the advertising, offering for sale, sale, or distribution of the System, forthwith distribute a copy of this Order to each of their operating divisions or departments.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, licensees, or franchisees, or any other change in the corporation which may affect compliance obligations arising out of the Order.

It is further ordered, That in the event that the corporate respondent merges with another corporation or transfers all or a substantial part of its business or assets to any other corporation or to any other person, said respondent shall require such successor or transferee to file promptly with the Commission a written agreement to be bound by the terms of this Order: *Provided*, That if said respondent wishes to present to the Commission any reasons why said Order should not apply in its present form to said successor or transferee, it shall submit to the Commission a written statement setting forth said reasons prior to the consummation of said succession or transfer.

It is further ordered, That the individual respondent Salvatore Saporito promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further understood that nothing contained in this Order shall be construed in any way to annul, invalidate, repeal, terminate, modify, or exempt respondents from complying with agreements, orders or directives of any kind obtained by any other agency or act as a defense to actions instituted by municipal or state regulatory agencies.

Nothing in this Order shall be construed to imply that any past or future conduct of respondents is subject to and complies with the rules and regulations of, or the statutes administered by the Federal Trade Commission.

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

The Decision and Order was issued by the Commission October 28, 1975.

CHARLES A. TOBIN,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

V 40 236 DEC 8 75 D XUM

In the Matter of Sherwood Electronic Laboratories, Inc. a corporation.

Consent order requiring a Chicago, Ill., supplier of high fidelity audio components, among other things to cease fixing resale prices of its products; fair trading its products for five years; suggesting resale prices for two years; withholding earned advertising allowances from, or refusing to sell to, price-cutting dealers; requiring dealers to report price-cutters; and imposing customer restrictions upon dealers.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

I. *It is ordered*, That respondent Sherwood Electronic Laboratories, Inc., a corporation, its successors and assigns, and respondent's employees, agents, representatives, including sales representatives or other independent contractors, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, importation, distribution, offering for sale and sale of high fidelity audio components and other products in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Establishing, continuing or enforcing any contracts, agreements, understandings or arrangements with distributors or retail dealers of respondent's products (hereinafter distributors and retail dealers are referred to in this Order as "dealers") which have the purpose or effect of fixing, establishing, maintaining, or enforcing the prices at which respondent's products are to be resold.

2. Fixing, establishing, controlling or maintaining the prices at which dealers may advertise, promote, offer for sale or sell respondent's products.

3. Publishing, disseminating, circulating or providing by any other means, any suggested resale prices: *Provided however*, That subsequent to two (2) years after the date on which this Order becomes final, respondent may suggest resale prices if it is clearly and conspicuously stated on each page of any price list, book, tag, advertising or promotional material or other document that the price is suggested.

4. Requiring any dealer to enter into written or oral agreements or understandings that such dealer will adhere to established or suggested prices for respondent's products as a condition to receiving or retaining its dealership.

5. Refusing to sell or threatening to refuse to sell to any dealer who desires to engage in the sale of respondent's products for the reason that such dealer will not enter into an understanding or agreement with respondent to advertise or sell said products at respondent's established or suggested resale price.

6. Threatening to withhold or withholding earned cooperative advertising credits or allowances from any dealer because said dealer advertises respondents' products at retail prices other than that which respondent deems appropriate or has approved.

7. Disseminating or circulating any warranty registration form or any other document which requires or requests that the retail price paid by the ultimate consumer for respondent's products be stated and reported to respondent.

8. Securing or attempting to secure any promises or assurances from dealers or prospective dealers regarding the prices at which such dealers will advertise or sell respondent's products or requesting or requiring any dealer or prospective dealer to obtain approval from respondent for prices offered by said dealers in advertisements for respondent's products.

9. Requiring, soliciting or encouraging any dealer, person or firm either directly or indirectly to report the identity of any dealer, person or firm who does not adhere to any resale or retail price or any of respondent's products, or acting on reports so obtained by refusing or threatening to refuse sales to any dealer, person or firm so reported.

10. Terminating, threatening, intimidating, coercing, delaying shipments, or taking any other action to prevent the sale of respondent's products by a dealer because said dealer has advertised or sold, is advertising or selling, or is suspected of advertising or selling such products at other than prices that respondent may deem to be appropriate or has approved.

11. Establishing, continuing or enforcing, by refusal to sell, termination or threat thereof, delay in shipment or threat thereof, or in any other manner, any contract, agreement, understanding, or arrangement or method of doing business which has the purpose or effect of restricting or limiting in any manner the customers or classes of customers to whom dealers may sell respondent's products.

12. Convening or participating in any meeting for the purpose of undertaking or engaging in any of the acts or practices prohibited by this Order.

In connection with the foregoing provisions under Part I of this Order, *it is further provided*, That after the expiration of five (5) years from the date this Order becomes final, nothing contained in this Order shall prohibit respondent from lawfully exercising such rights, if any, as it may have to distribute and establish resale prices for its products under fair trade laws then in effect.

II. *It is further ordered*, That respondent shall:

1. Forthwith upon this Order becoming final, mail or deliver, and obtain signed receipts therefor, copies of this Order to every present dealer, to every dealer terminated by respondent since January 1, 1972 and to every person or firm that within three (3) years from the effective date hereof becomes a new dealer.

2. Forthwith distribute a copy of this Order to each of its operating divisions and subsidiaries and to all officers, sales personnel, sales agents, sales representatives and advertising agencies and secure from each such entity or person a signed statement acknowledging receipt of said Order.

3. Within thirty (30) days from the date on which this Order becomes final, mail or deliver, and obtain a signed receipt therefor, written notice to all of respondent's sales personnel, sales agents and sales representatives and advertising agencies informing such persons that their violation of any provision of this Order may result in the termination of said employment or business relationship. Respondent shall obtain prior approval from the New York Regional Office of the Federal Trade Commission of said written notification.

4. Forthwith terminate the employment or business relationship with any person or firm willfully violating any provision of this Order and take appropriate disciplinary and corrective action, which may include termination, for non-willful violation.

5. Within sixty (60) days from the date on which this Order becomes final, mail or deliver, and obtain a signed receipt therefor, a written offer of reinstatement upon the same terms and conditions available to respondent's other dealers, to any distributor or dealer located in an area where resale prices were not or could not be lawfully controlled who was terminated by respondent from January 1, 1972 to the effective date of this order unless respondent can establish that the dealer terminated does not or did not at the time of termination have good credit or that the dealer does not have reasonably adequate facilities for selling respondent's products, and forthwith reinstate any such distributor or dealer who within thirty (30) days thereafter requests, in writing, reinstatement.

III. *It is further ordered*, That respondent:

1. Notify the Commission at least thirty (30) days prior to any proposed change in the respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation of or dissolution of subsidiaries or any other such change in the corporation which may affect compliance obligations arising out of the Order.

2. For a period of three (3) years from the date this Order becomes final, establish and maintain a file of all records referring or relating to respondent's refusal during such period to sell its products to any dealer, which file shall contain a record of a communication to each such dealer explaining respondent's refusal to sell, and which file will be made available for Commission inspection on reasonable notice; and, annually, for a period of three (3) years from the date hereof, submit a report to the Commission's New York Regional Office listing the names and addresses of all dealers with whom respondent has refused to deal during the preceding year, a description of the reason for the refusal and the date of the refusal.

[1] Copies of the Complaint, Decision and Order, filed with the original document.

IV. *It is further ordered*, That in the event the Commission issues any Order which is less restrictive than the provisions of Paragraph I, II, or III of this Order, in any proceeding involving alleged resale price maintenance of a manufacturer or supplier of audio components subject to investigation by the Commission pursuant to File No. 741 0042, then the Commission shall, upon the application of Sherwood Electronic Laboratories, Inc., reconsider this Order and may reopen this proceeding in order to make whatever revisions, if any, are necessary to bring the foregoing paragraphs into conformity with the less stringent restrictions imposed upon respondent's competitors.

It is further ordered, That the respondent herein shall within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

The Decision and Order was issued by the Commission October 24, 1975.

CHARLES A. TOBIN,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 82 Stat. 146, 147; 15 U.S.C. 45, 1601, *et seq.*)

In the Matter of Tri-West Construction Company, Inc., a corporation, and William B. Cafarelli, individually and as an officer of said corporation.

Consent order requiring a Boise, Idaho, home construction, repair and rehabilitation firm, among other things to cease using false pricing claims and other misrepresentations to sell its home improvement products or services; using coercive tactics to increase the contract price; and obtaining certificates of completion before actually completing the work. Further, respondent is required to complete the work agreed to in the original contract at the original price, to obtain a supplemental contract for any additional work desired by a customer, and to comply with requirements of the Truth in Lending Act that credit cost disclosures be made and that credit customers whose homes have been taken as security be allowed a three-day right of rescission period.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

I. *It is ordered*, That respondents Tri-West Construction Company, Inc., a corporation, and William B. Cafarelli, individually and as an officer of said corporation, and respondents' successors, assigns, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale, distribution or installation of home improvement products or services, or other products, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing directly or by implication that:

1. Respondents' organization is a subsidiary or division of United States Steel Corporation or is otherwise affiliated with such company or any other manufacturer of construction materials.

2. Respondents have an exclusive arrangement of any kind with United States Steel Corporation or are the only distributor of such company's products in any area.

3. Respondents have an exclusive arrangement with or are the only area distributor of products of any manufacturer of construction materials.

4. Respondents, United States Steel Corporation, or any other supplier of construction materials advertises its products and/or services by means of work done on individuals' homes.

5. The homes of any of respondents' customers are or will be used for demonstration or advertising purposes or as model homes; or that as a result of allowing or agreeing to allow their homes to be used as models, demonstrators, or before-and-after examples, customers are or will be granted reduced prices, discounts, or other special prices.

6. Any price for respondents' products and/or services is a discount price, reduced price, or otherwise special price, unless respondents can affirmatively show by documentary evidence that such price constitutes a significant reduction from an established selling price at which such products and/or services have been sold in substantial quantities by respondents in the recent regular course of their business; or misrepresenting, in any manner, respondents' price or the savings available to customers.

7. The price or terms offered by respondents are limited as to time or limited in any other manner, unless respondents can affirmatively show by documentary evidence that the represented limitations are actually in force and are in good faith adhered to.

B. Refusing or failing to perform work at the contract price after entering into an agreement therefor with a customer. In each instance where respondents and the customer determine upon additional goods or services to be provided by or through respondents, beyond those originally agreed upon, the complete terms of such supplementary agreement shall be set forth in a separate contract which shall clearly and conspicuously disclose in bold print:

This is a contract for additional goods and/or services. You are *not required* to purchase these goods and/or services. If you do not wish these additional goods and/or services, Tri-West will perform all the requirements of the original contract for the original contract price.

C. Obtaining from any customer a signed certificate of completion or other document attesting to the completion of contracted work unless the customer has in fact received all products and services contracted for, and a copy of each applicable guarantee.

D. Representing directly or by implication that a certificate of completion is only a technical requirement, or disparaging in any manner the importance

[1] Copies of the Complaint, Decision and Order, filed with the original document.

V 40 236 DEC 8 75 XUM

of the customer's waiting until completion of all contracted work before signing such a document.

E. Failing to disclose to the customer that respondents' furnishing of home improvement products and services gives respondents and others the right, under state law, to file a lien for materials and/or labor on the customer's home.

II. *It is further ordered*, That respondents Tri-West Construction Company, Inc., a corporation, and William B. Cafarelli, individually and as an officer of said corporation, and respondents' successors, assigns, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with any extension of consumer credit or advertisement to aid, promote or assist directly or indirectly any extension of consumer credit, as "consumer credit" and "advertisement" are defined in Regulation Z (12 CFR § 226) of the Truth in Lending Act (P.L. 90-321, 15 U.S.C. § 1601 et seq.), do forthwith cease and desist from:

A. Failing to use the term "cash downpayment" to describe the downpayment in money made in connection with the credit sale, as required by § 226.8(c)(2) of Regulation Z.

B. Failing to use the term "amount financed" to describe the amount of credit extended, as required by § 226.8(c)(7) of Regulation Z.

C. Failing to use the term "finance charge" to describe the sum of all charges required by § 226.4 of Regulation Z to be included therein, as required by § 226.8(c)(8)(i) of Regulation Z.

D. Failing to disclose the sum of the cash price, all charges which are included in the amount financed but which are not part of the finance charge, and the finance charge, and to describe that sum as the "referred payment price," as required by § 226.8(c)(8)(ii) of Regulation Z.

E. Failing to disclose the date on which the finance charges begins to accrue when different from the date of the transaction, as required by § 226.8(b)(1) of Regulation Z.

F. Failing to disclose the number, amounts and due dates or periods of payments scheduled to repay the indebtedness, and the sum of such payments, and to describe said sum as the "total of payments," as required by § 226.8(b)(3) of Regulation Z.

G. Failing to describe or identify the type of any security interest held or to be retained or acquired by the creditor in connection with the extension of credit, and to provide a clear identification of the property to which the security interest relates, as required by § 226.8(b)(5) of Regulation Z.

H. Failing to identify the method of computing any unearned portion of the finance charge in the event of prepayment of the obligation when said obligation includes a precomputed finance charge, as required by § 226.8(b)(7) of Regulation Z.

I. Failing to itemize and include in the finance charge, for purposes of disclosure of the finance charge and computation of the annual percentage rate, any and all charges or premiums for credit life and/or disability insurance unless respondents have clearly and conspicuously disclosed to the customer in writing that such insurance is not required and have obtained a specific dated and separately signed affirmative written indication of the customer's desire for such insurance as prescribed by § 226.4(a)(5) of Regulation Z.

J. Failing to furnish to the customer, before the transaction is consummated, a duplicate of the instrument or other statement containing the disclosures prescribed by § 226.8 of Regulation Z, as required by § 226.8(a) of Regulation Z.

K. Failing, in any transaction in which a security interest is or will be retained or acquired in real property which is used or expected to be used as the principal residence of the customer, to comply with all requirements regarding the right of rescission set forth in § 226.9 of Regulation Z.

L. Making any physical changes in a customer's property or performing any work or services on such property before expiration of the rescission period provided for in § 226.9(a) of Regulation Z, in any transaction in which a security interest is or will be retained or acquired in real property which is used or expected to be used as the principal residence of the customer, as provided in § 226.9(c) of Regulation Z.

M. Failing, in any consumer credit transaction or advertisement, to make all disclosures, determined in accordance with §§ 226.4 and 226.5 of Regulation Z, at the time and in the manner, form and amount required by §§ 226.6, 226.7, 226.8, 226.9 and 226.10 of Regulation Z.

It is further ordered, That respondents hereafter maintain complete business records relative to the manner and form of their compliance with the provisions of this order. Each such record shall be retained for not less than three years, and shall be furnished to representatives of the Federal Trade Commission upon request.

It is further ordered, That respondents shall forthwith deliver a copy of this order to cease and desist to all present and future salesmen and/or other persons engaged in the sale of respondents' products and/or services, and to all present and future personnel of respondents engaged in the consummation of any extension of consumer credit or in any aspect of the preparation, creation, or placing of advertising, and that respondents shall secure from each such salesman and/or other person a signed statement acknowledging receipt of said order.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include the respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a written report setting forth in detail the manner and form of their compliance with this order.

The Decision and Order was issued by the Commission October 31, 1975.

CHARLES A. TOBIN,
Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 75-SO-54]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Designation of Transition Area

On June 6, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 24365), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Fort Stewart, Ga., control zone and designate the Fort Stewart, Ga., transition area.

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 71.171 (40 FR 354), the Fort Stewart, Ga., control zone is amended as follows:

". . . Wright TVOR 242° . . ." would be deleted and ". . . Wright TVOR 234° . . ." would be substituted therefor.

In § 71.181 (40 FR 441), the following transition area is added:

FORT STEWART, Ga.

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Lyle H. Wright AAF (latitude 31°53'20" N., longitude 81°33'45" W.); within 1.5 miles each side of the 049° bearing from Allenhurst RBN, extending from the 8.5-mile radius area to the RBN.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 26, 1975.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-32907 Filed 12-5-75;8:45 am]

[Airspace Docket 75-NW-19]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING AREA

Alteration of Transition Area

On October 1, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 46141) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Ellensburg, Washington, Transition Area.

Interested persons were given 30 days in which to submit written data, views, or arguments. No objections were received.

In consideration of the foregoing, the amendment is hereby adopted without changes.

Effective Date: This amendment shall be effective 0901 GMT on January 29, 1976.

This amendment is issued under the authority of Section 307(a) of the Federal Aviation Act of 1958 as amended (49 U.S.C. 1348(a)) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Washington on November 28, 1975.

J. H. TANNER,
Acting Director, Northwest Region.

In § 71.181 (40 FR 441) the description of the Ellensburg, Washington, Transition Area be amended to read as follows:

ELLENSBURG, WASHINGTON

That airspace extending upward from 700' above the surface within a 5-mile radius of Bowers Field (Latitude 47°02'02" N, Longitude 120°31'49" W); within the arc of a 13-mile radius circle centered on the Ellensburg VORTAC, beginning at the 016° radial and extending clockwise to the 063° radial; within the arc of a 20.5-mile radius circle centered on the Ellensburg VORTAC, beginning at the 063° radial and extending clockwise to the 221° radial; that airspace extending upward from 1200' above the surface southwest of Ellensburg bounded on the north by V-28, on the southeast by the Ellensburg VORTAC 221° radial, on the southwest by V-4.

[FR Doc.75-32904 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SO-124]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On October 16, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 48520), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Selma, Ala., transition area.

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. There were no comments received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., January 29, 1976, as hereinafter set forth.

In 71.181 (40 FR 441), the Selma, Ala., transition area is amended as follows:

That airspace extending upward from 700 feet above the surface within a 12-mile radius of Craig AFB (latitude 32°20'30" N., longitude 86°59'15" W.); within an 18.5-mile radius of the Cahaba VORTAC, extending clockwise from the 301° radial to the 212° radial.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 25, 1975.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-32905 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SO-22]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On March 14, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 11893), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Wallace, N.C., transition area.

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., January 29, 1976, as hereinafter set forth.

In § 71.181 (40 FR 441), the Wallace, N.C., transition area is amended as follows:

". . . northwest of the VORTAC." would be deleted and ". . . northwest of the VOR TAC; within 3 miles each side of the 078° bearing from Pendy NDB (latitude 34°42'58" N., longitude 78°00'14" W.), extending from the 5-mile radius area to 9.5 miles east of the RBN." would be substituted therefor.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

V40236 DEC 8 75 XUM

Issued in East Point, Ga., on November 26, 1975.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-32906 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SO-44]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Roanoke Rapids, N.C., transition area.

The Roanoke Rapids transition area is described in § 71.181 (40 FR 441). It is necessary to alter the description by correcting the longitudinal ordinate of the Halifax County Airport and by adding reference to the Rapids (private) nondirectional radio beacon which is being established on the airport to support a new instrument approach procedure. The new instrument approach procedure will require designation of an additional eight square miles of controlled airspace. Since this amendment is minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 71.181 (40 FR 441), the Roanoke Rapids, N.C., transition area is amended as follows:

". . . 77°43'00" W.) . . ." is deleted and ". . . 77°42'19" W.); within 3 miles each side of the 233° bearing from Rapids RBN (latitude 36°26'19" N., longitude 77°42'14" W.), extending from the 7-mile radius area to 8.5 miles southwest of the RBN . . ." is substituted therefor.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 25, 1975.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-32910 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SW-67]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation and Alteration of Transition Areas

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a 700-foot transition area at Alpine, Texas, and alter the Texas transition area.

On October 14, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 48142) stating the Federal Aviation Administration proposed to designate a 700-foot transition area at Alpine, Texas, and alter the Texas transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

1. In § 71.181 (40 FR 441), the following transition area is added:

ALPINE, TEXAS

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of the center of the Alpine Municipal Airport (latitude 33°23'00" N., longitude 103° 41'00" W.) and extending 6.0 miles west and 9.5 miles east of the 023° bearing from the airport coordinates to a point 24.5 miles north of the airport coordinates.

2. In § 71.181 (40 FR 441), the Texas transition area is amended by deleting everything after "excluding that airspace" and substituting therefor "excluding that airspace south of a line beginning at the intersection of the United States/Mexican Border and 30°00'00" north latitude, thence east along 30° north latitude to and counterclockwise along the arc of a 105-mile-radius circle centered at latitude 29°21'35" N., longitude 100°46'35" W., to and along the United States/Mexican Border to point of beginning."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Fort Worth, Tex., on November 25, 1975.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

[FR Doc.75-32911 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SO-102]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On September 10, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 42025), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Campbellsville, Ky., transition area.

Interested persons were afforded an opportunity to participate in the rule-making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 71.181 (40 FR 441), the following transition area is added:

CAMPBELLSVILLE, KY.

That airspace extending upwards from 700 feet above the surface within a 6.5-mile radius of Taylor County Airport (latitude 37°21'05" N., longitude 85°18'45" W); within 3 miles each side of the 229° bearing from the Arista RBN (latitude 37°21'19" N., longitude 85°18'54" W.), extending from the 6.5-mile radius area to 8.5 miles southwest of the NDB.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 25, 1975.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.75-32908 Filed 12-5-75;8:45 am]

[Airspace Docket No. 75-SO-155]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redesignation of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to redesignate the Valdosta, Ga., (Moody AFB) control zone.

The Valdosta (Moody AFB) control zone is described in § 71.171 (40 FR 354) and is designated as part-time, with effective times of 0700 to 2300 hours, local time, Monday through Thursday; from 0700 to 2130 hours, local time, Friday; from 0900 to 1600 hours, local time, Saturday and from 1000 to 1600 hours, local time, Sunday; excluding Federal legal holidays. The U.S. Air Force is changing its hours of operation at Moody AFB and it is necessary to redesignate the control zone to accommodate the changes. Since this amendment is minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, January 29, 1976, as hereinafter set forth.

In § 71.171 (40 FR 354), the Valdosta, Ga. (Moody AFB) control zone is amended as follows:

All after ". . . south of the VOR." is deleted and "This control zone is effective from 0700 to 2300 hours, local time, daily." is substituted therefor.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 26, 1975.

LONNIE D. PARRISH,
Acting Director, Southern Region.

[FR Doc.75-32909 Filed 12-5-75;8:45 am]

[Docket No. 15192; Amdt. No. 997]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Recent Changes and Additions

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue, S.W., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or cancelling the following VOR—OR/DME SIAPs, *effective January 15, 1976.*

Fairmont, WV—Fairmont Muni. Arpt., VOR-TAC Rwy 22, Amdt. 1.

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 25—ADVISORY COMMITTEE MANAGEMENT

PART 25A—OTHER COMMITTEE MANAGEMENT

Department of Agriculture Committee Management Regulations; Correction

The following corrections are made to the Department of Agriculture's committee management regulations (Parts 25 and 25A, Subtitle A, Title 7 of the Code of Federal Regulations) which became effective October 14, 1975. The regulations were published in the FEDERAL REGISTER (40 FR 42171) on September 11, 1975.

1. The citation of authority for Part 25 following the table of contents is corrected to read:

. . . . . .

AUTHORITY: 5 U.S.C. 301; Sec. 8, 86 Stat. 773 (5 U.S.C. App. I.).

2. Section 25.11 is corrected as follows:

§ 25.11 Establishment and Renewal of Advisory Committees.

. . . . . .

(b) *Procedure for Establishment.*

. . . . . .

(3) *Preparation of Establishment Document.*

. . . . . .

V40236 DEC 8 75 XUM

(F) Statement concerning the plan to achieve balanced membership on the advisory committee (§ 25.15).

(G) Names or titles of committee members or a statement as to who will appoint them.

The document shall be routed to the Office of Management and Finance through the Office of the General Counsel.

• • • • •

Dated: December 3, 1975.

JOSEPH R. WRIGHT, Jr.,
Assistant Secretary for Administration.

Standard Inspections, Marketing Practices

CHAPTER I—AGRICULTURAL MARKETING SERVICE, DEPARTMENT OF AGRICULTURE

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—Regulations Governing Inspection and Certification

BASIS FOR CHARGES

The Agricultural Marketing Act of 1946 authorizes official inspection and certification of processed fruits and vegetables, processed products thereof, and certain other processed food products. Such inspection and certification is voluntary and is made available upon request of financially interested parties and upon payment of a fee. The Act requires such fees to be reasonable and, as nearly as possible, to cover the cost of rendering the service.

Statement of consideration leading to amendment of regulations. Effective October 12, 1975, the fee for hours worked by seasonal inspectors in plants with year around contracts was raised from $12.10 to $17.40 per hour. After re-evaluating the costs for providing this type of service and the impact of an increase of this amount upon the applicant, it has been concluded that the best interests of the applicant and the government will be served by reducing the fee for the hours worked by seasonal inspectors.[1]

Accordingly, pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. et seq., as amended; 7 U.S.C. 1621-1627), § 52.52 is amended to read as follows:

§ 52.52 Changes for inspection services on a contract basis.

• • • • •

(c) • • •

(2) For personnel assigned on less than a year-round basis:

Each inspector—$15.40 per hour.

Each subordinate inspector on the same shift with an inspector—$11.40 per hour.

(3) *Travel expense.* No reporting charges will be made for regular full time inspection personnel assigned under a year-round in-plant contract; *Provided;* That, per diem and/or mileage will be charged when paid to each inspector assigned during those periods the regularly assigned inspector(s) are taking annual and compensatory leave.

• • • • •

(Sec. 205, 60 Stat. 1090, as amended (7 U.S.C. 1624))

Notice of proposed rulemaking, public procedure thereon, and the postponement of the effective time of this action later than 30 days from date of publication in the FEDERAL REGISTER, (5 U.S.C. 553), are impracticable, unnecessary, and contrary to the public interest in that (1) the Agricultural Marketing Act of 1946 provides that the fees charged shall be reasonable and, as nearly as possible, cover the cost of the service rendered, (2) the decrease in fee rate set forth herein will accrue benefits to the consumer as well as the processor, and (3) additional time is not required by the users of the Inspection Service to comply with this amendment.

Effective date: October 12, 1975.

Dated: December 2, 1975.

DONALD E. WILKINSON,
Administrator.

[FR Doc.75-32921 Filed 12-5-75;8:45 am]

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—CHILD NUTRITION PROGRAMS

[Amdt. 8]

PART 245—DETERMINING ELIGIBILITY FOR FREE AND REDUCED PRICE MEALS AND FREE MILK IN SCHOOLS

Notice of Proposed Rulemaking

The regulations governing the determination of eligibility for free or reduced price meals in schools participating in the National School Lunch Program, School Breakfast Program, and Special Milk Program are amended to implement Public Law 94-105, enacted October 7, 1975, and for other purposes.

The principal changes stemming from Public Law 94-105 affect § 245.1, §245.3, § 245.5, and § 245.6 to: (1) make the service of reduced price meals mandatory; (2) require that children eligible for reduced price meals be those children who are members of a household whose annual income falls between the applicable family-size income level of the State's standards for free meals and 95 percent above the applicable family-size income level in the Secretary's income poverty guidelines; (3) require that reference be made to unemployed parents or guardians in the public announcement of eligibility; and (4) provide that, for cause, information in a parent's application may be verified.

Other changes affect § 245.5, § 245.10 and § 245.11 concerning the actions taken by School Food Authorities and State agencies, or FNSROs where applicable, in the event of changes in eligibility criteria and standards or other program changes after the beginning of a school year. School Food Authorities which elected to serve both free and reduced price meals at the beginning of the school year, as opposed to only free meals, may publicly announce changes in eligibility criteria for reduced price meals in the form of a public release published in the informational media or may announce such changes in the same manner as the original criteria were announced. This provision is added to facilitate implementation of the changes in eligibility criteria as a result of Public Law 94-105. State agencies, or FNSROs where applicable, are required to announce changes in family-size income standards within 30 days after the Secretary has announced a change in the income poverty guidelines or other program change which necessitates public announcement. The period within which School Food Authorities shall have their revised free and reduced price policy statements submitted to, and approved by, State agencies, or FNSROs where applicable, is changed from 30 days to 60 days after the State agency, or FNSRO where applicable, has announced a change in standards or other program change.

Failure to have a School Food Authority's policy statement aproved by the State agency, or FNSRO where applicable, at the end of the 60-day period will result in the suspension of reimbursement for all meals and milk served thereafter, until such time as the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Furthermore, no commodities donated by the Department shall be used in any program after the end of the 60-day period, until such time as the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Once the School Food Authority's free and reduced price policy statement has been approved, reimbursement may be allowed at the discretion of the State agency, or FNSRO where applicable, during the period of suspension. Previously, State agencies and FNSROs did not have the latitude to allow reimbursement for eligible meals and milk served after the date the free and reduced price policy statement was to be approved by the State agency, or FNSRO where applicable.

Other changes are nonsubstantive and are made for clarification.

Since the substantive changes in the regulations are nondiscretionary, the Department does not believe that the proposed rule making and public participation procedures are necessary. Accordingly, the regulations for Determining Eligibility for Free and Reduced Price Meals and Free Milk are hereby amended as follows:

1. In the table of sections, § 245.3 is renamed "Eligibility standards and criteria," and § 245.5 is renamed "Public announcement of the eligibility criteria."

2. In § 245.1, paragraph (a) is revised to read as follows:

§ 245.1 General purpose and scope.

(a) Section 9 of the National School Lunch Act, as amended, and section 4 of the Child Nutrition Act of 1966, as amended, require that schools participating in the National School Lunch Program (7 CFR Part 210) and the School Breakfast Program (7 CFR Part 220) and other schools utilizing commodities donated by the Department shall serve free meals to any child who is a member of a household which has an annual income not above the applicable family-size income level set forth in income poverty guidelines prescribed by the Secretary. Each State educational agency is required to prescribe family-size income standards, which may not be more than 25 percent above the Secretary's income poverty guidelines, to be used by schools in the State during each fiscal year in determining which children in the State are eligible for free meals. Section 3 of the Child Nutrition Act of 1966, as amended, requires that schools participating in the Special Milk Program (7 CFR Part 215) shall serve free milk to any child who is eligible for free meals. Each State educational agency is also required to prescribe family-size income standards for reduced price meals which will result in the service of reduced price meals to any child who is a member of a household which has an annual income above the applicable family-size income standard prescribed by the State educational agency for free meals, but not above 95 percent of the applicable family-size income level in the income poverty guidelines prescribed by the Secretary. School Food Authorities are required to publicly announce the eligibility criteria and to make determinations with respect to family size and income on the basis of a statement executed by an adult member of the family. School Food Authorities are prohibited from making any physical segregation of or other discrimination against, or any overt identification of, any child eligible for free or reduced price meals or free milk.

• • • • •

3. In § 245.2, paragraph (e) is revised as follows:

§ 245.2 Definitions.

• • • • •

(e) "Income poverty guidelines" means the family-size income levels prescribed annually by the Secretary for use by States in establishing eligibility for free and reduced price meals and for free milk.

• • • • •

4. In § 245.3, the heading and paragraphs (a), (b), and (c) are revised to read as follows:

§ 245.3 Eligibility standards and criteria.

(a) Each State agency, or FNSRO where applicable, shall at the beginning of each fiscal year announce family-size income standards to be used by School Food Authorities of schools under the jurisdiction of such State agency, or FNSRO where applicable, in making eligibility determinations for free or reduced price meals and for free milk. Such family-size income standards for free and reduced price meals and for free milk shall be in accordance with the standards set forth in § 245.1 of this part. Within those standards for free meals, the State agency, or FNSRO where applicable, may prescribe a single set of family-size income standards for use in the State, or it may prescribe a range of income standards. However, for reduced price meals, the State agency, or FNSRO where applicable, must prescribe income standards as set forth in § 245.1.

(b) Each School Food Authority shall establish eligibility criteria for free and reduced price meals and for free milk in conformity with the family-size income standards prescribed by the State agency, or FNSRO where applicable, under paragraph (a) of this section. Such criteria shall: (1) Specify the uniform family-size income criteria to be used for determining eligibility for free and reduced price meals and for free milk in all schools participating in the National School Lunch Program, School Breakfast Program, or Special Milk Program and in commodity only schools under the jurisdiction of the School Food Authority; and (2) provide that all children from a family meeting family-size income criteria and attending any school under the jurisdiction of the School Food Authority which participates under the National School Lunch Program, School Breakfast Program, Special Milk Program, or is a commodity only school shall be provided the same benefits. The School Food Authority's eligibility criteria shall be a part of the policy statement required under § 245.10 and shall be publicly announced in accordance with the provisions of § 245.5.

(c) Each School Food Authority shall serve free and reduced price meals and free milk in the respective programs to all children eligible therefor under its eligibility criteria. Family income used by a School Food Authority in determining eligibility of an applicant shall be income as defined in the Secretary's income poverty guidelines, including the adjustments for special hardship conditions. In any school which participates in more than one childe nutrition program (National School Lunch Program, School Breakfast Program or Special Milk Program) or is a commodity only school which also participates in the School Breakfast Program or the Special Milk Program, the eligibility criteria shall be applied uniformly so that eligible children receive the same benefits in each program. If a child transfers from one school to another school under the jurisdiction of the same School Food Authority, his eligibility for free or reduced price meals or for free milk, if previously established, shall be transferred to, and honored by, the receiving school, if it participates in the National School Lunch Program, School Breakfast Program, Special Milk Program, or is a commodity only school.

5. § 245.5 is revised to read as follows:

§ 245.5 Public announcement of the eligibility criteria.

(a) After the State agency, or FNSRO where applicable, notifies the School Food Authority that its criteria for determining the eligibility of children for free and reduced price meals and for free milk have been approved, the School Food Authority shall publicly announce such criteria: *Provided however,* That no such public announcement shall be required for boarding schools, or a school which includes food service fees in its tuition, where all attending children are provided the same meals or milk. Such announcements shall be made at the beginning of each school year or, if notice of approval is given thereafter, within 10 days after the notice is received. The public announcement of such criteria, as a minimum, shall include the following:

(1) A letter or notice distributed, on or about the beginning of each school year, to the parents of children in attendance at the school. The letter or notice shall contain complete information on (i) the eligibility criteria for free and reduced price meals and free milk; (ii) the four special hardship conditions for adjusting income; (iii) how a family may make application for free or reduced price meals or for free milk for its children; (iv) how a family may appeal the decision of the School Food Authority with respect to the application under the hearing procedure set forth in § 245.7; (v) a statement to the effect that, in certain cases, foster children are eligible for free or reduced price meals or for free milk regardless of the income of the family with whom they reside, and that families wishing to apply for such meals or milk for foster children should contact the School Food Authority; (vi) the statement: "In the operation of child feeding programs, no child will be discriminated against because of his race, sex, color, or national origin"; and (vii) a statement to the effect that children having parents or guardians who become unemployed are eligible for free or reduced price meals or for free milk during the period of unemployment, provided that the loss of income causes the family income during the period of unemployment to be within the eligibility criteria of the School Food Authority. The letter or notice shall be accompanied by a copy of the application form required under § 245.6.

(2) On or about the beginning of each school year, a public release, containing the same information supplied to parents, shall be provided to the informational media, the local unemployment office, and to any major employers contemplating large layoffs in the area from which the school draws its attendance.

(b) Copies of the public release shall be made available upon request to any

[1] Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

V 40 236 DEC 8 75 XUM

interested persons. Any subsequent changes in a school's eligibility criteria during the school year which are approved by the State agency, or FNSRO where applicable, shall be publicly announced in the same manner as the original criteria were announced: *Provided, however*, That for fiscal year 1976, School Food Authorities which elected to serve both free and reduced price meals at the beginning of the school year may make public announcement of changes in eligibility criteria in the same manner as the original criteria were announced or in the form of a public release published in the informational media.

6. In § 245.6, paragraph (a), the words "standards" is deleted wherever it appears and the word "criteria" is inserted in lieu thereof, and paragraph (b) is revised as follows:

§ 245.6 Application for free and reduced price meals and free milk.

* * * * *

(b) When the information furnished by a family in its application indicates that the family meets the eligibility criteria for either free or reduced price meals or for free milk, the children from that family shall be provided the free or reduced price meals or free milk to which the information indicates they are entitled. Subsequently, school officials may, for cause, seek verification of the data in the application. A family who wishes to appeal a decision made by the School Food Authority with respect to an application for free or reduced price meals or for free milk for its children, or a School Food Authority which wishes to challenge the continued eligibility of any child for free or reduced price meals or for free milk, shall do so under the hearing procedure established under § 245.7. However, prior to initiating the hearing procedure, the parent or School Food Authority may request a conference to provide an opportunity for the parent and school officials to discuss the situation, present information, and obtain an explanation of the data submitted in the application or the decision rendered. The request for a conference shall not in any way prejudice or diminish the right to a fair hearing. The children of a family determined eligible for free or reduced price meals or for free milk based on the information on the application shall continue to receive the free or reduced price meals or free milk while any challenge is pending.

* * * * *

§ 245.9 [Amended]

7. In § 245.9, the word "standards" is deleted wherever it appears and the word "criteria" is inserted in lieu thereof.

8. In § 245.10, paragraphs (c) and (d) are revised and a new paragraph (e) is added, as follows:

§ 245.10 Action by School Food Authorities.

* * * * *

(c) Each year, if a School Food Authority does not have its policy statement approved by the State agency, or FNSRO where applicable, by October 15, reimbursement shall be suspended for any meals or milk served until such time as the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Furthermore, no commodities donated by the Department shall be used in any school after October 15, until such time as the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Once the School Food Authority's free and reduced price policy statement has been approved, reimbursement may be allowed, at the discretion of the State agency, or FNSRO where applicable, for eligible meals and milk served during the period of suspension.

(d) If any free and reduced price policy statement submitted for approval by any School Food Authority to the State agency, or FNSRO where applicable, is determined to be not in compliance with the provisions of this part, the School Food Authority shall submit a policy statement that does meet the provisions within 30 days after notification by the State agency, or FNSRO where applicable.

(e) When revision of a School Food Authority's approved free and reduced price policy statement is necessitated because of a change in the family-size income standards of the State agency, or FNSRO where applicable, or because of other program changes, the School Food Authority shall have 60 days from the date the State agency announces the change in which to have its revised policy statement approved by the State agency, or FNSRO where applicable. In the event that a School Food Authority's proposed revised free and reduced price policy statement has not been submitted to, and approved by, the State agency, or FNSRO where applicable, within 60 days following the public announcement by the State agency, reimbursement shall be suspended for any meals or milk served after the end of the 60 day period. No commodities donated by the Department shall be used in any school after the end of the 60 day period, until such time as the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Reimbursement may be allowed at the discretion of the State agency, or FNSRO where applicable, for eligible meals and milk served during the period of suspension once the School Food Authority's free and reduced price policy statement has been approved by the State agency, or FNSRO where applicable. Pending approval of a revision of a policy statement, the existing statement shall remain in effect.

9. In § 245.11, paragraphs (a), (c), (d), and (f) are revised and (a–1) is added, as follows:

§ 245.11 Action by State agencies and FNSROs.

(a) Each State agency, or FNSRO where applicable, shall, for schools under its jurisdiction: (1) Issue such instructions as are necessary to assure that School Food Authorities are fully informed of the provisions of this part and of the requirements for the filing and approval of free and reduced price policy statements, which instructions may require School Food Authorities to establish the maximum price of a reduced price lunch at a level not to exceed 20 cents and the maximum price of a reduced price breakfast at a level not to exceed 10 cents; (2) prescribe and publicly announce by July 1 of each fiscal year, in accordance with § 245.3(a), family-size income standards which shall be applicable to all families, including welfare and other families receiving public assistance. Any standards prescribed by FNSRO with respect to nonprofit private schools shall be developed by FNSRO after consultation with the State agency.

(a–1) When a revision of the family-size income standards of the State agency, or FNSRO where applicable, is necessitated because of a change in the Secretary's income poverty guidelines or because of other program changes, the State agency shall publicly announce its revised family-size income standards no later than 30 days after the Secretary has announced such change.

* * * * *

(c) Each State agency, or FNSRO where applicable, shall instruct School Food Authorities under their jurisdiction that they may not alter or amend the eligibility criteria set forth in an approved policy statement without advance approval of the State agency, or FNSRO where applicable.

(d) Not later than 10 days after the State agency, or FNSRO where applicable, announces its family-size income standards, it shall notify School Food Authorities in writing of any amendment to their free and reduced price policy statements necessary to bring the family-sized income criteria into conformance with the State agency's or FNSRO's family-size income standards.

* * * * *

(f) Each State agency, or FNSRO where applicable, shall, in the course of its supervisory assistance, review and evaluate the performance of School Food Authorities and of schools in fulfilling the requirements of this part, and shall advise School Food Authorities of any deficiencies found and any corrective action required to be taken.

NOTE: The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Effective date: December 1, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 959—ONIONS GROWN IN SOUTH TEXAS

Expenses and Rate of Assessment

This document authorizes the South Texas Onion Committee to spend not more than $87,783 for its operations during the fiscal period ending July 31, 1976, and to collect one and one-half cents ($0.015) per 50-pound container of onions, or equivalent quantity, handled by first handlers under the program.

The committee is the administrative agency established under Marketing Agreement No. 143 and Order No. 959, both as amended, regulating the handling of onions grown in South Texas. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq).

Notice was published in the November 17 FEDERAL REGISTER (40 FR 53261) regarding the proposals. It afforded interested persons an opportunity to submit written comments not later than November 28, 1975. None was received.

After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular period shall apply to all assessable onions from the beginning of such period.

The regulation follows:

§ 959.216 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending July 31, 1976, by the South Texas Onion Committee for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate, will amount to $87,783.

(b) The rate of assessment to be paid by each handler in accordance with the marketing agreement and this part shall be one and one-half cents ($0.015) per 50-pound container of onions, or equivalent quantity, handled by him as the first handler thereof during said fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period ending July 31, 1976, may be carried over as a reserve.

(d) Terms used in this section have the same meaning as when used in the said marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: December 2, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division Agricultural Marketing Service.

[FR Doc.75-32920 Filed 12-5-75;8:45 am]

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

PART 1464—TOBACCO

1975-Crop—Fire-Cured, Dark Air-Cured and Virginia Sun-Cured, Loan Rate Schedules

Correction

In the correction document, appearing on page 55309, in the issue of Friday, November 28, 1975, in the paragraph numbered "2." the word "second" should read "third".

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

SUBCHAPTER B—REGULATIONS AND STATEMENTS OF GENERAL POLICY

PART 327—ASSESSMENTS

Classification of Deposits

1. The Board of Directors of the Federal Deposit Insurance Corporation ("FDIC") amended §§ 329.1 and 329.7 of Part 329 of its regulations (12 CFR 329.1 and 329.7) so as to permit, in pertinent part, public units, as defined in Section 3(m) of the Federal Deposit Insurance Act (12 U.S.C. 1813(m)), to maintain savings deposits at insured nonmember commercial banks. These amended regulations were published in the FEDERAL REGISTER of December 5, 1974 (39 FR 42339–40 (1974)).

The Board of Directors of the FDIC has also recently amended §§ 329.1 and 329.7 of Part 329 of its regulations so as to permit corporations, partnerships, associations, or other organizations operated for profit to maintain savings deposits of not more than $150,000 at insured nonmember commercial banks. The amended regulations were published in the FEDERAL REGISTER of October 7, 1975 (40 FR 46301–02 (1975)). In pertinent part in both amended regulations, the definition of the term "savings deposits" in § 329.1(e) for purposes of Part 329 of the regulations was revised.

Section 327.2(b)(4) of the FDIC's rules and regulations (12 CFR 327.2(b)(4)) defines the term "savings deposits" for purposes of assessments in Part 327 of the regulations. This definition is substantially similar to the definition of "savings deposits" in Section 329.1(e) prior to the two aforementioned amendments. Accordingly, the Board of Directors is hereby adopting a revision to § 327.2(b)(4) so as to conform to and incorporate the substance of the amendments to § 329.1(e) of the FDIC's regulations.

2. Section 327.2 of 12 CFR Part 327 is amended by revising subparagraph (b)(4) to read as follows:

§ 327.2 Classification of deposits.

* * * * *

(b) The time and savings deposits for the purpose of such reports and for the computation of assessments as provided in subsection (b) of section 7 of the Act (12 U.S.C. 1817) shall consist of:

* * * * *

(4) Savings deposits as defined in § 329.1(e).

(Secs. 7–9, 64 Stat. 877–82, Secs. 7, 8, 74 Stat. 546–51; 12 U.S.C. 1817–19)

3. Since § 329.1(e) of the FDIC's rules and regulations already embodies the substance of this revision and since this revision is not restrictive in nature, the requirements of 5 U.S.C. 553(b) and 553(d) and 12 CFR 302.1, 302.2 and 302.5, with respect to notice, public participation, and deferred effective date were not followed in connection with the promulgation of this revision.

4. *Effective date.* This revision is effective immediately.

By order of the Board of Directors, December 1, 1975.

FEDERAL DEPOSIT INSURANCE CORPORATION,
[SEAL] ALAN R. MILLER,
Executive Secretary.

[FR Doc.75-32949 Filed 12-5-75;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 75F-0328]

PART 121—FOOD ADDITIVES

Components of Paper and Paperboard in Contact With Aqueous and Fatty Foods

The Commissioner of Food and Drugs is amending the food additive regulations in § 121.2526 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 121.2526) to provide for the use of a clarifier for water to be used in the manufacture of paper and paperboard, effective December 8, 1975.

Notice was given in the FEDERAL REGISTER of September 6, 1974 (39 FR 32342), that a petition (FAP 4B2996) had been filed by Betz Laboratories, Inc., Somerton Rd., Trevose, PA 19047, proposing that § 121.2526 be amended to provide for safe use of the sulfuric acid salt of the condensation polymer from *N,N*-dimethyl-1,3-propanediamine and 1-chloro-2,3-epoxypropane as a clarifier of water for the processing of paper and paperboard

V40236 DEC 8 75 XUM

intended to contact food. The Commissioner, having evaluated the data in the petition and other relevant material, concludes that the food additive regulations should be amended to provide for safe use of the subject additive under the preferred description and nomenclature as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2526(a)(5) is amended by adding alphabetically a new item to the list of substances as follows:

§ 121.2526 Components of paper and paperboard in contact with aqueous and fatty foods.

(a) • • •
(5) • • •

List of substances	*Limitations*
• • • •	• • • •
Polyamine-epichlorohydrin resin produced by the reaction of *N,N*-dimethyl-1, 3-propanediamine with epichlorohydrin and further reacted with sulfuric acid, Chemical Abstracts Service Registry Number [27029-41-0], such that the finished resin has a maximum nitrogen content of 14.4 percent (dry basis) and a minimum viscosity in 30 percent by weight aqueous solution (pH 4-6) of 50 centipoises at 25° C. as determined by Brookfield LVT model viscometer, using a No. 1 spindle at 12 r.p.m. (or equivalent method).	For use only as a clarifier in the treatment of influent water to be used in the manufacture of paper and paperboard, and used at at level not to exceed 20 parts per million of the influent water.
• • • •	• • • •

Any person who will be adversely affected by the foregoing order may at any time on or before January 7, 1976, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Six copies of all documents shall be filed and should be identified with the Hearing Clerk docket number found in brackets in the heading of this order. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective December 8, 1975.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: December 1, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1316—ADMINISTRATIVE FUNCTIONS, PRACTICES AND PROCEDURES

Submission of Hearing Requests

Drug Enforcement Administration regulations presently require that all requests for hearings to be conducted before the Drug Enforcement Administration and all notices of appearance in such hearings shall be addressed and filed as follows:

§ 1316.47 *Request for hearing.* • • •

(Date)

Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: Hearing Clerk, Office of Chief Counsel.

§ 1316.48 *Notice of appearance.* • • •

(Date)

Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: Hearing Clerk, Office of Chief Counsel.

• • • • •

The individual who performs the activities of receiving the above-referred documents is now designated as the DEA Federal Register Representative, and all such documents should be addressed to and filed with such person.

Therefore, under the authority vested in the Attorney General by Sections 301 and 501(b) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 821, 871(b), respectively), and delegated to the Administrator of the Drug Enforcement Administration by 28 CFR § 0.100, and further, having been duly designated as Acting Administrator by Order No. 607-75 of the Attorney General, dated May 30, 1975, in accordance with the authority stated therein, and pursuant to the authority delegated to the Acting Administrator by 28 CFR § 0.132(d), the Acting Administrator hereby orders that §§ 1316.47 and 1316.48 of Title 21 of the Code of Federal Regulations be amended as follows:

§ 1316.47 Request for hearing.

(Date)

Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative.

• • • • •

§ 1316.48 Notice of appearance.

(Date)

Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative.

• • • • •

This order is effective upon the date of its issuance.

Dated: November 26, 1975.

JERRY N. JENSON,
Deputy Administrator, Drug Enforcement Administration.

[FR Doc.75-32950 Filed 12-5-75;8:45 am]

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. R-75-363]

PART 1912—SALE OF INSURANCE AND ADJUSTMENT OF CLAIMS

The purpose of this revision is to provide a convenient list of servicing companies and to make certain other technical amendments to this part.

Because the revision is for the convenience of the public and involves administrative procedures only, it is unnecessary to provide for notice and public procedure. However, good cause does exist for making these revisions effective on January 8, 1976 (30 days after publication in the FEDERAL REGISTER).

Accordingly, Subchapter B of Chapter X, Title 24 is amended as follows:

1. Section 1912.2 is revised to read as follows:

§ 1912.2 National Flood Insurance Association.

• • • • •

(e) Communications concerning membership and cooperation with the Association, and its operations, should be directed to the National Flood Insurers Association, 1755 South Jefferson Davis Highway, Suite 1102, Arlington, Virginia 22202, (703-920-2070).

2. Section 1912.5 is added to read as follows:

§ 1912.5 Servicing Companies.

The following servicing entities have been designated to act as servicing companies for the Association in the areas indicated:

SERVICING COMPANIES

ALABAMA

The Hartford Insurance Group, The Hartford Building, 100 Edgewood Avenue, Atlanta, Georgia 30301, (404) 521-2059. (Also services Georgia).

ALASKA

Industrial Indemnity Company of Alaska, P.O. Box 307, Anchorage, Alaska 99510, (907) 279-9441.

ARIZONA

Aetna Technical Services, Inc., 3225 North Central Avenue, Phoenix, Arizona 85012, (602) 264-2621.

ARKANSAS

The Travelers Indemnity Company, 700 South University, P.O. Box 51, Little Rock, Arkansas 72203, (501) 664-5085.

CALIFORNIA (NORTHERN)

Fireman's Fund American Insurance Co., P.O. Box 3136, San Francisco, California 94119, (415) 421-1676.

CALIFORNIA (SOUTHERN)

Fireman's Fund American Insurance Co., P.O. Box 2323, Los Angeles, California 90051, (213) 381-3141.

COLORADO

CNA Insurance, 1660 Lincoln Street—Suite 1800, Denver, Colorado 80203, (303) 861-0561. (Also services New Mexico, Utah & Wyoming).

CONNECTICUT

Aetna Insurance Company, P.O. Box 1779, Hartford, Connecticut 06101, (203) 523-4861. (Also services Massachusetts/Western).

DELAWARE

General Accident F&L Assurance Corp., Ltd., 414 Walnut Street, Philadelphia, Pennsylvania 19106, (215) 238-5512. (Also services Pennsylvania).

DISTRICT OF COLUMBIA

Insurance Company of North America, 5225 Wisconsin Avenue, Washington, D.C. 20015, (202) 244-2000.

FLORIDA

The Travelers Indemnity Company, 1516 East Colonial Drive, Orlando, Florida 32803, (305) 896-2001.

GEORGIA

The Hartford Insurance Group, The Hartford Building, 100 Edgewood Avenue, Atlanta, Georgia 30301, (404) 521-2059. (Also services Alabama).

HAWAII

First Insurance Co. of Hawaii, Ltd., P.O. Box 2866, Honolulu, Hawaii 96803, (808) 548-5511.

IDAHO

Aid Insurance Company, Snake River Division, 1845 Federal Way, Boise, Idaho 83701, (208) 343-4931.

ILLINOIS

State Farm Fire & Casualty Company, 2309 East Oakland Avenue, Bloomington, Illinois 61709, (309) 557-7337.

INDIANA

American States Insurance Company, 500 North Meridian Street, Indianapolis, Indiana 46204, (317) 262-6696.

IOWA

Employers Mutual Casualty Company, P.O. Box 884, Des Moines, Iowa 50304, (515) 280-2511.

KANSAS

Royal-Globe Insurance Companies, 1125 Grand Avenue, Kansas City, Missouri 64141, (816) 842-6116. (Also services Nebraska & Missouri/Western).

KENTUCKY

CNA Insurance, 580 Walnut Street, Suite 1000, Cincinnati, Ohio 45202, (513) 579-9000. (Also services Ohio/Southern).

LOUISIANA

Aetna Technical Services, Inc., P.O. Box 61003, New Orleans, Louisiana 70160, (504) 821-1511.

MAINE

Commercial Union Assurance Company, c/o Campbell, Payson & Noyes, 27 Pearl Street, Box 527 Pearl Street Station, Portland, Maine 04116, (207) 774-1431.

MARYLAND

U.S. Fidelity & Guaranty Company, P.O. Box 1138, Baltimore, Maryland 21203, (301) 547-3000.

MASSACHUSETTS (EASTERN)

Commercial Union Assurance Company, 1 Beacon Street, Boston, Massachusetts 02108, (617) 725-6128. (Also services New Hampshire & Vermont).

MASSACHUSETTS (WESTERN)

Aetna Insurance Company, P.O. Box 1779, Hartford, Connecticut 06101, (203) 523-4861 Ext. 219. (Also services Connecticut).

MICHIGAN

Insurance Company of North American, Buhl Building—Room 300, Griswold and Congress Streets, Detroit, Michigan 48226, (313) 963-4114.

MINNESOTA (EASTERN)

The St. Paul Fire & Marine Ins. Co., 33 East Wentworth, St. Paul, Minnesota 55118, (612) 222-7751 Ext. 253.

MINNESOTA (WESTERN)

The St. Paul Fire & Marine Ins. Co., 7900 Xerxes Avenue, South, Minneapolis, Minnesota 55431, (612) 835-2600.

MISSISSIPPI

The Travelers Indemnity Company, 5360 Interstate 55 North, P.O. Box 2361, Jackson, Mississippi 39205 (601) 956-5600.

MISSOURI (WESTERN)

Royal-Globe Insurance Company, 1125 Grand Avenue, Kansas City, Missouri 64141, (816) 842-6116. (Also services Kansas & Nebraska).

MISSOURI (EASTERN)

MFA Insurance Company, 1817 West Broadway, Columbia, Missouri 65201, (314) 445-8441.

MONTANA

The Home Insurance Company, 8 Third Street, North, P.O. Box 1031, Great Falls, Montana 59401, (406) 761-8110.

NEBRASKA

Royal Globe Insurance Company, 1125 Grand Avenue, Kansas City, Missouri 64141 (816) 842-6116. (Also services Kansas & Missouri/Western).

NEVADA

The Hartford Insurance Group, P.O. Box 500, Reno, Nevada 89504, (702) 329-1061.

NEW HAMPSHIRE

Commercial Union Assurance Company, 1 Beacon Street, Boston, Massachusetts 02108. (617) 725-6128. (Also services Massachusetts (Eastern) & Vermont).

NEW JERSEY

Great American Insurance Company, 5 Dakota Drive, Lake Success, New York 11040, (201) 224-4200. (Also services New York).

NEW MEXICO

CNA Insurance, 1660 Lincoln Street—Suite 1800, Denver, Colorado 80203, (303) 861-0561. (Also services Colorado, Utah & Wyoming).

NEW YORK

Great American Insurance Company, 5 Dakota Drive, Lake Success, New York 11040. (516) 775-6900. (Also services New Jersey).

NORTH CAROLINA

Kemper Insurance, 1229 Greenwood Cliff, Charlotte, North Carolina 28204. (704) 372-7150.

NORTH DAKOTA

The St. Paul Fire & Marine Ins. Co., The Hamm Building—Room 254, 408 St. Peter Street, St. Paul, Minnesota 55102. (612) 227-9581. (Also services South Dakota).

OHIO (NORTHERN)

Commercial Union Insurance Company, 1300 East 9th Street, Cleveland, Ohio 44114, (216) 522-1060.

OHIO (SOUTHERN)

CNA Insurance, 1660 Lincoln Street—Suite 1600, Denver, Colorado 80203, (303) 861-0561. (Also services New Mexico, Colorado and Utah.)

3. § 1912.22 is revised to read as follows:

§ 1912.22 Judicial Review.

Upon the disallowance by the Association or its agent of any claim on grounds other than failure to file a proof of loss, or upon the refusal of the claimant to accept the amount allowed upon any such claim, after appraisal pursuant to policy provisions, the claimant within one year after the date of mailing of the notice of disallowance or partial disallowance of the claim may, pursuant to 42 U.S.C. 4053, institute an action on such claim against the Association, only in the U.S. District Court for the district in which the insured property or the major portion thereof shall have been situated without regard to the amount in controversy.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128), and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969; as amended by 39 FR 2787; January 24, 1974.)

Effective date: These amendments shall be effective as of Jan. 8, 1976.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[FR Doc.75-32926 Filed 12-5-75;8:45 am]

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

INCREASE IN FEES FOR INTERNATIONAL SPECIAL MAIL SERVICES

Miscellaneous Amendments

On page 43232 of the FEDERAL REGISTER of September 19, 1975, there was published a notice of intention to amend several sections in Subchapter B of Title 39, CFR, to increase the fees for the following special services on international

mail: registration, insurance, restricted delivery, special delivery, special handling, and certificates of mailing. Interested persons were invited to submit written comments relative to the proposed changes at any time on or before October 18, 1975.

No written comments relative to the proposed changes were received.

Accordingly, the Postal Service has determined to adopt the amendments as published.

In view of the above, the following amendments, to be effective January 3, 1976, are made to title 39, CFR.

(39 U.S.C. 401, 403, 404(2), 407, 410(a))

ROGER P. CRAIG,
Deputy General Counsel.

PART 42—REGISTRATION

1. Section 42.3 is revised to read as follows:

§ 42.3 Fees.

(a) Canada:

Limit of indemnity:	Fee
$0.01 to $100.00	$1.90
$100.01 to $200.00	2.10

(b) All other countries:

Limit of indemnity	Fee
$15.78	1.90

See § 72.2 for indemnity provisions.

§ 42.6 [Amended]

2. In paragraph (a) (3) of § 42.6 strike out "50 cents" and insert "60 cents" in lieu thereof.

PART 43—INSURANCE

3. New § 43.3 is added to read as follows:

§ 43.3 Fees.

(a) Canada:

Limit of Indemnity:	Fee
Not over $15.00	$0.35
$15.01 to $50.00	0.80
$15.01 to $50.00	.55
$50.01 to $100.00	.75
$100.01 to $150.00	.95
$150.01 to $200.00	1.15

(b) All other countries:

Limit of indemnity:	Fee
Not over $15.00	$0.60
$50.01 to $100.00	1.00
$100.01 to $150.00	1.20
$150.01 to $200.00	1.40
$200.01 to $300.00	1.60
Limit of Indemnity:	Fee
$300.01 to $400.00	1.80
$400.01 to $500.00	2.00
$500.01 to $600.00	2.20
$600.01 to $700.00	2.40
$700.01 to $800.00	2.60
$800.01 to $900.00	2.80
$900.01 to $1,000.00	3.00
$1,000.01 to $1,100.00	3.20
$1,100.01 to $1,200.00	3.40

PART 44—SPECIAL DELIVERY (EXPRES)

4. Section 44.3(a) is revised to read as follows:

§ 44.3 Payment.

(a) Fees:

Class of mail	Weight: Not more than 2 lbs	Weight: More than 2 lbs but not more than 10 lbs	Weight: More than 10 lbs
Letters, letter packages, post cards, and airmail other articles	$1.20	$1.45	$1.70
Surface other articles	1.70	1.80	2.10

PART 45—SPECIAL HANDLING

5. Section 45.2 is revised to read as follows:

§ 45.2 Fees.

Weight:	Fee
Not more than 2 lbs	$0.50
More than 2 lbs. but not more than 10 lbs	.70
More than 10 lbs	1.00

Special handling fees are in addition to the regular postage rate to the country concerned.

PART 47—CERTIFICATES OF MAILING

6. Section 47.2 is revised to read as follows:

§ 47.2 Fees.

(a) Individually listed pieces:

Original certificate for ordinary postal union or parcel post—10 cents for each piece described.

Each additional copy of original certificate of mailing or copy of original mailing receipt for registered or insured mail—10 cents for each piece described.

(b) Identical pieces:

Identical pieces of postal union mail paid with ordinary stamps, precanceled stamps, or meter stamps:

Up to 1,000 pieces (1 certificate for total number)	$0.50
For each additional 1,000 pieces or fraction	.10
Duplicate copy	.10

[FR Doc.75-32947 Filed 12-4-75;8:45 am]

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Increase in Fees for Domestic Special Services, Domestic and International Money Orders, and Other Nonpostal Services

On September 19, 1975, the Postal Service published in the FEDERAL REGISTER (40 FR 43233) a notice of proposed rulemaking on this subject, setting forth an increase in the fees for domestic special services, domestic and international money orders, and for other special or nonpostal services. Interested persons were invited to submit written views and arguments on the proposed fee increases at any time on or before October 18, 1975. More than 300 comments were received from various persons and organizations. These comments were carefully considered by the Postal Service in formulating the action herein.[1]

Many commenters objected to the size of the increase in fee for the address correction service. The Postal Service has, however, held the size of the fee increase (10 cents to 25 cents) to a minimum, considering the cost of rendering the service. Our cost estimate of 25 cents per piece is very conservative. The fee has been held to this amount because of our desires to lighten the impact on postal customers and to preserve significant incentives for mailers to update address lists. This fee increase responds to the sharp increases in Postal Service costs. The uniform ten-cent fee for address correction service was set in 1968 (in 1962 for second-class mailings). Since 1968, postal costs and, consequently, postal rates have increased substantially. On the basis of the facts and information available to us, including the comments submitted in response to our notice, we find the increased fee to be reasonable and, indeed, very conservative. We are attaching as an Appendix hereto a more complete discussion of all the planned fee increases, with historical and other background information and certain cost figures.

Some commenters suggested that the fee for correcting mailing lists and the address correction fee should be lower for nonprofit organizations. The suggestion implies subsidization by other users and is, therefore, not acceptable.

A number of commenters objected to the fee increases in general and, specifically, to the increases in registry, c.o.d., special delivery, certified services, in the fee for opening mail at dead-letter offices, and in the fee for correcting mailing lists. The Postal Service position is that these fees must be increased to cover the costs of service and to avoid cross-subsidization by other services.

One commenter—whose detailed comments cover points raised in a great many less comprehensive comments—proposed that the Postal Service delay implementation of the new proposed fee for address correction, listing the need for additional time for the Postal Service to:

1. Justify cost rationalization;
2. Conduct operational studies;
3. Conduct educational advertising campaigns;
4. Evaluate the public service nature; and
5. Assess negative impact on U.S. Postal Service.

The Postal Service evaluated each of the points raised prior to publication of the September 19, 1975, FEDERAL REGISTER

[1] Several commenters mistakenly objected to the increase for third-class bulk-mail rates. However, increase in bulk-third-class rates were not proposed in the notice. Increases in these rates are proposed in our rate filing with the Postal Rate Commission (Docket R76-1).

would take an extended period of time, during which the losses of the Postal Notice. Further study of these points Service would continue to mount. The new fee schedule is based on the costs of the service. The amount of postal employee time required to process a change-of-address notice at the current labor rate clearly justifies the proposed fee.

Operational studies have been and are being Conducted. For example, the central mail mark-up system has been developed to improve our service and reduce our costs. Without central mark-up, our fees would have had to be even higher than the proposed fee. All savings that accrue through improved operations are reflected in the fee schedule.

Furthermore, the Postal Service will continue to conduct public awareness advertising, as it has in the past. This has been done through advertising, periodic press releases, and the distribution of 200 million change-of-address forms annually and 11 million change-of-address kits this year. But neither greater public-educational efforts to stress the importance of currently correct addresses, nor the public service nature of postal business, nor the negative impact of increasing this fee and possibly thereby inhibiting mailers from utilizing the service to keep their mailing lists updated, nor the possible future effects of further operational studies, can justify protracted postponement of fees that will yield sufficient revenues to cover the costs that are involved.

One respondent suggested that a free-forwarding period of 90 days or at least 60 days be included in the 25¢ address correction service for non-local second-class mail. The cost of this proposal would be prohibitive for the Postal Service, particularly if the frequency of publication is weekly or daily.

Several respondents objected to the number of duplicate Forms 3579 they receive. The Postal Service makes every effort to avoid these duplications. The major cause for these duplications is the excessive length of time during which publications continue to be mailed with the old address. If mailers would minimize the number of bad addresses in their lists, and the time taken to correct lists, their charges for address correction service would also be minimized.

Another comment suggests providing an option so bulk mailers could address mail to a named person or resident. The Postal Service has this matter under advisement, and decision may be expected soon with regard to all tabloids, catalogs, and similar advertising material in third and fourth class.

In response to a number of comments, the Postal Service is considering whether address correction service should be made optional for second-class mailers. A flat charge for filing a change of address order, similar to the charge instituted in France, was also suggested. This alternative was studied two years ago and rejected because it would favor those who receive mail, particularly solicitations, far in excess of the average, and discriminate against those who generally receive little mail.

One commenter proposed that we make the insurance feature of registry service optional. The ramifications of this proposal were not discussed. The Postal Service has been considering whether some restructuring of this service would be in the public interest, but has not yet reached a conclusion.

Some commenters indicated that the fee increases generally should come under the jurisdiction of the Postal Rate Commission. The Postal Service does not agree that these special service fees fall under the jurisdiction of the Postal Rate Commission; in our opinion they may be established by the Postal Service.

Several commenters suggested that the increases should be delayed until a later date citing various hardships and needs for advance financial planning. The Postal Service has responded to these comments and plans to delay implementation of these fee increases. Accordingly, all announced fee changes will become effective January 3, 1976.

Having given due consideration to all comments received, the Postal Service has determined to adopt the proposed increases in fees as published, with the effective date described above. Accordingly, the Postal Service hereby adopts the following amendments to the Postal Service Manual.

(39 U.S.C. 401, 404)

LOUIS A. COX,
General Counsel.

PART 122—ADDRESSES

1. In § 122.514a the second sentence is revised to read as follows: "For lists of more than 10 names or addresses, the charge is 10 cents per name or street address, including individual apartments."

PART 134—THIRD CLASS

2. In 134.421 strike out "$15" and insert "$20" in lieu thereof.

PART 145—PERMIT IMPRINTS

3. In 145.11 strike out "$15" and insert "$20" in lieu thereof.

PART 159—UNDELIVERABLE MAIL

4. (a) In 159.211, 159.212b, 159.212d, 159.221b, 159.222 and 159.223 strike out "10¢" and insert "25¢" in lieu thereof.

(b) In 159.23 strike out "ten-cent" and insert "twenty-five cent" in lieu thereof.

(c) In 159.243 a-d, 159.255, and 159.-73b strike out "10 cents" and insert "25 cents" in lieu thereof.

(d) In 159.243 a-c and 159.251 strike out "2 ounces" and insert "4 ounces" in lieu thereof.

PART 161—REGISTERED MAIL

5. Section 161.21 is revised to read as follows:

V40236 DEC 8 75 XUM

.21 Fees.

Value	Fees (in addition to postage) For articles not covered by commercial or other insurance	For articles also covered by commercial or other insurance
$0.00 to $100	$1.90	$1.90
$100.01 to $200	2.10	2.10
$200.01 to $400	2.40	2.40
$400.01 to $600	2.70	2.70
$600.01 to $800	3.00	3.00
$800.01 to $1,000	3.30	3.30
$1,000.01 to $2,000	3.60	$3.30 plus handling charge of 25 cents per $1,000 or fraction over first $1,000.
$2,000.01 to $3,000	3.90	
$3,000.01 to $4,000	4.20	
$4,000.01 to $5,000	4.50	
$5,000.01 to $6,000	4.80	
$6,000.01 to $7,000	5.10	
$7,000.01 to $8,000	5.40	
$8,000.01 to $9,000	5.70	
$9,000.01 to $10,000	6.00	
$10,000 to $1,000,000	$6.00 plus handling charge of 25¢ per $1,000 or fraction over first $10,000.	
$1,000,000.01 to $15,000,000	$253.30 plus handling charge of 20¢ per $1,000 or fraction over first $1,000,000.	$253.05 plus handling charge of 20¢ per $1,000 or fraction over first $1,000,000.
Over $15,000,000	Additional charges may be made based on considerations of weight, space, and value.	

ADDITIONAL SERVICES	Extra fee (cents)
COD collection charge (maximum amount collectible is $300)	85
Restricted delivery	80
Return receipts:	
Requested at time of mailing:	
Showing to whom and when delivered	26
Showing to whom, when, and address where delivered	45
Requested after mailing:	
Showing to whom and when delivered	45

6. Section 162.21 is revised to read as follows:

PART 162—INSURED MAIL

.21 Fees (in addition to postage).

Liability:	Fee
$0.01 to $15.00	$0.35
$15.01 to $50.00	.55
$50.01 to $100.00	.75
$100.01 to $150.00	.95
$150.01 to $200.00	1.15

Liability for insured mail is limited to $200.

PART 163—COD MAIL

7. Section 163.21 is revised to read as follows:

.21 In addition to postage.

Amount to be collected or insurance coverage desired:	COD Fees
$0.01 to $10.00	$0.85
$10.01 to $25.00	1.05
$25.01 to $50.00	1.25
$50.01 to $100.00	1.45
$100.01 to $200.00	1.65
$200.01 to $300.00	1.85
Restricted delivery	.60
Notice of nondelivery	.25
Alteration of COD charges or designation of new addressee	.50

PART 165—CERTIFICATES OF MAILING, RETURN RECEIPTS, AND RESTRICTED DELIVERY

8. Section 165.12 is revised to read as follows:

.12 Fees.

.121 *Individual pieces*

Original certificate of mailing for individually listed pieces of all classes of ordinary mail—10¢ for each piece of mail described.

Each additional copy of original certificate of mailing or original mailing receipt for registered, insured, certified, and COD mail—10¢ for each piece of mail described.

.122 *Bulk Pieces*

Identical pieces of first- and third-class mail paid with ordinary stamps, precanceled stamps, or meter stamps are subject to the following fees:

Up to 1,000 pieces (1 certificate for total number)	$0.50
For each additional 1,000 pieces, or fraction	.10
Duplicate copy	.10

9. Section 165.22 is revised to read as follows:

.22 Fees (in addition to postage and other fees).

Requested at time of mailing:	
Showing to whom (signature) and date delivered	$0.25
Showing to whom (signature) and date and address where delivered	.45
Requested after mailing: Showing to whom and date delivered	.45

10. In 165.242c strike out "25¢" and insert "45¢" in lieu thereof.

11. In 165.32 strike out "$0.50" and insert "$0.60" in lieu thereof.

PART 166—SPECIAL DELIVERY

12. Section 166.21 is revised to read as follows:

.21 Special delivery fees.

Class of mail	Weight: Not more than 2 lbs	Weight: More than 2 lbs but not more than 10 lbs	Weight: More than 10 lbs
First-class, airmail, and priority mail	$1.20	$1.45	$1.70
All other classes	1.70	1.80	2.10

PART 167—SPECIAL HANDLING

13. Section 167.2 is revised to read as follows:

§ 167.2 Fees.

Weight:	Fee
Not more than 2 lbs	$0.50
More than 2 lbs. but not more than 10 lbs	.70
More than 10 lbs	1.00

The special handling fee is in addition to regular third- or fourth-class postage and may be prepaid by ordinary postage stamps or by meter stamps.

PART 168—CERTIFIED MAIL

14. Section 168.3 is revised to read as follows:

168.3 Fees.

	Cents
.31 Fee in addition to postage	.50
.32 Restricted Delivery	.60
.33 Return Receipts:	
Requested at time of mailing:	
Showing to whom and date delivered	.25
Showing to whom, date, and address where delivered	.45
Requested after mailing: Showing to whom and date delivered	.45

PART 171—MONEY ORDERS

15. Section 171.122b is revised to read as follows:

.122 Money order fees.

a. • • •

b. Fees for domestic money orders issued at other post offices including those with branches or stations on military installations are as follows:

Amount of money order:	Amount of fee: Domestic
$0.01 to $10.00	$0.45
$10.01 to $50.00	.60
$50.01 to $300.00	.80

16. In 171.211, under the heading labeled "Fee", (a) Strike out "$0.45" and insert "$0.65" in lieu thereof; (b) Strike out ".65" and insert ".90" in lieu thereof: and (c) Strike out ".75" and insert "1.15" in lieu thereof.

A Post Office Services (Domestic) transmittal letter making this change in the pages of the Postal Service Manual is in the process of being published and will be transmitted to subscribers automatically as soon as possible. Notice of the issuance of this transmittal letter will be published in the usual manner in the FEDERAL REGISTER through an appropriate amendment to 39 CFR 111.3.

APPENDIX

REGISTRY

The most recent fee increases for this service occurred in May 1971. The present increases will average approximately 73% over current fees. This increase is necessary because current fees produce revenues that cover only 57% of attributable costs. On an FY 1976 basis attributable costs are estimated at $123 million, and revenues at $123.7 million (at planned fees).

CERTIFIED

The most recent fee increase for this service occurred in March 1966. The present fee increases will average approximately 67% over current fees. Given the fairly steep fee increase, the increased fee is a reasonably close equivalent, for the time being, of the costs of the service. On an FY 1976 basis, attributable costs are estimated at $42.9 million and revenues at $42.3 million (at planned fees).

INSURANCE

The most recent fee increase for this service occurred in March 1966. The present fee increases will average approximately 83% over current fees. On an FY 1976 basis, revenues are estimated to be $46.3 million, and attributable costs are $45.8 million (at planned fees).

COLLECT ON DELIVERY

Fees for this service were last increased in July 1969. The present fee increases average approximately 34%. At present fee levels, revenues are only 94% of the attributable costs of the service. Given the fact that increases for this service are not as great as those for others, it is appropriate that this service make a contribution to the overhead costs of the Postal Service at this time. On an FY 1976 basis, revenues are estimated at $15.7 million, and attributable costs are $12.5 million (at planned fees).

SPECIAL DELIVERY

Fees for this service were increased most recently in May 1971. The present fee increases average 100%. At current fees the revenues from this service would be $43.3 million, approximately 50% of attributable costs. At the increased fees, revenues are estimated at $86.3 million, and costs at $86.0 million, on an FY 1976 basis.

MONEY ORDERS

The most recent increase in fees for domestic money orders was in March 1966. At present fees, revenues are only 60% of the costs attributable to the service. At the increased fees, revenues are estimated at $78.6 million, on an FY 1976 basis, and attributable costs are $76.5 million.

OTHER FEES

Largely because the following services are purchased relatively infrequently, costs and fees must be determined in part on consideration of the operational elements involved in rendering the service and the time required to perform those operations. Routine cost collection data systems generally report data for higher volume services. To illustrate the relationship between the increased fee and the cost incurred in performing the service, we here briefly summarize the major operations required in performing each service, and indicate the time taken to perform those operations, at current labor rates, for which the increased fees will compensate.

Certificates of mailing: To provide this service Postal clerks verify the name and address of the mailer and addressee and that the fee has been paid for individual certificates of mailing. For certificates for bulk mailings, the name and address of the mailer, the fee, and the total number of pieces in the mailing are verified. Certificates of mailing are hand stamped. Appropriate steps are taken to provide duplicate copies, if requested, via carbon or reproduction. In most cases, the certificate of mailing forms are provided by the Postal Service. The fees for this service will compensate the Postal Service for seven-tenths of a minute of labor. The minimum fee for certificates of mailing issued for bulk mailings will recover the costs of approximately three and one-half minutes of labor. Fees were last increased in July, 1967.

Return receipts: To provide this service mailers will normally complete the mailer's entries on the forms, but in some cases the postal clerk must complete the form. On acceptance the form must be verified and payment must be noted.

Delivery employees obtain the signature of the addressee or his agent and the date of delivery on the form. The address of delivery is filled in if requested. The delivery employee examines the card for completeness and makes any corrections necessary. The return receipts are given to the clearing clerk daily when the carrier returns to the post office. The clearing clerk checks to make sure the return receipts are properly signed and dated and then postmarks them. The form is then returned to the sender. The fees will recover the cost of approximately 1.8 minutes of labor (3.2 minutes if the address where delivered also is requested). The fees were last increased in July, 1969.

Restricted delivery: To provide this service the postal clerk at the office of mailing must verify the endorsement requesting this service and payment of the fee. At the office of delivery the carrier must verify the identification of the addressee and deliver the article only to the addressee or to an agent that the addressee has authorized in writing to receive his mail. This restriction frequently requires additional attempts at delivery. The fee will recover the cost of approximately 4.3 minutes of labor. Fees were last increased in July 1957.

Correction of mailing lists: To provide this service the postal clerk, after recording the name and address of the list owner, as well as other identification information about the mailing list itself, must separate and distribute the addresses by carrier routes and box section, where the following operations are performed:

a. For name—and—address lists. Correct entries are marked. Names to whom mail cannot be delivered or forwarded are crossed off; incorrect house, rural route or box numbers are corrected; wrong initials are corrected; the name of the head of the family, if known, is indicated where more than one name is shown for an address. A new address is furnished for persons who have moved permanently and have filed a change of address order at the post office.

b. For occupant lists. Correct addresses are marked; incorrect and nonexistent addresses are crossed off; business addresses are separately identified; rural route addresses are separatedly identified; and the number of units in apartment house addresses is indicated.

The increased fees will recover the cost of seven-tenths of a minute of labor time per address. Fees were last increased in July 1957.

Dead letter return fee: First-class letters which are undeliverable and which cannot be returned to the sender are held at the last office of address for a prescribed retention period and then sent to a dead letter branch. The dead letter return fee compensates for the cost of examining the contents of the piece in search of an address to which the mail may be forwarded or returned and, for preparing an envelope with that address for subsequent delivery. The envelope is addressed and marked for collection of the dead letter return fee and dispatched. At the destination, the letter is delivered in accordance with postage due procedures. The increased fee will recover the cost of less than two minutes of labor. Fees were last increased in July 1958.

Special handling: This service involves such additional operations as are necessary for packages which must be given extra attention or care in handling, transportation, and dispatch. The increased fees for lightweight pieces will recover the cost of approximately 3.5 minutes of labor, and for the heaviest pieces, approximately seven minutes of labor. Fees were last increased in July 1957.

Address correction service: To provide this requested service, the postal clerks must fill out a form with: old address, new address and key or code numbers that identify the addressee in the files of the mailer. The form is then mailed and delivered to the requestor. Alternative procedures may involve transcribing the correct address on mail pieces under a certain weight range, when these pieces are not entitled to forwarding. The entire piece is then returned to the sender. If the unforwardable piece exceeds the weight limit, the improper address is cut out and sent along with a postal form containing the correct address. The increased fee will recover the costs of less than two minutes of labor time. Fees were last increased in January 1968 (in January 1962 for correcting addresses on second-class mail).

Permit imprint fees: This fee is a one-time charge for a permit to deposit matter in the mail without affixing stamps or meter impressions. The permit is valid for an indefinite period so long as the holder makes periodic use of the permit. Administration of the permit imprint system involves the creation of a number of records when the permit is first issued for the maintenance of proper accounting and auditing procedures.

All permit imprint records are periodically examined to insure compliance with the active status requirements. If a permit holder is found in non-compliance, he is notified of the fact and his permit held in an inactive file for 10 days. At the end of that period, if no reply was received, the records of the permit are transferred for storage in dead files and the permit holder is notified that his permit is considered abandoned and therefore canceled.

The increased fee will compensate for approximately 2.5 hours of labor expended over the indefinite life of the permit. Fees were last increased in January, 1963.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 466-8; OPP-800007A]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Exemptions From Requirement of a Tolerance for Certain Inert Ingredients in Pesticide Formulations

On October 20, 1975, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (40 FR 48940) a notice of proposed rulemaking to amend 40 CFR 180.1001 by exempting

V40236 DEC 8 75 XUM

certain pesticide chemicals which are additional inert (or occasionally active) ingredients in pesticide formulations from tolerance requirements under provisions of Section 408(e) of the Federal Food, Drug, and Cosmetic Act. No comments or requests for referral to an advisory committee were received by the Agency with regard to this notice, and it has been concluded, therefore, that the amendment to the regulations be adopted as proposed.

Any person adversely affected by this regulation may, on or before January 7, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, Room 1019, East Tower, 401 M St. SW, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on December 8, 1975, Part 180, Subpart D, § 180.1001, is amended as set forth below.

(Section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)))

Dated: December 2, 1975.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart D, § 180.1001 is amended by alphabetically inserting new items in paragraphs (d) and (e) as follows.

§ 180.1001 Exemptions from the requirement of a tolerance.

• • • • • •

(d) • • •

Inert ingredients	Limits	Uses
• • •	•	• • •
α-Alkyl (C_{12}–C_{18})ω-hydroxypoly(oxyethylene/oxypropylene) heteric polymer in which the oxyethylene content is 8–12 moles and the oxypropylene content is 2–7 moles.		Surfactants, related adjuvants of surfactants.
• • •	•	• • •
α-Alkyl (C_{12}–C_{18})-ω-hydroxypoly(oxyethylene/oxypropylene) heteric polymer in which the oxyethylene content averages 13–17 moles and the oxypropylene content averages 2–6 moles.		Surfactants, related adjuvants of surfactants.
• • •	•	• • •
D & C Green No. 6		Dye.
• • •	•	• • •
Manganese carbonate		Plant nutrient.
• • •	•	• • •
Partial sodium salt of *N*-lauryl-β-iminodipropionic acid	Not more than 1 percent of pesticide formulation.	Surfactants, related adjuvants of surfactants.
• • •	•	• • •
Zinc stearate, conforming to 21 CFR, section 121.101(d)(5)		Flow control agent.

(e) • • •

• • •	•	• • •
Epoxidized soybean oil		Stabilizer.
• • •	•	• • •
Magnesium silicate, hydrated magnesium silicate		Solid diluent, carrier.
• • •	•	• • •
Sodium butylnaphthalene sulfonate	Not more than 0.5 pct of pesticide formulation.	Surfactants, related adjuvants surfactants.
• • •	•	• • •
Sodium mono- and dimethyl naphthalene sulfonate, molecular weight 245–260.		Surfactants, related adjuvants surfactants.
• • •	•	• • •
Xanthan gum		Thickener.
• • •	•	• • •

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 406-5]

PART 407—CANNED AND PRESERVED FRUITS AND VEGETABLES PROCESSING INDUSTRY POINT SOURCE CATEGORY

Extension of Comment Period

This notice extends the period for comments to the notice, published October 21, 1975, promulgating interim final regulations consisting of effluent guidelines, limitations and standards for the Fruits, Vegetables, and Specialties Subcategories of the Canned and Preserved Fruits and Vegetables Processing Industry Point Source Category (40 FR 49222).

Requests for an extension of time were submitted by persons having an interest in commenting. They point out that the document entitled "Economic Analysis of Interim Final Effluent Guidelines-Fruits and Vegetables Processing Industry" was not available for distribution on the date of the original notice, and that additional time is needed to review the document in sufficient detail to provide meaningful comments.

In view of the request, the Environmental Protection Agency has determined it is in the public interest that the period for comments on the interim final regulations be extended for an addtional thirty days. Accordingly, all comments received on or before December 19, 1975, will be considered.

Dated: December 1, 1975.

ANDREW W. BREIDENBACH,
Acting Assistant Administrator for Water and Hazardous Materials.

[FR Doc.75-32969 Filed 12-5-75;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Amendment E-175]

PART 101-26—PROCUREMENT SOURCES AND PROGRAMS

Travel Trailers

This regulation deletes the obligation that agencies submit their requirements for "camping, office, and house-type" trailers to GSA for procurement.

1. Section 101-26.501-1 is amended to read as follows:

§ 101-26.501-1 General.

Except as provided for the Department of Defense (DOD) in paragraph (a) of this section, executive agencies shall submit to GSA for procurement their requirements for purchase in the United States of all new passenger motor vehicles (FSC 2310), trucks/truck tractors (FSC 2320), and trailers (FSC 2330) van type (with payload of not less than 5,000 nor more than 50,000 pounds. Specifically included are sedans, station wagons, carryalls, ambulances, buses, and trucks, including trucks with specialized mounted equipment, truck chassis with special purpose bodies, and all van type trailers (with payload of not less than 5,000 nor more than 50,000 pounds.)

• • • • • •

(b) When it is determined that specialized requirements for passenger motor vehicles and trucks indicate the need for procurement from sources other than GSA, a request for waiver justifying the procurement shall be submitted in writing to the General Services Administration (FYP), Washington, DC 20406. GSA will notify agencies in writing whether or not a waiver has been granted. Justification for special purpose trucks may be based on a description of the vehicle having unique characteristics such as a special purpose body or equipment that may require close supervision by agency personnel to ensure proper installation of the equipment by the contractor; e.g., when a medical van is to be equipped with Government or contractor-supplied equipment. Requests for procurement through sources other than GSA will be handled on an individual basis considering the urgency of the need of the requirement and provided full justification is submitted therefor.

2. Section 101-26.501-3 is amended to read as follows:

§ 101-26.501-3 Submission of requirements.

Requirements shall be submitted to the General Services Administration (FYP), Washington, DC 20406, and shall contain consignment and shipping instructions, including the names and addresses of persons to receive purchase documents if they are different from the consignees.

• • • • • •

3. Section 101-26.501-8(b) is revised to read as follows:

§ 101-26.501-8 Notification of vehicle defects.

• • • • • •

(b) When motor vehicles are manufactured by a concern other than one for whom an address is shown in § 101-26.501-8(a) and the address of the manufacturer is not known, agencies shall inform GSA of the vehicle location address. (This includes those vehicles manufactured by the General Motors Corporation other than the Chevrolet Motor Division and the GMC Truck and Coach Division.) In these cases, agencies shall forward the vehicle location address to the General Services Administration (FYP), Washington, DC 20406. GSA will forward the vehicle location address to the manufacturer or advise the agency concerned.

• • • • • •

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective on December 8, 1975.

Dated: November 26, 1975.

JACK ECKERD,
Administrator of General Services.

[FR Doc.75-32892 Filed 12-5-75;8:45 am]

Title 45—Public Welfare

CHAPTER XII—ACTION

PART 1222—PARTICIPATION OF PROJECT BENEFICIARIES

Volunteer Programs

On April 14, 1975, there was published in the FEDERAL REGISTER (45 CFR Part 1222), a notice of proposed rule to amend Chapter XII of Title 45, Code of Federal Regulations to add a new Part 1222 which would provide regulations requiring the establishment for each project involving full-time volunteer programs under Title I of the Domestic Volunteer Service Act of 1973 (87 Stat. 408) (the Act) of a continuing mechanism to assure the meaningful participation of program beneficiaries as mandated by Section 106, Title I of the Act.

Current ACTION programs under Title I of the Act and affected by this rule include Volunteers In Service To America (VISTA) (Part A), University Year for ACTION (UYA) (Part B), ACTION Cooperative Volunteers (ACV) and Program for Local Service (PLS) (Part C).

As a result of comments received and duly considered, the following clarifying changes are made:

1. Section 1222.3 is amended to read: "Each potential project sponsor shall establish an advisory group for the project, to include substantial membership of potential project beneficiaries, or to the extent feasible, their democratically chosen representatives, prior to the submission on an application to ACTION for Volunteers.

"The term 'substantial' means, in this case a sufficient number of appropriate persons to assure that the concerns and points of view of the potential project beneficiaries are adequately presented to and considered in the deliberations of the group. The phrase 'project beneficiaries' means in this case, recipients of benefits accruing directly from project activities as conducted by ACTION Volunteers.

"Potential sponsoring organizations that have an established governing, policy, or advisory group whose membership is composed of at least 50% of members of the beneficiary population are not required to establish a separate project advisory group for the purposes of this Order."

The aforegoing change responds to comments suggesting that new advisory groups not be required where such organizations or functions are pre-existent, and that the meanings of "substantial" and "project beneficiaries" be clarified.

2. Section 1222.4-2 regarding advisory group responsibilities is amended to read: "To review and provide written comments concerning any project application prior to the submission of the application to ACTION. A copy of such comments shall accompany each application to ACTION."

The aforegoing change responds to numerous requests to delete the project proposal approval authority of the advisory groups. While consenting to such requests, ACTION, at the same time, will carefully weigh withholding of approval by advisory councils of project proposals submitted by sponsoring organizations to ACTION in its deliberations concerning the disposition of such project applications.

3. Section 1222.4-3 regarding responsibilities of advisory group is amended to read: "To meet with the sponsoring organization's staff at periodic intervals, but no less than twice per project year, for the purpose of reviewing and commenting on the development and implementation of the project. Such project review and commentary should be directed toward the adequacy of the project to meet the identified need of the project beneficiaries."

The aforegoing change responds to requests to decrease the number of required advisory group meetings during the course of a project's term, a need felt especially by sponsors serving widely separated rural communities and penal institutions.

4. Section 1222.4-4 regarding advisory group responsibilities is amended to read: "To submit, if it so chooses, written reports and/or copies of minutes of its meetings to the Sponsor to accompany the Sponsor's Quarterly Program Reports (A-568) submitted to the appropriate ACTION regional office."

The aforegoing change is in response to requests that the frequency of reporting of advisory group commentary be decreased and left optional to the wishes of the advisory group but not subject to the option of the sponsoring organization's staff.

In addition to comments resulting in the foregoing changes, a number of suggestions were made but are not adopted. The following comments relate to revelant sections, subjects covered, and reasons why suggestions are not incorporated in the final regulations:

1. Several recommendations were made to exempt certain Title I programs from the participation of program beneficiaries requirements. Such exclusion would violate both the spirit and letter of Section 106, Title I of the Act.

2. A recommendation would have amended § 1222.3 to read "Each sponsor of a project involving 20 or more Volunteers shall establish an advisory group . . ." on grounds that to require a sponsor to assemble an advisory group for projects involving a lesser number of Volunteers is neither practical nor realistic. The philosophy of the legislation is that beneficiaries of all Title I programs participate in the planning, development, and implementation of projects affecting them. This participation is not related to the size or scope of project activities or the number of volunteers conducting such activities. ACTION sees no correlation between the number of volunteers serving on a project and the practicality of utilizing an advisory group.

3. Recommendations were made that membership of advisory groups include a minimum of 51% of project beneficiaries and that requirements be made which would specify precise acceptable conditions and procedures for membership in the group. Due to the variety of program types, characteristics and conditions of beneficiaries, geographical distribution, established organizational procedures of sponsors, and other affecting conditions, it is inappropriate to specify precise terms and conditions required to provide for "meaningful participation of program beneficiaries," since all project sponsors could not meet the degrees of specificity imposed by such requirements.

Accordingly, with these changes and additions, the proposed regulation is adopted as set forth below:

Sec.
1222.1 Purpose.
1222.2 Applicability.
1222.3 Policy.
1222.4 Advisory group's responsibilities.
1222.5 Advisory group expenses.
1222.6 Sponsor's responsibilities.

AUTHORITY: Secs. 106 and 420 of Pub. L. 93-113, 87 Stat. 398 and 414.

§ 1222.1 Purpose.

The purpose of these regulations is to prescribe requirements for the establishment of a continuing mechanism for the meaningful participation of project beneficiaries in the planning, development, and implementation of project activities utilizing full-time volunteers authorized

V40236 DEC 8 75 XUM

under Title I of the Domestic Volunteer Service Act of 1973, PL 93-113. This policy specifically implements Section 106, Title I, PL 93-113.

§ 1222.2 Applicability.

These regulations apply to all full-time volunteer programs and projects under Title I, PL 93-113, including grant programs. Included in these programs are VISTA (Part A), University Year for ACTION (UYA) (Part B), ACTION Cooperative Volunteers (ACV) and Program for Local Services (PLS) (Part C).

§ 1222.3 Policy.

(a) Each potential project sponsor shall establish an advisory group for the project, to include substantial membership of potential project beneficiaries or, to the extent feasible, their democratically chosen representatives, prior to the submission of an application to ACTION for volunteers.

(b) The term "substantial" means, in this case, a sufficient number of appropriate persons to assure that the concerns and points of view of the potential project beneficiaries are adequately presented and considered in the deliberations of the group. The phrase "project beneficiaries" means, in this case, recipients of benefits accruing directly from project activities as conducted by ACTION Volunteers.

(c) Potential sponsoring organizations that have an established governing, policy, or advisory group whose membership is composed of at least 50% of members of the beneficiary population are not required to establish a separate project advisory group for the purposes of these regulations.

§ 1222.4 Advisory group's responsibilities.

The advisory group shall have the following responsibilities for the intent and purposes of these requirements:

(a) To the extent practical, assist the sponsor in the initial planning of a new project proposal and in the planning of a continuation project application.

(b) To review and provide written comments concerning any project application prior to the submission of the application to ACTION. A copy of such comments shall accompany each application to ACTION.

(c) To meet with the sponsoring organization's staff at periodic intervals, but no less than twice per project year, for the purpose of reviewing and commenting on the development and implementation of the project. Such project review and commentary should be directed toward the adequacy of the project to meet the identified needs of the project beneficiaries.

(d) To submit, if it so chooses, written reports and/or copies of minutes of its meetings to the sponsor to accompany the Sponsor's Quarterly Program Report (A-568) submitted to the appropriate ACTION regional office.

§ 1222.5 Advisory group expenses.

As permitted by law, ACTION regional staff may pay for certain incidental out-of-pocket expenses incurred by the advisory group in connection with its responsibilities under § 1222.4.

§ 1222.6 Sponsor's responsibilities.

The sponsor or potential sponsor shall furnish the following evidence of the advisory group's participation in the planning, development, and implementation of the project:

(a) Each new application to ACTION for volunteers shall contain a statement describing how the advisory group has participated in the planning of the project proposal. This statement shall be signed by an authorized representative of the Advisory group (see § 1222.4-2). For continuation project applications, a written statement shall be included which specifies how the advisory group complied with its responsibilities under § 1222.4 of these regulations. This statement shall be signed by an authorized representative of the advisory group (see § 1222.4-2 and 3).

(b) In each Sponsor's Quarterly Program Report (A-568), the sponsor shall include a brief statement describing the extent to which the advisory group was involved in the continuing development and implementation of the project.

Effective on January 7, 1976.

JOHN L. GANLEY,
Deputy Director.

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER E—LOAD LINES

[CGD 75-199]

PART 42—DOMESTIC AND FOREIGN VOYAGES BY SEA

Fee Schedule

On August 15, 1975, there was published in the FEDERAL REGISTER (40 FR 34407), a notice of proposed rulemaking to revise the schedule of fees to be paid to the assigning authority by the owner of a vessel for the assignment or reissue of load lines, and for the annual load line survey. Interested persons were given the opportunity to submit, not later than September 29, 1975, comments concerning the proposed regulations.

No comments were received, and the proposed amendment is adopted without change, as set forth below.

Effective date: This amendment is effective on January 8, 1976.

Dated: November 25, 1975.

O. W. SILER,
Admiral, U.S. Coast Guard Commandant.

Subpart 42.35 of Chapter I of Title 46 of the Code of Federal Regulations is amended as follows:

§ 42.35-1 [Amended]

1. In § 42.35-1, by revising Table 42.35-1 to read as follows:

TABLE 42.35-1.—*Fees for assignment of load line*

Fee numeral [1] or gross tonnage	Fee classed vessels	Fee unclassed vessels
Under 200	$35	$170
200 and under 400	35	220
400 and under 700	40	265
700 and under 1,000	45	325
1,000 and under 1,500	45	400
1,500 and under 2,500	55	465
2,500 and under 3,500	70	535
3,500 and under 5,000	80	605
5,000 and under 6,500	100	675
6,500 and under 8,000	115	740
8,000 and under 10,000	125	810
10,000 and under 12,000	140	880
12,000 and under 15,000	150	950
15,000 and above	160	1,020

[1] Fee numeral is equal to

$$\frac{L \times B \times D}{140}$$

in which *L*, *B*, and *D* are the molded dimensions. The fee numeral shall be used when it is greater than the gross tonnage.

2. In paragraph (d) of § 42.35-1, by striking the figure "$100" and inserting the figure "$125", in place thereof.

§ 42.35-5 [Amended]

3. In paragraph (a) of § 42.35-5, by striking the words "fees for condition survey and reissue of load line certificate" in the first sentence, and inserting the words "fee for periodical condition survey for renewal of the Load Line Certificate in place thereof.

4. In § 42.35-5 by adding a new paragraph (c) to read as follows:

* * * * *

(c) The minimum charge for the reissuance of load line certificates, such as for a change of flag or short term extension, shall be $70. This assumes one visit equivalent to an annual load line inspection.

§ 42.35-10 [Amended]

5. In paragraph (a) of § 42.35-10, by striking the figure "$45" and inserting the figure "$65", in place thereof; and by striking the figure "$55" and inserting the figure "$70", in place thereof.

(46 U.S.C. 86; [49 U.S.C. 1655(b)(1)]; 49 CFR 1.4(b) and 1.46(b)).

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 28—PUBLIC ACCESS, USE AND RECREATION

Bombay Hook National Wildlife Refuge, Del.

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Travel by motor vehicle, bicycle, or on foot, is permitted from sunrise to sunset on designated routes unless prohibited by posting, for the purpose of nature study, photography, hiking, and sightseeing. Pets are permitted if on a leash not over 10 feet in length.

The refuge area, comprising 15,135 acres, is delineated on maps available from the Refuge Manager, Bombay Hook National Wildlife Refuge, R 1, Box 147, Smyrna, Delaware 19977 or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

HOWARD N. LARSEN,
Regional Director
U.S. Fish and Wildlife Service.

DECEMBER 1, 1975.

[FR Doc.75-32893 Filed 12-5-75;8:45 am]

PART 28—PUBLIC ACCESS, USE AND RECREATION

Eastern Neck National Wildlife Refuge, Md.

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

MARYLAND

EASTERN NECK NATIONAL WILDLIFE REFUGE

Entrance into the refuge and use of parking areas and facilities is permitted during daylight hours for photography, hiking, nature study, bicycling, and access to fin fishing, shell fishing, and crabbing.

Boat access is permitted at Bogle's Wharf for commercial and sport fin and shell fishing and crabbing in accordance with Federal and State regulations.

The Ingleside Recreation Area is open from May 1, 1976 through September 30, 1976. Boats may be launched at the launching site from May 1, 1976 through September 30, 1976.

Pets are permitted if on a leash not exceeding 10 feet in length, only in designated parking areas. Camping is not permitted.

The following activities are not permitted at the Eastern Neck Narrows during the period May 1, 1976 through September 30, 1976: Stopping or parking vehicles, standing on or fishing and crabbing from the roadside or shoreline and launching or removing boats.

Designated nature trails, boardwalks, and recreation sites are open for use except during refuge deer hunts. All other areas are closed.

Registered motor vehicles are permitted on refuge roads and in designated parking areas only. Parking and leaving vehicles unattended along the refuge roads is not permitted.

The refuge, comprising approximately 2,286 acres, is delineated on a map available from the Refuge Manager, Eastern Neck National Wildlife Refuge, Route 2, Box 225, Rock Hall, Maryland 21661, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

HOWARD N. LARSEN,
Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 1, 1975.

[FR Doc.75-32894 Filed 12-5-75;8:45 am]

PART 28—PUBLIC ACCESS, USE AND RECREATION

Erie National Wildlife Refuge, Pa.

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

PENNSYLVANIA

ERIE NATIONAL WILDLIFE REFUGE

Entry on foot or by motor vehicle is permitted on designated travel routes for the purpose of nature study, photography, and sightseeing during daylight hours. Pets are permitted if on a leash not over 10 feet in length. Use of the picnic area is permitted on Saturdays and Sundays from 6:00 a.m. to 9:30 p.m. May 30 through October 15 and on weekdays by reservation.

The refuge area, comprising 7,994 acres, is delineated on maps available from the Refuge Manager, Erie National Wildlife Refuge, RD 2, Box 191, Guys Mills, Pennsylvania 16327 and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

HOWARD N. LARSEN,
Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 1, 1975.

[FR Doc.75-32895 Filed 12-5-75;8:45 am]

PART 28—PUBLIC ACCESS, USE AND RECREATION

Tinicum National Environmental Center, Pa.

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation for individual wildlife refuge areas.

PENNSYLVANIA

TINICUM NATIONAL ENVIRONMENTAL CENTER

Entrance into the Center is permitted for the purpose of bicycling, hiking, nature study, sightseeing and photography from drawn to dusk. Motorcycles are prohibited beyond the visitor parking area. Trail bikes, snowmobiles, all terrain, air cushion or other similar motor vehicles are prohibited. Pets are permitted if on a leash not exceeding 10 feet in length. Boats are not permitted in the Center impoundments.

A map of the refuge is available from the Refuge Manager, Tinicum National Environmental Center, Suite 104, Scott Plaza 2, Philadelphia, Pennsylvania 19113 and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

HOWARD N. LARSEN,
Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 1, 1975.

PART 28—PUBLIC ACCESS, USE AND RECREATION

Sachuest Point National Wildlife Refuge, R.I.

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

RHODE ISLAND

SACHUEST POINT NATIONAL WILDLIFE REFUGE

Entry on foot is permitted from sunrise to sunset on designated routes, unless prohibited by posting, for the purpose of nature study, photography, and sightseeing. Pets are permitted if on a leash not over 10 feet in length.

The entire refuge beach has no lifeguards. Swimming will be at the visitor's own risk. Access along designated routes on the refuge for surf fishing and shell fishing is permitted.

Fires are permitted only on the ocean beach. No other fires are permitted at

V40236 DEC 8 75 XUM

other locations on the refuge. Camping, tents, floating devices and nudity are not permitted on the refuge.

Over-the-sand vehicles, snowmobiles, air cushion, all terrain or other similar vehicles are not permitted on the refuge except for emergency and law enforcement purposes.

A map of the refuge is available from the Refuge Manager, Ninigret National Wildlife Refuge, Box 307, Charlestown, Rhode Island 02813 or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

HOWARD N. LARSEN,
Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 1, 1975.

[FR Doc.75-32897 Filed 12-5-75;8:45 am]

PART 33—SPORT FISHING

DeSoto National Wildlife Refuge, Iowa and Nebr.

The following special regulation is effective on date of publication in the Federal Register.

§ 33.5 **Special regulations; sport fishing; for individual wildlife refuge areas.**

IOWA AND NEBRASKA

DE SOTO NATIONAL WILDLIFE REFUGE

Sport fishing on the DeSoto National Wildlife Refuge, Iowa and Nebraska, is permitted on the lake area within the refuge. This open area, comprising 850 acres, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225. Sport fishing is subject to the following conditions:

(1) All fishermen shall conform with the regulations of the State in which they are properly licensed, either Iowa or Nebraska, subject to more restrictive regulations that may be included herein.

(2) Open Season: Daylight hours January 3, 1976 through February 29, 1976, providing ice conditions are safe enough to permit this activity, and 6:00 a.m. to 9:00 p.m., April 15, 1976 through September 30, 1976.

(3) Trot lines and float lines are not permitted.

(4) Archery fishing and spear fishing is permitted during the period May 1, 1976, through June 15, 1976. Only the following fishes can be taken with bow and arrow or spear: Bigmouth Buffalofish (Ictiobus cyprinellus), Smallmouth Buffalofish (Ictiobus bubalus), Carp (Cyprinus carpio), Longnose Gar (Lepisosteus osseus) and Shortnose Gar (Lepisosteus platostomus).

(5) Digging or seining for bait is not permitted.

(6) No more than two lines with two hooks on each line may be used for fishing.

(7) Motor or wind driven conveyances are not permitted on the lake during the period January 3, to February 9.

(8) The use of boats, with or without motors, is permitted during the period April 15 to September 15.

(9) During the period September 15 to September 30, only boats without motors or motors up to 25 H.P. are permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through September 30, 1976.

JAMES E. FRATES,
Refuge Manager, DeSoto National Wildlife Refuge, Missouri Valley, Iowa.

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Endangered Status for 216 Species Appearing on Convention on International Trade; Corrections

In FR Document 25479 appearing at page 44329 in the FEDERAL REGISTER of Friday, September 26, 1975, the following changes to the list should be made:

1. On page 44330 for the entry "Orange-footed pimple back." under the "Range" column, add "Duck River in Tennessee".

2. On page 44332 after the entry for "Mindoro zone-tailed pigeon." make the following additions:

(a) Under the "Common name" column add "Bahaman or Cuban parrot."

(b) Under the "Scientific name" column add "*Amazona leucocephala.*"

(c) Under the "Range" column add "West Indies (Cuba, Bahamas, Cayman Islands)."

(d) Under the "Portion of range where endangered" add "Do."

Written comments concerning the addition of the "Bahaman or Cuban parrot" received by February 6, 1975, will be considered.

Dated: December 1, 1975.

NECTARINES GROWN IN CALIFORNIA

Increase in the Expenses for the 1975–76 Fiscal Period; Invitation to Submit Comments

This notice invites written comments relative to a proposal to increase from $655,581 to $660,000 the expenses reasonable and likely to be incurred by the Nectarine Administrative Committee for the 1975–76 fiscal period under Marketing Order No. 916.

Consideration is being given to the following proposal submitted by the Nectarine Administrative Committee, established under the marketing agreement, as amended, and Order No. 916, as amended (7 CFR Part 916), regulating the handling of nectarines grown in California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer the provisions thereof:

(a) That the Secretary find that provisions pertaining to the expenses in paragraph (a) of § 916.214 (40 FR 31592) be amended as follows:

§ 916.214 **Expenses and rate of assessment.**

(a) *Expenses.* Expenses that are reasonable and likely to be incurred during the fiscal period March 1, 1975, through February 29, 1976, will amount to $660,000.

* * * * *

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposal shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than December 23, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: December 2, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7 CFR Part 928]

HANDLING OF PAPAYAS GROWN IN HAWAII

Proposed Minimum Quality and Size Requirements

This notice invites written comment relative to proposed minimum quality and size requirements for shipments of Hawaiian papayas under the Marketing Agreement and Order No. 928. This regulation would require that all Hawaiian papayas handled grade at least Hawaii No. 1 grade. Papayas shipped in interstate or export channels would be required to be pyriform shape and weigh at least 10 ouices. Fruit shipped in intrastate channels would be required to weigh at least 14 ounces except Hawaii Fancy grade fruit would be required to weigh at least 16 ounces. This proposal was recommended by the Papaya Administrative Committee established pursuant to the said Marketing Agreement and Order No. 928, regulating the handling of papayas grown in Hawaii. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The Committee estimates that 1976 production of Hawaiian papayas will total 48.0 million pounds, 17 percent more than the estimated record large 1975 crop. Fresh sales are expected to total 42.0 million pounds and the remaining 6.0 million procesed. In-state fresh sales have ranged 10.7–13.1 million pounds in recent years and are projected at 13.5 million for 1976. It is anticipated that out-of-state sales will amount to 68 percent of the total fresh sales next year and reach a record large 28.5 million pounds, 5.0 million more than in 1975.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed regulation shall file the same, in quadruplicate with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than December 22, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during business hours (7 CFR 1.27(b)).

As proposed § 928.306 *Papaya Regulation 6* would read as follows:

§ 928.306 **Papaya Regulation 6.**

(a) During the period January 1, 1976 through December 31, 1976, no handler shall ship any container of papayas:

(1) To any destination within the production area unless said papayas grade at least Hawaii No. 1 and are of the size which individually weigh not less than 14 ounces: *Provided,* That papayas handled as Hawaii Fancy grade shall be of a size which individually weigh not less than 16 ounces.

(2) To any export destination unless said papayas grade at least Hawaii No. 1: *Provided,* That such papayas shall be of pyriform shape and weigh not less than 10 ounces each.

(b) When used herein "Hawaii Fancy", "Hawaii No. 1", "Hawaii No. 2" and "pyriform shape" shall have the same meaning as set forth in the State of Hawaii Revised Regulation No. 1 Subsection 5.32—Wholesale Standards for Hawaiian Grown Papayas. All other terms shall have the same meaning as when used in the marketing agreement and order.

(Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 3, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

V 40 236 DEC 8 75 XUM

DEPARTMENT OF TRANSPORTATION

United States Coast Guard

[33 CFR PART 117]

[CGD 75-222]

DRAWBRIDGE OPERATION REGULATIONS

Lake Champlain, Vermont

At the request of the Vermont Department of Highways, the Coast Guard is considering amending the regulations for the drawbridge between Sandy Point and Knight Point, Lake Champlain, to provide periods when the draw need not open for the passage of vessels. The draw is presently required to open on signal. This change is being considered because there are few requests for passages during the proposed closed periods of the winter months and evening hours.

The drawbridges listed in § 117.190 (f) (3) and (4) are in Vermont as is the drawbridge in this proposal. For clarity, these bridges are being placed together in a new § 117.191.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander (oan), Third Coast Guard District, Governors Island, New York 10004. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, Third Coast Guard District.

The Commander, Third Coast Guard District, will forward any comments received before January 9, 1976, with his recommendations to the Chief, Office of Marine Environment and Systems, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations is amended as follows:

§ 117.190 [Amended]

1. Section 117.190(f)(3) and § 117.190(f)(4) are deleted.

2. A new § 117.191 is added immediately after § 117.190 to read as follows:

§ 117.191 Navigable waters in the State of Vermont and their tributaries; bridges when constant attendance of draw tenders is not required.

(a) Lake Champlain; Vermont Department of Highways bridge across entrance to Missisquoi Bay, between Alburg Tongue and Hog Island, at East Alburg. The draw shall open on signal if at least 24 hours notice is given.

(b) Lake Champlain; Missisquoi Bay, Central Vermont railroad bridge. The draw shall open on signal from June 1 through September 30 from 7 a.m. to 11 p.m. At all other times the draw shall open on signal if at least 24 hours notice is given to Central Vermont Railway, Inc., St. Albans, Vermont 05478.

(c) Lake Champlain; Vermont Department of Highways bridge between Grand Isle and North Hero.

(1) From June 1 through September 30, the draw shall open on signal from 7 a.m. to 9 p.m.

(2) From 1 June through 30 September, the draw shall open on signal if at least four hours notice is given from 9 p.m. to 7 a.m.

(3) From 1 October through 31 May, the draw shall open on signal if at least 24 hours notice is given.

(4) During periods of advance notice requirements, the draw shall open as soon as possible for public vessels of the United States.

(d) The owners of or agencies controlling these bridges shall keep a copy of the regulations in this section pertaining to the bridge, and a notice stating how the advance notices required by this section are to be given conspicuously posted on both the upstream and downstream sides of the bridge.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1-05-1(c)(4)).

Dated: December 1, 1975.

R. I. PRICE,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

TERMINATION OF AUTHORIZATIONS

Deletion of Certain Technical Standard Orders

On September 13, 1973, the Federal Aviation Administration published a Notice of Proposed Rule Making (Notice 73-24; 38 FR 25450) that proposed to amend Part 37 of the Federal Aviation Regulations by deleting § 37.128 *Position light flashers (air-carrier aircraft)—TSO-C18c;* § 37.134 *Technical Standard Order C24: "Landing Flares";* § 37.166 *Portable aircraft emergency communication equipment (for air carrier aircraft)—TSO-C61a;* and § 37.194 *Position light flashers, single-circuit (for non-air-carrier aircraft)—TSO-C33.* Those sections contain minimum standards for the manufacture under a Technical Standard Order (TSO) authorization of the articles specified in the respective section titles.

As indicated in Notice 73-24, in general, the equipment covered by TSO-C18c, -C24, and -C33 is no longer in use; and in the case of TSO-C61a, the equipment will shortly be phased out of service. The FAA also stated its belief in that notice that since the demand for the equipment covered by TSO-C18c, -C24, -C33, and -C61a was negligible or nonexistent, it was unreasonable to continue to expend funds for the FAA surveillance of manufacturers holding authorizations under those TSO's. The deletion of the TSO's was proposed in Notice 73-24 for those reasons.

The FAA received 5 public comments in response to Notice 73-24. Four of the the commentators expressed approval of the proposal. However, based on a further review by the FAA, it is believed that Notice 73-24 did not provide adequate information with respect to the subject matter covered in the notice. In particular, Notice 73-24 did not specifically propose any action with respect to TSO -C18, C18a, and -C18b, and TSO—C61. These older TSO's have been amended or superseded in the past. Only the latest versions, TSO—C18c and TSO—C61a appear in the Code of Federal Regulations; however, the standards contained in these older TSO's continue to apply to certain manufacturers of articles covered by the TSO's. In addition, Notice 73-24 did not clearly indicate, as intended, that the TSO authorizations issued to manufacturers for the equipment covered by the TSO's would be terminated. The reasons presented in Notice 73-24 for the action proposed therein are equally applicable to these older TSO's with respect to the termination of the authority to mark as TSO approved new articles manufactured in accordance with the standards of these TSO's. Therefore, this supplemental notice is being issued which proposes to delete TSO -C18c, -C24, -C33, and -C61a and to terminate the authority to mark as TSO approved articles manufactured under these TSO's or their earlier versions.

In view of the changes being made to the proposal contained in Notice 73-24, The FAA is issuing this Supplemental Notice of Proposed Rule Making. The FAA requests that those persons who submitted comments on Notice 73-24, review those comments in light of the proposal contained herein. Those persons as well as all other interested persons are invited to participate in this rulemaking action by submitting such written data, views, or arguments as they may desire.

All comments with respect to this supplemental notice, received on or before February 6, 1976, and the comments received in response to Notice 73-24 will be considered by the Administrator before taking action on the proposed rule. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

The proposals contained in this supplemental notice supersede the proposals contained in Notice 73-24. Comments relating to this notice, only, are solicited.

This amendment is proposed under the authority of sections 313(a) and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a) and 1421) and section 6 (c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing it is proposed to amend Part 37 of the Federal Aviation Regulations as follows:

1. By revising the heading of § 37.3 and adding a new § 37.3(c) to read as follows:

§ 37.3 TSO marking and privileges.

* * * * *

(c) Notwithstanding paragraphs (a) and (b) of this section (after the effective date of this amendment), no person may mark as TSO aproved an article manufactured under a TSO authorization or an FAA letter of acceptance of a statement of conformity issued for—

(1) TSO–C18, –C18a, –C18b, or –C18c;
(2) TSO–C24;
(3) TSO–C33; or
(4) TSO–C61 or –C61a.

§§ 37.128, 37.134, 37.166 and 37.194 [Deleted]

2. By deleting §§ 37.128, 37.134, 37.166, and 37.194.

Issued in Washington, D.C. on November 28, 1975.

JAMES M. VINES,
Acting Director, Flight Standards Service.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 407]

[FRL 466-6]

CANNED AND PRESERVED FRUITS AND VEGETABLES PROCESSING INDUSTRY POINT SOURCE CATEGORY

Extension of Comment Period

This notice extends the period for comments to the notice, published October 21, 1975, proposing regulations consisting of effluent guidelines, limitations and standards for Existing Sources, Standards of Performance and Pretreatment Standards for the Fruits, Vegetables, and Specialties Subcategories of the Canned and Preserved Fruits and Vegetables Processing Industry Point Source Category (40 FR 49237).

Requests for an extension of time were submitted by persons having an interest in commenting. They point out that the document entitled "Economic Analysis of Interim Final Effluent Guidelines—Fruits and Vegetables Processing Industry" was not available for distribution on the date of the original notice, and that additional time is needed to review the document in sufficient detail to provide meaningful comments.

In view of the request, the Environmental Protection Agency has determined it is in the public interest that the period for comments on the proposed regulations be extended for an additional thirty days.

Accordingly, all comments received on or before December 19, 1975, will be considered.

Dated: December 1, 1975.

ANDREW W. BREIDENBACH,
Acting Assistant Administration for Water and Hazardous Materials.

[FR Doc.75-32970 Filed 12-5-75;8:45 am]

POSTAL SERVICE

[39 CFR Part 111]

ENVELOPES, POSTAL CARDS, AEROGRAMMES; FIRST CLASS

Green Border Envelopes and Cards

Under the provisions of 39 CFR 111.3 the Postal Service proposes to amend 141.11 of the Postal Service Manual to require that envelopes and cards bearing a green border be used for first class mail matter only, and that all such envelopes and cards be charged postage equivalent to the first-class rate. A conforming amendment is also made to 131.222.

It has been a long-standing practice in the Postal Service to recognize an envelope or a card prepared with a green border as first-class mail, to accord it first-class mail handling, and to require postage on it equivalent to the first-class rate. Some mailers, however, have been using green border envelopes and cards for other classes of mail, resulting in first class handling for lower class mail and insufficient postage for the service rendered. The purpose of this proposed regulation, then, is to formalize in Postal Service regulations the above-described practice of the Postal Service with regard to green border envelopes and cards.

Interested persons who wish to do so may submit written data, views, or arguments concerning this proposed change in Postal Service regulations to the Director, Office of Mail Classification, Rates and Classification Department, United States Postal Service, Washington, D.C. 20260. All comments received on or before January 5, 1976 will be considered by the Postal Service prior to taking action on the proposed amendment.

Accordingly, although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rule making, 39 U.S.C. 410(a), the Postal Service invites public comment on the following proposed revision of the Postal Service Manual:

PART 131—FIRST CLASS

1. In 131.22 of the Postal Service Manual add new .222c reading as follows:

131.22 Postal and Post Cards.

* * * * *

.222 Post Cards

* * * * *

c. Green Border Cards
See 141.115.

PART 141—ENVELOPES, POSTAL CARDS, AEROGRAMMES

2. In 141.11 of the Postal Service Manual add new .115 reading as follows:

141.11 Envelopes

* * * * *

.115 Green Border Envelopes and Cards

The use of envelopes and cards bearing a green border must be for first-class mail matter only. All envelopes and cards bearing a green border shall be charged postage equivalent to the first-class rate.

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published on adoption of this proposal.

(39 USC 401, 404)

ROGER P. CRAIG,
Deputy General Counsel.

Comptroller of the Currency

REGIONAL ADVISORY COMMITTEE ON BANKING POLICIES AND PRACTICES FOR THE FOURTEENTH NATIONAL BANK REGION

Amended Notice of Meeting [1]

A meeting of the Advisory Committee on Banking Policies and Practices for the Fourteenth National Bank Region will be held December 18 and 19, 1975 at the Las Vegas Hilton Hotel, Las Vegas, Nevada. The meeting on December 18 will be from 9:00 a.m. until 12:00 noon and the meeting on December 19 will also be from 9:00 a.m. until 12:00 noon. Both meetings will be open to the public. Interested members of the public will be admitted on a first come basis.

Topics to be discussed include an economic update by the Regional Economist, the progress on implementation of the Haskins & Sells Study, the CBCT developments, reserves for bad debts and changes in Reports of Income and Condition.

Persons or groups planning to make statements over five minutes in length must submit three copies to Mr. Palmer C. Hamilton, Office of the Comptroller of the Currency, Washington, D.C. 20219, prior to December 10, 1975.

Dated: December 2, 1975.

JAMES E. SMITH,
Comptroller of the Currency.

US ARMY MEDICAL RESEARCH AND DEVELOPMENT ADVISORY PANEL

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Pub. Law 92-463, notice is hereby given that the U.S. Army Medical Research and Development Advisory Panel will meet from 0900 hours to 1600 hours on January 8, 1976 in Room 5E069, James V. Forrestal Building, 10th and Independence Avenue, Southwest, Washington, D.C. 20314.

The agenda includes discussion of current developments in the Army Medical Department Research, Development, Test and Evaluation Program.

The meeting is open to the public; however, space accommodations are limited. Persons wishing to attend should advise the Executive Secretary, in writing prior to the meeting, at the following address: U.S. Army Medical Research and Development Command, Forrestal Building, Room 8G091, Washington, D.C. 20314.

Dated: December 1, 1975.

By authority of the Secretary of the Army:

ROBERT G. FLOWERS, Jr.,
Lt. Colonel, U.S. Army,
Chief, Plans Office, TAGO.

DEPARTMENT OF JUSTICE

IMPORTATION OF CONTROLLED SUBSTANCES

Notice of Application

Pursuant to Section 1008 of the Controlled Substance Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore in accordance with § 1311.42 of Title 21, Code of Federal Regulations, notice is hereby given that on July 25, 1975, Biomedical Research Branch, Division of Research, National Institute on Drug Abuse, DHEW, 11400 Rockville Pike, Rockwall Building, Rockville, Maryland 20852, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug:	Schedule
Tetrahydrocannabinols	I
Marihuana	I
Lysergic Acid Diethylamide	I
Etonitozene	I
Psilocybin	I
Psilocyn	I
3,4-methylenedioxy amphetamine	I
5 - methoxy - 3,4 - methylenedioxy amphetamine	I
3,4,5-trimethoxy amphetamine	I
Bufotenine	I
Dimethyltryptamine	I
4 - methyl-2,5-dimethoxyamphetamine	I
2,5-dimethoxyamphetamine	I
4 - bromo -2,5-dimethoxyamphetamine	I
4-methoxyamphetamine	I
Amphetamine	II
Diprenorphine	II
Etorphine Hydrochloride	II

Pursuant to section 1008 of the Controlled Substance Act (21 U.S.C. 958(h)), and in accordance with § 1311.42(a) of Title 21 of the Code of Federal Regulations (CFR), notice is hereby given that the above company made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances indicated. As to each basic class of controlled substances listed above for which application for registration has been made, any other applicant therefor, and any existing bulk manufacturer registered therefor, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than January 9, 1976.

Comments and objections may be addressed to the Hearing Clerk, Office of Administrative Law Judge, Drug Enforcement Administration, Room 1130, 1405 Eye Street NW., Washington, D.C. 20537.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1301.-42 (b), (c), (d), (e) and (f). As noted in a previous notice at 40 FR 43745-46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Acting Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42 (a), (b), (c), (d), (e) and (f) are satisfied.

Dated: November 28, 1975.

JERRY N. JENSON,
Acting Administrator,
Drug Enforcement Administration.

NATIONAL ADVISORY COMMITTEE ON CRIMINAL JUSTICE STANDARDS AND GOALS

Meeting

This is to provide notice of meeting of the Juvenile Delinquency Task Force of the National Advisory Committee on Criminal Justice Standards and Goals.

The Juvenile Delinquency Task Force will be meeting in New Orleans, Louisiana on January 9 and 10, 1976 at the Bourbon Orleans Hotel, 717 Orleans Street, New Orleans, Louisiana. The meeting will be open to the public.

Items on the agenda are:

1. Discussion of issues and comparative analyses in juvenile correction.

2. Presentation of standards and commentary in Delinquency Prevention.
3. Presentation of comparative analyses, standards and commentary for adoption on Abuse and Neglect.
4. Presentation of standards and commentary for adoption on Juvenile Recial, Non-Judicial Officers.
5. Presentation of standards and ords, Role of Defense Counsel and Judicommentary for Management Information, Planning and Evaluation.
6. Presentation of standards and commentary for Families in Need of Service.
7. Outlines on Corrections and Police sections for review.
8. Chairman and Executive Director's report.
9. Adoption of minutes of October 31/November 1, 1975 meeting.
10. Response from audience.

Meeting Times: January 9—8:30 a.m.–8 p.m.; January 10—8:30 a.m.–2:30 p.m.

For further information, contact Richard Vanduizend, General-Attorney, National Institute of Juvenile Justice Delinquency Prevention, 633 Indiana Avenue, NW., Washington, D.C.

GERALD H. YAMADA,
Attorney-Advisor,
Office of General Counsel.

DEPARTMENT OF THE INTERIOR

Bureau of Outdoor Recreation

[INT DES 75-58]

NEW WILD AND SCENIC RIVER STUDY

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement regarding the wild and scenic river study of the New River, North Carolina, and invites written comments within forty-five (45) days of this notice. Comments from interested members of the public should be addressed to the Regional Director, Southeast Region, Bureau of Outdoor Recreation, 148 Cain Street, Atlanta, Georgia 30303.

The environmental statement considers the probable impact of establishing 26.5 miles of the New River and its South Fork as a component of the National Wild and Scenic River System to be administered by the State of North Carolina.

Copies of the draft statement are available for inspection at the following locations:

Office of Information, Bureau of Outdoor Recreation, Room 4427, Department of the Interior, Washington, D.C. 20240, Telephone: (202) 343-5726.
Mr. J. Phil Bennington, Clerk of the Circuit Court, Grayson County, Independence, Virginia 24348, Telephone: (703) 773-7231.
Mr. Robert Lee, Region D, Council of Governments, Executive Arts Building, Furman Road, Boone, North Carolina 28607, Telephone: (704) 264-5558.
Ashe County, Ashe County Board of Commissioners Office, c/o Mr. Roy Taylor, Jefferson, North Carolina 28640.
Clerk of the Court, Alleghany County, c/o Mr. Glenn Busic, Alleghany Courthouse, Sparta, North Carolina 28675, Telephone: (919) 372-8949.
Office of Regional Director, Bureau of Outdoor Recreation, 148 Cain Street, Atlanta, Georgia 30303, Telephone: (404) 526-4405.
Mr. Arthur W. Cooper, Assistant Secretary, Department of Natural and Economic Resources, Box 27687, Raleigh, North Carolina 27611, Telephone: (919) 829-4984.
Mr. Joe Robertson, Director, Regional Office, Department of Natural and Economic Resources, 2528 Vest Mill Road, Winston Salem, North Carolina 27103, Telephone: (919) 765-6300.

Single copies are available to the public and may be obtained by writing to the regional Director, Bureau of Outdoor Recreation, Southeast Region, 148 Cain Street, Atlanta, Georgia 30303. Please refer to the statement number shown above.

Dated: November 28, 1975.

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

Fish and Wildlife Service

COYOTE DAMAGE CONTROL: CATTLE, SHEEP AND GOATS

Report on Emergency Use of M-44 Devices

Notice is hereby given on the emergency use of M-44 devices by the Department of Interior's operational predator damage control program for the month of September. This use is in compliance with the experimental use permit (No. 6704-EXP-6G) issued by the Environmental Protection Agency pursuant to Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 135-135k), and in accordance with 40 CFR, part 162.19, as promulgated in the FEDERAL REGISTER on January 31, 1974 (39 FR 3939). This report is made pursuant to FEDERAL REGISTER notice of June 20, 1974 (39 FR 22166).

Actual M-44 use for September 1975 is as follows.

M-44 Emergency use—September 1975

State	Number of counties	Number of ranches	Number of cattle, sheep, and goats protected	Number of M-44's used
Arizona	3	23	6,657	352
Montana	16	24	17,107	482
Nevada	1	1	1,000	40
New Mexico	12	28	15,017	950
Oregon	9	28	3,089	212
Texas	29	126	33,686	1,030
Utah	3	12	11,642	112
Wyoming	2	4	2,251	76
Total	75	245	90,449	3,244

One or more coyotes were taken with this device on 100 of the 245 emergency areas, but losses were not necessarily halted in each case. During this month, 226 coyotes were taken by this device. Other species taken with the device during this period include 22 red foxes, 1 gray fox, 2 feral dogs, 5 raccoons, 17 opossums, 3 skunks, and 1 domestic dog.

All of the above use of M-44 devices as a supplemental tool to attempt to resolve coyote depredation on cattle, sheep and goats was conducted by trained Service personnel in accordance with the "Procedure For Advance Identification and Approval of Areas For the Possible Emergency Use of Sodium Cyanide Delivered by the M-44 Device for the Control of Depredating Canids," as it appears in the FEDERAL REGISTER, Volume 39, No. 120—Thursday, June 20, 17974.

GEORGE W. MILES,
Acting Director,
Fish and Wildlife Service.

DECEMBER 2, 1975.

Geological Survey

MID ATLANTIC AREA

Proposed OCS Order

Notice is hereby given that the Geological Survey is proposing OCS Orders for the Mid Atlantic Area. For purpose of these Orders, the Mid Atlantic Area shall include those lands subject to Federal OCS oil and gas leasing in that part of the Mid Atlantic Ocean from

V40236 DEC 8 75 XUM

southern New York to the southern part of Virginia.

By 39 FR 191, October 1, 1974, the Geological Survey announced its intention to develop operating Orders for the Atlantic OCS Area and solicited comments and suggestions concerning proposed OCS Orders by November 1, 1974. Comments have been received and considered.

In view thereof, the following operating Orders are being proposed and consistent with current procedures of the Geological Survey, comments and suggestions are solicited as to the content of these proposed Orders.

OCS Order No. 1: Marking of Wells, Platforms, and Structures.
OCS Order No. 2: Drilling Procedures.
OCS Order No. 3: Plugging and Abandonment of Wells.
OCS Order No. 4: Suspensions and Determination of Well Producibility.
OCS Order No. 5: Subsurface Safety Devices.
OCS Order No. 7: Pollution and Waste Disposal.
OCS Order No. 12: Public Inspection of Records.
OCS Orders No. 6, 8, 9, 11, and 13 are being drafted and will be published at a later date.

Interested persons may submit written comments and suggestions to the Director, U.S. Geological Survey, National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, on or before February 15, 1976.

V. E. McKELVEY,
Director.

MID-ATLANTIC OCS ORDER NO. 1

Effective ----------

MARKING OF WELLS, PLATFORMS, AND STRUCTURES

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.37.

The operator shall comply with the following requirements. All departures from the requirements specified in this Order must be approved pursuant to 30 CFR 250.12(b).

1. *Identification of Fixed Platforms or Structures.* Platforms and structures shall be identified at two diagonal corners by a sign with letters and figures not less than 30.5 centimetres (12 inches) in height with the following information: The name of lease operator, the block number in which the platform or structure is located, the area name shown on OCS Official Protraction Diagrams (or, where no name has been assigned, the Protraction Diagram number), and the platform or structure designation. The information shall be abbreviated as in the following example:

"The Blank Oil Company operates "C" platform on Block 999 of the Salisbury Area"

The identifying sign on the platform would show: "BOC–999–Sal.–C."

2. *Identification of Nonfixed Platforms or Structures.* Floating semi-submersible platforms, bottom-setting mobile and floating drilling ships shall be identified by one sign with letters and figures not less than 30.5 centimetres (12 inches) in height affixed to the derrick so as to be visible from off the vessel and containing the following information: The name of the lease operator, the block number, the area designation based on OCS Official Leasing Maps, the OCS lease number, and the well number.

3. *Identification of Wells.* The OCS lease and well number shall be painted on, or a sign affixed to, each singly completed well. In multiple completed wells each completion shall be individually identified at the well head. All identifying signs shall be maintained in a legible condition.

4. *Identification of Subsea Objects.* Any subsea object presenting a hazard to navigation resulting from lease operations shall be identified in accordance with appropriate U.S. Coast Guard regulations.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

MID-ATLANTIC OCS ORDER NO. 2

Effective ----------

DRILLING PROCEDURES

This Order is established pursuant to the authority prescribed in 30 CFR 250.11. All exploratory and development wells drilled for oil and gas shall be drilled in accordance with 30 CFR 250.34, 250.41, 250.91, and the provisions of this Order which shall continue in effect until field drilling rules are issued. When sufficient geologic and engineering information is obtained through exploratory drilling, operators may make application or the Area Supervisor may require an application for the establishment of field drilling rules. After field drilling rules have been established by the Area Supervisor, development wells shall be drilled in accordance with such rules.

All wells drilled under the provisions of this Order shall have been included in an exploratory or development plan for the lease as required under 30 CFR 250.34. Each Application for Permit to Drill (Form 9–331C) shall include all information required under 30 CFR 250.91, and shall include a notation of any proposed departures from the requirements of this Order. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

The operator shall comply with the following requirements. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor. References in this Order to approvals, determinations, or requirements are to those given or made by the Area Supervisor or his delegated representative.

1. *Well Casing and Cementing.* All wells shall be cased and cemented in accordance with the requirements of 30 CFR 250.41(a)(1), and the Application for Permit to Drill shall include the casing design safety factors for collapse, tension, and burst. In cases where cement has filled the annular space back to the ocean floor, the cement may be washed out or displaced to a depth not exceeding 12.2 metres (40 feet) below the ocean floor to facilitate casing removal upon well abandonment. For the purpose of this Order, the several casing strings in order of normal installation are drive or structural, conductor, surface, intermediate, and production casing.

For the surface, intermediate, and production casing strings, if there are indications of improper cementing such as lost returns, cement channeling, or mechanical failure of equipment, the operator shall recement or make the necessary repairs and run a temperature or cement bond log to verify that the casing has been adequately cemented.

The design criteria for all wells shall consider all pertinent factors for well control, including formation fracture gradients and pressures and casing setting depths. All casing, except drive pipe, shall conform to the specifications contained in "API Spec 5A—Casing, Tubing, and Drill Pipe," and shall be new pipe or reconditioned used pipe that has been tested to insure that it will meet API specifications for new pipe.

A. *Drive or Structural Casing.* This casing shall be set by drilling, driving, or jetting to a minimum depth of 30.5 meters (100 feet) below the ocean floor or to such greater depth required to support unconsolidated deposits and to provide hole stability for initial drilling operations. If this portion of the hole is drilled, the drilling fluid shall be of a type that is in compliance with the liquid disposal requirements of OCS Order No. 7, and a quantity of cement sufficient to fill the annular space back to the ocean floor shall be used.

B. *Conductor and Surface Casing.* Casing design and setting depths shall be based upon all engineering and geologic factors, including the presence or absence of hydrocarbons or other potential hazards and water depths.

(1) *Conductor Casing.* This casing shall be set at a depth in accordance with paragraph 1B(3) below. A quantity of cement sufficient to fill the annular space back to the ocean floor shall be used.

(2) *Surface Casing.* This casing shall be set at a depth in accordance with paragraph 1B(3) below and cemented in a manner necessary to protect all freshwater sands and provide well control until the next string of casing is set.

This casing shall be cemented with a quantity sufficient to fill the calculated annular space to at least 457.2 metres (1,500 feet) above the surface casing shoe and at least 61 metres (200 feet) inside the conductor casing or as approved by the District Supervisor. After drilling a maximum of 30.5 metres (100 feet) below the surface casing shoe, a pressure test shall be obtained to aid in determining a formation fracture gradient either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight to be used in drilling the intermediate hole.

(3) *Conductor and Surface Casing Setting Depths.* These strings of casing shall be set at the depth specified below, subject to approved variation to permit the casing to be set in a competent bed, or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations. These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure or conditions and for the initial wells in an area, the District Supervisor may prescribe an additional casing string and the exact setting depths. Except as otherwise may be prescribed, conductor casing setting depths shall be between 91.4 metres (300 feet) and 304.8 metres (1,000 feet) (TVD below ocean floor), and surface casing setting depths shall be between 304.8 metres (1,000 feet) and 1,371.6 metres (4,500 feet) (TVD below ocean floor).

Engineering, geophysical, and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

C. *Intermediate Casing.* One or more strings of intermediate casing shall be set when required by anticipated abnormal pressure, mud weight, sediment, and other well conditions. The proposed setting depth for intermediate casing will be based on the pressure tests of the exposed formation immediately below the surface casing shoe or on subsequent pressure tests.

A quantity of cement sufficient to cover and isolate all hydrocarbon zones and to isolate abnormal pressure intervals from normal pressure intervals shall be used. If a liner is used as an intermediate string, the cement shall be tested by a fluid entry or pressure test to determine whether a seal between the liner top and next larger string has been achieved. The test shall be recorded on the driller's log. When such liner is used as production casing, it shall be extended to the surface and cemented to avoid surface casing being used as production casing.

D. *Production Casing.* This string of casing shall be set before completing the well for production. It shall be cemented in a manner necessary to cover or isolate all zones which contain hydrocarbons, but in any case, a calculated volume sufficient to fill the annular space at least 152.4 metres (500 feet) above the uppermost producible hydrocarbon zone must be used. When a liner is used as production casing, the testing of the the seal between the liner top and the next larger string shall be conducted as in the case of intermediate liners. The test shall be recorded on the driller's log.

E. *Pressure Testing of Casing.* Prior to drilling the plug after cementing, all casing strings, except the drive or structural casing, shall be pressure-tested as shown in the table below. The test pressure shall not exceed the internal yield pressure of the casing. The surface casing shall be tested with water in the top 100 feet of the casing. If the pressure declines more than 10 percent in 30 minutes, or if there is other indication of a leak, corrective measures shall be taken until a satisfactory test is obtained.

Casing	Minimum surface pressure
Conductor	14.1 Kg/cm² (200 psi).
Surface	70.3 Kg/cm² (1000 psi).
Intermediate, Liner, and production.	105.45 Kg/cm² (1500 psi) or 0.046 Kg/cm²/m (0.2 psi/ft.), whichever is greater.

After cementing any of the above strings, drilling shall not be commenced until a time lapse of eight hours under pressure for conductor casing string or 12 hours under pressure for all other strings. Cement is considered under pressure if one or more float valves are employed and shown to be holding the cement in place or when other means of holding pressure is used. All casing pressure tests shall be recorded on the driller's log.

F. *Directional Surveys.* Wells are considered vertical if inclination does not exceed an average of three degrees from the vertical. Inclination surveys shall be obtained on all vertical wells at intervals not exceeding 152.4 metres (500 feet) during the normal course of drilling.

Wells are considered directional if inclination exceeds an average of three degrees from the vertical. Directional surveys giving both inclination and azimuth shall be obtained on all directional wells at intervals not exceeding 152.4 metres (500 feet) during the normal course of drilling and at intervals not exceeding 30.5 metres (100 feet) in all angle change portions of the hole.

On both vertical and directional wells, directional surveys giving both inclination and azimuth shall be obtained at intervals not exceeding 152.4 metres (500 feet) prior to, or upon, setting surface or intermediate casing, liners, and at total depth.

Composite directional surveys shall be filed with the District Supervisor. The interval shown will be from the bottom of conductor casing, or, in the absence of conductor casing, from the bottom of drive or structural casing to total depth. In calculating all surveys, a correction from true north to Universal Transverse Mercator-Grid north shall be made after making the magnetic to true north correction.

2. *Blowout Prevention Equipment.* Blowout preventers and related well-control equipment shall be installed, used, and tested in a manner necessary to prevent blowouts. Prior to drilling below the drive pipe or structural casing and until drilling operations are completed, blowout prevention equipment shall be installed and maintained ready for use as follows:

A. *General Requirements.*

(1) *Blowout Preventer Equipment.* Blowout prevention equipment shall consist of an annular and the specific number of ram-type preventers, one of which shall contain a blind-shear ram. The pipe rams shall be of proper size to fit the pipe in use. The bore of all preventers and spools shall be of sufficient size to accommodate the largest equipment that is expected to be run into the casing below the preventers. The working pressure of any blowout preventer shall exceed the maximum anticipated surface pressure to which it may be subjected.

All preventers shall be equipped with:

(a) A hydraulic actuating system that provides sufficient accumulator capacity to close all blowout prevention equipment units with a 50 percent operating fluid reserve at 84.4 Kg/cm² (1200 psi). A high pressure nitrogen or accumulator back-up system shall be provided with sufficient capacity to close all blowout preventers and hold them closed. Locking devices shall be provided on the ram-type preventers.

(b) An operable remote blowout-preventer-control station shall be provided, in addition to the one on the drilling floor.

(c) A drilling spool with side outlets, if side outlets are not provided in the blowout preventer body, shall be installed to provide for a kill line and choke manifold. An auxiliary connection for an emergency kill or choke line shall be provided below any preventer that is in use and not located on the sea floor.

(d) A kill line with a master valve located next to the well. This valve shall not be used for normal opening or closing on flowing fluids. The kill line shall have at least one control valve in addition to the master valve.

(e) A choke manifold equipped with a hydraulic control valve, a master valve, three adjustable chokes of which one shall be a hydraulic adjustable choke, and an accurate pressure gauge. The choke manifold outlets shall be connected in such a manner that the well fluids may be directed to production facilities or emergency storage.

(f) A fill-up line.

(g) The annular type preventer shall be equipped for automatic actuation in case of failure of the control system.

(h) All valves, pipe, and fittings that can be exposed to pressure from the wellbore shall be of a pressure rating at least equal to that of the blowout-prevention equipment.

(2) *Auxiliary Equipment.* The following auxiliary equipment shall also be provided:

(a) A top kelly cock shall be installed below the swivel, and an essentially full-opening kelly cock of such design that it can be run through blowout preventers shall be installed at the bottom of the kelly.

(b) An inside blowout preventer and a full opening drill string safety valve in the open position shall be maintained on the rig floor at all times while drilling operations are being conducted. Valves shall be maintained on the rig floor to fit all pipe that is in the drill string. A safety valve shall be available on the rig floor assembled with the proper connection to fit the casing string that is being run in the hole.

(c) A socket-type full-opening safety valve that is capable of being dropped over any drill pipe tool joint in use shall be maintained on the rig floor ready for use.

B. *Drive Pipe or Structural Casing.* Before drilling below this string, at least one remotely controlled, annular-type blowout preventor or pressure-rotating, pack-off-type head and equipment for circulating the drilling fluid to the drilling structure or vessel shall be installed.

When the blowout preventer system is on the ocean floor, the choke and kill lines or equivalent vent lines, equipped with necessary connections and fittings, shall be used for diversion. An annular preventer or pressure-rotating, pack-off-type head, equipped with suitable diversion lines as described above and installed on top of the marine riser, to permit the diversion of hydrocarbons and other fluids, may be utilized for diversion. The diverter system providing at least the equivalent of two 15.2 centimetre (6-inch) lines (or equivalent in internal cross-sectional area) and full-open or butterfly valves shall be installed in order to permit the full diversion of hydrocarbons and other fluids. The diverter system shall be equipped with automatic, remote-controlled valves which open prior to shutting in the well, with at least two lines venting in different directions to accomplish downwind diversion. A schematic diagram and operational procedure for the diverter system shall be submitted with the Application for Permit to Drill (Form 9–331C) to the District Supervisor for approval.

In drilling operations where a floating or semi-submersible type of drilling vessel is used and formation competency at the structural casing setting depth is not adequate to permit circulation of drilling fluids to the vessel while drilling conductor hole, a program which provides for safety in these operations shall be described and submitted to the District Supervisor for approval. This program shall include all known pertinent and relevant information, including seismic and geologic data, water depth, drilling-fluid hydrostatic pressure, schematic diagram from rotary table to proposed conductor casing seat, and contingency plan for moving off location. In all areas where shallow hazards or hydrocarbons are unknown, seismic data shall be obtained, and a small-diameter initial pilot hole from the bottom of drive or structural casing to proposed conductor casing seat shall be drilled to aid in determining the presence or absence of these hazards.

C. *Conductor Casing.* Before drilling below this string, at least one remotely controlled, annular-type blow-out preventer and equipment for circulating the drilling fluid to the drilling structure or vessel shall be installed. A diverter system as described in paragraph 2B above shall be installed.

D. *Surface Casing.* Before drilling below this string, the blowout prevention equipment shall include a minimum of: (1) three remote-controlled, hydraulically operated blowout preventers, including one equipped with pipe rams, one with blind shear rams, and one annular type; (2) a

V 4 0 2 3 6 DEC 8 7 5 XUM

drilling spool with side outlets, if side outlets are not provided in the blowout preventer body; (3) a choke line and manifold; (4) a kill line separate from choke line; and (5) a fill-up line.

E. *Intermediate Casing.* Before drilling below this string, the blowout prevention equipment shall include a minimum of: (1) four remote-controlled, hydraulically operated blowout preventers with a working pressure which exceeds the maximum anticipated surface pressure, including at least two equipped with pipe rams, one with blind shear rams, and one annular type; (2) a drilling spool with side outlets, if side outlets are not provided in the blowout preventer body; (3) a choke line and manifold; (4) a kill line separate from choke line; and (5) a fill-up line.

F. *Testing.*

(1) *Pressure Test.* Ram-type blowout preventers and related control equipment shall be tested to the rated working pressure of the stack assembly, or at the working pressure of the casing, whichever is the lesser. Annular-type preventers shall be tested to 70 percent of these pressure requirements. They shall be tested: (a) when installed, (b) before drilling out after each string of casing is set, (c) not less than once each week from each of the control stations, and (d) following repairs that require disconnecting a pressure seal in the assembly.

(2) *Actuation.* While drill pipe is in use, the ram-type blowout preventers equipped with pipe rams shall be actuated while out of the hole, once each trip. If a tapered drill string is in use, the smaller size pipe rams shall be actuated on the appropriate size pipe, once each trip. Accumulators or accumulators and pumps shall maintain a pressure capacity reserve at all times to provide for repeated operation of hydraulic preventers. An operable remote blowout-preventer-control station shall be provided in addition to the one on the drilling floor. Each control station shall be checked for proper operations weekly, in conjunction with the pressure test.

(3) *Drills.* A blowout prevention drill shall be conducted weekly for each drilling crew to insure that all equipment is operational and that crews are properly trained to carry out emergency duties.

(4) *Records.* All blowout preventer tests and crew drills shall be recorded on the driller's log.

3. *Mud Program.* The characteristics, use, and testing of drilling mud and the conduct of related drilling procedures shall be such as are necessary to prevent the blowout of any well. Quantities of mud materials sufficient to insure well control shall be maintained readily accessible for use at all times.

A. *Mud Control.* Before starting out of the hole with drill pipe, the mud shall be properly conditioned. Proper conditioning requires either circulation with the drill pipe just off bottom to the extent that the annular volume is displaced, or proper documentation in the driller's log prior to pulling the drill pipe that: (1) there was no indication of influx of formation fluids prior to starting to pull the drill pipe from the hole, (2) the weight of the returning mud is not less than the weight of the mud entering the hole, and (3) other mud properties recorded on the daily drilling log are within the specified ranges at the stage of drilling the hole to perform their required functions. In those cases when the hole is circulated, the driller's log shall be so noted.

When coming out of the hole with drill pipe, the annulus shall be filled with mud before the mud level drops 30.5 metres (100 feet). A mechanical device for measuring the amount of mud required to fill the hole shall be utilized, and any time there is an indication of swabbing, or influx of formation fluids, the necessary safety devices and action shall be employed to control the well. The mud shall not be circulated and conditioned, except on or near bottom, unless well conditions prevent running the drill pipe back to bottom. The mud in the hole shall be circulated or reverse-circulated prior to pulling drill-stem test tools from the hole.

The hole shall be filled by accurately measured volumes of mud. The number of stands of drill pipe and drill collars that may be pulled between the times of filling the hole shall be calculated and posted. The number of barrels and pump strokes required to fill the hole for this designated number of stands of drill pipe and drill collars shall be posted. For each casing string, the maximum pressure which may be applied to the blowout preventer before controlling excess pressure by bleeding through the choke shall be posted near the driller. Drill pipe pressure shall be monitored during the bleeding procedure for well control.

An operable degasser shall be installed in the mud system prior to the commencement of drilling operations and shall be maintained for use throughout the drilling and completion of the well.

B. *Mud Test Equipment.* Mud test equipment shall be maintained on the drilling rig at all times, and mud tests shall be performed daily, or more frequently as conditions warrant. The following mud-system monitoring equipment shall be installed (with derrick floor indicators) and used at the point in the drilling operation when mud returns are established and throughout subsequent drilling operations:

(1) Recording mud pit level indicator to determine mud pit volume gains and losses. This indicator shall include a visual and audio warning device.

(2) Mud volume measuring device for accurately determining mud volumes required to fill the hole on trips.

(3) Mud return indicator to determine that returns essentially equal the pump discharge rate.

(4) Gas-detecting equipment to monitor the drilling mud returns.

C. *Mud Quantities.* The operator shall state in the Application for Permit to Drill the minimum quantities of mud material, including weighting material, to be maintained at the drill site for emergency use. Daily inventories of mud materials, including weighting material, shall be recorded and maintained at the drill site. Drilling operations shall be suspended in the absence of approved minimum quantities of mud materials for emergency use.

4. *Well Control Surveillance and Training.*

A. *Surveillance.* From the time drilling operations are initiated and until the well is completed or abandoned, a member of the drilling crew or the toolpusher shall maintain rig floor surveillance at all times, unless the well is secured with blowout preventers or cement plugs.

B. *Training.* Company and drilling-contractor supervisory personnel including drillers shall be trained in and be knowledgeable of present-day well control methods. The operator shall maintain a record of such training on the facility. Training shall include:

(1) Abnormal pressure detection methods.

(2) Well control methods and procedures.

5. *Hydrogen Sulfide.* When drilling operations are undertaken to penetrate reservoirs known or expected to contain hydrogen sulfide (H_2S), or, if unknown, upon encountering H_2S, the following preventive measures shall be taken to control the effects of the toxicity, flammability, and corrosive characteristics of H_2S. Alternative equipment or procedures that achieve the same or greater levels of safety may be approved by the District Supervisor. When sulfur dioxide (SO_2), a product of combustion of H_2S, is present, the procedures outlined in the approved contingency plan required in paragraph 5A(3) of this Order shall be followed.

A. *Personnel Safety and Protection.* All personnel shall undergo an eardrum examination before assignment to H_2S prone areas. Personnel with perforated eardrums shall be prohibited from working in an H_2S environment.

(1) *Training Program.*

(a) All personnel, whether regularly assigned, contracted, or employed on an unscheduled basis, shall be informed as to the hazards of H_2S and SO_2. They shall also be instructed in the proper use of personnel safety equipment and informed of H_2S detectors and alarms, ventilation equipment, prevailing winds, briefing areas, warning systems, and evacuation procedures.

(b) Information relating to these safety measures shall be prominently posted on the drilling facility and on vessels in the immediate vicinity which are serving the drilling facility.

(c) To promote efficient safety procedures, an on-site H_2S safety program, which includes a weekly drill and training session, shall be established. Records of attendance shall be maintained on the drilling facility.

(d) All personnel in the working crew shall have been indoctrinated in basic first-aid procedures applicable to victims of H_2S exposure. During subsequent on-site training sessions and drills, emphasis shall be placed upon rescue and first aid for H_2S victims. Each drilling facility shall have the following equipment, and each crew member shall be thoroughly familiar with the location and use of these items:

(i) A first-aid kit.

(ii) Resuscitators, complete with face masks, oxygen bottles, and spare oxygen bottles.

(iii) A Stokes litter or equivalent.

(e) One person, who regularly performs duties on the drilling facility, shall be responsible for the overall operation of the on-site safety and training program.

(2) *Visible Warning System.* Wind direction equipment shall be installed at prominent locations to indicate to all personnel, on or in the immediate vicinity of the facility, the wind direction at all times for determining safe upwind areas in the event that H_2S is present in the atmosphere.

Operational danger signs shall be displayed from each side of the drilling ship or platform, and a number of rectangular red flags shall be hoisted in a manner visible to watercraft and aircraft. Each flag shall be of a minimum width of three feet and a minimum height of two feet. Each sign shall have a minimum width of eight feet and a minimum height of four feet, and shall be painted a high-visibility yellow color with black lettering of a minimum of 30.5 centimeters in height (12 inches) indicating: "DANGER—HYDROGEN SULFIDE—H_2S". All signs and flags shall be illuminated under conditions of poor visibility and at night when in use. These signs and flags shall be displayed to indicate the following operational conditions and requirements:

(a) *Moderate Danger.* When the threshold limit value of H_2S (10 parts per million) is reached, the signs will be displayed. If the concentration of H_2S reaches 20 parts per million, protective breathing apparatus shall be worn by all personnel, and all nonworking personnel shall proceed to the safe briefing areas.

(b) *Extreme Danger.* When H_2S is determined to have reached the injurious level (50 parts per million), the flags shall be hoisted in addition to the displayed signs.

All nonessential personnel or all personnel, as appropriate, shall be evacuated at this time. Radio communications shall be used to alert all known air- and watercraft in the immediate vicinity of the drilling facility.

(3) *Contingency Plan.* A contingency plan shall be developed prior to the commencement of drilling operations. The plan shall include the following:

(a) General information and physiological response to H_2S and SO_2 exposure.

(b) Safety procedures, equipment, training, and smoking rules.

(c) Procedures for operating conditions:

(i) Moderate danger to life.

(ii) Extreme danger to life.

(d) Responsibilities and duties of personnel for each operating condition.

(e) Designation of briefing areas as locations for assembly of personnel during Extreme Danger condition. At least two briefing areas shall be established on each drilling facility. Of these two areas, the one upwind at any given time is the safe briefing area.

(f) Evacuation plan.

(g) Agencies to be notified in case of an emergency.

(h) A list of medical personnel and facilities, including addresses and telephone numbers.

(4) *H_2S Detection and Monitoring Equipment.* Each drilling facility shall have an H_2S detection and monitoring system which activates audible and visible alarms before the concentration of H_2S exceeds its threshold limit value of 10 parts per million in air. This equipment shall be capable of sensing a minimum of five parts per million H_2S in air, with sensing points located at the bell nipple, shale shaker, mud pits, driller's stand, living quarters, and other areas where H_2S might accumulate in hazardous quantities. H_2S detector ampules shall be available for use by all working personnel. After H_2S has been initially detected by any device, frequent inspections of all areas of poor ventilation shall be made with a portable H_2S-detector instrument.

(5) *Personnel Protective Equipment.*

(a) All personnel on a drilling facility or aboard marine vessels serving the facility shall be equipped with proper personnel protective-breathing apparatus. The protective breathing apparatus used in an H_2S environment shall conform to all applicable Occupational Safety and Health Administration regulations and American National Standards Institute standards. Optional equipment, such as nose cups and spectacle kits, shall be available for use as needed.

(b) The storage location of protective breathing apparatus shall be such that they are quickly and easily available to all personnel. Storage locations shall include the following:

(i) Rig floor.

(ii) Any working areas above the rig floor.

(iii) Mud-logging facility.

(iv) Shale-shaker area.

(v) Mud pit area.

(vi) Mud storage area.

(vii) Pump rooms (mud and cement).

(viii) Crew quarters.

(ix) Each briefing area.

(x) Heliport.

(c) A system of breathing-air manifolds, hoses, and masks shall be provided on the rig floor and in the briefing areas. A cascade air-bottle system shall be provided to refill individual protective-breathing-apparatus bottles. The cascade air-bottle system may be recharged by a high-pressure compressor suitable for providing breathing-quality air, provided the compressor suction is located in an uncontaminated atmosphere. All breathing-air bottles shall be labeled as containing breathing-quality air fit for human usage.

(d) Workboats attendant to rig operations shall be equipped with protective breathing apparatus for all workboat crew members. Pressure-demand or demand-type masks, connected to a breathing-air manifold, and additional protective breathing apparatus shall be available for evacuees. Whenever possible, boats shall be stationed upwind.

(e) Helicopters attendant to rig operations shall be equipped with a protective breathing apparatus for the pilot.

(f) The following additional personnel safety equipment shall be available for use as needed:

(i) Portable H_2S detectors.

(ii) Retrieval ropes with safety harnesses to retrieve incapacitated personnel from contaminated areas.

(iii) Chalk boards and note pads located on the rig floor, in the shale-shaker area, and in the cement pump rooms for communication purposes.

(iv) Bull horns and flashing lights.

(v) Resuscitators.

(6) *Ventilation Equipment.* All ventilation devices shall be explosion-proof and situated in areas where H_2S or SO_2 may accumulate. Movable ventilation devices shall be provided in work areas and be multidirectional and capable of dispersing H_2S or SO_2 vapors away from working personnel.

(7) *Notification of Regulatory Agencies.* The following agencies shall be immediately notified under the alert conditions indicated:

(a) *Moderate Danger.*

(i) U.S. Geological Survey.

(ii) U.S. Coast Guard.

(b) *Extreme Danger.*

(i) U.S. Geological Survey.

(ii) U.S. Coast Guard.

(iii) Appropriate State agencies.

B. *Metallurgical Equipment Considerations.* Equipment used when drilling zones bearing H_2S shall be constructed of materials which, according to design principles, will be also to resist damage from the phenomena known variously as sulfide stress cracking, hydrogen embrittlement, or stress corrosion cracking. Such equipment includes drill pipe, casing, casing heads, blowout-preventer stack assemblies, kill lines, choke manifolds, and other related equipment. A knowledge of the various interactions between stress, environment, and the metallurgy employed is required for successful operation in H_2S environments. The following general practices are required for acceptable performance:

(1) *Drilling String.* Drill strings shall be designed consistent with the anticipated depth, conditions of the hole, and reservoir environment to be encountered. Care shall be taken to minimize exposure of the drill string to high stresses as much as is practical and consistent with the anticipated hole conditions to be encountered.

(2) *Casing.* Casing, couplings, flanges, and related equipment shall be designed for H_2S service. Field welding on casing (except conductor and surface strings) is prohibited unless approved by the District Supervisor.

(3) *Wellhead, Blowout Preventers, and Pressure Control Equipment.* The blowout-preventer stack assembly shall be designed in accordance with criteria evolved through technology of the latest state-of-the-art for H_2S Service. Surface equipment such as choke lines, choke manifold, kill lines, bolting, weldments, and other related well-killing equipment shall be designed and fabricated utilizing the most advanced technology concerning sulfide stress cracking. Elastomers, packing, and similar inner parts exposed to H_2S shall be resistant at the maximum anticipated temperature of exposure.

C. *Mud Program.*

(1) Either water- or oil-base muds are suitable for use in drilling formations containing H_2S if oil-base muds are used, cuttings shall be cleaned of oil prior to disposal into the ocean.

(2) A pH of 10.0 or above shall be maintained in a water-base mud system to control corrosion and prevent sulfide stress cracking.

(3) Consideration shall also be given to the use of H_2S scavengers in both water- and oil-base mud systems.

(4) Sufficient quantities of additives shall be maintained on location for addition to the mud system as needed to neutralize H_2S picked up by the system when drilling in formations containing H_2S.

(5) The application of corrosion inhibitors to the drill pipe to afford a protective coating or their addition to the mud system may be used as an additional safeguard to the normal protection of the metal by pH control and the scavengers mentioned above.

(6) Drilling mud containing H_2S gas shall be degassed at the optimum location for the particular rig configuration employed. The gases so removed shall be piped into a closed flare system and burned at a suitable remote stack.

D. *General Operations.* All personnel in the working area shall utilize H_2S protective-breathing apparatus when required, as specified in paragraph 5A(2). The normal fixed-point monitor system outlined in paragraph 5A(4) may be supplemented with portable H_2S detectors as conditions warrant.

(1) *Drill String Trips or Fishing Operations.* Every effort shall be made to pull a dry drill string while maintaining well control. If it is necessary to pull the drill string wet after penetration of H_2S-bearing zones, increased monitoring of the working area shall be provided and protective breathing apparatus shall be worn under conditions as outlined in paragraph 5A(2).

(2) *Circulating Bottoms-up from a Drilling Break, Cementing Operations, Logging Operations, or Well Circulation While Not Drilling.* After penetration of an H_2S-bearing zone, protective breathing apparatus shall be worn by those personnel in the working area in advance of circulating bottoms-up or when H_2S is indicated by the monitoring system in quantities sufficient to require protective breathing appartus under paragraph 5A(2), should this condition occur earlier.

(3) *Coring Operations in H_2S-bearing Zones.* Personnel protective-breathing apparatus shall be worn 10–20 stands in advance of retrieving the core barrel. Cores to be transported shall be sealed and marked for the presence of H_2S.

(4) *Abandonment or Temporary Abandonment Operations.* Internal well-abandonment equipment shall be designed for H_2S service.

(5) *Logging Operations after Penetration of Known or Suspected H_2S-bearing Zones.* Mud in use for logging operations shall be conditioned and treated to minimize the effects of H_2S on the logging equipment.

(6) *Stripping Operations.* Displaced mud returns shall be monitored and protective breathing apparatus worn if H_2S is detected at levels outlined for protective breathing apparatus under paragraph 5A(2).

(7) *Gas-cut Mud or Well Kick from H_2S bearing Zones.* Protective breathing apparatus shall be worn when an H_2S concentration of 20 parts per million is detected. Should a decision be made to circulate out a kick, protective breathing apparatus shall be worn prior to and subsequent to bottoms-up, and at any time during an extended kill operation that the concentration of H_2S becomes hazardous to personnel as defined in paragraph 5A(2)(a).

V40236 DEC 8 75 XUM

(8) *Drill String Precautions.* Precautions shall be taken to minimize drill string stresses caused by conditions such as excessive dogleg severity, improper stiffness rations, improper torque, whip, abrasive wear on tool joints, and joint imbalance. American Petroleum Institute Bulletin RP 7G shall be used as a guideline for drill string precautions. Tool-joint compounds containing free sulphur shall not be used. Proper handling techniques shall be employed to minimize notching, stress concentrations, and possible drill pipe failures.

(9) *Flare System.* The flare system shall be designed to safely gather and burn H_2S gas. Flare lines shall be located as far from the drilling facility as feasible in a manner to compensate for wind changes. The flare system shall be equipped with a pilot and an automatic igniter. Backup ignition for each flare shall be provided.

E. *Kick Detection and Well Control.* In addition to the requirements of paragraph 3B of this Order, all efforts shall be made to prevent a well kick as a result of gas-cut mud, drilling breaks, lost circulation, or trips for bit change. Drilling rate changes shall be evaluated for the possibility of encountering abnormal pressures, and mud weights adjusted in an effort to compensate for any hydrostatic imbalance that might result in a well kick.

In the event of a kick, the disposal of the well influx fluids shall be accomplished by one of the following alternatives, giving consideration to personnel safety, possible environmental damage, and possible facility well equipment damage:

Alternative A. To contain the well fluid influx by shutting in the well and pumping the fluids back into the formation.

Alternative B. To control the kick by using appropriate well-control techniques to prevent formation fracturing in open hole within the pressure limits of well equipment (drill pipe, casing, wellhead, blowout preventers and related equipment). The disposal of H_2S and other gases shall be through pressured or atmospheric mud-gas separator equipment, depending on volume and pressure of H_2S gas. The equipment shall be designed to recover drilling mud and to vent to the atmosphere and burn the gases separated. The mud system shall be treated to neutralize H_2S and restore and maintain the proper mud quality.

F. *Well Testing in an H_2S Environment.*

(1) *Procedures.*

(a) Well testing shall be performed with a minimum number of personnel in the immediate vicinity of the rig floor and test equipment to safety and adequately perform the test and maintain related equipment and services.

(b) Prior to initiation of the test, special safety meetings shall be conducted for all personnel who will be on the drill facility during the test, with particular emphasis on the use of personnel protective-breathing apparatus, first aid procedures, and the H_2S Contingency Plan.

(c) During the test, the use of H_2S detection equipment shall be intensified. All produced gases shall be vented and burned through a flare system which meets the requirements of paragraph 5D(9). Gases from stored test fluids shall be vented into the flare system.

(d) "No Smoking" rules in the approved Contingency Plan of paragraph 5A(3) of this Order shall be rigorously enforced.

(2) *Equipment.*

(a) Drill-etem test tools and wellhead equipment shall be suitable for H_2S service.

(b) Tubing which meets the requirements for H_2S service shall be used for drill stem testing. Drill pipe shall not be used for drill stem tests without the prior approval of the District Supervisor. The water cushion shall be thoroughly inhibited in order to prevent H_2S corrosion. The test string shall be flushed with treated fluid for the same purpose after completion of the test.

(c) All surface test units and related equipment shall be designed for H_2S service. Only competent personnel who are trained in and knowledgeable of the hazardous effects of H_2S shall be utilized in these tests.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved.

RUSSELL G. WAYLAND,
Chief, Conservation Division

MID-ATLANTIC OCS ORDER No. 3

Effective ----------

PLUGGING AND ABANDONMENT OF WELLS

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.15. The operator shall comply with the following minimum plugging and abandonment procedures which have general application to all wells drilled for oil and gas. Plugging and abandonment operations must not be commenced prior to obtaining approval from an authorized representative of the Geological Survey. Oral approvals shall be in accordance with 30 CFR 250.13. All departures from the requirements specified in this Order must be approved pursuant to 30 CFR 250.12(b).

1. *Permanent Abandonment.*

A. *Isolation in Uncased Hole.* In uncased portions of wells, cement plugs shall be spaced to extend 30.5 metres (100 feet) below the bottom to 30.5 metres (100 feet) above the top of any oil, gas, and fresh water zones so as to isolate them in the strata in which they are found and to prevent them from escaping into other strata. Additional cement plugs may be required to protect other minerals, or to prevent migration of fluids in the well bore. No more than 762.0 metres (2,500 feet) of uncased hole shall be left without a cement plug of at least 30.5 metres (100 feet) in length in wells requiring a mud weight in excess of 1.44kg/l (12.0 ppg) for control.

B. *Isolation of Open Hole.* Where there is open hole (uncased and open into the casing string above) below the casing, a cement plug shall be placed in the deepest casing string by (1) or (2) below, or in the event lost circulation conditions exist or are anticipated, the plug may be placed in accordance with (3) below:

(1) A cement plug placed by displacement method so as to extend a minimum of 30.5 metres (100 feet) above and 30.5 metres (100 feet) below the casing shoe.

(2) A cement retainer with effective back pressure control set not less than 15.2 metres (50 feet), nor more than 30.5 metres (100 feet), above the casing shoe with a cement plug calculated to extend at least 30.5 metres (100 feet) below the casing shoe and 15.2 metres (50 feet) above the retainer.

(3) A permanent type bridge plug set within 45.7 metres (150 feet) above the casing shoe with 15.2 metres (50 feet) of cement on top of the bridge plug. This plug shall be tested prior to placing subsequent plugs.

C. *Plugging or Isolating Perforated Intervals.* A cement plug shall be placed opposite all open perforations (perforations not squeezed with cement) extending a minimum of 30.5 metres (100 feet) above and 30.5 metres (100 feet) below the perforated interval or down to a casing plug, whichever is less. In lieu of the cement plug, the following two methods are acceptable, provided the perforations are isolated from the hole below:

(1) A cement retainer with effective back pressure control set not less than 15.2 metres (50 feet) not more than 30.5 metres (100 feet) above the top of perforated interval with a cement plug calculated to extend at least 30.5 metres (100 feet) below the bottom of the perforated interval and 15.2 metres (50 feet) above the retainer.

(2) A permanent type bridge plug set within 45.7 metres (150 feet) above the top of the perforated interval with 15.2 metres (50 feet) of cement on top of the bridge plug.

D. *Plugging of Casing Stubs.* If casing is cut and recovered, a cement plug 61 metres (200 feet) in length shall be placed to extend 30.5 metres (100 feet) above and 30.5 metres (100 feet) below the stub. A retainer may be used in setting the required plug.

E. *Plugging of Annular Space.* No annular space that extends to the ocean floor shall be left open to drilled hole below. If this condition exists, the annulus shall be plugged with cement.

F. *Surface Plug Requirement.* A cement plug of at least 45.7 metres (150 feet), with the top of the plug 45.7 metres (150 feet) or less below the ocean floor, shall be placed in the smallest string of casing which extends to the surface.

G. *Testing of Plugs.* The setting and location of the first plug below the top 45.7-metre (150-foot) plug, will be verified by either (1) placing a minimum pipe weight of 6,800.0 kilograms (15,000 pounds) on the plug, or where this plug is placed utilizing a cement retainer or bridge plug, it is only necessary that the setting of the retainer or bridge plug be verified by placing at least 6,800.0 kilograms (15,000 pounds) on it prior to placing cement on top.

H. *Mud.* Each of the respective intervals of the hole between the various plugs shall be filled with mud fluid of sufficient density to exert hydrostatic pressure exceeding the greatest formation pressure encountered while drilling such interval.

I. *Clearance of Location.* All casing and piling shall be severed and removed to that depth below the ocean floor approved by the Area Supervisor after a review of data on the ocean bottom conditions. The operator shall verify that the location has been cleared of all obstructions.

2. *Temporary Abandonment.* Any drilling well which is to be temporarily abandoned shall be mudded and cemented as required for permanent abandonment except for requirements P and I of section 1 above. When casing extends above the ocean floor, a mechanical bridge plug (retrievable or permanent) shall be set in the casing between 4.6 and 61.0 metres (15 and 200 feet) below the ocean floor.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

MID-ATLANTIC OCS ORDER No. 4

Effective ----------

SUSPENSIONS AND DETERMINATION OF WELL PRODUCIBILITY

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.12(d)(1). An OCS lease provides for extension beyond its primary term for as long as oil or gas may be produced from the lease in paying quantities. The term "paying quantities" as used herein means production in quantities sufficient to yield a return in excess of operating costs. An OSC lease may be maintained beyond the primary term, in the absence of actual production, when a suspension of production has been approved. All applications for suspension of production for an initial period should be submitted prior to the expiration of the term of a lease. The Area Supervisor may approve a suspension of production provided at least one well has been drilled on the lease and determined to be capable of being produced in paying quantities. The temporary or permanent abandonment of a well will not preclude approval of a suspension of production as provided in 30 CFR 250.12(d)(1). All departures from the requirements specified in this Order must be approved pursuant to 30 CFR 250.12(b).

A well may be determined to be capable of producing in paying quantities when the following requirements below have been met:

1. *Oil Wells.* A production test of at least two hours duration, following stabilization of flow.

2. *Gas Wells.* A deliverability test of at least two hours duration, following stabilization of flow, or a four-point back-pressure test.

3. *Well Data.* All pertinent engineering, geologic, and economic data shall be submitted to the Area Supervisor and will be considered in determining whether or not a well is capable of being produced in paying quantities.

4. *Witnessing and Results.* All tests must be witnessed by an authorized representative of the Geological Survey. Test data accompanied by operator's affidavit, or third-party test data, may be accepted in lieu of a witnessed test provided prior approval is obtained from the District Supervisor.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

MID-ATLANTIC OCS ORDER No. 5

Effective ----------

SUBSURFACE SAFETY DEVICES

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.41(b). The operator shall comply with the following requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b). All applications for approval under the provisions of this Order shall be submitted to the District Supervisor. Reference in this Order to approvals, determinations, or requirements are to those given or made by the Area Supervisor or his delegated representative.

1. *Installation.* All tubing installations open to hydrocarbon-bearing zones shall be equipped with a surface-controlled or other remotely controlled subsurface safety device, to be installed at a depth of 30.5 metres (100 feet) or more below the ocean floor unless, after application and justification, the well is determined to be incapable of flowing oil or gas. These installations shall be made within two days after stabilized production is established. The well shall not be left unattended while open to production before a subsurface safety device is installed.

A. *Shut-in Wells.* A tubing plug shall be installed in lieu of, or in addition to, other subsurface safety devices if a well has been shut in for a period of six months. Such plugs shall be set at a depth of 30.5 metres (100 feet) or more below the ocean floor and shall be of the pump-through type. All wells perforated and completed, but not placed on production, shall be equipped with a subsurface safety device or tubing plug within two days after completion.

B. *Injection Wells.* Subsurface safety devices above shall be installed in all injection wells unless, after application and justification, it is determined that the well is incapable of flowing which condition shall be verified annually.

2. *Design, Testing, and Inspection.* Subsurface safety devices shall be designed, adjusted, installed, and maintained to insure reliable operation. During testing and inspection procedures, the well shall not be left unattended while open to production unless a properly operating subsurface safety device has been installed in the well.

A. *Surface-Controlled Subsurface Safety Devices.*

(1) *Quality Assurance and Performance.* The operator shall use subsurface safety devices that comply with the minimum standards set forth in "API Spec 14 A, October 1973, Subsurface Safety Valves," for quality assurance including design, material, and functional test requirements, and for verification of independent party performance testing and manufacturer functional testing of such valves.

(2) *Installation and Testing.* The operator shall comply with the minimum recommended practices set forth in "API RP 14 B, October 1973, Design, Installation, and Operation of Subsurface Safety Valve Systems," which contain procedures for design calculations, safe installation, and operating and testing. Each surface-controlled subsurface safety device installed in a well shall be tested in place for proper operation when installed, or reinstalled, at least monthly for the next six months and quarterly thereafter. If the device does not operate properly, it shall be removed, repaired, and reinstalled or replaced and tested to insure proper operation.

B. *Tubing Plugs.* A shut-in well equipped with a tubing plug shall be inspected for leakage by opening the well to possible flow at intervals not exceeding six months. If sustained liquid flow exceeds 400 cm^3/min (.014 ft^3/min), or gas flow exceeds 424.8 l/min (15 ft^3/min), the plug shall be removed, repaired, and reinstalled or an additional tubing plug installed to prevent leakage.

3. *Temporary Removal.* Each wireline- or pumpdown-retrievable subsurface safety device may be removed, without further authorization or notice, for a routine operation which does not require approval of a Sundry Notice and Report on Wells (Form 9–331) for a period not to exceed fifteen days. The well shall be clearly identified as being without a subsurface safety device and shall not be left unattended while open to production. The provisions of this paragraph are not applicable to the testing and inspection procedures specified in section 2 (Design, Testing, and Inspection) above.

4. *Additional Protective Equipment.* All tubing installations in which a wireline- or pumpdown-retrievable subsurface safety device is to be installed shall be equipped with a landing nipple, with flow couplings or other protective equipment above and below, to provide for setting of the subsurface safety device. All wells in which a subsurface safety device or tubing plug is installed shall have the tubing-casing annulus packed off above the uppermost open casing perforations. The control system for all surface-controlled subsurface safety devices shall be an integral part of the platform shut-in system.

5. *Departures.* All departure applications will be considered for approval pursuant to 30 CFR 250.12(b) and the requirements of this Order. All applications for departures shall include a detailed statement of the well conditions, efforts made to overcome any difficulties, and proposed alternate safety measures.

6. *Emergency Action.* All tubing installations open to hydrocarbon-bearing zones and not equipped with a subsurface safety device as permitted by this Order shall be clearly identified as not being so equipped, and a subsurface safety device or tubing plug shall be available at the field location. In the event of an emergency, such device or plug shall be promptly installed, due consideration being given to personnel safety.

7. *Records.* The operator shall maintain the following records for a minimum period of one year for each subsurface safety devices and tubing plug installed, and these records shall be available to any authorized representative of the Geological Survey.

A. *Field Records.* Individual well records shall be maintained at or near the field and shall include, as a minimum, the following information:

(1) A record which will give design and other information; i.e., make, model, type, spacers, bean and spring size, pressure, etc.

(2) Verification of assembly by a qualified person in charge of installing the device and installation date.

(3) Verification of setting depth and all operational tests as required in this Order.

(4) Removal date, reason for removal, and reinstallation date.

(5) A record of all modifications of design in the field.

(6) All mechanical failures or malfunctions, including sand cutting, of such devices, with notation as to cause or probable cause.

(7) Verification that failure report was submitted.

B. *Other Records.* The following records, as a minimum, shall be maintained at the operator's office:

(1) Verified design information of subsurface safety devices for the individual well.

(2) Verification of assembly and installation according to design information.

(3) All failure reports.

(4) All laboratory analysis reports of failed or damaged parts.

(5) Quarterly failure-analysis report.

8. *Reports.* Well completion reports (Form 9–330) and any subsequent reports of workover (Form 9–331) shall include the type and the depth of the subsurface safety devices and tubing plugs installed.

To establish a failure-reporting and corrective-action program as a basis for reliability and quality control, each operator shall submit a quarterly failure-analysis report to the Area Supervisor, identifying mechanical failures by lease and well, make and model, cause or probable cause of failure, and action taken to correct the failure. The report shall be submitted within 30 days following the periods ending December 31, March 31, June 30, and September 30 of each year.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

MID-ATLANTIC OCS ORDER No. 7

Effective ----------

POLLUTION AND WASTE DISPOSAL

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.43. The operator shall comply with the following requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Pollution Prevention.* In the conduct of all oil and gas operations, the operator shall prevent pollution of the ocean. Furthermore, the disposal of waste materials into the ocean

V40236 DEC 8 75 XUM

shall not create conditions which will adversely affect the public health, life or property, aquatic life or wildlife, recreation, navigation, or other uses of the ocean.

A. *Liquid Disposal.*

(1) Drilling mud containing oil shall not be disposed of into ocean.

(2) The operator shall submit with the Application for Permit to Drill (Form 9–331C) a detailed list of drilling mud constituents and their concentrations, including the chemical composition of trade name components, and a list of the drilling mud additives which might be used to meet special drilling requirements. Drilling mud containing toxic substances shall be neutralized prior to disposal.

(3) Curbs, gutters, and drains on platforms and structures shall be installed and maintained in accordance with the provisions of OCS Order No. 8.

(4) Produced waste water disposal systems shall be designed and maintained so that the oil content of the effluent shall meet applicable requirements promulgated by the Environmental Protection Agency pursuant to the Federal Water Pollution Control Act as amended.

(a) A copy of the results of all analyses submitted to the Environmental Protection Agency shall be similarly submitted to the Area Supervisor, and a copy of the most recent analysis shall be maintained at the discharge site or field production headquarters and be available for inspection by Geological Survey personnel.

(b) Should an analysis indicate that the effluent does not meet the above requirements, corrective action shall be taken immediately. Approval to continue operations to aid in the identification and remedy of the problem shall be obtained from the Area Supervisor. Such approval shall be contingent upon submittal of a follow-up report to the Area Supervisor within 10 days.

(5) The disposal of produced waste water other than into the ocean shall have the method and location approved by the Area Supervisor.

B. *Solid Waste Disposal.*

(1) Drill cuttings, sand, and other solids containing oil shall not be disposed of into ocean unless all of the free oil has been removed.

(2) Mud containers and other solid waste materials shall be incinerated or transported to shore for disposal in accordance with Federal, State, or local requirements.

(3) All sewage shall be treated so that effluent shall meet applicable requirements promulgated by th Environmental Protection Agency pursuant to the Federal Water Pollution Control Act as amended.

(a) A copy of the results of all analyses submitted to the Environmental Protection Agency shall be similarly submitted to the Area Supervisor, and a copy of the most recent analysis shall be maintained at the discharge site or field production headquarters and be available for inspection by Geological Survey personnel.

(b) Should an analysis indicate that the effluent does not meet the above requirements, corrective action shall be taken immediately. Approval to continue operations to aid in the identification and remedy of the problem shall be obtained from the Area Supervisor. Such approval shall be contingent upon submittal of a follow-up report to the Area Supervisor within 10 days.

2. *Personnel, Inspections and Reports.*

A. *Personnel.* The operator's personnel shall be thoroughly instructed in the techniques of equipment maintenance and operation for the prevention of pollution. Nonoperator personnel shall be informed in writing, prior to executing contracts, of the operator's obligations to prevent pollution.

B. *Pollution Inspections.* All drilling and production facilities shall be inspected daily. All production facilities, such as separators, tanks, treaters, and other equipment shall be such as are necessary to control the maximum anticipated pressures and production of oil and gas. Maintenance or repairs as are necessary to prevent pollution of the ocean shall be undertaken immediately.

C. *Pollution Reports.* All pollution reports required shall be submitted on Form 9–1880, entitled *Pollution Report.*

(1) All spills of oil and liquid pollutants shall be recorded showing the cause, size of spill, and action taken, and the record shall be maintained and available for inspection by the District Supervisor. All spills of less than 2.4 cubic metres (15 barrels) shall be reported orally to the District Supervisor within 12 hours and shall be confirmed in writing.

(2) All spills of oil and liquid pollutants of 2.4 to 7.9 cubic metres (15 to 50 barrels) shall be reported orally to the District Supervisor immediately and shall be confirmed in writing.

(3) All oil spills of 2.4 cubic metres (15 barrels) or more shall also be reported to the Governor or his designee of each adjacent State within four hours.

(4) All spills of oil and liquid pollutants of a substantial size or quantity, which is defined as more than 7.9 cubic metres (50 barrels), and those of any size or quantity which cannot be immediately controlled, shall be reported orally without delay to the District Supervisor, the Coast Guard, and the Regional Administrator, Environmental Protection Agency. All oral reports shall be confirmed in writing.

(5) Operators shall notify each other upon observation of equipment malfunction or pollution resulting from another's operation.

3. *Pollution Control Equipment and Oil Spill Contingency Plan.*

A. *Equipment.* Standby pollution control equipment and materials shall be maintained by, or shall be available to, each operator at an offshore or onshore location. This shall include containment booms, skimming apparatus, cleanup materials and chemical agents, and shall be available prior to the commencement of operations. No chemicals shall be used without prior approval of the Area Supervisor. The equipment and materials shall be inspected monthly and maintained in good condition for use. The results of the inspections shall be recorded and maintained at the site.

B. *Oil Spill Contingency Plan.* The operator shall submit an oil spill contingency plan for approval by the Area Supervisor before consideration can be given to approval of an application for permit to conduct operations. This plan shall contain the following:

(1) Provisions to assure that full resource capability is known and can be committed during an oil discharge situation including the identification and inventory of applicable equipment, materials, and supplies which are available locally and regionally, both committed and uncommitted, and the time required for deployment.

(2) Provisions for varying degrees of response effort depending on the severity of the oil discharge.

(3) Establishment of notification procedures for the purpose of early detection and timely notification of an oil discharge including a current list of names, telephone numbers, and addresses of the responsible persons and alternates on call to receive notification of of an oil discharge, as well as the names, telephone numbers, and addresses of regulartory organizations and agencies to be notified when an oil discharge is discovered.

(4) Provisions for well defined and specific actions to be taken after discovery and notification of an oil discharge including:

(a) Specification of an oil discharge response operating team consisting of trained, prepared and available operating personnel.

(b) Predesignation of an oil discharge response coordinator who is charged with the responsibility and delegated commensurate authority for directing and coordinating response operations.

(c) A preplanned location for an oil discharge response operations center and a reliable communications system for directing the coordinated overall response operations.

4. *Spill Control and Removal.* Immediate corrective action shall be taken in all cases where pollution has occurred. Corrective action taken under the Oil Spill Contingency Plan shall be subject to modification when directed by the Area Supervisor. The primary jurisdiction to require corrective action to abate the source of pollution and to enforce the subsequent cleanup by the lessee or operator shall remain with the Area Supervisor pursuant to the provisions of this Order and the memorandum of understanding between the Department of Transportation (U.S. Coast Guard) and the Department of the Interior (U.S. Geological Survey) dated August 16, 1971.

5. *Annual Contingency Plan.* Annual contingency plan assessments will be conducted in conjunction with Plan of Development review. Upon request of the Area Supervisor, revised contingency plans reflecting changes in personnel, equipment, and methods shall be submitted.

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

MID-ATLANTIC OCS ORDER NO. 12

Effective ----------

PUBLIC INSPECTION OF RECORDS

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.97 and 43 CFR Part 2. Requests for information made under the Freedom of Information Act, 5 U.S.C. § 552, will be governed by the provisions of 43 CFR Part 2 (40 F.R. 7304, February 19, 1975.) Section 2.13 of 43 CFR says:

It is the policy of the Department of the Interior to make the records of the Department available to the public to the greatest extent possible, in keeping with the spirit of the Freedom of Information Act.

Section 2.15(c) of 43 CFR says:

A request for a record may be denied only if it is determined that (1) the record is exempt from disclosure (under the Freedom of Information Act) and (2) that withholding of the record is required by statute or Executive Order or supported by sound grounds.

The operator shall comply with the follow-requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Availability of Records.* It has been determined that certain records pertaining to leases and wells in the Outer Continental Shelf and submitted under 30 CFR 250 shall be made available for public inspection, as specified below, in the Area office. Certain other portions of these records have been determined to be exempt from disclosure. The reason for these exemptions is discussed in Section 4 of this Order.

A. *Form 9–152—Monthly Report of Operations.* All information contained on this form shall be available except the information required in the Remarks column.

B. *Form 9–330—Well Completion or Recompletion Report and Log.*

(1) Prior to commencement of production, all information contained on this form shall be available, except Item 1a, Type of Well; Item 4, Location of Well, at top production interval reported below: Item 22, if Multiple Completion, How many; Item 24, Producing Interval; Item 26, Type Electric and Other Logs Run; Item 28, Casing Record; Perforation Record; Item 32, Acid, Shot, Fracture, Cement Squeeze, etc.; Item 33, Production; Item 37, Summary of Porous Zones; and Item 38, Geologic Markers.

(2) After commencement of production, all information shall be available, except Item 37, Summary of Porous Zones; and Item 38, Geologic Markers.

(3) If production has not commenced after an elapsed time of five years from the date of filing Form 9–330 as required in 30 CFR 250.38(b), all information contained on this form shall be available, except Item 37, Summary of Porous Zones; and Item 38, Geologic Markers. Within 90 days prior to the end of the 5-year period, the lessee or operator shall file a Form 9–330 containing all information requested on the form, except Item 37, Summary of Porous Zones; and Item 38, Geologic Markers, to be made available for public inspection. Objections to the release of such information may be submitted with the completed Form 9–330.

C. *Form 9–331—Sundry Notices and Report on Wells.*

(1) When used as a "Notice of Intention to" conduct operations, all information contained on this form shall be available, except Item 4, Location of Well, at top production interval; and Item 17, Describe Proposed or Completed Operations.

(2) When used as a "Subsequent Report of" operations, and after commencement of production, all information contained on this form shall be available, except information under Item 17 as to subsurface locations and measured and true vertical depths for all markers and zones not placed on production.

D. *Form 9–331C—Application for Permit to Drill, Deepen or Plug Back.* All information contained on this form, and location plat attached thereto, shall be available, except Item 23, Proposed Casing and Cementing Program.

E. *Form 9–1869—Quarterly Oil Well Test Report.* All information contained on this form shall be available.

F. *Form 9–1870—Semi-Annual Gas Well Test Report.* All information contained on this form shall be available.

G. *Multi-point Back Pressure Test Report.* All information contained on this form used to report the results of required multi-point back pressure test of gas wells shall be available.

H. *Sales of Lease Production.* Information contained on monthly Geological Survey computer printout showing sales volumes, value, and royalty of production of oil, condensate, gas and liquid products, by lease, shall be made available.

2. *Filing of Reports.* All reports on Forms 9–152, 9–330, 9–331, 9–331C, 9–1869, 9–1870, and the forms used to report the results of multi-point back pressure tests, shall be filed in accordance with the following: All reports submitted on these forms shall include a copy with the words "Public Information" shown on the lower right-hand corner. All items on the form not marked "Public Information" shall be completed in full; and such forms, and all attachments thereto, shall not be available for public inspection. The copy marked "Public Information" shall be completed in full, except that the items described in 1(A), (B), (C), and (D) above, and the attachments relating to such items, may be excluded. The words "Public Information" shall be shown on the lower right-hand corner of this set. This copy of the form shall be made available for public inspection.

3. *Availability of Inspection Records.* All accident investigation reports, pollution incident reports, facilities inspection data, and records of enforcement actions are also available for public inspection.

4. *Information Exempt from Public Inspection.* It has been determined that certain information as discussed in paragraphs 1.A, 1.B, 1.C, 1.D, and 2 of this Order is exempt from disclosure under exemption 9 of the Freedom of Information Act (5 U.S.C. § 552(b)(9).) This information has been determined to qualify as "geological and geophysical information and data including maps concerning wells."

HARRY A. DUPONT,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

SHIPPERS ADVISORY COMMITTEE MEETING

Postponement of Public Meeting

The December 9, 1975, meeting of the Shippers Advisory Committee, announced in the November 24, 1975, issue of the FEDERAL REGISTER (40 FR 54452), is postponed until January 6, 1976, and will be held in the Village Green Recreation Building, 7300 Route 60, Vero Beach, Florida, at 10:30 a.m., local time. This notice is issued pursuant to the provisions of § 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770). The committee is established under Marketing Order No. 905 (7 CFR Part 905), which regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. This regulatory program is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). At its meeting of December 2, 1975, the committee recommended regulations it deemed appropriate to the current supply situation and requested that the meeting scheduled for December 9, 1975, be postponed until January 6, 1976.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813–682–3103.

Dated: December 3, 1975.

DONALD E. WILKINSON,
Administrator.

Agricultural Stabilization and Conservation Service

AGRICULTURAL CONSERVATION PROGRAM

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Agricultural Stabilization and Conservation Service, Department of Agriculture, has prepared a draft environmental statement on the Agricultural Conservation Program, USDA–ASCS–ES (Adm.) 75–1. The Agricultural Conservation Program was authorized under sections 7 to 15, 16(a) and 17 of the Soil Conservation and Domestic Allotment Act and Title X of the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93–86). It provides cost-sharing assistance to farmers and ranchers in establishing measures for soil and water conservation, environmental protection and enhancement, wildlife improvement and other similar purposes. The program will place emphasis on carrying out long-term and enduring type measures under annual or long-term cost-share agreements.

The impact of this program on the environment will generally be beneficial. Major adverse environmental effects are not anticipated in implementing this program. Some minor impacts may occur, principally during the construction of certain of the practices such as noise, dust and fumes from machinery operation, soil open for potential erosion, some wildlife habitat disturbed, etc.

This draft statement was filed with the Council on Environmental Quality on November 5, 1975. Copies of the statement have been forwarded to all State Clearinghouses, various conservation and environmental organizations and Federal agencies as outlined in the CEQ guidelines. To assist in implementing this program early in 1976, we wish to receive any comments on the draft statement by January 5, 1976.

Copies of the statement are available for inspection during regular working hours at USDA, Agricultural Stabilization and Conservation Service, Room 4702 South Building, 14th and Independence Avenue, SW., Washington, D.C. 20250, and at all State offices for the Agricultural Stabilization and Conservation Service. A limited number of single copies are available upon request at the Washington, D.C. office.

Comments concerning the draft statement should be addressed to the Director, Environmental Quality and Land Use Division, Agricultural Stabilization

V40236 DEC 8 75 D XUM

and Conservation Service, Room 4091 South Building, 14th and Independence Avenue, SW., Washington, D.C. 20250.

All comments must be received on or before January 5, 1976, in order to be sure of consideration in the preparation of the final environmental impact statement.

Signed at Washington, D.C. on December 2, 1975.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

Food and Nutrition Service

NATIONAL SCHOOL LUNCH PROGRAM, SCHOOL BREAKFAST PROGRAM, SPECIAL MILK PROGRAM, AND COMMODITY ONLY SCHOOLS

Income Poverty Guidelines for Determining Eligibility for Free and Reduced Price Meals and Free Milk

This notice amends the Secretary's income poverty guidelines to substitute schedules showing the guidelines levels when increased by 95 percent for the previous schedules showing the levels when increased by 75 percent. Public Law 94-105, enacted October 7, 1975 amends the requirements for reduced price lunches specified in section 9 of the National School Lunch Act (42 U.S.C. 1758). As amended, this section requires that all schools participating in the National School Lunch Program, or utilizing commodities donated by the Department, provide free lunches to children from families whose income is at or below the applicable family-size income level in the Secretary's income poverty guidelines, and requires that schools provide lunches at a reduced price to children from families whose income is above the income level prescribed by State educational agencies for free meals, and below 195 percent of the applicable family-size income level in the Secretary's income poverty guidelines.

Also, the law adds subsection (a) to section 12 of the National School Lunch Act (42 U.S.C. 1760) to provide that the value of assistance to children under the Act may not be considered as income under any Federal or State laws. Section 11(b) of the Child Nutrition Act of 1966 (42 U.S.C. 1780) contains a like provision which is applicable to the School breakfast and Special Milk Programs.

Section 4(e) of the Child Nutrition Act of 1966 (42 U.S.C. 1773(e)) requires that free and reduced price breakfasts be served in the School Breakfast Program under the same conditions as are established under the National School Lunch Act for free and reduced price lunches. Section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1772) provides that children who qualify for free lunches under the Secretary's guidelines shall also be eligible for free milk.

Under the legislation, each State educational agency is required to prescribe income guidelines for both free and reduced price meals and free milk by family size, for use by schools in the State. In the case of free meals and free milk, the State guidelines may not be less than the applicable family size income level prescribed by the Secretary and may not exceed the Secretary's guidelines by more than 25 percent. The maximum eligibility criteria for reduced price meal service must be established at 95 percent in excess of the Secretary's guidelines.

Pursuant to section 9 of the National School Lunch Act, as amended, and sections 3 and 4(e) of the Child Nutrition Act of 1966, as amended, the income poverty guidelines for determining eligibility for free and reduced price meals in the National School Lunch Program, School Breakfast Program, and commodity only schools and for free milk in schools in the Special Milk Program during fiscal year 1976 are prescribed by the Secretary in the following tables. Also included, for the convenience of State educational agencies, are the Secretary's income poverty guidelines when increased by 25 percent and when increased by 95 percent. The increased figures represent the maximum levels which may be prescribed by State educational agencies in determining eligibility for free meals and free milk, and the mandatory level for determining eligibility for reduced price meals, respectively. The Secretary's guidelines remain the minimum level for free meals and free milk; all children at or below such levels shall be served a free meal and free milk. Guidelines for the island of Guam are identical to those established for the State of Hawaii, due to comparable costs of living.

Income poverty guidelines, fiscal year 1976 (48 States, District of Columbia, Territories excluding Guam)

Family size	Secretary's guidelines, fiscal year 1976	Guidelines when increased by— 25 percent	95 percent
1	$2,580	$3,230	$5,040
2	3,390	4,240	6,620

9	9,430	11,770	18,370
10	10,100	12,620	19,690
11	10,780	13,470	21,010
12	11,460	14,320	22,330
Each additional family member	680	850	1,320

The Secretary's income poverty guidelines are based on the previous year's poverty level adjusted for the year-to-year change in the Consumer Price Index. This procedure is consistent with the basic procedure used by the Bureau of the Census in updating its latest statistics on poverty levels.

"Income," as the term is used in this notice, is similar to that defined in the Bureau of the Census report, "Characteristics of the Low-Income Population: 1971," Consumer Income, Current Population Reports, series P-60, No. 86, December 1972. "Income" means income before deductions for income taxes, employees' social security taxes, insurance premiums, bonds, etc. It includes the following:

(1) Monetary compensation for services, including wages, salary, commission, or fees; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) social security payments; (5) dividends or interest on savings or bonds, income from estates or trusts, or net rental income; (6) public assistance or welfare payments; (7) unemployment compensations; (8) Government civilian employee or military retirement or pension or veterans' payments; (9) private pensions or annuities; (10) alimony or child support payments; (11) regular contributions from persons not living in the household; (12) net royalties; and (13) other cash income. Other cash income would include cash amounts received or withdrawn from any source including savings, investments, trust accounts, and other resources which would be available to pay the price of a child's meal.

"Income," as the term is used in this notice, does not include any income or benefits received under any Federal program which are excluded from consideration as income by any legislative prohibition, for example, income received by volunteers for services performed in the National Older Americans Volunteer Program as stipulated in the 1973 amendments to the Older Americans Act of 1965, Public Law 93-29 (87 Stat. 30); nor does the term include income used for the following special hardship conditions which could not be reasonably anticipated or controlled by the household: (1) Unusually high medical expenses; (2) shelter costs in excess of 30 percent of income as defined herein;

(3) special education expenses due to the mental or physical condition of a child; and (4) disaster or casualty losses. Furthermore, the value of assistance to children or their families shall not be considered as income if prohibited by the authorizing legislation, e.g., the National School Lunch Act, the Child Nutrition Act of 1966, and the Food Stamp Act of 1964.

In applying guidelines, school food authorities may consider both the income of the family during the past 12 months and the family's current rate of income to determine which is the better indicator of the need for free and reduced-price meals: *Provided, however,* that children whose parents or guardians become unemployed shall be eligible for free or reduced price meals or free milk during the period of unemployment, if the loss of income causes the family income to be within the eligibility criteria of the school food authority.

Effective Date. This notice shall be effective as of October 7, 1975.

Dated: December 1, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

FOREIGN AVAILABILITY SUBCOMMITTEE OF THE NUMERICALLY CONTROLLED MACHINE TOOL TECHNICAL ADVISORY COMMITTEE

Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Foreign Availability Subcommittee of the Numerically Controlled Machine Tool Technical Advisory Committee will be held on Tuesday, January 13, 1976 at 1:00 p.m. in Room 1851, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Foreign Availability Subcommittee of the Numerically Controlled Machine Tool Technical Advisory Committee was initially established on July 10, 1973. On July 15, 1975, the Director, Office of Export Administration approved the reestablishment of the Subcommittee, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to numerically controlled machine tools, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Foreign Availability Subcommittee was formed to determine the extent of foreign capability in numerically controlled technology.

The agenda for the meeting is: (1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion of additional means of collecting foreign availability information on Free World non-COCOM countries.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1620, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/967-4196.

Dated: December 3, 1975.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

National Bureau of Standards

CENTER FOR BUILDING TECHNOLOGY ADVISORY COMMITTEE

Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. III, 1973), notice is hereby given that the Center for Building Technology Advisory Committee will hold a meeting from 9 a.m. to 4 p.m. on January 13, 1976, in room 209 on the 2nd floor of the McGraw-Hill Building, 1221 Avenue of the Americas, New York, New York.

The Committee was established in January 1973 to advise the Department of Commerce on matters relating to the Nation's needs in building research and technology. The Committee consists of 19 members, balanced on the basis of their knowledge in such building areas as products, materials and equipment; construction unions; construction contractors (general and specialized); the design professions; the home building industry; owner-builders' financing, standards and codes; consumer interests; and State and local governments.

The purpose of this meeting is to obtain the Committee's advice on approaches for more effective interaction of the Center with the building community. The meeting agenda will address the Center's activities in development and implementation of energy-conservation performance standards for buildings, programs for coordination of building dimensions as part of a metric conversion effort, and other matters which the Chairman may deem appropriate to discuss.

The public will be permitted to attend, to file written statements, and, to the extent time permits, to present oral statements. Questions or comments on the agenda should be submitted in writing before January 9, 1976, to the Committee Control Officer. Approximately 25 seats will be available for the public.

Copies of the minutes will be available on request thirty (30) days after the meeting.

Inquiries may be addressed to the Committe Control Officer, Dr. Richard N. Wright, Director, Center for Building Technology, Building 226, Room B-250, National Bureau of Standards, Washington, D.C. 20234 (phone 301-921-3377).

Dated: December 3, 1975.

ERNEST AMBLER,
Acting Director.

NIH GRANTS PEER REVIEW SYSTEM

Notice of Public Hearings

Notice is hereby given that the National Institutes of Health (NIH) Grants Peer Review Study Team plans to hold a series of three public hearings to solicit information from the scientific community and other interested groups or individuals in conjunction with its study of the NIH "grants peer review" system, previously announced in the FEDERAL REGISTER on September 4, 1975 (40 FR 40870).

Some of the general topics for which information is solicited include:

1. Adequacy of the total review system, e.g.

a. The effectiveness of the system in serving and responding to societal needs and expectations for biomedical research on disease-related problems.

b. The effectiveness of the system in assisting in maintenance of a strong, high quality national biomedical science base.

c. The extent to which the system assists in meeting the best standards of public accountability for expenditure of public funds.

2. Adequacy of the initial scientific review.

V40236 DEC 8 75 XUM

3. Adequacy of the Council review.
4. Adequacy of the priority rating system.
5. Impact of the Privacy Act of 1974.
6. Impact of the Freedom of Information Act, as amended in 1974.
7. Impact of the Federal Advisory Committee Act.
8. Recommendations as to how the present Grants Peer Review System can be improved.

The hearings are open to interested members of the public and will be held from 9 a.m. until 5 p.m. as follows:

February 12, 1976—Chicago, Ill., 219 S. Dearborn Street, Rm. 204A.

February 19, 1976—San Francisco, Calif., 555 Battery Street, Rm. 503.

February 26, 1976—Bethesda, Md., National Institutes of Health, 9000 Rockville Pike, Bldg. 1, 3rd floor, Wilson Hall.

Attendance and the number of presentations will be limited to the time and space available. Thus, all individuals wishing to attend or present statements at these hearings should contact Dr. Mathilde Solowey, Executive Secretary, NIH Grants Peer Review Study Team, Room 4A35, Bldg. 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, (301) 496–1231, by 5:00 p.m. E.S.T., January 16, 1976, stating which hearing site they wish to attend, and whether or not they wish to make a presentation.

Those planning to make a presentation must file a written statement or detailed summary of their presentation with the Executive Secretary before 5:00 p.m. E.S.T. on January 30, 1976. Only speakers discussing subjects relevant to the study will be scheduled.

Initially, each speaker will be limited to a maximum of ten minutes, although more time may be available depending on the number of scheduled speakers.

Those who cannot attend the hearings, but would like to submit a written statement, are encouraged to do so.

Dated: December 1, 1975.

DONALD S. FREDRICKSON,
Director, NIH.

Office of Education

ADVISORY COUNCIL ON FINANCIAL AID TO STUDENTS

Notice of Public Meeting

Notice is hereby given, pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), that the next meeting of the Adivsory Council on Financial Aid to Students will be held on February 9 and 10, 1976, from 9:00 a.m. to 4:30 p.m., in Room 3000 (Assistant Secretary Conference Room), Federal Office Building #6, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

The Advisory Council on Financial Aid to Students is established under Section 499(a) of the Higher Education Act of 1965, as amended (20 U.S.C. 1089). The Committee shall advise the Commissioner on matters of general policy arising in the administration by the Commissioner of programs relating to financial assistance to students and on the evaluation of the effectiveness of these programs.

The meeting of the Committee shall be open to the public. The proposed agenda includes:

1. Deliberation on twenty-one written papers by Council members on Federal financial aid programs.

2. Matters pertaining to content of Council's Second Annual Report.

Records shall be kept of all Committee proceedings and shall be available for public inspection at the Council's Office located in Room 4669, Regional Office Building #3, 7th and D Streets, SW., Washington, D.C. 20202.

Signed at Washington, D.C. on December 3, 1975.

WARREN T. TROUTMAN,
OE Delegate.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N–75–458]

CINNAMON LAKE

Notice of Hearing

In the matter of Cinnamon Lake, OILSR No. 0–0987–41–4, Doc. No. 75–248–IS, Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d).

Notice is hereby given that: 1. Cinnamon Lake, Avland Development Company, John F. Shoemaker, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90–448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued October 22, 1975, which was sent to the developer pursuant to 15 U.S.S. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Cinnamon Lake, located in Ohio, contain untrue statements of material fact or omit to state material facts required to be stated therein or necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received November 18, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), *it is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street SW., Washington, D.C., on January 29, 1976, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C. 20410 on or before January 15, 1976.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

Dated: November 25, 1975.

JAMES W. MAST,
Administrative Law Judge.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–334]

DUQUESNE LIGHT CO., ET AL. (BEAVER VALLEY POWER STATION, UNIT 1)

Order Convening Evidentiary Hearing

The Atomic Safety and Licensing Board was informed in a telephonic conference call on December 1, 1975 that all parties are available and ready to proceed with additional matters at an evidentiary hearing, and that December 16, 1975 is a convenient date. The Board was informed by Duquesne Light Company, *et al.* (Applicants) that a motion would be filed for a low power testing license, not to exceed one percent[1] of full power, within this week.

Wherefore, it is ordered, In accordance with the Atomic Energy Act, as amended, and the Rules of Practice of the Nuclear Regulatory Commission, that a session of evidentiary hearings shall convene at 9:00 a.m. on Tuesday, December 16, 1975

[1] This one percent limit appears consistent with the application of *expressio unius est exclusio alterius* to Section 50.57(c) of the Commission's rules. In addition, the Appeal Board has recently applied a similar interpretation in holding that the specifics stated in a rule are controlling over the general language. *In the Matter of Toledo Edison Company, et al.*, ALAB–300, Slip Op., page 15, citing *Ginsburg v. Popkin*, 285 U.S. 204, 208 (1932): "General language of a statutory provision, although broad enough to include it, will not be held to apply to a matter specifically dealt with in another part of the same enactment."

in Courtroom No. 2, 8th Floor, U.S. District Court, U.S. Post Office and Courthouse, 7th and Grand Streets, Pittsburgh, Pennsylvania.

Issued: December 2, 1975, Bethesda, Maryland.

ATOMIC SAFETY AND LICENSING BOARD,
SAMUEL W. JENSCH,
Chairman.

[FR Doc.75–32884 Filed 12–5–75;8:45 am]

[Docket No. 50–482A]

KANSAS GAS AND ELECTRIC CO. AND KANSAS CITY POWER AND LIGHT CO. (WOLF CREEK GENERATING STATION, UNIT NO. 1)

Rescheduling Prehearing Conference

Pursuant to the request of counsel for all parties at a telephone conference held this date, and for good cause shown, the previously scheduled prehearing conference in the above-captioned proceeding is hereby rescheduled for Friday, January 2, 1976, at 9 a.m. local time at the Nuclear Regulatory Commission Hearing Room, 5th Floor, East West Towers, 4350 East-West Highway, Bethesda, Maryland. The prehearing conference will consider the matters and issues described in the original Order therefor, which notice and order is incorporated herein by reference.

It is so ordered.

Dated at Bethesda, Maryland, this 2nd day of December, 1975.

The Atomic Safety and Licensing Board.

MARSHALL E. MILLER,
Chairman.

[Docket No. P–564–A]

PACIFIC GAS AND ELECTRIC CO.

Receipt of Partial Application for Construction Permits and Facility License: Time for Submission of Views on Antitrust Matters

Pacific Gas and Electric Company (the applicant), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, dated August 14, 1975, in connection with their plans to construct and operate two reactors in Stanislaus County, California. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portions of the application consisting of an Environmental Report and the Preliminary Safety Analysis Report (PSAR) pursuant to § 2.101 of Part 2, are expected to be filed in September 1976 and April 1977, respectively. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

A copy of the partial application will be available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Local Public Document Room, Stanislaus County Free Library, 1500 I Street, Modesto, California 95345. Docket No. P–564–A has been assigned to the application and it should be referenced in any correspondence relating to it.

Any persons who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before January 30, 1976.

Dated at Bethesda, Md., this 21st day of November 1975.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Light Water Reactors Branch 2–3, Division of Reactor Licensing.

[FR Doc.75–32094 Filed 11–28–75;8:45 am]

[Docket No. 50–549]

POWER AUTHORITY OF THE STATE OF NEW YORK (GREENE COUNTY NUCLEAR POWER PLANT)

Hearing on Application for Construction Permit

Pursuant to the Atomic Energy Act of 1954, as amended (the Act), and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection," and Part 2, "Rules of Practice," notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board (Board), to consider the application filed under the Act by the Power Authority of the State of New York (the applicant), for a construction permit for a pressurized water reactor designated as the Greene County Nuclear Power Plant (the facility), which will be designed for operation at 3600 thermal megawatts with a net electrical output of approximately 1273 megawatts. The proposed facility is to be located in Greene County, New York.

The hearing, which will be scheduled to begin in the vicinity of the site of the proposed facility, will be conducted by an Atomic Safety and Licensing Board (Board), which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel. The Board consists of Dr. George A. Ferguson, Dr. Cadet H. Hand, Jr. and Frederic J. Coufal, Esquire, Chairman.

Pursuant to 10 CFR 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER at a later date.

Upon completion by the Commission's staff of a favorable safety evaluation of the application and an environmental review, and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Nuclear Reactor Regulation will consider making affirmative findings on Items 1–3, a negative finding on Item 4, and an affirmative finding on Item 5 specified below as a basis for the issuance of a construction permit to the applicant. In the event that a separate hearing is held with respect to a limited work authorization, Item 6 below describes the matters for consideration.

ISSUES PURSUANT TO THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

1. Whether in accordance with the provisions of 10 CFR 50.35(a): (a) The applicant has described the proposed design of the facility including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public;

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in the final safety analysis report;

(c) Safety features or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features or components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facility, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

2. Whether the applicant is technically qualified to design and construct the proposed facility;

3. Whether the applicant is financially qualified to design and construct the proposed facility; and

4. Whether the issuance of a permit for construction of the facility will be inimical to the common defense and security or to the health and safety of the public.

ISSUE PURSUANT TO NATIONAL ENVIRONMENTAL POLICY ACT OF 1969 (NEPA)

5. Whether, in accordance with the requirements of 10 CFR Part 51, the construction permit should be issued as proposed.

V 40 236 DEC 8 75 D XUM

ISSUES PURSUANT TO 10 CFR 2.761a (LIMITED WORK AUTHORIZATION)

6. Pursuant to 10 CFR 2.761a, a separate hearing and partial decision by the Board on issues pursuant to NEPA and general site suitability and certain other possible issues may be held and issued prior to and separate from the hearing and decision on other issues. In the event the Board, after the hearing, makes favorable findings on such issues, the Director of Nuclear Reactor Regulation may, pursuant to 10 CFR 50.10(e) authorize the applicant to conduct certain onsite work entirely at its own risk prior to completion of the remainder of the proceeding.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 2.4(n), the Board will determine without conducting a *de novo* evaluation of the application: (1) whether the application and the record of the proceeding contain sufficient information, the review of the application by the Commission's staff has been adequate to support the proposed findings to be made by the Director of Nuclear Reactor Regulation on Items 1–4 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permit proposed by the Director of Nuclear Reactor Regulation; and (2) whether the NEPA review conducted by the Commission's staff has been adequate.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1–5 above as a basis for determining whether a construction permit should be issued to the applicant.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with § 51.52(c) of 10 CFR Part 51: (1) determine whether the requirements of section 102(2) (A), (C), and (D) of NEPA and Part 51 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding for the permit with a view to determining the appropriate action to be taken; and (3) determine after weighing the environmental, economic, technical and other benefits against environmental and other costs, and considering available alternatives whether a construction permit should be issued, denied, or appropriately conditioned to protect environmental values.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held within sixty (60) days after the notice of hearing is published or at such other time as the Board deems appropriate, for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any required special prehearing conference, and within sixty (60) days after discovery has been completed or at such other time as the Board may specify, for the purpose of dealing with the matters specified in 10 CFR 2.752.

The Board will set the time and place for any special prehearing conference, prehearing conference and evidentiary hearing, and the respective notices will be published in the FEDERAL REGISTER.

Any person who does not wish, or is not qualified, to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may make an oral or written statement on the record. He does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of Items 1–5 above. Limited appearances will be permitted at the time of the hearing at the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission by February 6, 1976. The presiding Atomic Safety and Licensing Board may make further provision with respect to limited appearances subsequently during the course of this proceeding.

Any person whose interest may be affected by the proceeding, who wishes to participate as a party in the proceeding must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714. A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a suporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A petition for leave to intervene must be filed with the Secretary of the Commission and others as specified below by January 7, 1976. A petition for leave to intervene which is not timely will not be entertained absent a determination by the Board that the petitioner, in addition to the matters specified in 10 CFR 2.714(d), has made a substantial showing of good cause for failure to file on time. The reasons for the tardiness in filing a petition for leave to intervene, as well as the factors specified in 10 CFR 2.714(a)(1)–(4) shall be considered in making a determination whether there has been a substantial showing of good cause by the petitioner.

Pursuant to 10 CFR 2.101, the application and the Environmental Report required by 10 CFR 50.30(f), have been docketed without the full Preliminary Safety Analysis Report covering the matters in 10 CFR 50.34(a) and 50.34a, and without certain site suitability information required for an authorization to conduct certain onsite work in accordance with 10 CFR 50.10(e). Under 10 CFR 2.101, the omitted material should be filed by the applicant within six months. In view of this, any person who wishes to participate as a party in this proceeding pursuant to 10 CFR 2.714 need not set forth in any petition for leave to intervene required to be filed by January 7, 1976, any contentions related to the omitted material. A deadline for filing of other contentions relating to matters covered in the omitted material will be established by the Board subsequent to acceptance of the full PSAR for a detailed review. In all other aspects, said petition must meet the requirements of 10 CFR 2.714, namely, setting forth the interest of the petitioner in the proceeding, facts and reasons why intervention should be permitted, and a general statement as to the subject matter in the proceeding as to which intervention is sought.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicant by December 29, 1975.

Papers required to be filed in this proceeding shall be filed by mail or telegram addressed to the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR § 2.708, an original and twenty (20) conformed copies of each such paper with the Commission. A copy of any petition for intervention should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 and to Scott B. Lilly, Esquire, General Counsel, Power Authority of the State of New York, 10 Columbus Circle, New York, New York 10019 and Lex Larson, Esquire, LeBoeuf, Lamb, Leiby & McRae, 1757 N Street NW., Washington, D.C. 20036, attorneys for the applicant.

For further details, see the application for a construction permit dated September 12, 1975, and the applicant's environmental report dated September 12, 1975, which, along with any amendments or supplements thereto, are or will be available as noted above for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., between the hours of 8:30 a.m. and 5:00 p.m. on weekdays. Copies of those documents will also be available at the Catskill Public Library, Franklin Street, Catskill, New York for inspection by members of the public between the hours of 12:00 p.m.–8:00 p.m. on Mondays and Wednesdays; 10:00 a.m.–5:00 p.m. on Tuesdays, Thursdays, Fridays, and Saturdays. As they become available, a copy of the applicant's Preliminary Safety Analysis Report including site suitability information, the safety evaluation report by the Commission's Office of Nuclear Reactor Regulation, the draft and final environmental statements, the report of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permit, the transcripts of the prehearing conferences and of the hearing, and other relevant documents, will also be available at the above locations. Copies of the proposed construction permit and the ACRS report may be obtained, when available, by request to the Director, Division of Reactor Licensing, United States Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Office of Nuclear Reactor Regulation's safety evaluation and final environmental statement, when available, may be purchased at current rates, from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Washington, D.C. this 25th day of November 1975.

UNITED STATES NUCLEAR REGULATORY COMMISSION,
SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.75-32701 Filed 12-5-75;8:45 am]

POWER AUTHORITY OF THE STATE OF NEW YORK

[Docket No. 50-548]

Receipt of Partial Application for Construction Permit and Facility License; Time for Submission of Views on Antitrust Matters

Power Authority of the State of New York (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed a part of an application dated July 25, 1975, in connection with their plans to construct and operate a reactor in Greene County, New York. Greene County Nuclear Power Plant (the facility), will be a pressurized water reactor designed for operation at 3600 thermal megawatts with a net electrical output of approximately 1273 megawatts. This portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

In addition, the general information portion of the application and the Environmental Report were docketed on September 15, 1975, but without the full Preliminary Safety Analysis Report in accordance with 10 CFR 2.101. The Preliminary Safety Analysis Report was tendered but initially rejected and is expected to be re-submitted for docketing in the near future. A separate notice of receipt for this remaining portion will be published at that time. A notice of hearing is also being published separately dealing with radiological health and safety and environmental matters.

Copies of the individual portions of the application, as noted above, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Catskill Public Library, Franklin Street, Catskill, New York 12414.

Docket No. 50-549-A has been assigned to this antitrust portion of the application and it should be referenced in any correspondence relating to it. Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before February 6, 1976.

Dated at Bethesda, Maryland, this 19th day of November 1975.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Light Water Reactors Branch 2-3, Division of Reactor Licensing.

[FR Doc.75-32702 Filed 12-3-75;8:45 am]

[Docket No. 50-206]

SOUTHERN CALIFORNIA EDISON CO. AND SAN DIEGO GAS AND ELECTRIC CO.

Proposed Issuance of Amendment to Provisional Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR-13 issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees) for operation of the San Onofre Nuclear Generating Station Unit 1, located in San Diego County, California.

The license amendment would revise the Technical Specifications for the facility to incorporate requirements for periodic load bearing tests and visual inspections of the turbine deck and the turbine deck supporting structure. This is intended to verify the capability of the post-tensioned turbine deck and the associated steel supporting structure to withstand the worst loading combinations (normal, seismic and impact loading) assumed in the design of the new air pallet system which would support the spent fuel shipping cask during transfers across the turbine deck. Modifications to the cask handling system in addition to the proposed new air pallet system also involve proposed strengthening of the support structure at the south and north turbine deck extensions.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By January 7, 1976 the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject provisional operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Rollin E. Woodbury, Southern California Edison Company, Post Office Box 800, Rosemead, California 91770, and C. Hayden Ames, San Diego Gas and Electric Company, 111 Sutter Street, San Francisco, California 94104, attorneys for the licensees.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether

V40236 DEC 8 75 XUM

a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the Commission's letter to the licensee dated March 6, 1974, the licensee's report "Spent Fuel Shipping Cask Handling," dated March 21, 1975, and the proposed load bearing test and visual inspection of the turbine deck and structural supports (Proposed Change No. 42, dated November 11, 1975). All of these documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the San Clemente Public Library, 233 Granada Street, San Clemente, California 92672. Safety Evaluation Reports will be prepared by the Office of Nuclear Reactor Regulation for the license amendment and for the proposed facility modifications. The Safety Evaluation Reports and the license amendment, when issued, may be inspected at the above locations, and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 1st day of December 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,
Chief Operating Reactors Branch No. 1, Division of Reactor Licensing.

[FR Doc.75-32814 Filed 12-5-75;8:45 am]

[Docket No. P-599-A]

TENNESSEE VALLEY AUTHORITY

Receipt of Partial Application for Construction Permits and Facility Licenses: Time for Submission of Views on Antitrust Matters

Tennessee Valley Authority (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed one part of an application, dated September 2, 1975, in connection with their plans to construct and operate 2 pressurized water nuclear reactors on a site located near the boundary between the East Embayment Block of the Mississippi Embayment Province and the Nashville Dome Province. The portion of the application filed contains the information requested by the Attorney General for the purpose of an antitrust review of the application as set forth in 10 CFR Part 50, Appendix L.

The remaining portion of the application consisting of a Preliminary Safety Analysis Report accompanied by an Environmental Report pursuant to § 2.101 of Part 2, is expected to be filed during June, 1976. Upon receipt of the remaining portions of the application dealing with radiological health and safety and environmental matters, separate notices of receipt will be published by the Commission including an appropriate notice of hearing.

A copy of the partial application is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555. Docket No. P-599-A has been assigned to the application and it should be referenced in any correspondence relating to it.

Any person who wishes to have his views on the antitrust matters of the application presented to the Attorney General for consideration should submit such views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Chief, Office of Antitrust and Indemnity, Office of Nuclear Reactor Regulation, on or before January 19, 1976.

Dated at Bethesda, Md., this 11th day of November 1975.

For the Nuclear Regulatory Commission.

WALTER R. BUTLER,
Chief, Light Water Reactors Branch 1-2, Division of Reactor Licensing.

[FR Doc.75-30881 Filed 11-14-75;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.97, "Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant Conditions During and Following an Accident," describes a method acceptable to the NRC staff for complying with the Commission's requirements to provide instrumentation to monitor plant variables and systems during and following an accident in a light-water-cooled nuclear power plant.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.97 will, however, be particularly useful in evaluating the need for an early revision if received by February 6, 1976.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 1st day of December 1975.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

[FR Doc.75-32886 Filed 12-5-75;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 466-7]

ALTERNATIVE WASTE MANAGEMENT TECHNIQUES FOR BEST PRACTICABLE WASTE TREATMENT

Correction

Pursuant to section 304(d)(2) of the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92-500), the Environmental Protection Agency (EPA) gave notice on October 23, 1975 (40 FR 49599) that Alternative Waste Management Techniques for Best Practicable Waste Treatment has been published in final form.

The Notice of Availability which in the FEDERAL REGISTER of October 23, 1975 contained two errors which require correction as follows:

(1) The first sentence of the fifth paragraph which reads "The Environmental Protection Agency gave notice on March 25, 1975 (39 FR 11135) that *Alternative Waste Management Techniques for Best Practicable Treatment* was available in proposed form" is hereby revised to read "The Environmental Protection Agency gave notice on March 25, 1974 (39 FR 11135) that *Alternative Waste Management Techniques for Best Practicable Treatment* was available in proposed form."

(2) The last paragraph which gives information on ordering the report did not include the Municipal Construction Division indentification number. The last paragraph is hereby revised to read: "The report is available from the General Services Administration (8 FY), Centralized Mailing Lists Services, Building 41, Denver Federal Center, Denver, Colorado 80225. The title and number of the report are *Alternative Waste Management Techniques for Best Practicable Waste Treatment;* MCD-13; No. EPA-430/9-75-013."

Dated: December 2, 1975.

ANDREW W. BREIDENBACH,
Acting Assistant Administrator for Water and Hazardous Materials.

[FRL 467-1]

EFFLUENT STANDARDS AND WATER QUALITY INFORMATION ADVISORY COMMITTEE

Notice of Meeting

The Effluent Standards and Water Quality Information Advisory Committee has established a Toxics Substances Task Force to assist the Environmental Protection Agency in implementation of Section 307(a) of PL 92-500 (Toxic Substances Effluent Limitations).

The first workshop/meeting of the task force will be conducted at Washington, D.C. on Thursday, January 15 and Friday January 16, 1976. The workshop/meeting will begin at 9:30 a.m., January 15 and 16, Room 1112, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, Va.

The workshop/meeting will be devoted to a discussion and critique of the following:

I. RELATIONSHIP AND COVERAGE OF CURRENT AND PENDING TOXIC SUBSTANCES LEGISLATION AND REGULATIONS

Interpretation and effective implementation of Section 307(a) of PL 92-500 requires an understanding of related legislation and regulations. Accordingly, the following must be considered:

CURRENT LEGISLATION AND REGULATIONS

PL 92-500—Water Pollution Control Act—Sec. 307.
PL 92-532—Ocean Dumping Act.
PL 93-523—Safe Drinking Water Act.
PL 92-516—Federal Environmental Pesticide Control Act.
PL 92-596—Occupational Safety and Health Act.
PL 75-717—Federal Food, Drug and Cosmetic Act.
PL 86-613—Federal Hazardous Substances Act.

PROPOSED TOXIC SUBSTANCES CONTROL BILLS

H.R. 7664, McCollister; H.R. 7458, Brodhead; H.R. 7229, Eckhardt; and S. 776, Tunney; versions of the new and proposed Toxic Substance Control Act.

II. DEFINITION OF TOXIC SUBSTANCES—AQUATIC LIFE (PL 92-500)

It is necessary to define toxic substances in terms of aquatic life relating to population maintenance, diversity, and health. Population maintenance will be judged on effects related to growth, reproduction, species diversity, and survival.

III. METHOD OF DESIGNATING TOXIC MATERIAL (PL 92-500)

Alternatives to be considered:

A. Existing data base (literature).

B. Generic similarities in toxicity between chemicals with known toxicity levels and chemicals with unknown biological effect (this would be based on available data showing similarity of biological effects from materials with similar chemical structures).

C. Toxic effluent approach (toxic effluents having unknown combinations of designated toxic materials and unidentified materials. Bioassay would be used to determine toxicity to flow).

D. Designation of toxic materials and toxic effluents on basis of demonstrated ecological effect in receiving water. One of the above alternatives for designating a toxic material or a combination of these alternatives is to be considered instead of TL50 with arbitrary application factor added.

IV. SETTING OF TOLERANCE LIMITS (PL 92-500)

The mechanism for setting of tolerance limit must be accomplished in one or several of the following ways and should be specified in terms of concentrations rather than on mass loadings depending upon circumstances and dilution. Where mass loading may be high, a combination of the two may be needed. These levels can be set on:

A. Bioassay.

B. Community ecology of the receiving water.

C. By taking cognizance of intermittent levels of discharge (monitoring).

D. Variations of acceptable limits of discharge based on stream flow and stream concentration levels.

V. DEVELOPMENT OF BIOASSY METHODS

This bioassay method must be developed or selected so that it is suitable for identification of toxic materials and monitoring toxic flows. It should be simple enough so that technician level operators can get reliable results.

VI. DISCUSSION OF ES&WQIAC TOXIC SUBSTANCES TASK FORCE PLANS

The meeting will be open to the public and under the overall direction of the Committee Chairman. Since space is limited, call or write to Dr. Martha Sager, Chairman, or Mr. Martin Brossman, Executive Director, ES&WQIAC, EPA, Crystal Mall Bldg. #2, Washington, D.C. 20460, Telephone: Area Code (703) 557-7390.

MARTHA SAGER,
Chairman, ES&WQIAC.

[OPP-33000/345; FRL 465-6]

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street, SW, Washington, DC 20460.

On or before February 6, 1976, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW, Washington, DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after February 6, 1976.

Dated: November 26, 1975.

MARTIN H. ROGOFF,
Acting Director, Registration Division.

APPLICATIONS RECEIVED (OPP-33000/345)

EPA File Symbol 241-ELN. American Cyanamide Co., Agricultural Div., PO Box 400, Princeton NJ 08540. AVENGE, WILD OAT HERBICIDE. FEDERAL MARITIME COMMISSION

FARRELL LINES INC. AND PACIFIC FAR EAST LINE, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before December 18, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Edward Aptaker, Esquire, Morgan, Lewis & Bockius, Counselors at Law, 1800 M Street, N.W., Washington, D.C. 20036.

Agreement No. 10207, covers an agreement whereby Farrell Lines Incorporated (Farrell) appoints Pacific Far East Line, Inc. (PFEL) as principal agent in the major ports situated in California and as supervisory agents at ports in Oregon, Washington and British Columbia with respect to Farrell's West Coast/South Pacific freight service. PFEL shall perform all acts and functions customarily performed by a steamship agent, such as husbanding, solicitation and booking of cargo, entering and clearing of vessels, collection and remittance of freight and other moneys, and other agency responsibilities under terms and conditions set forth in the agreement.

By Order of the Federal Maritime Commission.

Dated: December 3, 1975.

FRANCIS C. HURNEY,
Secretary.

TROPICANA PRODUCTS, INC. ET AL.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before December 29, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination on unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Miss B. E. Smith, Assistant Secretary, Canaveral Port Authority, P.O. Box 267, Cape Canaveral, Florida 32920.

Agreement No. T-3166, between the Canaveral Port Authority (Port) and Tropicana Products, Inc., (formerly Fruit Industries, Inc.) (Tropicana), provides for the 50-year lease to Tropicana of certain premises, together with the exclusive right to wharf frontage in Brevard County, Florida, to be used as a fruit prcoessing facility. As compensation, Tropicana shall pay Port a ground rental in the amount of $400.00 per acre per year. In addition, Tropicana shall pay Port for the first 25 years of said term (thereafter subject to negotiation), as wharfage for commodities delivered by pipe lines between plants of Tropicana and ship, at the rate of one (.01¢) cent per barrel of forty-two (42) gallons. Ships docking at Port's marginal wharf for the receipt or the discharge of cargo in the interest of Tropicana, shall be subject to the Port's tariff for such dockage, and ships docking at Tropicana's leased wharf for the receipt or the discharge of cargo in the interest of Tropicana, shall be free of liability for dockage charges to the Port.

Agreement No. T-3166-1, between the same parties, modifies the basic agreement by altering the area of the leased premises, setting a $17,000.00 per annum minimum compensation for wharfage and dockage thereby increasing the total annual minimum compensation to $25,000.00, and provding for the assessment of wharfage according to the Port's tariff in the event that the leased premises shall be used for commodities other than those used in the fruit processing facility.

Agreement No. T-3166-2, between the same parties, modifies the basic agreement by providing for (1) the release of presently leased property, less a pumping station area, (2) the payment of wharfage of 15 cents per ton on exports from the leased premises of containerized products for human consumption, citrus products and citrus by-products, and (3) the granting of absolute priority at all times to Tropicana for loading and unloading vessels at the east berth of the marginal wharf to be constructed at the west end of the released waterfront property.

Agreement No. T-3169, between Tropicana and Cevesco, Inc. (Cevesco), provides for an assignment of lease whereby Tropicana shall assign to Cevesco, for and in consideration of the sum of $10.00, its leasehold interest in FMC Agreement No. T-3166, as amended, together with all improvements thereon. As compensation for said improvements, Cevesco shall pay Tropicana an amount totaling $350,000.00. This agreement also provides for a mortgage of the assigned leasehold by way of reassignment whereby Cevesco, in consideration of Tropicana's payment of $10.00, shall reassign, transfer, and set over to Tropicana as security for a $250,000 indebtedness, all the land and improvements transferred by the assignment of lease.

Agreement No. T-3170, between Cevesco and Port Canaveral Warehouses, Inc. (PCWI), provides for an assignment of lease whereby Cevesco shall assign to PCWI, for and in consideration of the sum of $10.00, its leasehold interest in FMC Agreement No. T-3166, as amended, together with all improvements thereon. As compensation for said improvements, PCWI shall pay Cevesco an amount totaling $400,000.00. This agreement also provides for a mortgage of the assigned leasehold by way of reassignment whereby PCWI, in consideration of Cevesco's payment of $10.00, shall conditionally reassign, retransfer and set over to Cevesco as security for a $200,000 indebtedness, all the land and improvements transferred by the assignment of lease.

By Order of the Federal Maritime Commission.

Dated: December 3, 1975.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket Nos. RI76-69; RI76-70]

ATLANTIC RICHFIELD CO. ET AL.

Order Providing for Hearing on and Suspension of Proposed Changes in Rates, and Allowing Rate Changes To Become Effective Subject to Refund [1]

NOVEMBER 26, 1975.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly Sections 4 and 15, the Regulations pertaining thereto [18 CFR, Chapter I], and the Commission's Rules of Practice and Procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and Section 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[1] Does not consolidate for hearing or dispose of the several matters herein.

* Unless otherwise stated, the pressure base is 14.65 lb/in²a.
[1] No current deliveries.
[2] Contains pricing provisions which may not be permissible under section 154.93 of the Commission's regulations. Consistent with prior Commission action, section 154.93 of the regulations is waived to permit filing of the agreement. Granting such waiver, however, shall not be construed as approval of such provisions and any rate filing pursuant thereto shall be subject to rejection.
[3] Correction filed Nov. 6, 1975.
[4] Accepted, for filing as of the date set forth in the "Effective Date Unless Suspended" column.
[5] The proposed rate increase is accepted as of Dec. 4, 1975, insofar as it does not exceed the Opinion No. 662 ceiling and is suspended until May 4, 1976, insofar as it exceeds the Opinion No. 662 ceiling rate.
[6] Unless otherwise stated, the rate shown is the total rate, inclusive of any applicable British thermal unit adjustment and tax.

V40236 DEC 8 75 XUM

The proposed rate increases of Atlantic Richfield exceed the applicable area ceiling established in Opinion No. 662 and they are suspended for five months.

Warren Petroleum's proposed rate increase contained in Supplement No. 11 to its FPC Gas Rate Schedule No. 50 is from a rate level below the applicable area ceiling rate under Opinion No. 662 to a level in excess of such ceiling rate. That portion not exceeding the ceiling rate is accepted thirty days after filing and that portion exceeding the applicable ceiling rate is suspended for five months therefrom.

[Docket Nos. E-7400, E-7517, E-7485 and E-7533]

BOSTON EDISON CO.

Payment of Refunds

DECEMBER 1, 1975.

Take notice that on November 3, 1975, Boston Edison Company (Edison) filed a report of refunds made on October 31, 1975, pursuant to the Commission's orders in the above-captioned proceedings. Edison states that refunds were made to six of the seven wholesale customers served under its S-1 rate, the seventh customer being Boston Gas Company. Edison states that refunds with respect to Boston Gas Company are being conducted according to a contract by which Edison purchased the electric distribution properties of Boston Gas Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-254]

CLEVELAND ELECTRIC ILLUMINATING CO. AND PENNSYLVANIA-NEW JERSEY-MARYLAND GROUPS

Supplements to Interconnection Agreement

DECEMBER 1, 1975.

Take notice that on November 14, 1975, the Cleveland Electric Illuminating Company (CEI) and the Pennsylvania-New Jersey-Maryland Group (PJM Group) tendered for filing proposed Schedules 1.02, 4.02, 5.02, 6.02, 7.02, and 9.01, all dated November 12, 1975, to the Interconnection Agreement between them dated September 30, 1965, which is filed with the Commission under the following Rate Schedule designations:

	Rate Schedule FPC No.
The Cleveland Electric Illuminating Co	4
Public Service Electric and Gas Co	38
Philadelphia Electric Co	29
Pennsylvania Power & Light Co	44
Baltimore Gas and Electric Co	19
Potomac Electric Power Co	24
Pennsylvania Electric Co	49
Metropolitan Edison Co	29
Jersey Central Power & Light Co	24

CEI and the PJM Group state that the proposed Schedules clarify the wording of the Interconnection Agreement; bring it into closer conformity with other agreements; increase certain charges in order to cover present costs of service, and provide charges for new services and services involving third Parties.

In their filing CEI and the PJM Group state further that no new facilities will be installed nor will existing facilities be modified in connection with the proposed Schedules. It is requested that the proposed Schedules become effective on December 15, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-257]

CONSUMERS POWER CO.

New Service Agreement

DECEMBER 1, 1975.

Take notice that Consumers Power Company ("Consumers Power") on November 17, 1975, tendered for filing a Service Agreement for wholesale for resale electric service between Consumers Power and the City of Charlevoix, Michigan ("Charlevoix"). Consumers Power states that on its effective date, September 30, 1975, the agreement supplanted a prior contract for electric service between the two parties, dated July 12, 1973, and designated Consumers Power Company Rate Schedule FPC No. 36. Consumers Power states that the Service Agreement incorporates the rates permitted by the Commission to become effective, subject to refund, on September 30, 1975. Consumers Power states that the Commission Order was in Docket No. ER76-45, issued August 29, 1975.

Consumers Power states that the Service Agreement was concluded with Charlevoix pursuant to the commitment of Consumers Power to place its wholesale for resale customers on a SCHEDULE OF RATES GOVERNING WHOLESALE FOR RESALE ELECTRIC SERVICE, and consistent with the Order of the Federal Power Commission in Docket No. ER76-45 dated August 20, 1975. Consumers Power states that the execution of the Service Agreement is prompted by Consumers Power's desire to have one standard rate schedule for wholesale service.

Consumers Power states that copies of the filing were served on Charlevoix and on the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-33029 Filed 12-5-75;8:45 am]

[Docket No. RP75-107]

GRANITE STATE GAS TRANSMISSION, INC.

Proposed Substitute Changes in Rates

DECEMBER 1, 1975.

Take notice that on November 18, 1975, Granite State Gas Transmission, Inc. (Granite State), 66 Market Street, Portsmouth, New Hampshire 03801, tendered for filing Substitute Ninth Revised Sheet No. 3A in its FPC Gas Tariff, Original Volume No. 1, containing proposed changes in rates for effectiveness on December 1, 1975, in substitution for the rates initially filed in Docket No. RP75-107 on May 30, 1975 and suspended by order issued therein on June 18, 1975.

According to Granite State, Substitute Ninth Revised Sheet No. 3A is submitted to adjust the rates originally filed in Docket No. RP75-107 to reflect a current cost of gas adjustment which became effective on July 1, 1975 and to reflect a reclassification and allocation of the test period cost of service to conform to the method adopted by the Commission in *United Gas Pipe Line Co.*, Opinion No. 671. The cost of gas adjustment amounts to a reduction in rates to Northern Utilities, Inc. of approximately $311,206 annually; the revised rates, reclassified and allocated according to the Opinion No. 671 method result in the same total jurisdictional increase of approximately $218,000 annually, proposed in the revised rates as originally filed in Docket No. RP75-107, Granite State declares.

According to Granite State, copies of the filing were served upon Northern Utilities, Inc., the Company's sole jurisdictional customer and regulatory commissions of the States of Maine and New Hampshire.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 9, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP75-89]

NORTHERN NATURAL GAS CO.

Filing of Tariff Sheets

DECEMBER 1, 1975.

Take notice that on November 14, 1975, Northern Natural Gas Company (Northern) tendered for filing revised tariff sheets[1] which Northern states eliminates the rate effects of its advance payment agreements with Exxon as ordered by the Commission's order, issued October 31, 1975. Northern requests waiver of the notice requirements to permit an effective date of October 27, 1975. Northern states that copies of the filing have been mailed to Customers and State Commissions on a list attached to its submittal.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-244]

OTTER TAIL POWER CO.

Filing of Supplement to Interconnection Agreement

DECEMBER 1, 1975.

Take notice that on November 12, 1975, Otter Tail Power Company (Otter Tail) tendered for filing Supplement No. 3, dated June 10, 1975, to the 230 KV Interconnection Agreement between Otter Tail and Minnkota Power Cooperative, Inc. Otter Tail states that this Supplement No. 3 is filed as a supplement to Rate Schedule FPC No. 151 and expands the existing 230 KV Interconnection Agreement by providing for service to new loads and improved service to existing loads of both parties. Otter Tail requests this Supplement No. 3 be permitted to become effective 30 days after the filing date of November 12, 1975.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

SEA ROBIN PIPELINE CO.

Filing of Revised Tariff Sheet

DECEMBER 1, 1975.

Take notice that on November 14, 1975, Sea Robin Pipeline Company tendered for filing Seventh Revised Sheet No. 4 to its FPC Gas Tariff, Original Volume No. 1. This tariff sheet and supporting information are being filed 45 days before the effective date of January 1, 1976, pursuant to Section 1 of Sea Robin's tariff, and is in compliance with the provisions of Order Nos. 452, 452-A and 452-B.

Copies of the revised tariff sheet and supporting data are being mailed to Sea Robin's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 9, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Filing of Interchange Agreement

DECEMBER 1, 1975.

Take notice that on November 13, 1975, Southern California Edison Company (Edison) filed with the Commission copies of an interchange agreement between Edison and the City of Seattle, Washington (Seattle) as an initial rate schedule under the Federal Power Act. Edison requests that the filing be made effective thirty days after the date of filing.

Edison states that the interchange agreement provides for the sale by either party to the other of such nonfirm electric as the selling party determines it has available for delivery. According to Edison, Seattle has made some sales to Edison, but Edison has made no sales to Seattle and anticipates that none will be made in the near future.

The sale price, including wheeling charges and losses, is to be at a rate agreed upon by both parties prior to delivery, and is the same rate provided for in the Edison-Tacoma Interchange Agreement filed with the Commission on November 13, 1975, in Docket No. ER76-247, except that no minimum rate per kilowatthour is specified.

Edison states that no new facilities are to be installed and that no existing facilities are to be modified to supply service under the agreement.

According to Edison copies of its filing have been mailed to Seattle and to the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.18, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

V40236 DEC 8 75 XUM

[Docket No. ER76-247]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Interchange Agreement

DECEMBER 1, 1975.

Take notice that on November 13, 1975, Southern California Edison Company (Edison) filed with the Commission copies of an interchange agreement between Edison and the City of Tacoma, Washington (Tacoma) as an initial rate schedule under the Federal Power Act. Edison requests that the filing be made effective thirty days after the date of filing.

Edison states that the interchange agreement provides for the sale by either party to the other of such nonfirm electric energy as the selling party determines it has available for delivery. According to Edison, Tacoma has made some sales to Edison, but Edison has made no sales to Tacoma and anticipates that none will be made in the near future.

The sale price, including wheeling charges and losses, is to be at a rate agreed upon by both parties prior to delivery, but not less than 3 mills per kilowatt-hour.

Edison states that no new facilities are to be installed and that no existing facilities are to be modified to supply service under the agreement.

According to Edison, copies of its filing have been mailed to Tacoma and to the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-33028 Filed 12-5-75;8:45 am]

FEDERAL RESERVE SYSTEM

ORWIG AND COMPANY, INC.

Order Approving Merger of Bank Holding Companies

Orwig and Company, Inc., Kansas City, Missouri ("Orwig"), a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under § 3(a)(5) of the Act (12 U.S.C. 1842(a)(5)) to merge with Merchants Investors, Inc., Kansas City, Missouri ("Merchants Investors"), under the title and charter of Orwig.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Orwig, the twentieth largest banking organization in Missouri, controls Merchants-Produce Bank and The University Bank (both located in Kansas City, Missouri), which together hold aggregate deposits of approximately $89.6 million, representing .6 per cent of the total commercial bank deposits in the State.[1] Orwig's control of these two banks arises from the fact that it controls 36 per cent of the voting shares of the parent holding company of Merchants-Produce Bank and 39 per cent of the voting shares of the parent holding company of The University Bank.[2] Merchants Investors is also deemed to control The University Bank by virtue of its ownership of 39 per cent of the voting shares of that bank's parent holding company. In addition, Merchants Investors holds 17 per cent of the voting shares of the parent holding company of Merchants-Produce Bank. Upon consummation of the transaction herein, Orwig will control 78 per cent of the voting shares of the parent of The University Bank and 53 per cent of the voting shares of the parent of Merchants-Produce Bank.

Merchants-Produce Bank and The University Bank operate in the Kansas City bank market at locations approximately 10 miles apart.[3] Merchants-Produce Bank holds deposits of approximately $62 million, representing 1.3 per cent of the commercial bank deposits in the market, and ranks thereby as the fourteenth largest bank in the market. The University Bank holds deposits of approximately $27.6 million, representing .6 per cent of the total market deposits, and ranks as the thirtieth largest bank in the market.

Orwig and Merchants Investors are each owned in equal proportions by members of the same family. The purpose of the proposed transaction is to simplify the ownership of Merchants-Produce Bank and The University Bank by consolidating their control under one corporation. Since the transaction is essentially a corporate reorganization with no change in the management or operations of either bank, consummation of the proposal would not have an adverse effect on existing or potential competition, nor would it increase the concentration of banking resources in any relevant market area or have an adverse effect on any other bank. Thus, the competitive considerations are regarded by the Board as being consistent with approval of the application.

The financial condition and managerial resources of Orwig, Merchants-Produce Bank and the University Bank are considered satisfactory and the future prospects for each appear favorable. Thus, the banking factors are consistent with approval of the application. Although consummation of the proposal would effect no changes in the service offered by either bank, the considerations relating to the convenience and needs of the communities to be served are also consistent with approval of the application. It is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and that the application should be approved.

In conjunction with the proposed transaction, Orwig proposes to continue to engage in its nonbanking activities, as well as those presetly engaged in by Merchants Investors, which activities include operating an insurance agency, selling real property, leasing personal and real property, extending short term business loans and performing data processing services. Orwig relies on § 4(c)(ii) of the Act as authority for continuing to engage in these nonbanking activities.[4] Whether Orwig is in fact entitled to such exemption is still under consideration by the Board. Absent a favorable determination by the Board on that question, Orwig would be prohibited from engaging in the nonbanking activities acquired from Merchants Investors, Inc., as a result of this merger, although Orwig could continue its present nonbanking activities until at least December 31, 1980, on the basis of the ten-year authority in § 4(a)(2) of the Act. Thus, the Board's action herein is subject to the condition that the transaction may not be consummated unless the Board determines that Orwig is entitled to the exemption in § 4(c)(ii) of the Act, or until Merchants Investors, Inc., terminates or divests its nonbanking activities.

On the basis of the record, the application is approved for the reasons summarized above and subject to the condition set forth above. Further, the transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[5] effective December 1, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-32933 Filed 12-5-75;8:45 am]

[1] All banking data are as of December 31, 1974, and reflect bank holding company formations and acquisitions as of September 30, 1975.

[2] Material submitted in connection with this application indicates that, since December 31, 1970 (the date of the enactment of the 1970 Amendments to the Act), the parent holding companies of Merchants-Produce Bank and The University Bank have each redeemed a portion of their outstanding shares, thus resulting in Orwig and Merchants Investors increasing their proportionate interests in such holding companies and their respective subsidiary banks. Such actions were taken without the prior approval of the Board, as required by section 3 of the Act. However, it appears that neither Orwig nor Merchants Investors was aware that such transactions required the Board's approval. Accordingly, the Board has viewed the subject application as including a request by Orwig and Merchants Investors for permission to continue the increased proportionate interests in the parents of Merchants-Produce Bank and The University Bank, on the basis of the facts of record, has concluded that such request should be, and is hereby, granted.

[3] The Kansas City banking market, the relevant geographic market for purposes of analyzing the competitive effects of the proposal, is approximated by the Kansas City SMSA, excluding therefrom Ray County and the southern portion of Cass County, Missouri.

[4] Section 4(c)(ii) of the Act provides that the prohibitions of § 4 of the Act shall not apply to any bank holding company which is "... a company covered in 1970 more than 85 per centum of the voting stock of which was collectively owned on June 30, 1968, and continuously thereafter, directly or indirectly, by or for members of the same family, or their spouses, who are lineal descendants of common ancestors ...."

[5] Voting for this action: Chairman Burns and Governors Mitchell, Bucher, Holland, Wallich and Jackson. Absent and not voting: Governor Coldwell.

PARK CAPITAL CORP.

Order Approving Acquisition of Bank

Park Capital Corp., La Grange Park, Illinois, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire an additional 1.2 percent of the voting shares of the Bank of La Grange Park, La Grange Park, Illinois ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a one-bank holding company, presently owns approximately 21.9 percent of the voting shares of Bank, and common directors of Applicant and Bank own an additional 13.5 percent.[1] With deposits of $24.3 million, Bank controls approximately 0.04 percent of the total deposits in commercial banks in the State and controls approximately 0.06 percent of such deposits in the Chicago banking market.[2] Applicant proposes to acquire an additional 498 shares, or 1.2 percent of the shares of Bank. Due to the nature and size of the transaction, consummation of the proposal would eliminate neither existing or potential competition, nor would it increase the concentration of banking resources or have an adverse effect on other banks in the area. Thus, competitive considerations are consistent with approval of the application.

The financial condition and managerial resources of Applicant and Bank are considered satisfactory, and the future prospects for each appear favorable. Thus, the banking factors are consistent with approval of the application. Although there will be no immediate change in the services or operations of Bank as a result of the proposal, Applicant states that its increased shareholdings of Bank will result in a more concentrated effort on its part to direct the operations of Bank for the benefit of the community it serves. Hence, considerations relating to the convenience and needs of the community to be served are also consistent with approval of the application. Therefore, it is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order nor (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors,[3] effective November 28, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc.75-32934 Filed 12-5-75;8:45 am]

[1] Voting for this action: Chairman Burns and Governors Mitchell, Bucher, Wallich and Jackson. Absent and not voting: Governor Coldwell.

[2] All banking data are as of December 31, 1974.

[3] The Chicago banking market, which is the relevant banking market, is approximated by the boundaries of Cook County, Du Page County, and portions of Lake County.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs. Temp. Reg. D-10 Supplement]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation continues the delegation of authority to the Secretary of Defense to perform all functions in connection with the lease renewal of certain space in the Northern Virginia area of the National Capital Region.

2. *Effective date.* This regulation is effective immediately.

3. *Expiration date.* The regulation shall expire 5 years from the effective date of the lease of the rented premises.

4. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, authority is hereby delegated to the Secretary of Defense to perform all functions in connection with the leasing of laboratory and related office and special purpose space in the Northern Virginia area of the National Capital Region, as he may deem necessary for use by the Defense Communications Agency System Engineering Facility and the Defense Communications Engineering Office of said Department.

b. This delegation includes authority to lease the required space and to assign, reassign, operate, maintain, control, and protect the demised space. This authorization shall extend to leasing space under authority contained in section 210 (h)(1) of the above-cited Act, for a firm period not to exceed 5 years.

c. The Secretary of Defense may redelegate this authority to any officer or employee of the Department of Defense.

d. This authority shall be exercised in accordance with the limitations and requirements of the above-cited Act, section 322 of the Act of June 30, 1932, as amended (40 U.S.C. 278a), and other applicable statutes and regulations.

DWIGHT A. INK,
Acting Administrator of General Services.

NOVEMBER 30, 1975.

[FR Doc.75-32890 Filed 12-5-75;8:45 am]

[3] Voting for this action: Chairman Burns and Governors Mitchell, Holland and Jackson. Absent and not voting: Governors Bucher, Wallich and Coldwell.

[Federal Property Management Regs. Temp. Reg. F-382]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent, in conjunction with the Administrator of General Services, the consumer interests of the executive agencies of the United States Government in proceedings before the California Public Utilities Commission, involving an Investigation on the Commission's Own Motion into the Determination of a Lifeline Volume of Gas and a Lifeline Quantity of Electricity and into Gas and Electric Utility Rate Structures.

2. *Effective date.* This regulation is effective November 6, 1975.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administration Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the California Public Utilities Commission concerning the October 7, 1975, order by which the Commission entered into an Investigation on its Own Motion into the Determination of a Lifeline Volume of Gas and a Lifeline Quantity of Electricity and into Gas and Electric Utility Rate Structures (Case No. 9988). The authority delegated to the Secretary of Defense shall be exercised concurrently with the Administrator of General Services.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

V40236 DEC 8 75 XUM

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

DWIGHT A. INK,
Acting Administrator of General Services.

NOVEMBER 21, 1975.

[FR Doc.75-32891 Filed 12-5-75;8:45 am]

INTERNATIONAL JOINT COMMISSION

UNITED STATES AND CANADA

Hearings

In the matter of the application of the St. Lawrence Seaway authority to effect partial closure of a section of the St. Lawrence River between Toussaint Island and Presqu'ile near Iroquois, Ontario.

The International Joint Commission, a joint United States and Canadian body established under the Boundary Waters Treaty of 1909, will hold public hearings on the above application at:

2:00 p.m., January 6, 1976, St. Lawrence Room; Holiday Inn, Cornwall, Ontario.

2:00 p.m., January 7, 1976, Ramada Inn, Highway 3 and I-81, Watertown, New York.

The Applicant advises that an increasing number of accidents to downbound vessels entering Iroquois Locks has occurred during the last five years. Vessels involved in those accidents were affected by the cross currents from the Canadian Channel located between Toussaint Island and Presqu'ile. The Application further states that the requested partial closure will have no measurable effect on the level of water above Toussaint Island and that this closure of the Canadian Channel will increase velocities in the remaining cross-section of the river by not more than five percent.

Anyone wishing to present views on the Application or to provide advice as to conditions that might be attached to an Order of Approval, either on his own behalf or as a representative of others, will be given an opportunity to do so. Statements may be given orally or in writing. Allocation of time may be required for oral statements; therefore witnesses should be prepared to summarize their statements. Written statements may be of any length. If written statements are submitted, it is requested that, if possible, thirty (30) copies be provided for the Commission's use. Additional copies may be deposited with the Secretaries at the hearings for the use of the news media and others present. Also, where possible, the Commission would appreciate receiving advance notice of persons or parties wishing to make a statement.

Copies of the Application are available on request from the Secretaries of the Commission and from the office of D. Witherspoon, Great Lakes-St. Lawrence Study Office, Environment Canada, Room 318, Federal Building, 45 Second Street East, Cornwall, Ontario.

D. G. CHANCE,
Secretary, Canadian Section, International Joint Commission, Suite 850, 151 Slater Street, Ottawa, Ontario K1P 5H3, (613) 995-2984.

W. A. BULLARD,
Secretary, United States Section, International Joint Commission, 1717 H Street NW, Suite 200, Washington, D.C. 20440, (202) 296-2142.

DECEMBER 30, 1975.

[337-TA-19]

GLASS FIBER OPTIC DEVICES AND INSTRUMENTS WITH GLASS FIBER OPTIC DEVICES

Postponement

It is hereby ordered that with regard to the above-captioned investigation the date for response to the complaint is postponed from November 14, 1975, to December 1, 1975; the date for reply to the response is postponed from December 2, 1975, to December 16, 1975; and the date for the temporary exclusion hearing is postponed from Decineber 17, 1975, to January 14, 1976.

Issued: December 2, 1975.

MYRON R. RENICK,
Administrative Law Judge.

[FR Doc.75-32965 Filed 12-5-75;8:45 am]

[337-TA-20]

CERTAIN BISMUTH MOLYBDATE CATALYSTS

Prehearing Conference

Notice is hereby given that the United States International Trade Commission will hold a prehearing conference in connection with investigation No. 337-TA-20, Certain Bismuth Molybdate Catalysts, on Tuesday, December 16, 1975, at 10:00 a.m., EST, in the Hearing Room of the United States International Trade Commission Building, 701 E Street, Northwest, Washington, D.C. This conference is preparatory for the hearing which will be held to determine whether there is reason to believe that a violation of section 337 exists and, if so, whether or not a temporary order of exclusion or a cease and desist order should be issued.

On or before December 8, 1975, each participant should serve any of the following documents on the Administrative Law Judge and all known parties:

1. Motions pertaining to the scope of the proceeding.

2. A statement of the issues and sub-issues in this proceeding.

3. A statement of the participant's position on each of the proposed.

4. Proposed stipulations.

5. Requests for information.

6. A statement describing the evidence each participant proposes to present at the hearing, relating such evidence to each of the issues and sub-issues.

7. Proposed procedural dates.

8. A proposed agenda for the prehearing conference.

Replies to the items listed above should be served on or before December 12, 1975.

Parties with like interests will be grouped and a spokesman appointed for their common interests at the prehearing conference.

At the conference the participants should be prepared to discuss problems involved in the proceeding, procedural and substantive, and should be authorized to make commitments with respect thereto. Among the specific items to be discussed are: stipulations as to facts; authentication of documents, future procedural dates, including dates for the service of direct and rebuttal evidence; dates for trial briefs and dates for the hearing.

Issued: December 3, 1975.

MYRON R. RENICK,
Administrative Law Judge.

CERTIFICATE OF SERVICE

I, Myron R. Renick, served the attached Notice of Prehearing Conference on Richard W. Rappaport, United States International Trade Commission Investigative Attorney, personally, and on the following parties via certified mail—return receipt requested, on the 3rd day of December, 1975:

S. Leslie Misrock, Pennie & Edmonds, 330 Madison Avenue, New York, New York 10017.

Dale H. Hoschelt, Schuyler, Birch, Swindler, McKie & Beckett, 1000 Connecticut Avenue, N.W., Washington, D.C. 20036.

Ritchie T. Thomas, Cox, Langford & Brown, 21 Dupont Circle, N.W., Washington, D.C. 20036.

MYRON R. RENICK,
Administrative Law Judge, U.S. International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436.

POSTAL SERVICE

MAIL TO CANADA

Revocation of Suspension of Private Express Statutes

In the October 28, 1975, issue of the FEDERAL REGISTER, 40 FR 50157, the Postal Service announced, in view of a strike by Canadian postal workers, a suspension of 39 U.S.C. 601(a) (1) through (6) and 39 CFR 310.2(b) (1) through (6) so as to permit the carriage of letters destined for delivery in Canada out of the mails without paying postage or meeting any of the other conditions in such provisions of law and regulation.

The postal strike having ended in Canada, the suspension of the provisions of law and regulation referred to above is hereby revoked, effective December 8, 1975.

(39 U.S.C. 401, 404, 601)

LOUIS A. COX,
General Counsel.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Doc. No. 301-6]

MILLERS' NATIONAL FEDERATION

Notice of Complaint

On December 1, 1975, the Chairman of the Section 301 Committee received from Julian B. Heron, Jr., Esquire, Attorney for Millers' National Federation, a petition alleging unfair trade practices by the European Community. The complainant alleges that U.S. exports of wheat flour to third country markets are adversely affected by export subsidies paid by the EC to its wheat millers. Relief is requested under Section 301 of the Trade Act of 1974 (Pub. L. 93-618; 88 Stat. 1978). The text of the petition is as follows:

Chairman, Section 301 Committee, Office of the Special Representative for Trade Negotiations, 1800 G St. NW., Room 725, Washington, D.C. 20506.

Subject: Complaint Filed Pursuant to Section 301 of the Trade Act of 1974.

1. The name of the complainant is Millers' National Federation. It represents flour millers throughout the United States. Exports of wheat flour from the United States to certain other markets are adversely affected as a direct result of export subsidies paid by the EEC to its wheat millers.

2. The foreign practice, act and policy which is the subject of this complaint is the EEC's export subsidy on wheat flour exported outside the borders of the EEC. This practice falls directly within 19 USC § 2411(a).

3. The regulations announcing export subsidies from time to time appear in the *Official Journal*. These regulations are numerous and have been published since 1964. Of particular importance is regulation No. 120/67 which was published in the EEC's *Official Journal* on June 13, 1967.

4. The foreign countries which export wheat flour through the use of export subsidies within the EEC include the Republic of Germany, the Netherlands, Belgium, France, Luxembourg and Italy.

5. The product involved is wheat flour, TSUS 131.40 and BTN 11.01.

6. The export subsidy paid on wheat flour produced in the EEC is of a sufficient amount so as to displace U.S. wheat flour sales in third countries such as Jamaica, Saudi Arabia, Egypt and many others. The EEC wheat subsidy often is in the neighborhood of $50 per ton which is more than enough to distort international trade in wheat flour which is sold primarily on a price basis.

(i) World trade in wheat flour in 1974 amounted to 95 million hundredweights, equalling over $1 billion. The U.S. exported in 1974, 14.5 million hundredweights of wheat flour with a value of approximately $193,000,000 and the EEC exported 42.4 million hundredweights in the same year with a value estimated to be approximately $424,000,000.

(ii) Export subsidies paid by the EEC to its flour millers have caused U.S. flour millers to lose their 43%-48% share of the world market for wheat flour. The result of the EEC subsidy is that U.S. flour millers currently have an 18% share of the world market. A market share loss of 30 percentage points.

(iii) The export subsidies paid by the EEC violate Article XVI of the General Agreement on Tariffs and Trade. More importantly, the export subsidies fall directly within 19 USC § 2411(a)(3).

7. Millers' National Federation has not filed for other relief under the Trade Act of 1974 or any other act believing that the United States has sufficient authority pursuant to 24 USC § 2411 to cause the EEC to terminate its subsidy on wheat flour.

Respectfully submitted,

JULIAN B. HERON, JR.,
Pope Ballard & Loos, 888 17th St. NW., Washington, D.C. 20006, Attorney for Millers' National Federation.

HEARINGS

I. The complainant has requested that hearings be held on this matter. Such hearings will be held at 10:00 A.M. on Wednesday, January 28, 1976, and if necessary will continue on January 29 at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C., Room 730.

II. Requests to present oral testimony and accompanying briefs must be received on or before January 21, 1976. Interested persons are advised to refer to the regulations promulgated by the Office of the Special Representative for Trade Negotiations covering procedures to be followed in all Section 301 proceedings (40 FR 39497—August 28, 1975).

1. *Submission of Briefs and Requests to Present Oral Testimony.* Requests for oral testimony and submission of written briefs should conform to the procedures set forth in 15 CFR Part 2006.6 and 2006.7 (40 FR 39497—August 28, 1975).

2. *Rebuttal Briefs*—In order to assure parties the opportunity to contest information provided by other interested parties, rebuttal briefs may be filed by any party within 15 days after the close of the hearings. The requirement that written briefs be submitted in 20 copies is waived with regard to rebuttal briefs.

3. *Attendance at Hearings*—The hearings will be open to the public.

MORTON POMERANZ,
Chairman, Section 301 Committee, Office of the Special Representative for Trade Negotiations.

VETERANS ADMINISTRATION

PRIVACY ACT OF 1974

Notice of Proposed Additional Routine Use

Notice is hereby given that the Veterans Administration is considering adding a new statement in the description of the system of records entitled, "Veterans and Beneficiaries Guardianship Records—VA," set forth on page 38112 of the FEDERAL REGISTER of August 26, 1975 and adopted by notice published on page 47980 of the FEDERAL REGISTER of October 10, 1975. The proposed statement, which follows, involves the routine use of records in the system, including categories of users and the purposes of such uses and will avoid the need for written consent of the individual in every case which would involve a disclosure of information pertaining to that individual.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. All revelant material received before January 7, 1976, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the comments are available for inspection only in Central Office and furnished the address and the above room number.

Notice is given that it is proposed to make this description effective September 27, 1975, the effective date of section 3, Pub. L. 93-579.

Approved: December 1, 1975.

By direction of the Administrator.

[SEAL] ODELL W. VAUGHN,
Deputy Administrator.

NOTICE OF SYSTEMS OF RECORDS

In the system, "Veterans and Beneficiaries Guardianship Records—VA," appearing at 40 FR 38112, the following routine use is added to read as follows:

System Name: Veterans and Beneficiaries Guardianship Records—VA.

. . . . . .

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

. . . . . .

A record from this system of records may be disclosed to a fiduciary appointed by the Veterans Administration in the case of a veteran or other adult beneficiary found incompetent by the Veterans Administration even though such veteran or other adult beneficiary has not been declared incompetent by a court of competent jurisdiction.

INTERSTATE COMMERCE COMMISSION

[Notice No. 925]

ASSIGNMENT OF HEARINGS

DECEMBER 3, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but

V40236 DEC 8 75 D XUM

interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 134599 Sub 122, Interstate Contract Carrier Corporation, now assigned December 10, 1975 at Boston, Massachusetts, is postponed indefinitely.

MC 119726 Sub 53, N.A.B. Trucking Co., Inc.; MC 139495 Sub 46, National Carriers, Inc. and 140768, American Trans-Freight, Inc., now being assigned January 20, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

FF-434 Sub 2, Transconex, Inc., now being assigned Pre-Hearing Conference January 5, 1976, at Interstate Commerce Commission, Washington, D.C.

MC 140611, Harkema Express Lines Ltd., continued to January 5, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 140580 Sub 1, Earl Haines, Inc., now assigned December 11, 1975 at Washington, D.C., has been postponed to February 12, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 135646 Sub 3, Jimmie W. Dervan dba Dervan Cartage Service, now being assigned January 28, 1976 (2 days), at Atlanta, Ga.; in a hearing room to be later designated.

MC 19227 (Sub-No. 217), Leonard Bros. Trucking Co., Inc., now assigned February 3, 1976, at Los Angeles, Calif., is canceled and application dismissed.

MC 140724, Burning Bar Sales Co., Inc., now being assigned February 2, 1976 (2 days), at Los Angeles, Calif.; in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Finance Docket No. 26303]

MACKINAC TRANSPORTATION CO.

Abandonment of Line

DECEMBER 1, 1975.

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, That no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. §§ 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Mackinac, Emmett, and Cheboygan Counties, Mich., on or before December 15, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 21st day of November, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD,
Secretary.

The Interstate Commerce Commission hereby gives notice that by order dated November 21, 1975, it has been determined that the Mackinac Transportation Company abandonment of its carferry operation between St. Ignace and Mackinaw City, a distance of approximately 8.7 miles all in Mackinac, Emmett, and Cheboygan Counties, Michigan, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmenal Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that approval of this abandonment would result in the diversion of traffic (1) to other cross-lake carferries, (2) to either the Chicago, Ill., or Windsor, Ont. gateways, or (3) to motor carrier transportation. In view of the wide geographic area affected by this potential diversion in comparison to the relatively small volume of traffic handled by the ferry, no significant increases in fuel consumption or air pollution are anticipated. Furthermore, only minor alterations in water quality, ambient noise levels, and safety conditions are expected. There would be no impact upon historic or archaeological sites, and there are no definitive plans with which this abandonment would conflict.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before December 30, 1975.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 134]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

DECEMBER 8, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 C.F.R. Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before December 29, 1975. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-76216. By order entered December 2, 1975, the Motor Carrier Board approved the transfer to Circle S Trucking, Inc., Pendleton, Oreg., of the operating rights set forth in Permit No. MC-136023 (Sub-No. 1), issued May 31, 1974, to William L. Smith, doing business as Circle S Trucking, Pendleton, Oreg., authorizing the transportation of wood residuals, from the facilities of Blue Mountain Forest Products Company in Grant and Umatilla Counties, Oreg., to points in Walla Walla County, Wash., limited to a transportation service to be performed under a continuing contract, or contracts, with Blue Mountain Forest Products Company. Russell M. Allen, 1200 Jackson Tower, Portland, Oreg., attorney for applicants.

No. MC-FC-76218. By order entered December 2, 1975, the Motor Carrier Board approved the transfer to Illinois Valley Cartage, Inc., Peru, Ill., of the operating rights evidenced by Certificate of Registration No. MC-58397 (Sub-No. 1), issued October 8, 1964, to Wisdom Trucking Service, Inc. (David Davis, Jr., Trustee-in-Bankruptcy), Bloomington, Ill., authorizing the transportation, in interstate or foreign commerce, of household goods, furnaces and railroad freight within a fifty (50) mile radius of 219 Fisk Ave., DeKalb, Ill., and to transport such property to or from any points outside of such authorized area of operations for a shipper or shippers within such area. Robert T. Lawley, 300 Reisch Bldg., Springfield, Ill. 62701, attorney for applicants.

ATLANTA AND SAINT ANDREWS BAY RAILWAY CO.

[Rule 19; Ex Parte No. 241; 11th Rev. Exemption No. 10]

Exemption Under Provision of Mandatory Car Service Rules

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 397, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44 ft. 6 in. or less[1] regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Atlanta and Saint Andrews Bay Railway Company, Reporting Marks: ASAB.
The Baltimore and Ohio Railroad Company, Reporting Marks: BO.
Bangor and Aroostook Railroad Company, Reporting Marks: BAR.
The Central Railroad Company of New Jersey, Robert D. Timpany, Trustee, Reporting Marks: CNJ.
The Chesapeake and Ohio Railway Company, Reporting Marks: CO.
Chicago, West Pullman & Southern Railroad Company, Reporting Marks: CWP.
The Denver and Rio Grande Western Railroad Company, Reporting Marks: DRGW.
Missouri-Kansas-Texas Railroad Company, Reporting Marks: MKT.

[Revised I.C.C. Order No. 131, Amdt. 2; Rev. S.O. No. 994]

ASSOCIATION OF AMERICAN RAILROADS

Rerouting Traffic

Upon further consideration of Revised I.C.C. Order No. 131, (The Baltimore and Ohio Railroad Company) and good cause appearing therefor:

It is ordered, That: I.C.C. Order No. 131 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

[1] Change.

(g) *Expiration date.* This order shall expire at 11:59 p.m., May 31, 1976, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., December 5, 1975, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., November 24, 1975.

PART II:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

OVER-THE-COUNTER SLEEP-AID DRUG PRODUCTS

V40236 DEC 8 75 XUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 338, 339, 340]

[Docket No. 75-N-0244]

OVER-THE-COUNTER DRUGS

Proposal To Establish Monographs for OTC Nighttime Sleep-Aid, Daytime Sedative, and Stimulant Products

Pursuant to Part 330 (21 CFR Part 330), the Commissioner of Food and Drugs received on October 21, 1975 the report of the Advisory Review Panel on Over-The-Counter (OTC) Sedative, Tranquilizer and Sleep-Aid Drug Products. In accordance with § 330.10(a)(6), the Commissioner is issuing (1) a proposed regulation containing the monographs recommended by the Panel establishing conditions under which OTC nighttime sleep-aid, daytime sedative and stimulant drugs are generally recognized as safe and effective and not misbranded, (2) a statement of the conditions excluded from the monographs on the basis of a determination by the Panel that they would result in the drugs not being generally recognized as safe and effective or would result in misbranding, (3) a statement of the conditions excluded from the monographs on the basis of a determination by the Panel that the available data are insufficient to classify such conditions under either (1) or (2) above, and (4) the conclusions and recommendations of the Panel to the Commissioner. The summary minutes of the Panel meetings are on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

The purpose of issuing the unaltered conclusions and recommendations of the Panel is to stimulate discussion, evaluation, and comment on the full sweep of the Panel's deliberations. The Commissioner has not yet fully evaluated the report, but has concluded that it should first be issued as a formal proposal to obtain full public comment before any decision is made on the recommendations of the Panel. The report of this Panel represents their best scientific judgment. It has been prepared independently of the Food and Drug Administration and does not necessarily reflect the Agency position on any particular matter contained therein. After a careful review of this document and all comments submitted in response to it, the Commissioner will prepare a tentative final regulation to establish monographs for OTC nighttime sleep-aid, daytime sedative and stimulant drug products. Comments on this document are due on or before March 8, 1976.

In accordance with § 330.10a()(2), all data and information concerning OTC sedative, tranquilizer, sleep-aid and stimulant drug products submitted for consideration by the Advisory Review Panel have been handled as confidential by the Panel and the Food and Drug Administration. All such data and information shall be put on public display at the office of the Hearing Clerk, Food and Drug Administration, on or before January 7, 1976, except to the extent that the person submitting it demonstrates that it still falls within the confidentiality provisions of 18 U.S.C. 1905 or section 301(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331(j)). Requests for confidentiality shall be submitted to the Food and Drug Administration, Bureau of Drugs, Division of OTC Drug Products Evaluation (HFD-510), 5600 Fishers Lane, Rockville, MD 20852.

Based upon the conclusions and recommendations of the Panel, the Commissioner proposes, upon publication of the final regulation:

1. That the monographs (Category I) be effective 30 days after the date of publication of the final monographs in the FEDERAL REGISTER.

2. That the conditions excluded from the monographs on the basis of the Panel's determination that they would result in the drug not being generally recognized as safe and effective or would result in misbranding (Category II) be eliminated from OTC drug products effective 6 months after the date of publication of the final monographs in the FEDERAL REGISTER, regardless whether further testing is undertaken to justify their future use.

3. That the conditions excluded from the monographs on the basis of the Panel's determination that the available data are insufficient to classify such conditions either as generally recognized as safe and effective and not misbranded or as not being generally recognized as safe and effective or would result in misbranding (Category III) be permitted to remain in use for 3 years after the date of publication of the final monographs in the FEDERAL REGISTER, if the manufacturer or distributor of any such drug utilizing such conditions in the interim conducts tests and studies adequate and appropriate to satisfy the questions raised with respect to the particular condition by the Panel.

In the following document, the Sedative, Sleep-Aid and Tranquilizer Panel set forth a concept known as "Category III with a marketing hold" (Category III (MH)) for doxylamine succinate and phenyltoloxamine dihydrogen citrate for use as OTC nighttime sleep-aids. The Panel concluded that these ingredients may be effective but require further testing. Since the ingredients have never before been marketed over-the-counter (OTC) as nighttime sleep-aids, the Panel concluded that there should be a marketing hold for that indication until adequate safety and effectiveness data are available. The Panel stated in their report that they were aware the effect of such a recommendation might cause the Food and Drug Administration to classify these ingredients in Category II and therefore, prohibit OTC marketing until an approved New Drug Application (NDA) is obtained by a drug manufacturer or until the OTC nighttime sleep-aid monograph (Part 338) is amended to include these ingredients.

The Panel in their recommendations also classified the ingredient diphenhydramine hydrochloride as an OTC nighttime sleep-aid as Category III but suggested marketing of this ingredient be permitted while final testing was carried out. This ingredient is presently a new drug marketed under an approved New Drug Application for prescription use only for several indications. Based on a review of this drug by the National Academy of Sciences—National Research Council (NAS/NRC), it was classified as "probably effective" for intractable insomnia. Diphenhydramine has never been legally marketed for any indication for over-the-counter use. The Panel raised questions regarding the safety and effectiveness of diphenhydramine as a nighttime sleep-aid which require resolution prior to classification of the ingredient in Category I.

The Commissioner has determined that an active ingredient classified as Category III which heretofore has been limited to prescription use or classified for OTC use at a dosage level higher than that available in an OTC drug product on December 4, 1975, as published in the FEDERAL REGISTER of December 4, 1975 (40 FR 56675), may not be lawfully marketed for OTC use until the tests and studies to satisfy the questions raised by the Panel have been conducted and the drug has been determined by the Food and Drug Administration to be generally recognized as safe and effective and not misbranded for over-the-counter marketing and so indicated in an appropriate monograph published in the FEDERAL REGISTER or a New Drug Application is approved. The Commissioner also concludes that the procedures promulgated in the FEDERAL REGISTER of May 11, 1972 (37 FR 9464) establishing the OTC drug review do not provide for a "marketing hold" for Category III conditions and that such a concept is equivalent to classifying an ingredient in Category II. The classification by a Panel of an ingredient, historically a prescription ingredient, in Category III with or without a marketing hold represents no more than an opinion that the prescription ingredient may be shown at some future time to be generally recognized as safe and effective for OTC marketing with adequate studies.

Accordingly, the Commissioner reaches the immediate determination that doxylamine succinate, phenyltoloxamine dihydrogen citrate and diphenhydramine hydrochloride as OTC nighttime sleep-aids are new drugs within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(p)), implemented by § 310.3(g) and (h)(5) (21 CFR 310.3(g) and (h)(5)). Therefore, they cannot now be marketed over-the-counter for use as OTC nighttime sleep-aids. Prior to marketing OTC for such an indication, an approved New Drug Application is required or a determination must be made that the ingredients are generally recognized as safe and effective in a monograph.

A number of questions have been presented to the Agency regarding the OTC marketing status of ingredients or amounts of ingredients previously limited to prescription use prior to finalization

of an applicable monograph for the ingredients. The reclassification of ingredients from prescription to OTC status presents important issues that need careful and special considerations. Therefore, the Commissioner has proposed in the FEDERAL REGISTER of December 4, 1975 (40 FR 56675) to establish a policy to clarify the marketing status of all ingredients currently restricted to prescription use which an OTC Advisory Panel recommends as either Category I (safe and effective), Category II (not safe and effective) or Category III (the available data are insufficient to classify the drug) and also the use of active ingredients at dosage levels higher than that available in any OTC drug product on December 4, 1975 as published in the FEDERAL REGISTER of December 4, 1975 (40 FR 56675).

The Commissioner is aware of some concern about the safety of OTC nighttime sleep-aids in general and about diphenhydramine in particular due to possible hazards of misuse, abuse or other adverse societal impact. He is therefore, seeking public comment on these issues at this time. The Panel addressed these issues to some degree by recommending a product container size limitation to avoid abuse. However, the Commissioner believes the broader safety issue of possible misuse and societal impact of OTC nighttime sleep-aids should be publicly reviewed through comment upon this proposal.

The conclusions and recommendations contained in the report of the Advisory Review Panel on OTC Sedative, Tranquilizer and Sleep-Aid products to the Commissioner are as follows:

In the FEDERAL REGISTER of January 5, 1972 (37 FR 85), the Commissioner of Food and Drugs announced a proposed review of the safety, effectiveness and labeling of all OTC drugs by independent advisory review panels. On May 8, 1972, the Commissioner signed the final regulations providing for the OTC drug review under § 330.10, which were made effective immediately. Pursuant to these regulations the Commissioner issued a request for data and information on all sedative, tranquilizer and sleep-aid active ingredients in drug products, in the FEDERAL REGISTER of August 22, 1972 (37 FR 16885). The Commissioner issued in the FEDERAL REGISTER of May 25, 1973 (38 FR 13763) an additional request for data and information on all stimulant ingredients.

The Commissioner appointed the following Panel to review the data and information submitted and to prepare a report on the safety, effectiveness, and labeling of OTC products containing sedative, tranquilizer, sleep-aid and stimulant ingredients:

Karl Rickels, M.D., Chairman, Calton K. Erickson, Ph.D., Helen Dunn Gouin, R.Ph., M.S., Ernest L. Hartmann, M.D., Sumner M. Kalman, M.D., Lester C. Mark, M.D., Frances S. Norris, M.D.

The Panel was first convened on November 15, 1972 in an organizational meeting. Working meetings were held on January 29 and 30, April 19 and 20, June 25 and 26, September 17 and 18, November 5 and 6, December 17 and 18, 1973; February 4 and 5, March 1 and 2, April 1 and 2, July 9 and 10, October 28 and 29, 1974; January 27 and 28, March 3 and 4, April 28 and 29, August 14 and 15, September 29 and 30, 1975.

The Panel included the following nonvoting liaison representatives: Ms. Renee Butler, nominated by an ad hoc group of consumer organizations. Joseph L. Kanig, Ph.D., and in his absence Mr. Peter G. Neaman or Mr. Max Richburg, R.Ph., were nominated by the Proprietary Association. Harvey I. Chernov, Ph.D., an employee of the Food and Drug Administration served as Executive Secretary until September 1973 when he was succeeded by Irma Hobart, M.D., also an employee of the Food and Drug Administration. Others who served with the Panel were Michael Kennedy, Panel Administrator, Melvin Lessing, M.S., R.Ph., Drug Information Analyst and George H. Kerner, Consumer Safety Officer.

In addition to the Panel members and liaison representatives, the Panel utilized the advice of the following consultant:

Robert W. Downing, Ph.D.

In addition, the following individuals provided useful scientific information by correspondence at the request of the Panel which is included in the administrative record:

Jerome W. Bettman, M.D., Nelson Irey, M.D., Irving J. Selikoff, M.D.

The following individuals were given an opportunity to appear before the Panel to express their views, either at their own request or at the Panel's request:

Clinton C. Brown, M.D., Robert B. Choate, Leonide Goldstein, M.D., Andrew Graham, Esq., Martin Himmel, Anita Johnson, Esq., Ben Marr Lanman, M.D., Leslie M. Lueck, Ph.D., Joseph Pittelli, M.D., E. Ned Schultz, M.D., Roger A. Schultz, Esq., Robert A. Sperber, M.D., Garrett W. Swenson, Esq., Gerald W. Vogel, M.D.

No person who so requested was denied an opportunity to appear before the Panel.

The Panel has thoroughly reviewed the literature, and the various data submissions, has listened to additional testimony from interested parties and has considered all pertinent data and information submitted through September 29, 1975 in arriving at its conclusions and recommendations.

The Panel first attempted to define the terms currently used in OTC products to be sure that these terms were clear to the consumer. The Panel was unable to define the term "tranquilizer" in relation to drugs for OTC daytime sedation. The Panel believes that the term "tranquilizer" is inappropriate for an OTC product because to the consumer, the term "tranquilizer" is misleading. The term promises a quantitatively different effect than that which an OTC drug is able to provide. Tranquilizer is a term properly identified with a medically prescribed psychotropic drug which is available by prescription and should in fact only be available by that source. For this reason, the Panel adopted the use of the term "daytime sedative." It was also apparent to the Panel that it would be necessary to appropriately define a product used to induce sleep at night. Such a product with the term "sedative" or "sleep-aid" did not in the Panel's estimation provide sufficient guidance to the consumer as to the use of the product. Therefore, the Panel is recommending to the Commissioner that the term "nighttime sleep-aid" be adopted for use of a product that will induce sleep.

These two terms "daytime sedative" and "nighttime sleep-aid" are descriptive of the types of products presently used as OTC medications. They indicate the time of use and the effect that the consumer will realize without causing confusion or misunderstanding. Henceforth, in this document, the Panel has adopted and uses the terms "daytime sedative" and "nighttime sleep-aid."

In accordance with the OTC drug review regulations (21 CFR 330.10), the Panel's findings with respect to these classes of drugs are set out in three categories:

I. Conditions under which nighttime sleep-aid, daytime sedative and stimulant products are generally recognized as safe and effective and are not misbranded.

II. Conditions under which nighttime sleep-aid, daytime sedative and stimulant products are not generally recognized as safe and effective or are misbranded.

III. Conditions for which the available data are insufficient to permit final classification at this time.

The Panel recommends the following for each category of drugs:

1. That the monographs (Category I) be effective 30 days after the date of publication of the final monographs in the FEDERAL REGISTER.

2. That the conditions excluded from the monographs on the basis of the Panel's determination that they would result in the drug not being generally recognized as safe and effective or would result in misbranding (Category II) be eliminated from OTC drug products effective 6 months after the date of publication of the final monographs in the FEDERAL REGISTER, regardless whether further testing is undertaken to justify their future use.

3. That the conditions excluded from the monographs (Category III) on the basis of the Panel's determination that the available data are insufficient to classify such conditions either as Category I—generally recognized as safe and effective and not misbranded; or as Category II—not being generally recognized as safe and effective or would result in misbranding, be permitted to remain in use for 3 years after the date of publication of the final monographs in the FEDERAL REGISTER, if the manufacturer or distributor of any such drug utilizing such conditions in the interim conducts tests and studies adequate and appropriate to satisfy the questions raised with respect to the particular condition by the Panel.

The Panel has provided a period of 3 years for testing Category III antihistamines as nighttime sleep-aids and be-

V40236 DEC 8 75 XUM

lieves that this period of time is necessary because testing facilities are limited. For example, only a few electroencephalograph (EEG) sleep laboratories exist and few experienced investigators are available to perform such studies. Much of the current effort is being utilized in studies on newer prescription drugs. Thus, to shortcut the practical time it would take to carry out these studies in a reasonable manner would not be in the best interest of the consumer, the industry or the testing laboratories. The Panel is aware that it generally takes considerable time to design, set up, conduct, analyze and report these tests. The Panel considers that the Category III ingredients (antihistamines) being reviewed are basically safe as OTC nighttime sleep-aid products. Their safety is therefore not in serious question unless higher dosages than recommended by the Panel as OTC nighttime sleep-aids are used. Thus the question of approval of these preparations is based upon demonstration of effectiveness.

The Panel also during its review realized that two antihistamines are not marketed as OTC sleep-aids but are available for other OTC indications, e.g., antitussive (cough suppressant) or as a calmative, at dosage levels lower than that which would be necessary to produce a sedative effect. These ingredients could possibly be used as OTC nighttime sleep-aids but the Panel is concerned with allowing marketing until further data are obtained on their safety and effectiveness. Therefore, the Panel created a Category III–MH (marketing hold) designation with a request that no marketing as an OTC nighttime sleep-aid be allowed until further testing has been done. These ingredients are discussed below. (See paragraph II C 3 below—*Conditions under which the available data are insufficient to permit final classification at this time.*)

I. Submission of Data and Information

A. Request for Submission of Sedative, Tranquilizer and Sleep-Aid Drug Data

Pursuant to the notice published in the Federal Register of August 22, 1972 (37 FR 16885) requesting the submission of data and information on sedative, tranquilizer, and sleep-aid drugs, the following firms made submissions relating to the indicated products:

1. *Submissions by firms.*

Firm	Marketed Products
Block Drug Co., Inc., Jersey City, NJ 07016.	Nytol Capsules, Nytol Tablets.
Bristol-Myers Co., New York, NY 10022.	Excedrin P.M. Tablets.
Endo Laboratories, Inc., Garden City, NY 11530.	Dilone Tablets, Percogesic Tablets.
Jeffrey Martin, Inc., Union, NJ 07083.	Compoz Tablets.
Miles Laboratories, Inc., Elkhart, IN 46514.	Miles Nervine Capsules, Miles Nervine Liquid, Miles Nervine Tablets.
Whitehall Laboratories, Inc., New York, NY 10017.	Quiet World Tablets, Sleep-Eze Tablets.
J. B. Williams Co., Inc., Cranford, NJ 07016.	Sominex Capsules, Sominex Tablets.

In addition, the following firms made related submissions:

Firm	Submissions
Johnson and Johnson Co., New Brunswick, NJ 08903.	Talc.
Miles Laboratories, Inc., Elkhart, IN 47514.	Diphenhydramine hydrochloride.
Monsanto Industrial Chemicals Co., St. Louis, MO 63166.	Methapyrilene fumarate, Methapyrilene hydrochloride.
Parke, Davis & Co., Ann Arbor, MI 48106.	Diphenhydramine hydrochloride.
Pfizer Inc., New York, NY 10017.	Doxylamine succinate.
J. B. Williams Co., Inc., Cranford, NJ 07016.	Doxylamine succinate, Phenyltoloxamine dihydrogen citrate.
Whitehall Laboratories, Inc., New York, NY 10017.	Diphenhydramine hydrochloride.

The following submission was not received in adequate time for review by the Panel:

Firm	Marketed Product
Del Laboratories, Inc., Farmingdale, NY 11735.	Placin Calmative Capsules.

2. *Labeled active ingredients contained in these marketed products.*

Acetaminophen, Ammonium bromide, Aspirin, Citric acid, Diphenhydramine hydrochloride, Doxylamine succinate, Methapyrilene fumarate, Methapyrilene hydrochloride, Niacinamide, Passion flower extract, Phenyltoloxamine dihydrogen citrate, Potassium bromide, Pyrilamine maleate, Salicylamide, Scopolamine aminoxide hydrobromide, Scopolamine hydrobromide, Sodium bicarbonate, Sodium bromide, Thiamine hydrochloride.

B. *Request for Submission of Stimulant Drug Data.* Pursuant to the notice published in the Federal Register of May 25, 1973 (38 FR 13763) requesting the submission of data and information on stimulant drugs, the following firms made submissions relating to the indicated products:

1. *Submissions by firms.*

Firm	Marketed products
Blair Laboratories, Inc., Norwalk, CT 06856.	Pre-Mens Forte Tablets.
Bristol-Myers Co., New York, NY 10022.	No-Doz Tablets.
Jerrard Cosmetics, Ltd., Hollywood, CA 90028.	Love Garden Stimulant Capsules.
J. B. Williams Co., Inc., Cranford, NJ 10017.	Viviran Tablets.

There were no additional related submissions.

2. *Labeled active ingredients contained in marketed products.*

Ammonium chloride, Caffeine, Ginseng, Vitamin E.

C. Classification of Submitted Data

1. *Ingredients considered by the Panel for safety and effectiveness as nighttime sleep-aids or daytime sedatives.*

Ammonium bromide, Diphenhydramine hydrochloride, Doxylamine succinate, Methapyrilene fumarate, Methapyrilene hydrochloride, Phenyltoloxamine dihydrogen citrate, Potassium bromide, Pyrilamine maleate, Scopolamine aminoxide hydrobromide, Scopolamine hydrobromide, Sodium bromide.

2. *Ingredient considered by the Panel for safety and effectiveness as a stimulant.*

Caffeine.

3. *Ingredients referred to other OTC panels for review.*

Ingredient	Panel Referred To
Acetaminophen	Internal Analgestic Panel.
Ammonium chloride	Miscellaneous Internal Drug Products Panel.
Aspirin	Internal Analgesic Panel.
Salicylamide	Internal Analgesic Panel.

4. *Irrational ingredients.*

The following ingredients in submitted products for review were classified by the Panel as irrational for use and are discussed later in this document:

Claimed Ingredient	Irrational Use
Ammonium chloride	Stimulant
Ascorbic acid	Nighttime Sleep-Aid/Daytime Sedative
Citric acid	Nighttime Sleep-Aid/Daytime Sedative
Ginseng	Stimulant
Niacinamide	Nighttime Sleep-Aid/Daytime Sedative.
Passion flower extract	Nighttime Sleep-Aid.
Sodium bicarbonate	Nighttime Sleep-Aid/Daytime Sedative.
Thiamine hydrochloride.	Nighttime Sleep-Aid.
Vitamin E	Stimulant.

5. *Inactive ingredients.*

Flavoring agents, Coloring agents, Talc.

The Panel is concerned about the carcinogenic potential of asbestos in talc, which is discussed later in this document.

The Panel has included the following table for the convenience of the reader, in which the active ingredients have been categorized:

Categorization of Single and Combination Ingredients Considered by the Panel for Safety and Effectiveness as Nighttime Sleep-Aids, Daytime Sedatives or Stimulants

(1) Nighttime sleep-aids as single ingredients

Ingredient	Category	Justification for categorization [1]	Additional period for testing
Antihistamines:			
Diphenhydramine hydrochloride	III	S, E	3 years.
Doxylamine succinate [2]	III (MH)	S, E	Do.
Methapyrilene fumarate	III	S, E	Do.
Methapyrilene hydrochloride	III	S, E	Do.
Phenyltoloxamine dihydrogen citrate [2]	III (MH)	S, E	Do.
Pyrilamine maleate	III	S, E	Do.
Bromides:			
Ammonium bromide	II	S, E	None.
Potassium bromide	II	S, E	Do.
Sodium bromide	II	S, E	Do.
Scopolamine compounds:			
Scopolamine aminoxide hydrobromide	II	S, E	Do.
Scopolamine hydrobromide	II	S, E	Do.
Miscellaneous compounds:			
Acetaminophen [3]	II	E	Do.
Aspirin [3]	II	E	Do.
Passion flower extract	II	IR	Do.
Salicylamide [3]	II	E	Do.
Thiamine hydrochloride	II	IR	Do.

[1] S (safety), E (effectiveness), IR (irrational combination) and NA (not applicable).
[2] MH indicates ingredient is placed in Category III (marketing hold), with additional data required prior to marketing for use indicated.
[3] Referred to OTC Internal Analgesics Panel for evaluation of analgesic claims.

(2) Nighttime sleep-aids as combinations of ingredients

Combination	Category	Justification for categorization	Additional period for testing
Combinations containing 2 or more antihistamines	II	S, E	None.
Combinations containing bromides	II	S, E	Do.
Combinations containing scopolamine	II	S, E	Do.
Combinations containing analgesics.[1]	III	E	3 years.
Combinations containing thiamine hydrochloride or passion flower.	II	IR	None.

[1] Referred to OTC Internal Analgesics Panel for evaluation of analgesic claims.

The Panel was unable to determine other rational combinations which might be considered safe and effective as nighttime sleep-aids.

(3) Daytime sedatives as single ingredients

Ingredient	Category	Justification for categorization	Additional period for testing
Antihistamines:			
Diphenhydramine hydrocholride [1]	II	S, E	None.
Doxylamine succinate [1]	II	S, E	Do.
Methapyrilene fumarate	III	S, E	3 years.
Methapyrilene hydrochloride	III	S, E	Do.
Phenyltoloxamine dihydrogen citrate	III	S, E	Do.
Pyrilamine maleate	III	S, E	Do.
Bromides:			
Ammonium bromide	II	S	None.
Potassium bromide	II	S	Do.
Sodium bromide	II	S	Do.
Scopolamine compounds:			
Scopolamine aminoxide hydrobromide	II	S, E	Do.
Scopolamine hydrobromide	II	S, E	Do.
Miscellaneous compounds:			
Acetaminophen [2]	II	E	Do.
Aspirin [2]	II	E	Do.
Salicylamide [2]	II	E	Do.
Niacinamide	II	IR	Do.
Thiamine hydrochloride	II	IR	Do.

[1] Ingredients have not been submitted as daytime sedatives and would not be appropriate for such use. (See discussion of individual ingredients in this preamble.)
[2] Referred to OTC Internal Analgesics Panel for evaluation of analgesic claims.

(4) Daytime sedatives as combinations of ingredients

Combination	Category	Justification for categorization	Additional period for testing
Combinations containing 2 or more anthistamines	II	S, E	None.
Combinations containing bromides	II	S, E	Do.
Combinations containing scopolamine	II	S, E	Do.
Combinations containing analgesics	III	S, E	3 years.
Combinations containing vitamins	II	IR	None.

The Panel was unable to determine other rational combinations which might be considered safe and effective as daytime sedatives.

V 40 236 DEC 8 75 XUM

(5) Stimulants as single ingredients

Ingredient	Category	Justification for categorization	Additional period for testing
Caffeine	I	S, E	NA.
Ammonium chloride [1]	II	IR	None.
Ginseng	II	IR	Do.
Vitamin E	II	IR	Do.

[1] Referred to OTC Miscellaneous Internal Panel for evaluation of diuretic claims.

(6) Stimulants as combinations of ingredients

Combination	Category	Justification for categorization	Additional period for testing
Combinations containing diuretics	II	IR	None.
Combinations containing ginseng	II	IR	Do.
Combinations containing Vitamin E	II	IR	Do.

The Panel was unable to determine other rational combinations which might be considered safe and effective as stimulants.

II. Nighttime Sleep-Aids

A. General Discussion

Sleep is generally defined as a regularly recurrent, easily reversible behavioral state characterized by relative quiescence, and a greatly increased threshold of response to stimulation from the environment. In recent years it has been shown that a series of well-defined changes in brain wave patterns and other physiological changes regularly accompany behavioral sleep. These polygraphically recorded patterns are now useful in determining exact time of sleep onset and minute-by-minute changes in sleep stages. It appears justifiable at this point to add to the above behavioral definition of sleep that normal sleep must be accompanied by the usual well-determined sequence of polygraphic patterns.

The Panel accepts that experiencing occasional sleep problems is a valid indication for OTC medication. Sleep problems amenable to help by OTC products would fall into two broad categories: (1) Occasional difficulty in falling asleep (an increase in sleep latency), and (2) occasional difficulty in remaining asleep (an increase in number of awakenings, total time awake after sleep onset, or early morning awakening). Normal sleep patterns vary considerably and a person should take OTC medication only when his pattern deviates widely from his usual pattern.

Patients with severe or chronic insomnia are not candidates for self-medication; they should consult their physicians. Severe insomnia can be defined as sleep difficulty serious enough to interfere regularly with a person's normal waking activities. Chronic insomnia is sleep difficulty occurring every night or almost every night for at least several weeks.

An OTC nighttime sleep-aid, then, is a substance which helps an individual fall asleep or is used for the relief of occasional sleeplessness. Possible uses for such products, if demonstrated by adequate testing, would be to reduce time taken to fall asleep, number of awakenings, or early morning awakening or any combination of the above circumstances if these circumstances (delayed sleep, frequent awakenings, light sleep, or reduced duration of sleep) interfere with the normal sleep pattern of the individual.

B. Safety and Effectiveness

The Panel suggests the criteria in the discussion below to establish the safety and effectiveness of these agents.

The active ingredient must be safe in the doses suggested on the labeling. The demonstration of safety should be based upon current criteria used to evaluate centrally acting drugs. This includes the Panel's suggested guidelines for testing the safety of a nighttime sleep-aid. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation.) The general guidelines used in the introduction of drugs for prescription use should also be followed in assessing safety. Also, certain special types of adverse reactions are difficult to evaluate. For example, teratogenic effects (the ability to cause congenital malformations), are so difficult to determine before marketing that the Panel advises that new drugs not intended for lifesaving use should not be used in women known to be pregnant or who are nursing a baby, and this precaution should be included in the labeling. Further, drugs that are suspected of causing mutations and/or cancer should not be authorized for OTC use. Finally, untoward interactions between an OTC preparation and other commonly used drugs or foods should be indicated in the labeling if such interactions may cause severe discomfort, distress, disease, or disability.

Because these drugs are intended for nighttime use, their action should not persist into the daytime hours, or beyond the intended period of sleep, so that no interference with normal motor or sensory performance is encountered during the waking state.

The drug should be effective without causing undue disturbance in the period after sleep, such as depressed motor or sensory activity, including reduced ability to perform simple motor tasks. The drug should not interfere in an unusual manner or to an unusual degree with physiological EEG patterns characteristic of normal sleep.

There should be a low potential for allergic manifestations and for idiosyncratic responses to the drug. The margin between an effective and a toxic dose should be large, and the desired effect should be produced ordinarily with a single dose; occasionally a repeated dose may be needed. The drug should not be habit-forming or addicting. There should be no serious toxicity that would result from ill-advised or inadvertent chronic use of the drug.

Determination of effectiveness of an OTC nighttime sleep-aid can be made to some extent by subjective reports from patients or subjects, and by nurses' observations, but are made more accurately by all night sleep laboratory recordings. Preferably, several methods should be used, such as all night sleep recordings in a small number of subjects combined with subjective reports in a large number of subjects, to make certain that a potential sleep-aid does improve sleep as verified both by objective criteria and by reports of improved sleep by the subjects themselves. The Panel has included recommended guidelines for evaluating the effectiveness of a nighttime sleep-aid. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation.)

In accordance with current practice, the packaging of such drugs should be designed to protect small children. In addition, the Panel believes that the quantity of the drug available in an OTC nighttime sleep-aid product container should be limited to prevent accidental ingestion of a lethal dose.

Labeling

Consumers often have a variety of questions regarding OTC medication. Additionally, they may need to discuss, or be warned of, possible drug interactions such as with certain other central nervous system depressants (e.g., tranquilizers, antihistamines, hypnotics, alcohol). For this reason, the Panel is of the opinion that all OTC products, and particularly those in the daytime sedatives, and nighttime sleep-aids categories should contain the following general warning: "Do not take this product if you are presently taking a prescription or OTC drug without consulting a physician or pharmacist."

The Panel is aware that the Commissioner, in the Federal Register of June 4, 1974 (39 FR 19880), has exhaustively reviewed the question of drug interactions and has ruled that specific warnings should replace general statements.

However, the Panel concludes that OTC nighttime sleep-aids are a class apart. Their specific and potentially hazardous actions as central nervous system depressants render them especially liable to additive toxicity with other depressant drugs used concurrently, whether prescription or OTC. The danger is compounded by the layman's ignorance of even the possibility that he might be exposing himself to the cumulative toxic effects of two or more depressant drugs. For example, he may already be taking remedies for a variety of indications (e.g., cough/cold, antimotion, dermatologic, etc.), and be unaware that these products contain antihistamines or other centrally acting ingredients. In this special case, therefore, the Panel believes it important that the general warning be retained for the guidance of the consumer.

The recommendation that the consumer who purchases an OTC drug should consult with a pharmacist is based on the belief that the pharmacist is the most readily available community health professional to the purchasing consumer, and that the average U.S.A. pharmacist today is probably as well acquainted with OTC preparations and the subject of possible drug interactions, etc., as the average physician. As a specialist in the drug field, he possesses knowledge of the subject, or will probably have appropriate written material (e.g., product information, handbooks, manuals, drug interaction lists) readily available.

Based upon the foregoing general discussion of the pharmacology of nighttime sleep-aids and limitations inherent therein, the following are valid (Category I) claims for nighttime sleep-aids:

"Helps fall asleep" and "For relief of occasional sleeplessness."

The following warnings should be included: "For adults only. Do not give to children under 12 years of age." "Take this product with caution if alcohol is being consumed."

The following warning on products containing antihistamines should also be included: "*Caution:* This product contains an antihistamine drug."

The labeling should also state that OTC nighttime sleep-aids are only recommended for the treatment of occasional sleep difficulty. The following warning should appear on the label: "If condition persists continuously for more than 2 weeks consult your physician. Insomnia may be a symptom of serious underlying illness."

The following Category III labeling claims are possibly valid if supported by controlled studies:

"Reduces time to fall asleep in persons with difficulty in falling asleep." "Reduces number of awakenings in persons who wake frequently during the night." "Prolongs sleep."

The following terms currently used are classified as Category II because they are seriously misleading or ambiguous: "natral sleep, normal sleep, sound sleep, nonhabit-forming, guaranteed (fast acting), or refreshing sleep."

"Natural sleep" is ambiguous since "natural" is not a well-defined term and could have referred to a natural feeling state in the morning or to normal appearing sleep by any number of physiological criteria. The term is misleading when these drugs are taken, since the drug is an exogenous non-naturally occurring agent introduced into the body. Hence, the body is obviously not entirely in its "natural" state during drug-induced sleep.

"Normal sleep" is ambiguous and is misleading for the same reasons given under natural sleep. "Sound sleep" is similarly ambiguous. The term "non-habit-forming" is misleading, undesirable and probably false because it is very hard to prove that any product with psychotropic activity can be non-habit-forming; but more importantly, there is an insinuation that other OTC sleep-aid products obviously are habit-forming.

"Guaranteed" is misleading and a false promise if used in a general way such as "guaranteed fast-acting." No drug helps 100 percent of the time. The Panel believes that the word "guarantee" should be prohibited in regard to medical claims. The Panel will not comment on the use of the term in labeling when it refers to promotional consideration such as "Guarantee: Your money will be refunded without question if you are in any way dissatisfied with this product."

"Refreshing sleep" is misleading and ambiguous since in the opinion of the Panel, "refreshing" is extremely difficult to define.

The Panel concludes that approval of an active ingredient or combination of active ingredients for a particular indication should not be interpreted as unique to the active ingredient or to the combination. Labeling, package insert, or advertising shall not refer to such approval either directly or by inference as a unique or an exclusive endorsement of such an ingredient or combination of ingredients.

The Panel is aware that the Food and Drug Administration does not regulate the advertising of OTC drug products. However, the Panel recommends that advertising in any medium for these drugs that in any way uses the labeling, package, or container not be inconsistent, even in subtle implication through mood, focus or innuendo, with the labeling claims in the proposed monographs. It follows that labeling and advertisements should, therefore, be closely monitored by the proper authority to see that advertisements do not go beyond the limitations of the monograph and/or negate the restrictions and warnings recommended by the Panel.

C. Categorization of Data

1. *Conditions under which nighttime sleep-aids are generally recognized as safe and effective and are not misbranded.*

Active Ingredients

The Panel concludes that none of the submitted active ingredients is generally recognized as safe and effective and are not misbranded as nighttime sleep-aids.

Labeling

The Panel recommends the following general labeling for nighttime sleep-aid active ingredients to be generally recognized as safe and effective and not misbranded:

a. *Indications.* (1) "Helps fall asleep." (2) "For relief of occasional sleeplessness."

b. *Warnings.* (1) "For adults only. Do not give to children under 12 years of age." All studies reviewed by the Panel deal with adults; and not enough data are available on these drugs for children. Also, there are insufficient data on how children will react, especially in light of the fact that many children have an opposite reaction to that of adults. For example, it is possible that children may be more easily stimulated rather than sedated with antihistamines used as nighttime sleep-aids (Ref. 1).

(2) "Do not take this product if pregnant or if nursing a baby." The reason for this warning is that the Panel feels there have not been enough studies regarding teratogenicity of these drugs. The use of any drug in pregnancy or during lactation should therefore be carefully assessed. Also, with respect to nursing mothers, it should be noted that many nighttime sleep-aid drugs, for example, antihistamines, possess anticholinergic properties which may inhibit lactation.

(3) "Do not take this product if you are presently taking a prescription or other OTC drug, without consulting your physician or pharmacist." The Panel believes that self-medication under such circumstances may lead to a drug interaction or overdose situation. For example, if an individual cannot sleep because of a cold or allergy he may unwittingly use an OTC antihistamine nighttime sleep-aid and at the same time use an antihistamine cold or anti-allergy preparation. This may result in excessive sedation or confusion.

(4) "If condition persists continuously for more than 2 weeks, consult your physician. Insomnia may be a symptom of serious underlying medical illness." The Panel is concerned that individuals may tend to overuse psychotropic drugs instead of seeking proper medical treatment of underlying emotional disturbances. The Panel considers that OTC nighttime sleep-aids are only for short-term occasional sleeplessness experienced by some "normal" individuals and that use of an OTC nighttime sleep-aid continuously for more than 2 weeks may be indicative of a more serious condition.

(5) "Take this product with caution if alcohol is being consumed." The Panel is aware that there may be additive effects if alcohol is taken in addition to other central nervous system depressants, such as OTC nighttime sleep-aids and prescription hypnotics, sedatives and tranquilizers. These additive effects include excessive sedation, confusion and, in extreme circumstances, may result in coma and even death.

(6) For products containing an antihistamine: "Caution: This product contains an antihistamine drug."

2. *Conditions under which nighttime sleep-aids are not generally recognized as safe and effective or are misbranded.* The use of nighttime sleep-aids under the following conditions is unsupported by scientific data, and in many instances by sound theoretical reasoning. After carefully reviewing all data submitted, the

V 40 236 DEC 8 75 XUM

Panel concludes that the following ingredients, labeling, and combination drugs involved should be removed from the market:

ACTIVE INGREDIENTS

Bromides: Ammonium bromide, Potassium bromide, and Sodium bromide.
Scopolamine Compounds: Scopolamine aminoxide hydrobromide, and Scopolamine hydrobromide.
Miscellaneous Compounds: Acetaminophen, Aspirin, Passion flower extract, Salicylamide, and Thiamine hydrochloride.

a. *Bromides (ammonium, potassium, sodium)*. The Panel concludes that ammonium bromide, potassium bromide and sodium bromide are not safe in therapeutic dosage levels as OTC nighttime sleep-aids because of toxicity and possible teratogenic effects. The Panel further concludes that at the dosage levels presently marketed these ingredients are not effective as nighttime sleep-aids. Ammonium, potassium and sodium bromides are similar in their pharmacological action and will be discussed as a group.

Bromine was discovered by Balard in 1826 and introduced into medicine in the salt form for the treatment of epilepsy in 1843 by Laycock. Its application as a hypnotic by Behrend dates back to 1864 (Ref. 1). The toxicity of bromides was noted in the 19th century. Wuth in 1927 reemphasized the toxicity of bromides which had been ignored for almost 100 years (Ref. 2). The barbiturates replaced bromides in the treatment of epilepsy, and bromides came to be used mainly as hypnotics and sedatives in the early 20th century.

By the late 1920's, bromides were widely prescribed and sold OTC as sedatives and hypnotics. Modern case reports about bromide toxicity recall their widespread use and importance before barbiturates and the so-called "minor tranquilizers" such as meprobamate replaced them to a very large extent in the 1950's (Ref. 3). With the availability of more prescription drugs, the use of bromides shifted primarily to OTC use, although cases of poisoning still result from prescribed drugs. The OTC preparations have become the largest source of bromide use today in medicine. They are seldom recommended by physicians although toxic effects have resulted from prescriptions containing bromides (Ref. 4) within the past 10 years.

Bromide, the negatively charged ionic form of bromine, is the drug we are concerned with in this review. Its close chemical relation to the chloride ion should be noted. Both chlorine and bromine are chemical elements included in a group known as the halogens. Special analytical methods are needed to detect bromide ion in the presence of chloride ion in biological fluids (Refs. 5 through 11). Bromides are ordinarily given by mouth and are efficiently absorbed. At high doses, subjects complain about gastrointestinal irritation, even when the drugs are given after meals, and some physicians in the past recommended that the bromides be given daily in three divided doses (Ref. 12). Divided doses cut down the intensity of gastrointestinal irritation, but serve no other purpose. A daily dose, if it could be tolerated without gastrointestinal irritation, would maintain therapeutic levels of bromide in the body. Absorption of a single oral dose is complete in 2 to 3 hours according to a study with radioactive bromide (^{82}Br) (Ref. 13). Peak plasma levels are reached about 30 to 45 minutes after a single oral dose (Ref. 14).

Distribution of bromide is the same as distribution of chloride, except for certain relatively minor differences. Like chloride, bromide distributes through the extracellular space, which is approximately 21 percent of total body weight. For a 150 lb. (70 kg.) man, the chloride or bromide etracellular space is 14.9 liters or approximately 15 liters. This space includes interstitial fluid and blood plasma. Large amounts of bromide appear in the salivary glands and also in gastric juice, where hydrogen bromide is formed. Bromide secretion by the gastric mucosa is analogous to that of chloride (Ref. 15). Formation of hydrogen bromide contributes to the gastric discomfort experienced by chronic users of bromides. Like chloride, bromide enters the red blood cells in appreciable amounts. Monovalent inorganic anions like chloride or bromide are not bound to any considerable extent to plasma protein, so that plasma determinations of these two ions refer to free halogen.

The total halogen concentration in the extracellular space, as measured in the plasma, is predominately chloride, and is normally about 99 to 105 milliequivalents per liter (mEq/l). In cases of poisoning by bromide, the chloride concentration may appear to go up, and this may be a clue to bromide poisoning. Usually bromide simply replaces part of the chloride, and standard laboratory tests report both ions as chloride.

Bromide does not penetrate cells in the brain to a greater extent than chloride, nor has there been found any qualitatively different distribution in brain tissue. It is assumed that bromide acts directly on the central nervous system (CNS), but not much information is available about the mechanism of its action. This is due, in large part, to the fact that bromides have been less widely used in the modern era in which more sophisticated ways of monitoring central nervous system function were introduced.

At least 80 percent of the elimination of bromide proceeds via the kidney. Both chloride and bromide ions are cleared from the kidney by simple filtration, and then each is partially reabsorbed by the tubules of the kidney. The renal clearance of bromide is slightly less than that for chloride because the bromide ion is reabsorbed from the renal tubules somewhat more efficiently than chloride (Ref. 16). If chloride intake is kept constant and enough bromide is given, it is possible to reach high steady state levels of bromide. If bromide intake is maintained constant and chloride intake is reduced, there will be a more rapid increase in the body concentration of bromide. The half-time for elimination of bromide from the body is about 12 days, on the average, for persons with normal kidney function (Ref. 13), assuming that sodium chloride intake remains constant.

The maintenance dose of bromide, about 0.9 gm per day, if taken from the start of dosing, would produce no ill effects, because almost 6 weeks would elapse before effective concentrations would be attained in the body fluids. This rate of accumulation is much too slow, since no one taking the drug on his own volition would wait that long for symptomatic relief; thus, large doses have to be taken initially to produce an effect rapidly. If dosage continues at the same high initial rate, cumulative poisoning would soon occur. At a moderate dose of 1 gm 3 times a day, the minimal effective blood concentration of 50 mg/100 ml is only attained after a week. After 3 weeks of continuous administration at the same rate, the blood level rises to 110 mg/100 ml, a blood concentration likely to produce toxic effects such as rashes, mental disturbances consisting of impaired thought and memory, dizziness and irritability (Ref. 17).

The body content of bromide may increase to a toxic level if the dosage is greater than the required maintenance dose and/or the renal elimination is below the expected level. At a steady rate, where intake equals output, the blood level will be just below the toxic range. If the rate of elimination were reduced, not unusual in older persons, the new steady state blood level of bromide would be a toxic concentration.

The blood serum concentration associated with toxicity is usually reported as 150 mg bromide per 100 ml or above. But cases of toxicity have occurred with serum levels of 50 mg/100 ml, and some patients have tolerated blood levels higher than 150 mg (Ref. 18).

To use these drugs chronically without monitoring the patient's chloride balance and blood serum bromide is, in the Panel's view, not safe medical practice since small changes in chloride intake or small changes in kidney function can lead to severe poisoning.

In 1927, Wuth stated, "Taking into account the interaction of bromides and chlorides, it is evident that if these individual variations of chloride intake are not considered it is merely a matter of luck whether bromide treatment is successful or not, or whether it does or does not lead to intoxication" (Ref. 2).

Depression of the central nervous system occurs with therapeutic amounts of bromides. With low doses and individual becomes drowsy. Larges doses produce impairment of central function, causing difficult speech, difficulty in thinking, and impaired memory.

There has been considerable argument about the effects of bromides on motor performance, but very little research has been done. In a "semiblind" study by Uhr and collaborators (Ref. 19), several tests of motor coordination, including simulated automobile driving, tests of

memory, and behavioral profiles were studied comparing a placebo, meprobamate and bromide. One group was not told what they were ingesting and the other group receiving different amounts of bromide were told that they were all ingesting the same amount. This is a bizarre design. In the doses used, 5.8 gm of bromide per day, there were no major deficits in performance produced by the bromides.

Jellinek and his associates (Ref. 18) inquired about the effects of bromides on human subjects as one increased the blood levels from sedative to mildly toxic ranges. The study was designed so that bromide levels of about 100 to 200 mg/100 ml of serum would be achieved and monitored in normal and psychotic subjects. Physical and psychological examinations were carried out during the course of the study. By giving daily doses of 50 mg of sodium bromide per kg body weight to all subjects, 78 normal subjects attained a mean serum bromide level of 148 mg/100 ml (range 120 to 200). However, a mean of 134 mg (range 98 to 186) was attained in 20 psychotic subjects.

In the normal subjects only sedative effects were noted. "Sounder and increased sleep" and some loss of concentration were noted. Skin rashes were seen in 2 of the 78 subjects. Some moderate tremors of the tongue, slightly increased patellar reflexes, and subjective feelings of "unsteadiness" were noted. Psychological tests that 44 percent (6 subjects) had reduced ability to concentrate. Sixteen subjects volunteered the information that they had developed a sexual indifference. Of the 20 psychotic patients with blood levels comparable to those for normal subjects, 2 showed sluggish or fixed pupillary reactions to light. Except for these there was "generally a picture of sedation and even of some therapeutic effect."

In the same study (Ref. 18), in a second group of 28 psychotic patients, doses of 75 to 100 mg/kg body weight of sodium bromide were given daily. A mean blood serum level of bromide of 228 mg/100 ml was obtained (range 175 mg to 310 mg). Sixteen subjects were dropped from the study after the fifth week because of various toxic signs. These signs included positive Romberg test (6 subjects), bromoderma (2 or possibly 3), unsteadiness and/or dizziness in 4, sleepiness or similar symptoms in 8, and a few miscellaneous toxicities. "An exacerbation of psychotic symptoms was not prominent" in this whole group of 28 subjects.

The Panel notes that the conclusion reached by the authors is that bromide therapy does not uncover psychotic behavior, but that psychotic patients generally show the same kinds of symptoms reported for normal subjects who are intoxicated. It is suggested by the authors that at blood levels below 200 mg bromide/100 ml of serum an additional factor is at work in cases where "bromism" or "bromide psychosis" have been reported.

Various types of skin rashes are seen in cases of bromide toxicity. The diagnosis is often missed because the possibility of bromide ingestion is not considered by the physician (Refs. 20 and 21). Because these reactions occur in only 1 to 10 percent of subjects taking bromides, it is likely that they represent an allergic reaction to the drug.

A single oral dose of bromide is not effective, because it takes a few days to achieve a therapeutic concentration in the extracellular fluid. This means that the sedative activity will be persistent and not transitory, as is intended when a hypnotic (sleep inducer) is used to induce sleep. Because bromides cannot induce sleep promptly after a single dose and must be used for several days and because these ingredients then have a continued pharmacological action, the Panel believes bromides should not be indicated as OTC sleep-aids. Sleep is not induced, says Sollman (Ref. 1), but is made possible by the calming action: "• • • the bromides tend to produce a mental, calm, aloofness progressing to lassitude. These predispose to sleep which can be resisted."

The Panel notes that contraindications to bromide therapy have been listed repeatedly (Ref. 22). These include: (1) Anorexia: Vomiting and diarrhea induced by taking of bromides can easily deplete the body's chloride content, thus making chronic bromide intoxication more easily produced, (2) Alcoholism: Bromides enhance and prolong symptoms of hangover and intoxication, (3) Congestive heart failure: Usually patients with cardiac failure are on a restricted salt diet, so that intoxication with bromides will occur more readily than in normal subjects, and (4) Kidney disease: Excretion of bromides is likely to be reduced more than in the normal individual and toxicity is to be anticipated.

Depression of the entire central nervous system is the usual pharmacological effect, except that the medulla is not depressed until very high drug concentrations are achieved. Psychic functions are depressed and spinal reflexes are diminished. Muscle tone is lowered. Large doses lessen arterial tension, lower body temperature, depress sexual drive, and cause somnolence, loss of coordination and sluggish reflexes. Psychic phenomena may include hallucinations of auditory or visual type, depression, or maniacal excitation. The neurological examination usually, but not always, shows a symmetrical distribution of altered function. This is useful in distinguishing between a central lesion and intoxication.

There has been discussion in the literature about the distinction between true schizophrenia and the apparent schizophrenia exhibited by some patients with bromide intoxication. Clearing up of the symptoms and their nonrecurrence as the intoxication disappears is a useful index. Some authors, for example, Levin (Ref. 23), claim that they can distinguish the two types of patient by the content of their hallucinations.

Neurological symptoms are commonly observed in cases of poisonings. Weakness was most common in one study of 27 cases (Ref. 24). It can involve a single extremity and thus mimic a central nervous system tumor or cerebrovascular accident. Sleepiness and stupor were also common. The state of consciousness was depressed in 14 of the patients, varying from drowsiness to coma. Thirteen patients were incontinent. Twenty had abnormal reflexes. Ataxia with the appearance of intoxication was the most common cerebellar sign; coarse tremor of the hands or tongue was seen in seven patients. Slurred speech was also common. Psychic manifestations included extreme excitement (12 cases), emotional instability, confusion, disorientation, and incooperativeness. In 12 cases, the average bromide concentration was 239 mg/100 ml of blood serum. Most of these patients had bronchopneumonia and/or urinary tract infection. The two deaths were due to pneumonia, a frequent cause of death in comatose patients.

"Ocular bobbing" is an intermittent conjugate downward deviation of the eyes in the absence of any reflex lateral eye movements. It is ordinarily caused by destruction of part of the brain. The sign is also seen in cases of bromism where there is a lateral deviation of the eyes as well as the downward movement (Ref. 25).

Animal studies have pointed to the possibility that bromides may be teratogenic (cause abnormalities of the developing fetus) (Ref. 26). In studies carried out on animals with chronic bromide intake such that the concentration in the body was about as great as in human subjects on therapeutic doses, there appeared to be mental retardation as evidenced by reduced learning ability in offspring (Ref. 27). In this case, the bromide was given to pregnant rats from the 4th to 12th day of gestation at a total dosage of 192 mg of bromide per kg.

A woman who had previously had two normal children delivered two boys, 1.5 years apart, while taking bromides. Both boys showed growth retardation and reduced head size. One was described as a "true microcephalic" (Ref. 28).

It is clear that bromides cross the placenta readily. Cases of bromide intoxication have occurred in newborns. A girl born after 40 weeks of gestation weighed only 2,020 gm (4.45 lb), was irritable and difficult to feed in the posnatal period and developed slowly. At age 2.5 years, she showed retarded mental and motor development and was below the 10th percentile in height, weight, and skull circumference. The mother had taken large amounts of a bromide-containing preparation all through gestation to relieve headaches (Ref. 29).

A 7-day-old girl entered a children's hospital with lethargy and poor sucking reflex and a blood serum bromide level of 365 mg/100 ml. The mother, a nurse, took 1 quart of an OTC bromide preparation the day before delivery and had appar-

V 40 236 DEC 8 75 XUM

ently taken lesser amounts during her 39-week pregnancy. On the 6th post partum day, the mother was found to have a serum bromide of 320 mg/100 ml. Both mother and infant recovered in this case, even though the blood levels were quite high (Ref. 30). A case of bromism with skin rash present was detected in a premature male infant. Ten days after delivery, skin lesions began to appear and penicillin treatment was started. The penicillin did not affect the rash, and it was suggested that the mother's milk be tested for bromide. The milk contained 120 mg bromide per 100 ml. The child was cured by substituting cow's milk (Ref. 26).

There are numerous case reports of bromide poisoning in infants (Ref. 31).

In summary, the Panel concludes that because the mode of action of the bromides involves displacement of chloride, a normal body constituent, and because this displacement takes many days to occur after ingestion of many of the "recommended" doses, the bromides cannot be considered for the use of occasional symptoms of sleeplessness. The mode of action involves a disturbance in the body's salt balance which requires the therapeutic level of the drug to be very close to the toxic level. In addition, bromides readily cross the placental barrier which might result in teratogenic effects such as mental retardation of the offspring. Since bromides offer only a narrow margin of safety resulting in a small or negligible benefit-to-risk ratio, the Panel does not believe that further testing is warranted.

Further, while it is possible to treat epilepsy with bromides (although more convenient drugs now exist for this purpose), blood levels must be constantly monitored and dosage must be individualized. Since monitoring of this type is not feasible or reasonable for an OTC drug and since this is an indication which cannot be labeled for use by a lay person without the advice and supervision of a physician, the Panel concludes that there is no indication for which bromides should be available on the OTC market. The risks involved in the uncontrolled use of bromides as nighttime sleep-aids are too great to permit general availability in the OTC market (Refs. 32 through 37). Because of the inherent safety issues, no further testing for safety and effectiveness is advised.

b. *Scopolamine compounds.* The Panel concludes that scopolamine, scopolamine hydromide, and scopolamine aminoxide hydromide are not safe at dosage levels which might possibly be effective as OTC nighttime sleep-aids. Although there are insufficient data available for OTC nighttime sleep-aid products concerning the effectiveness of scopolamine alone in producing sleep, the Panel believes, on the basis of the reported toxicity associated with these compounds, that doses high enough to be possibly effective as OTC nighttime sleep-aids are not safe. In the dosages currently used it is considered ineffective in the Panel's view as an OTC nighttime sleep-aid.

Scopolamine (L-hyoscine) occurs naturally as an alkaloid of belladonna. It is chemically and pharmacologically similar to atropine, Scopolamine in clinical doses (0.5 to 1.0 mg, orally or parenterally) normally causes drowsiness, euphoria, amnesia, fatigue, and dreamless sleep (Ref. 1). Meyers and Abreu (Ref. 2) suggest that differences in the therapeutic potencies of atropine and scopolamine may produce dissimilar effects in the brain.

Selected doses of either drug produce sedation in animals. Large doses of scopolamine (1.0 to 1.5 mg/kg) produce persistent excitement and larger doses produce transient excitement followed by deep sedation (Ref. 2). The sedative effects of scopolamine in man appear with doses of 0.3 to 0.6 mg whereas 2.0 mg or more of atropine are required to produce sedation, amnesia, and drowsiness (Ref. 3).

The belladonna alkaloids are absorbed, rapidly from the gastrointestinal tract, more so from the intestine than the stomach (Ref. 4). They also enter the circulation when applied locally to the mucosal surfaces of the body. Only limited absorption occurs from the eye and the intact skin, but in the lung atropine can be absorbed sufficiently from inhaled smoke to produce extrapulmonary effects such as blockade of peripheral symptoms due to cholinergic stimulation (Ref. 5).

Only about 1 percent of an oral dose of scopolamine is eliminated in the urine. Much of the alkaloid is thought to be destroyed by enzymatic hydrolysis, particularly in the liver.

Tolerance to scopolamine apparently occurs, although experimental evidence for it is sparse. Studies in mice suggest that tolerance occurs when scopolamine is given chronically to antagonize pilocarpine-induced hypothermia (Ref. 6). Tolerance did develop to scopolamine's effects in a behavioral situation in which chronic doses were injected into rats (Ref. 7). However, other workers have found no tolerance to scopolamine in mice when the drug was given chronically and then withdrawn to test the effects of pilocarpine (Ref. 8).

Studies in humans strongly suggest that chronic scopolamine administration (10 mg/kg intramuscularly) produces tolerance to the central nervous system as well as some involuntary (autonomic) effects (Ref. 9). Tolerance is noticed particularly in patients with parkinsonism, who may eventually receive daily doses of scopolamine that would result in toxic levels, if given to patients receiving the drug for the first time (Ref. 10).

Habituation and true addiction probably do not occur, although the literature on this aspect of scopolamine's actions is also sparse. In patients with parkinsonism who are suddenly withdrawn from large therapeutic doses, vomiting, malaise, sweating, and salivation have been known to occur (Ref. 1).

The side effects with therapeutic doses are mainly of importance because of their subjective unpleasantness to the patient and include the following: (1) dryness of the mouth, (2) blurred vision, (3) photophobia (abnormal visual intolerance of light), and (4) cardiac effects (tachycardia, bradycardia, arrhythmias, and palpitations). These are the most common side effects, and can rarely be completely avoided with the doses required to obtain significant therapeutic benefit (Ref. 11). Tolerance to the side effects, as with the therapeutic doses, apparently occurs.

Other side effects which sometimes occur include the following: (1) acute glaucoma, (increased intraocular pressure), (2) constipation, which can progress into complete obstruction of the bowel, (3) urinary retention, when enlargement of the prostate is present, (4) anhidrosis (lack of sweating), which may produce heat intolerance and in some cases can seriously impair body temperature regulation in individuals in a hot environment (children are especially sensitive to this effect), (5) hypersensitivity reactions, particularly skin rashes, and occasional edema (swelling) of parts of the mouth and throat, (6) ataxia, manifested by stumbling or difficulty in walking, may be seen with therapeutic doses in susceptible individuals; and (7) toxic psychoses (hallucinations, agitated delirium, belligerence, violence) may occur, particularly when scopolamine is combined with bromides or methapyrilene, and taken in high doses (Refs. 12 and 13). In a report involving scopolamine given as a premedication before surgery, 20 percent of the patients given 0.2 to 0.6 mg intravenously became delirious postoperatively (Ref. 14).

It has been reported that the sedation, tranquilization, and amnesia produced by scopolamine are useful in many circumstances, including labor, delirium tremens, toxic psychoses, and maniacal states (Ref. 1). In these conditions, the drug is almost always combined with agents which produce analgesia and sedation. However, given alone in the presence of pain or severe anxiety, scopolamine may induce outbursts of uncontrolled behavior.

As indicated earlier, therapeutic doses of scopolamine normally cause drowsiness, euphoria, amnesia, fatigue, and dreamless sleep. The same doses, however, occasionally cause excitement, restlessness, hallucinations, or delirium instead (Ref. 1). These atypical reactions may be idiosyncratic (unusual, infrequent, genetically caused reactions). They resemble the central effects of toxic doses of atropine, and occur regularly after large doses of scopolamine.

Infants, young children, and old people are especially susceptible to the effects of an overdose of scopolamine. The symptoms of poisoning develop soon after ingestion of the drug. The mouth becomes dry and burns; swallowing and talking are difficult, and there is marked thirst. The vision is blurred, and photophobia (sensitivity to light) occurs. The skin is hot, dry, and flushed. A rash may appear especially over the face, neck, and upper part of the trunk. The body temperature rises and may reach 109° F or higher in infants. The pulse is weak and very rapid, but in infants and old people the increased heart rate may not occur. Palpitations are prominent, and the blood pressure is elevated. Urinary urgency and difficulty in urination are sometimes noted.

The patient is restless, excited, confused, and exhibits weakness, giddiness, and muscular incoordination. Walking and talking are disturbed. Nausea and vomiting sometimes occur. The behavioral and mental symptoms may suggest an acute organic psychosis. Memory is disturbed, orientation is faulty, hallucinations are common, and mania and delirium often occur. In some cases of scopolamine poisoning, a mistaken diagnosis of acute schizophrenia or alcoholic delirium has been made, with the individuals being committed to a psychiatric institution for observation and treatment (Ref. 13). The entire syndrome often lasts 48 hours or longer. Depression and circulatory collapse occur only in cases of severe intoxication; the blood pressure declines, respirations become inadequate, and finally respiratory failure occurs after a period of paralysis and coma.

Fatalities from scopolamine are rare, but sometimes occur in belladonna poisoning in children. In these cases, the cause of death is apparently uncontrolled fever. Of all the potent alkaloids, atropine is usually stated to be more toxic than scopolamine, but the evidence for this is inconclusive; persons have survived doses of 500 mg of scopalmine. (In the case of atropine, doses of 1,000 mg have been survived.) The best antidote for scopolamine is physostigmine (Ref. 15). 2 to 3 mg subcutaneously every 2 hours as needed.

As with any depressant drug, the actions of scopolamine can be expected to enhance the effects of or be enhanced by other depressants such as alcohol (Ref. 16), barbiturates, narcotics, or tranquilizers. The drug has also been shown to produce an acute psychotic reaction when combined with marijuana (Ref. 17).

The following study plus many other studies suggest a "depressant" effect of scopolamine in animals which could be extrapolated to a depressant, or sedative, effect in humans. The dosages used cannot accurately be compared to those used in humans, but they do demonstrate that all of scopolamine's effects in animals are in the range of 0.01 to 10.0 mg/kg when given by injection.

Longo (Ref. 18) studied the effects of atropine and scopolamine on the encephalogram of the rabbit. The two alkaloids produced a sleep pattern (slow synchronous activity) while blocking the "awakening reaction." Scopolamine was 10 to 15 times more active than atropine in this regard. The generally classified EEG synchronization is "dissociated" from the behavioral effects of the drug in that the animal is apparently alert during the time that the EEG indicates a sleep pattern. This is known to be a characteristic of antimuscarinic central action.

The bulk of the literature on scopolamine's effects in man concerns its actions as an antimotion sickness and antiparkinsonism drug. This literature really tells us nothing more than the fact that scopolamine somehow depresses those areas of the brain involved in motion sickness (e.g., the cerebellum, semicircular canals and associated structures, and/or the medually emetic centers) and parkinsonism (basal ganglia and extra pyramidal system), and that the doses used are similar to those which appear to be effective in producing drowsiness.

The number of papers which document the sleep-inducing effects of scopolamine is surprisingly small, and many of these are reviews which assume the sedative effect of scopolamine, or simply refer again and again to the few papers available.

Very early reports in the European literature document the use of scopolamine hydrobromide in producing amnesia during labor when given in doses of 1/100 gr (0.6 mg) intravenously. This preceded its use in combination with morphine to produce "twilight sleep" as a form of obstetrical analgesia with amnesia. Orkin et al. (Ref. 19) have studied

[1] Cited OTC Volumes refer to the submissions made by interested persons pursuant to the call for data notices published in the FEDERAL REGISTER of August 22, 1972 (37 FR 16885) and May 25, 1973 (38 FR 13763). The volumes are on file in the office of the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, MD 20852.

V40236 DEC 8 75 XUM

atropine and scopolamine as preanesthetic medications and have found that smaller quantities of thiopental and meperidine are required to produce unconsciousness when scopolamine (0.4 to 0.6 mg intravenously) is given as a preanesthetic medication. One of their conclusions was that "scopolamine in 0.4 to 0.6 mg doses (intravenously) is almost as hypnotic as 100 mg of meperidine."

Tesoriere (Ref. 20) has also confirmed the "depression of the cortex" and amnesic effects in patients being prepared for surgery. The "common dose" of 0.32 to 0.43 mg (intravenously) can severely depress the older patient and must be used with caution.

Ostfeld and Aruguete (Ref. 21), in an often-cited study, reported that 0.8 mg of scopolamine injected subcutaneously can impair performance on behavioral tests involving the ability to focus attention, to recall objects and words, and to maintain an attentive set. They also noted that whereas the administration of atropine was accompanied by a rise in pulse rate, scopolamine administration was followed by a decrease in such rate. Finally, the subcutaneously administered scopolamine appeared to induce sleep, hallucinations, and mental disorientation more frequently than 10 mg of atropine administered orally.

Eger (Ref. 4), in a very complete review, reaffirmed the central nervous system effects of scopolamine, and noted that scopolamine is some 5 to 15 times more potent in producing drowsiness than atropine.

Environmental conditions and subjective attitudes greatly influence the response to scopolamine. Although these factors have not been extensively studied, a few examples are available (Ref. 22): The pain of labor can cause the response to amnesic doses of scopolamine to change to a state of delirious excitement and restlessness, often to such a degree that restraints are necessary; (2) the loss of a night's sleep can markedly increase the psychotomimetic effects of scopolamine; and (3) in high ambient temperatures, the central effects of scopolamine are significantly accentuated. The mechanism for this last effect is unclear.

The Panel concludes from the available literature that scopolamine definitely has central depressant effects in animals, and that it produces drowsiness and sleep in humans, in appropriate dosages. However, there is a serious lack of sufficient data on the central effects of scopolamine over a wide range of doses in man.

(1) *Scopolamine hydrobromide.* There are products presently on the OTC market promoted for sleep which contain 0.25 mg of scopolamine hydrobromide per unit dose, as part of a combination of ingredients. The Panel concludes that this ingredient is not effective as a nighttime sleep-aid in doses presently marketed, and that at higher, possibly more effective doses it would not be safe.

Although scopolamine hydrobromide has central depressant effects in animals, the evidence for its hypnotic effect in humans is mainly anecdotal on the basis of the drug's early use in parkinsonism and motion sickness. One source, also anecdotal, states that an oral dose of 0.3 mg has "little soporific effect" (Ref. 23). However, the Panel has been unable to locate any clinical studies of the effects of scopolamine hydrobromide alone on sleep onset or duration of sleep.

As mentioned earlier, the Panel has found, evidence (Ref. 11) which suggests an alarming frequency of side effects when scopolamine is given in doses necessary for a central depressant effect (0.6 mg and above). Side effects which can be seen with scopolamine hydrobromide in doses of 0.6 mg and above, orally, are dryness of the mouth, blurred vision, photophobia, and cardiac irregularities. Occasionally, constipation, urinary retention, hypersensitivity reactions, acute glaucoma, excessive restlessness and toxic psychosis can be seen. Infants, young children, and old people are especially susceptible to higher doses of the drug (Refs. 3 and 4). Doses of 2.0 mg orally in man often produce psychomimetic effects (Ref. 24). On the basis of this toxicity, the Panel concludes that doses high enough to be effective as a nighttime sleep-aid would not be safe.

(2) *Scopolamine aminoxide hydrobromide.* There are products presently on the OTC market promoted for sleep which contain 0.125 to 0.5 mg of scopolamine aminoxide hydrobromide per unit dose, as part of a combination of ingredients. The Panel concludes that this ingredient is not effective as a nighttime sleep-aid in doses presently marketed, and that at higher, possibly more effective doses it would not be safe.

While the Panel is aware of some animal studies relating to the safety of scopolamine aminoxide hydrobromide, the literature on this ingredient is not voluminous and, in fact, the Panel has been unable to locate any documented evidence for the safety of this ingredient in humans. Even though the Panel is aware that scopolamine compounds have been marketed for over 50 years and that the OTC drug review procedures relating to safety (21 CFR 330.10(a)(4)(i)) provide for consideration of marketing experience, the Panel finds that such information is insufficient to support safe use of scopolamine at levels that would be effective as OTC nighttime sleep-aids.

The therapeutic value of scopolamine aminoxide hydrobromide is due to its metabolism in the body to scopolamine. The claimed reduction in toxicity compared to that of scopolamine hydrobromide may be due to the slow conversion of scopolamine aminoxide hydrobromide to the parent base, so that a sustained action is seen with few toxic effects (Ref. 10). Since there are no clinical studies in the literature on the scopolamine base substance alone, the usual way to discuss scopolamine aminoxide hydrobromide has been to compare it with scopolabine hydrobromide, for which there are experiments reported in the literature. Therefore, all of the previous discussion on scopolamine hydrobromide (pharmacology, toxicity, side effects, etc.), would be applicable here.

The Panel has been unable to locate any reports of controlled clinical studies on the effectiveness of scopolamine aminoxide hydrobromide alone as a nighttime sleep-aid in the recommended doses of 0.125 to 0.5 mg. An old (1927) French thesis by Lados, cited by Scharf (Ref. 10), reported on the effects of scopolamine aminoxide hydrobromide in 16 cases of postencephalitic parkinsonism. Lados claimed that scopolamine aminoxide hydrobromide, in earlier experiments with dogs, was 1/200 as toxic as scopolamine, and proceeded to use doses of 4.0 mg of scopolamine aminoxide hydrobromide per day with no toxic symptoms in patients with parkinsonism. Scharf himself (Ref. 10) used scopolamine aminoxide hydrobromide in doses of 2.0 mg/day to treat patients with parkinsonism, with no toxic effects. On the other hand, doses of 2.0 mg 3 times a day of scopolamine aminoxide hydrobromide do produce a significant number of side effects (nightmares, blurred vision, dry mouth, tinnitus or ringing in the ears) when given for seasickness (Ref. 25). These authors noted that 2.0 mg of scopolamine aminoxide hydrobromide "produced far more severe reactions than had 0.75 mg of scopolamine hydrobromide". They stated that in these doses the toxicity and duration of action of scopolamine aminoxide hydrobromide were at least as great as those of scopolamine hydrobromide. A more recent paper, in which antimotion sickness drugs were reviewed (Ref. 26), indicates that scopolamine aminoxide hydrobromide 2.0 mg and scopolamine hydrobromide 0.6 to 1.0 mg have similar actions, toxicities, and durations of action.

Another old paper (1945) by Co Tui and Debruille (Ref. 27) states that copolamine aminoxide hydrobromide is 1/3 as potent and 1/8 as toxic as scopolamine hydrobromide, and that in equipotent doses the effect of scopolamine aminoxide hydrobromide seems to last only 1/3 as long as that of the nonaminoxide compound. However, these conclusions were drawn on the basis of lethal dose studies in mice and abolition of the acetylcholine depressor effect on the blood pressure of the cat, and are difficult to extrapolate to man. Most importantly, the literature regarding the toxicity and effectiveness of scopolamine aminoxide hydrobromide appears to be too sparse and inconsistent to substantiate the routine use of this derivative in an OTC product. If it is assumed from Co Tui and Debruille's (Ref. 27) animal studies, for example, that scopolamine aminoxide hydrobromide is 1/8 as toxic and 1/3 as effective as scopolamine hydrobromide, then in equipotent doses scopolamine aminoxide hydrobromide becomes only 1/2 as toxic as scopolamine hydrobromide; therefore, the safety is still questionable. Furthermore, clinical studies have not confirmed this reduced toxicity of scopolamine aminoxide hydrobromide.

Although these early uncontrolled studies in animals suggested that scopolamine aminoxide hydobromide is less toxic than other scopolamine salts, most newer reports conclude that scopolamine aminoxide hydrobromide and scopolamine hydrobromide have similar actions, toxicities, and durations of action in doses of about 2:1, aminoxide hydrobromide to hydrobromide (Ref. 28). On the basis of the toxicity associated with scopolamine aminoxide hydrobromide, the Panel concludes that doses high enough to be possibly effective as nighttime sleep-aids would have toxicity similar to that of scopolamine hydrobromide, and that these doses would not be safe. Because of the inherent safety issues, the Panel concludes that further studies with scopolamine would be fruitless.

c. *Miscellaneous compounds*—(1) *Acetaminophen, aspirin, salicylamide.* The Panel has been unable to locate any evidence that these ingredients are effective nighttime sleep-aids. The drugs have been referred to the Panel on Internal Analgesics for an opinion on their analgesic effects.

(2) *Passion flower extract, thiamine hydrochloride.* The Panel could find no valid scientific data to support the use of these ingredients as nighttime sleep-aids. After a search of the literature, the Panel was unable to identify a role for either passion flower extract or thiamine hydrochloride in the central nervous system in inducing sedation. Therefore, these ingredients were classified by the Panel as irrational (IR) for use in nighttime sleep-aid products.

Labeling

The Panel concludes that the following labeling claims are misleading and should be removed from OTC labeling: "natural sleep, normal sleep, refreshing sleep, sound sleep." These terms are misleading when these drugs are taken, since A drug is an exogenous, non-naturally occurring agent introduced into the body. Terms such as "non-habit-forming and guaranteed (fast acting)" are also misleading and probably false because it is very hard to prove that any product with psychotropic activity can be non-habit-forming or that a drug can be guaranteed to be effective in all cases.

3. *Conditions under which the available data are insufficient to permit final classification at this time.* The Panel concludes that adequate and reliable scientific evidence is not available to permit final classification of the claimed active ingredients and labeling listed below. The Panel believes it reasonable to provide 3 years for the development and review of such evidence.

Active Ingredients

Antihistamines
- Diphenhydramine hydrochloride
- Doxylamine succinate[2]
- Methapyrilene fumarate
- Methapyrilene hydrochloride
- Phenyltoloxamine dihydrogen citrate[2]
- Pyrilamine maleate

a. *Antihistamines.* Histamine is a chemical substance normally concerned with inflammatory responses to irritants or injury. In sensitized individuals, it is released in one or more target organs (especially skin and mucous membranes) causing allergic reactions such as itching, swelling, hay fever, asthma, etc. (Ref. 1).

The antihistamines, as their name implies, are a class of drugs useful in antagonizing these actions of histamine. They can also exert side actions, including both drowsiness and then stimulation, depending upon the dose (Ref. 2). The sedative action, commonly seen in allergic patients, may be the major effect observed with their use in nonallergic individuals. This has led to the introduction of its application as the primary effect of some antihistamines as OTC sleep-aids for a target population whose chief complaint is sleeplessness.

The mechanism by which antihistamines accomplish the blockage or antagonism is apparently a competitive inhibition of already released histamine, rather than an interference with the release itself (Ref. 3). Thus, the skin manifestations of histamine release, i.e., itch, flare, wheal, capillary permeability and edema, are all decreased by antihistamines, although the dosage varies with the potency of the compound used. For example, equivalent inhibition of histamine-induced skin wheals is produced in man by 25 mg of promethazine and 175 mg of pyrilamine (Ref. 4).

In the respiratory tract, rhinorrhea and bronchospasm are both decreased by antihistamines. Paradoxically, however, antihistamines themselves can cause bronchoconstriction in man, and they have been shown to cause contraction of isolated strips of guinea pig tracheal smooth muscle at concentrations in the usual antihistaminic therapeutic range (Refs. 5 and 6).

[2] Ingredient placed in Category III (MH) with a marketing hold until adequate safety and effectiveness data for use as a nighttime sleep-aid have been submitted to the Food and Drug Administration.

V40236 DEC 8 75 XUM

Apart from their specific antagonism to the actions of histamine, the antihistaminic drugs may also exert other effects, some useful, some undesirable. Stimulation of the central nervous system has been observed in some patients with focal cortical lesions, in whom small doses of antihistamines may cause electroencephalographic (EEG) activation and even frank seizures (Ref. 7). Excessive doses in any patient may cause restlessness, excitation, delirium tremors, and even convulsions (Ref. 2); depression of the central nervous system is also frequently observed with the use of antihistaminic drugs. When these drugs are used to block histamine, drowsiness is common with antihistaminic therapeutic doses, a characteristic which makes the use of these drugs possible as OTC nighttime sleep-aids.

Sedation is perhaps the most frequently reported side effect associated with the use of antihistaminic agents (Ref. 1). Its manifestations may vary from inability to concentrate, dizziness and incoordination, to deep sleep. The sedative effect can be hazardous in ambulatory patients whose daytime activities require mental alertness and motor coordination (e.g., driving an automobile); and the Panel believes that warnings of this hazard should be required on OTC labeling for products containing antihistamines. The sedative effect, of course, would become the primary indication when these drugs are marketed for use as OTC nighttime sleep-aids and; therefore, no such warning is required.

Antihistamines not only have the two primary indications discussed above, but also exhibit a number of other side effects and toxicities, many related to anticholinergic activity (Ref. 8).

Central and peripheral nervous system manifestations of toxicity from the use of antihistaminic drugs may include dizziness, tinnitus (ringing in the ears), lassitude, incoordination, fatigue, blurred vision, double vision, euphoria, nervousness, irritability, insomnia, anxiety, disorientation, vertigo, confusion, delirium, hyper reflexia, tremors, muscle spasm, convulsions (especially in children) and coma (Ref. 9). Fatal or near fatal overdoses cause fixed, dilated pupils, muscular twitchings followed by convulsions, coma, circulatory collapse and respiratory failure. Convulsions may persist for 24 hours, coma for 2 days, but death rarely occurs later than 24 hours after ingestion, unless due to infection associated with agranulocytosis (Ref. 10).

Gastrointestinal manifestations may include loss of appetite, nausea, vomiting, epigastric distress, constipation or diarrhea.

Cardiovascular symtoms may include palpitations (i.e., irregularities of heart rate and/or rhythm), hypotension, headache or tightness of the chest. In the genitourinary system, increased urinary frequency and/or difficulty in urination may be encountered. Skin rashes and photosensitivity may occur. Hematologic complications, fortunately rare, include leucopenia, thrombocytopenia, hemolytic anemia and agranulocytosis. Depending upon dose response relationships, some antihistamines may actually liberate histamine or serotonin, thus possibly contributing to adverse reactions such as bronchospasm.

Most antihistamines have some anticholinergic (atropine-like, belladonna-like) activity (Ref. 8). The action is not usually intense enough to be of therapeutic significance, but this activity may account for dryness of the mouth seen in some patients and more rarely, for other dysfunctions such as difficulty in urination and impotence (Ref. 1). Tingling, heaviness, and weakness of the hands may also be observed. Overdoses may cause mammary gland enlargement in both sexes, with secretion of milk. This effect has been attributed to depression of the hypothalamus with release of lactogenic hormone (Ref. 10).

The Panel is aware that the differences in chemical structure of the various antihistamine groups will have a significant effect on the sleep-aid indication. The groups may be classified as follows (Ref. 11):

Ethanolamines (examples: diphenhydramine, doxylamine and phenyltoloxamine). The drugs in this group are potent and effective histamine antagonists that possess significant atropine-like activity and have a pronounced tendency to induce sedation. With conventional antihistamine treatment doses, about half of the individuals who are treated with these drugs experience drowsiness. The incidence of gastrointestinal side effects, however, is low in this group.

Ethylenediamines (examples: methapyrilene and pyrilamine). These too, are highly effective histamine antagonists. These agents do not have a strong central nervous system action and may not produce a therapeutic somnolence even though a fair number of patients will exhibit drowsiness. Gastrointestinal side effects are quite common. This group contains some of the oldest and best-known antihistamines.

Alkylamines (example: chlorpheniramine). Antihistamines in this group are among the most active histamine antagonists and are generally effective in relatively low doses. These agents are not so prone to produce drowsiness and may be among the more suitable agents for daytime use; but again, a significant proportion of patients do experience this effect. Side effects involving central nervous system stimulation are more common in this than in other groups.

Piperazines (example: chlorcyclizine). The oldest member of this group, chlorcyclizine, is a valuable histamine antagonist with prolonged action and comparatively low incidence of drowsiness. The others are used primarily to counter motion sickness. The incidence of untoward effects, both central nervous system depressant and atropine-like, seems to compare favorably with that of other antihistamines. The possibility of some dulling of mental alertness should be borne in mind when the subject may be called upon to perform exacting and potentially hazardous tasks, such as driving a car.

Phenothiazines (example: promethazine). Most drugs of this class are histamine antagonists. The prototype, promethazine, was introduced in 1946 for the management of allergic conditions. The prominent sedative effects of this compound and its value in motion sickness were early recognized. Promethazine and its many congeners are now used primarily for their central depressant properties.

The problem for all the antihistamines when used as nighttime sleep-aids, from the Panel's point of view, is to ensure that the dosage recommended (e.g., possibly 50 mg in the case of diphenhydramine hydrochloride) is adequate for the sedative effect desired, yet not so large that toxic effects (see discussion below) result. The Panel is also concerned that, in currently available antihistamine OTC products promoted for sleep, dosages may have been reduced by the manufacturer to borderline or ineffective levels to avoid toxicity. The Panel feels that higher doses as recommended below by the Panel should be studied for some antihistamines to be used as nighttime sleep-aids.

Except for methapyrilene and pyrilamine, the Panel is unaware of any products containing antihistamines promoted for sleep on the OTC market. As indicated above, it is the opinion of the Panel that these two ingredients are currently used as OTC sleep-aids at very low doses; and therefore, the Panel was unable to find sufficient information on these or any other antihistamines which would allow the Panel to make a determination that they should be generally recognized as safe and effective for OTC use. Until such time as these data are available to the Food and Drug Administration, the Panel recommends that these ingredients be placed in Category III, with an additional period of 3 years for testing.

(1) *Diphenhydramine hydrochloride.* The Panel concludes that clinical experience with diphenhydramine hydrochloride as a prescription drug for use as an antihistamine agent strongly suggests that in an appropriate dosage (50 mg to a maximum 100 mg single dose at bedtime) it may be effective as an OTC nighttime sleep-aid. The ingredient is currently not marketed for any indication in an OTC product. Physicians have used diphenhydramine hydrochloride as a sleep-aid for many years because of its sedative side effects. However, only a few studies exist for the sleep indication and therefore the Panel has determined that further testing in well-controlled studies is required to assure the safety and effectiveness of the suggested dosage of 50 to 100 mg single dose at bedtime. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation). The Panel realizes that diphenhydramine is not currently available for OTC use, but because of well-established and documented safe clinical use for many years as described in the discussion below, the Panel has classified the ingredient in Category III.

Available evidence suggests that doses of 25 mg are ineffective (Refs. 1, 2 and 3). However, EEG studies with 25 and 50 mg doses indicate sedation, especially with the larger dose (Ref. 4). Doses of 50 mg or more have been reported to be as effective as doses of 100 mg or more of secobarbital or pentobarbital (Refs. 5, 6, 7, 8 and 9). Additional (minimum of three) well-controlled studies are required to determine whether diphenhydramine in doses of 50 mg is both effective and sufficiently safe to permit its use as an OTC nighttime sleep-aid.

Diphenhydramine was the first antihistamine produced in this country (Ref. 10). It is described (Ref. 11) as a potent antihistamine with a high incidence of sedation, mild antitussive effects, antiemetic effectiveness equal to dimenhydrinate, and is the antihistamine of choice for parenteral use in treatment of anaphylactic reactions.

Based on a review of this drug by the National Academy of Sciences-National Research Council (NAS/NRC), it was classified as "probably" effective for the sedation indication as follows: "For intractable insomnia and insomnia predominant in certain medical disorders." That group recommended that final classification required further investigation (Ref. 12).

The sedative properties of diphenhydramine have been exploited by anesthesiologists as a useful adjunct to preoperative medication (Refs. 13 and 14). The sedative action of diphenhydramine has been utilized in obstetric patients during labor (Ref. 15) and in the preoperative preparation of surgical patients (Ref. 13). Sedation determined by EEG examination was reported in one laboratory study (Ref. 4), while effectiveness in producing sleep was verified in two other EEG laboratories (Refs. 5 and 21) and also in a comprehensive drug surveillance program (Refs. 6 and 9).

Curiously, although antihistaminic drugs commonly produce drowsiness in patients, this effect is not observed in animals receiving comparable doses (Ref. 16). Therefore, a suitable animal model to test the sedative effect of new antihistaminic compounds in man does not exist. However, Winter (Ref. 16) postulated that it is possible to demonstrate a sedative action of an antihistaminic drug in animals by giving the test drug in connection with administration of a drug of known sedative action. This was accomplished with diphenhydramine and other antihistaminics administered in doses in 10 mg/kg injected subcutaneously into mice, followed in ½ hour by intraperitoneal administration of hexobarbital 100 mg/kg. The mean (average) sleeping time was prolonged about 40 percent by diphenhydramine, from 39.3±1.4 minutes to 56.4±1.9 minutes. Similarly, diphenhydramine 10 mg/kg prolonged mean sleep time obtained with pentobarbital 50 mg/kg in mice from 36.0±0.86 minutes to 53.8±0.86 minutes. Comparable results were obtained using guinea pigs receiving diphenhydramine 10 mg/kg and hexobarbital 35 mg/kg. Sleep time was prolonged from 50 to 73 minutes. Other investigators (Refs. 17 and 18) have confirmed prolongation of barbiturate sleep as a valid method for demonstrating the sedative action of antihistaminic drugs in animals. It should be noted that the studies above demonstrate only prolongation of sleep and not a true potentiation of the sedative effect of the barbiturate used. For example, a subhypnotic dose of pentobarbital (25 mg/kg intraperitoneally) in mice was not converted to a sleep dose by the addition of diphenhydramine in doses of 12.5 to 100 mg/kg orally (Ref. 3).

The sedative effect of diphenhydramine, alone or in combination, has been evaluated in a variety of ways. Sachs (Ref. 19) found it the major side effect in a series of 1,210 patients receiving diphenhydramine.

Friedlander (Ref. 5) examined sleep EEG's of 48 patients receiving secobarbital 200 mg or diphenhydramine 100 mg by mouth (the first sleep was with secobarbital in 21 patients). Both drugs were equally effective in induction and maintenance of sleep. Minor differences in amount of abnormal brain activity of various types led Friedlander to the conclusion that, in the dosage given, diphenhydramine might be "a little better drug" than secobarbital for obtaining sleep EEG's.

In a study by Goldstein et al. (Ref. 4), EEG frequency analysis in 42 human volunteers receiving diphenhydramine in does of 25 or 50 mg revealed predominantly increased low amplitude activity (i.e., "low energy sedation"). Not surprisingly, the effect was more marked with the larger dose.

Noell et al. (Ref. 8) used more than 3,000 male volunteers in a carefully controlled daytime EEG study of 33 antihistamines, secobarbital and placebo. Diphenhydramine 50 mg ranked second among the antihistamines, after dimenhydrinate, in time to "end of wakefulness" and thirteenth in time to "onset of sleep"; it was significantly superior to placebo in both of these effects.

Jaattela et al. (Ref. 20) compared the effects of oral daytime administration of the tranquilizer diazepam 10 mg, diphenhydramine 50 mg and placebo (sodium lactate) on mood and psychomotor function in 270 healthy medical students 20 to 23 years of age, divided into three groups (65 men, 25 women). Both drugs decreased activity in men and women and caused some euphoria in men. Diphenhydramine had a slightly greater depressant effect than diazepam on mental functions (as determined by standard tests, e.g. Nowlis adjective check list, digit symbol test, ability to repeat numbers in series).

An abstract by Bjerver and Goldberg (Ref. 2) refers to the central depressant action of a number of antihistamine compounds, including diphenhydramine, without providing details.

The Panel reviewed three studies designed to evaluate the sedative-hypnotic effects of the ingredients methaqualone 250 mg and diphenhydramine 25 mg separately and together in combination. The combination was derived from the demonstrated potentiation of methaqualone by diphenhydramine in the laboratory (Ref. 21). The first study was conducted by Beaubien et al. (Ref. 1) on psychiatric in-patients who received unidentified capsules containing either the combination, methaqualone 250 mg or diphenhydramine 25 mg. The capsules were distributed at random to 18 patients in double-blind fashion for a total of 200 sleeps. Nurses and patients each rated induction and duration of sleep and presence or absence of morning drowsiness and sluggishness on a 4-point scale.

There was some indication that the combination is superior to either methaqualone or diphenhydramine in regard to sleep induction, while the combination and methaqualone alone are equal and both superior to diphenhydramine 25 mg in maintaining sleep.

In the second study, Bordeleau et al. (Ref. 22) compared the sleep produced during 5 consecutive nights by the combination (methaqualone 250 mg and diphenhydramine 25 mg), methaqualone 250 mg, diphenhydramine 25 mg, secobarbital 200 mg and placebo in 101 female psychiatric patients averaging 37.1 years (range 17 to 62 years). Results were evaluated with a questionnaire con-

V 40 236 DEC 8 75 XUM

cerning duration and quality of falling asleep, duration and quality of sleep itself and subjective state on awakening and during the morning. The two single hypnotics (methaqualone and secobarbital) and the combination were found significantly superior to diphenhydramine and the placebo in quality and duration of both falling asleep and sleep itself; it was impossible to differentiate diphenhydramine 25 mg from the placebo in any of the five parameters of sleep studied.

In a third study, by Norris and Telfer (Ref. 14), the sedative effectiveness of diphenhydramine 25 mg appeared more favorably. This again was a comparison of the sedative effects of methaqualone 250 mg and diphenhydramine 25 mg in fixed combination, the individual ingredients and placebo in 200 otherwise healthy female patients undergoing minor gynecologic operations. The patients were divided into groups of 50, handled in double-blind fashion. Although both the mean sedation score and the number of patients showing good sedation were higher after the combination than after diphenhydramine 25 mg, the differences were not satistically significant. Changes in heart rate and blood pressure were minimal after each of the drugs, and postoperative nausea and vomiting were rare.

Cappe and Pallin (Ref. 15), aware of the sedative side effects of antihistamine drugs, explored the extent of hypnosis and analgesia with dispenhydramine and chlorprophenpyridamine in obstetric patients during labor and delivery. Each drug was administered to 30 patients in fractional doses intravenously. Moderate analgesia was achieved in 35 to 40 percent of patients receiving diphenhydramine (30 to 120 mg) or chlorprophenpyridamine. Untoward effects included nausea and vomiting and drop in blood pressure, but not respiratory depression in the newborn.

In another study, Lear et al. (Ref. 13) compared the sedative effectiveness of preoperative medication with various tranquilizers in 1,159 surgical patients. They administered chlorpromazine 12.5 to 50 mg intramuscularly to 350 patients, mepazine 200 to 400 mg orally to 434, promethazine 25 to 50 mg intramuscularly to 193 and diphenhydramine 50 to 100 mg intramuscularly to 132, using as controls a mixed series of 262 patients who received either morphine or meperidine and a belladonna derivative with or without a barbiturate. All of the tranquilizers diminished undesirable reflex activity while causing less overall depression than with the narcotics and barbiturates. The incidence of postoperative nausea and vomiting was reduced, especially with chlorpromazine. Among the 182 patients receiving diphenhydramine, sedation was rated as nil in 15 percent, slight in 34 percent, moderate in 46 percent and marked in 5 percent.

The authors noted that diphenhydramine has been used clinically at bedtime for sedation, either alone or in combination with barbiturates, for the apprehensive patient. Occasionally it has replaced the barbiturates for sedation, even in the allergic patient. The authors further noted that diphenhydramine combined with meperidine is useful preoperatively for brief procedures requiring early ambulation such as vein ligations and for other forms of minor surgery such as dilatation and curettage, removal of simple breast tumors, and incision and drainage.

Two pertinent papers have emerged from a group headed by Jick and Slone, who have established a comprehensive drug surveillance program in three Boston hospitals. The first of these (Ref. 6) concerns a double-blind comparison in adult medical patients of three hypnotic drugs: chloral betaine 750 mg (equivalent to chloral hydrate 500 mg), diphenhydramine 50 mg, pentobarbital 100 mg and a placebo. Fifty bottles of each of the drugs and 100 of placebo were numbered randomly and assigned in numerical order to patients requiring hypnotics. Of the original 250 patients entered into the trial, 195 (86 males, 109 females) received one or more of the prepared capsules. The average age and weight of patients receiving one of the hypnotic drugs were 56.3 years and 70.8 kg, respectively, and of those receiving placebo were 53.7 years and 68.5 kg, respectively. Hypnotic effectiveness was rated by the physician as "good," "fair," "poor," or "don't know." Because 59 patients received a "don't know" rating, analysis of effectiveness was confined to the remaining 136 patients. Statistically, no differences were evident (P=0.50) among the hypnotic drugs but all were superior to placebo: ratings were "good" or "fair" in 17 of 24 patients receiving chloral betaine, 23 of 28 with diphenhydramine, 20 of 24 with pentobarbital and 23 of 60 with placebo.

The second report from this drug surveillance program (Ref. 9) concerns the clinical effects of four hypnotic drugs (chloral hydrate, diphenhydramine, secobarbital and pentobarbital) in 2,045 patients, each receiving one or more of the four drugs in treatment of insomnia. All four drugs were reasonably effective; but, unfortunately, no placebo was used. In the case of diphenhydramine, it is of interest to note that doses were 100 mg in 46 patients (9 percent) and 25 mg in 24 patients (5 percent). Adverse effects were reported in nine patients (1.8 percent) receiving diphenhydramine; of these, seven received 50 mg and two received 100 mg. Vomiting occurred in one case and central nervous system depression in eight, in one of whom depression was deemed "major." All of the patients recovered promptly when the drug was discontinued, and there were no complications.

Another study, by Teutsch et al. (Ref. 23), evaluated sleep following pentobarbital 100 mg, diphenhydramine 50 mg, methapyrilene 50 mg or placebo in 159 patients in two Veterans Administration Hospitals. They found both pentobarbital and diphenhydramine, but not methapyrilene, were significantly better than the placebo when evaluated by the subjective question, "How long did you sleep?" In one of the two hospitals, methapyrilene was superior to the placebo, while in the other hospital, it was not. The authors further state that these findings confirm the results of another comparison between pentobarbital and diphenhydramine which they conducted earlier in 110 patients.

Vogel et al. conducted a double-blind EEG study of the effect of diphenhydramine 50 mg on the sleep of six healthy adult volunteers with both subjective and objective insomnia (Ref. 24). Placebo controls were not used.

Significant changes were observed by Vogel. They included a decrease in sleep latency and an increase in total sleep time, the latter being mainly accomplished by a significant increase in stage 2 sleep; the drug had no effect on delta or deep sleep. There was a small but statistically significant rapid eye movement (REM) deprivation (significant reduction in duration of REM sleep and increase in REM latency, with an almost significant REM rebound). There were no significant changes in subjective sleep variables, nor were important side effects encountered. Slightly more than base line drowsiness was reported by four of the six subjects the next morning, by two subjects on three and six mornings, respectively, following drug administration and by one subject one evening. It was concluded that diphenhydramine 50 mg significantly decreased EEG latency and increased duration of EEG sleep without significant side or toxic effects.

Diphenhydramine has been classed as a potent antihistamine with a high incidence of sedation (Ref. 11). The data in the present reports are confirmatory and suggest that a useful sedative-hypnotic effect may be obtained with diphenhydramine in doses of 50 to 100 mg. Diphenhydramine hydrochloride 25 mg, the amount contained in a combination preparation previously described (Ref. 14), is much less effective than the other constituent, methaqualone 250 mg.

With reference to safety, available data (Ref. 25) indicate a definite but low order of toxicity, unless dosage exceeds 100 mg. Instances of poisoning, accidental or suicidal, have been reported with diphenhydramine. Toxic psychoses from overdose of the drug have been observed (Ref. 26). Possibly the earliest suicide was that reported by Duerfeldt in 1947 (Ref. 27). Wyngaarden and Seevers (Ref. 28) listed a 6-month-old child who died in convulsions and a group of adults, ranging from 18 to 72 years in age, who sustained nonfatal convulsions, excitation, toxic psychosis, coma, petit mal or somnolence. These are typical examples, rather than a complete compilation.

Also of interest are observations that diphenhydramine is an enzyme inducer, i.e., it stimulates the activity of microsomal enzymes in the liver which metabolize a variety of drugs (Refs. 29, 30, 31 and 32). Examples of drugs whose metabolism in the body is so accelerated are zoxazolamine (Ref. 29), aminopyrine

(Ref. 31), carisoprodol (Ref. 30), some oral anticoagulants, barbituarates, corticosteroids, diphenylhydantoin, griseofulvin and diphenhydramine itself (Ref. 27). Since enzyme induction requires repeated use of the inducing drug, this problem would ordinarily not occur with OTC preparations intended for occasional use.

The Panel concludes that evidence already at hand strongly suggests that diphenhydramine in an appropriate dosage (50 mg single dose at bedtime) could prove effective as an OTC nighttime sleep-aid. The Panel recommends that diphenhydramine be made available as an OTC nighttime sleep-aid in a maximum 50 mg single dose at bedtime. Diphenhydramine has therefore been placed in Category III with 3 years provided for testing during which the ingredient may be clinically investigated at doses up to 100 mg to establish the minimally effective dose.

In addition, because past experience has shown that many nighttime sleep-aids have been misused and since there is no experience in the OTC market with this ingredient, the Panel believes that the quantity of the drug available in a product container should be limited to prevent accidental ingestion of a lethal dose.

The Panel believes that reported observations of anticholinergic and other side effects cannot be overlooked and need to be evaluated. Should such side effects prove not serious in a minimum of three additional well-controlled positive studies for the labeled claim of clinical effectiveness, the drug categorization may be changed from Category III to I.

(2) *Doxylamine succinate.* The Panel concludes that, in an appropriate dosage (25 to a maximum 50 mg single dose at bedtime), doxylamine succinate may be both safe and effective as an OTC nighttime-sleepaid, but further evidence of safety and effectiveness is needed. This drug is presently marketed as an antihistamine available by prescription in doses of 12.5 to 25 mg 3 to 4 times a day for adults, or 6.25 mg 2 to 4 times daily for children under 12 years and also available OTC as an antihistamine in doses of 3.75 to 7.50 mg 3 to 4 times a day for adults or 3.75 mg 4 times a day for children under 12 years.

Then Panel has placed the ingredient in Category III (MH) with a restriction on marketing since it is not currently marketed as an OTC nighttime sleep-aid, and further testing is required to demonstrate its safety and effectiveness for this indication. The Panel understands that the Agency can place this ingredient in Category II instead of Category III (MH) which has the effect of prohibiting marketing until an approved new drug application (NDA) is obtained or until the OTC nighttime sleep-aid monograph is amended to include the ingredient.

In antihistaminic sedative potency, doxylamine succinate resembles other antihistamines in the ethanolamine class. One paper (Ref. 1) indicates that doxylamine succinate is a potent antihistamine which shows a high incidence of sedation with average therapeutic doses. Feinberg (Ref. 2) grades the sedation of 12.5 mg of doxylamine succinate the same as that of 25 mg of methapyrilene hydrochloride, while other researchers contend that the sleep-inducing effect of doxylamine is significantly greater than that of methapyrilene (Ref. 3).

The exact mechanism of central nervous system depression by doxylamine is unknown, and there is nothing in the literature on the absorption and fate of doxylamine in humans. In male rats, 7 to 21 percent of a single intravenous or oral dose of the succinate is excreted in the urine within 24 hours of administration, while in female rats the amount excreted is 17 to 30 percent (Ref. 4). Dogs receiving daily oral doses of doxylamine

[a] Cited OTC Volumes refer to the submissions made by interested persons pursuant to the call for data notices published in the FEDERAL REGISTER of August 22, 1972 (37 FR 16885) and May 25, 1973 (38 FR 13763). V40236 DEC 8 75 XUM

succinate for prolonged periods consistently eliminate about 20 percent of the daily dose in the urine. Snyder and coworkers (Ref. 4) concluded, on the basis of tissue determinations of the drug and urinalysis of excreted products, that the bulk of the administered drug is metabolized in the body.

Brown and Werner (Ref. 1) found the intravenous LD_{50} (defined as a dose that is lethal for 50 percent of the test animals) for doxylamine succinate to be 49 and 62 mg/kg for rabbits and mice, respectively. Subcutaneously in mice and rats or orally in mice, the compound was about ⅛ as toxic as when given intravenously. It was about ½ as toxic orally in rabbits. In mice and rats, acute toxicity was similar for both sexes. They also found favorable ratio of effectiveness to toxicity for guinea pigs.

Acute toxicity studies in dogs showed that oral doses of 7.5 mg/kg of doxylamine succinate produced no evidence of toxicity (Ref. 5). Repeated administration of 15 mg/kg 3 times a day caused some loss of appetite and weight, mydriasis, apprehension, and muscular tremors in three out of four dogs. Similar effects occurred in one of two monkeys at dose levels of 16 to 20 mg/kg 3 times daily. Lower doses produced no such toxic effects.

In the same studies, the administration of doses of doxylamine succinate as high as 45 mg/kg twice daily for a period of 38 days had no significant effect in rats, as judged by gross signs of toxicity, hematologic determinations, and histopathology. Repeated administration of increasing doses from 50 to 150 mg/kg also had no gross effects. However, an increase to 200 mg/kg resulted in a decreased rate of growth in some animals, and an increase up to 400 mg/kg caused anorexia and death, in one case. Thus repeated doses resulted in toxicity only when the doses approached acutely lethal ones.

In a test for teratogenic effects of a combination of doxylamine and dicyclomine (a product used for treating nausea of pregnancy), doxylamine succinate was given orally to rabbits in doses of 10 to 100 mg/kg/day (Ref. 6). Neither doxylamine, dicyclomine nor the combination had any deleterious effects on pregnancy maintenance, litter size or fetal weight in the rabbit, except when maternal toxicity was produced. In rats, the same doses produced no alteration in breeding, conception, pregnancy maintenance, litter size or fetal weight, although a dose-related decrease in body weight gain did occur in rat pups from doxylamine and and dicyclomine-treated mothers.

Feinberg and Bernstein (Ref. 7) found that in 118 patients being treated for allergy with doses of 12.5 to 25 mg of doxylamine succinate, side effects were observed in 39 of them. Sedation or sleepiness was seen in 36 of the 39 patients. Nervousness was noted in four patients, and vertigo in four others. No serious toxic effects were noted after use of the drug for 6 months.

Keeney (Ref. 8) states that the use of doxylamine succinate as an antihistamine is infrequently followed by side effects, but MacQuiddy (Ref. 9) says that such side effects are "quite frequent" with the 50-mg dose of doxylamine succinate although with the 25-mg dose the number of reactions decreases "materially," while clinical results remain satisfactory. MacQuiddy concludes that doxylamine succinate is a safe and effective medication, having seen no reactions of any severity during his clinical study, with principally drowsiness and occasionally nausea being the main side effects.

Sheldon et al. (Ref. 10) gave allergic patients 12.5 to 200 mg of doxylamine succinate and found that 57 percent complained of drowsiness. However, the authors noted no apparent correlation between the dosage of the drug and drowsiness. Palpitations, irritability, and diarrhea were noted in three separate instances. There was no evidence of any hepatic, renal or vascular changes.

Finally, Ferguson (Ref. 11) gave schizophrenic patients up to 1,600 mg of doxylamine succinate daily by mouth for up to 6 months and found few side effects. He evenremarked about the lack of sedation or drowsiness with high doses, noting that a combination of 900 mg doxylamine and 270 mg of phenobarbital daily produced no sedation, whereas 270 mg of phenobarbital alone produced an all-day sleep, therefore suggesting even an antagonism of phenobarbital's hypnotic effect by doxylamine. There were no changes in pulse, respiration, temperature or blood pressure with the high doses used in Ferguson's study, and blood chemistry and organ function tests remained normal, yet the doses were encouragingly effective in treating schizophrenic patients. In addition, after giving doxylamine to schizophrenics, Ferguson found "there has been no habituation to doxylamine, but a mild degree of tolerance has been noted." He indicated that during a 6-month period, the dose had to be increased in some patients from 300 to 900 mg daily to maintain satisfactory results. Partially confirming these data was the work of Selzer and Waldman (Ref. 12), who gave chronic psychotic patients doses of doxylamine (unspecified salt) up to 900 mg/day for 3 months. Side effects were also virtually nonexistent in this study.

There were only a few citations found in the literature for tolerance buildup to the sedative effects of antihistamines, and all of these are unsubstantiated.

Thompson and Werner (Ref. 5), for example, state in their toxicity experiments that repeated administration of doxylamine succinate to rats in large doses for a comparatively long period did not lead to tolerance or accumulation. However, Feinberg (Ref. 2) states that there is a definite tendency for the rapid development of tolerance to the sedative effects of (all) antihistamines.

Since the depressant actions of antihistamines are additive with the effects of other central nervous system depressants, the concomitant use of alcoholic beverages or other drugs known to depress the central nervous system should be avoided (Ref. 13). Brown (Ref. 14) says that such combinations produce deepened and prolonged sleep.

It appears from some studies that 50 mg and above of doxylamine succinate produces the side effect of sedation when the drug is used as an antihistamine (Refs. 7 and 14). However, as stated above, Ferguson (Ref. 11) and Selzer and Waldman (Ref. 12) gave doses up to 900 mg daily in three divided doses, with little evidence of drowsiness, in schizophrenic patients. Such apparently contradictory results need to be explained.

No literature was found concerning poisoning or doses which cause death in humans.

Acute toxicity studies in animals which have been reported make no mention of the behavior of the animals before death, except that they died in convulsions. Chronic toxicity studies (Ref. 5) mention that dogs appear "apprehensive" after 15 mg/kg of doxylamine succinate 3 times daily, and that a monkey given 20 mg/kg 3 times daily yawned frequently, was apprehensive, and upon handling exhibited convulsive tremors.

The drowsiness effect of doxylamine in humans, as with other antihistamines, is well documented (Ref. 2). As mentioned earlier, doxylamine is a potent antihistamine with a high degree, compared with other antihistamines, of central nervous system depression as well. It may be stimulatory at higher doses, as suggested by the chronic toxicity studies in dogs and monkeys.

Only two clinical reports on the effectiveness of doxylamine as a sleep-aid have been found. The first study, by Noell et al. (Ref. 15), was performed on more than 3,000 men for the purpose of evaluating the sedative effects of over 20 antihistamines by electroencephalographic (EEG) methods and comparing these effects with those of barbiturate and nonbarbiturate hypnotics. Doxylamine succinate 25 mg was one of the three most sedating antihistamines, producing a significantly reduced latency to end of wakefulness, and comparing favorably with established hypnotic drugs such as secobarbital and pentobarbital in sedation activity. It was chosen as the antihistamine based on dosage causing the earliest onset of sleep.

The second study, by Sjoqvist and Lasagna (Ref. 3), compared the effectiveness of 25 and 50 mg of doxylamine succinate as a nighttime hypnotic with that of placebo and two doses of secobarbital. Both drugs were shown to be significantly better than placebo, and both doses of doxylamine scored better than 100 mg of secobarbital but not as well as 200 mg of secobarbital. There were few side effects, other than hangover, with both drugs. Two weaknesses of the study were (1) the high placebo effect (50 percent of the patients slept as well on placebo as on their previous hypnotic medication) and (2) the lack of a dose-related difference in effectiveness between the two doses of doxylamine used.

Both of the above-mentioned studies suggest that doxylamine may have nighttime sleep-aid potential.

In summary, the Panel notes that the potential effectiveness of doxylamine succinate as an OTC nighttime sleep-aid is shown by the fact that there were 33 percent side effects (primarily sedation or sleepiness) in one study where individual doses of up to 50 mg were used for the treatment of allergy (Ref. 7). No serious side effects were noted after use of the drug for 6 months. The Panel notes that studies in which high doses (up to 1,600 mg/day) of doxylamine succinate were given to schizophrenic patients (Ref. 11) suggest that the drug is relatively safe. However, it is possible that psychotic patients do not respond to high doses of centrally active drugs in the same manner as nonpsychotic individuals.

The Panel concludes that since the ingredient is not currently marketed as an OTC sleep-aid, it should be placed in Category III (MH) with a marketing hold during the testing period provided. The Panel concludes that the available reports on the safety of doxylamine succinate are not adequate to permit its use as an OTC nighttime sleep-aid. The Panel recommends that a minimum of five additional well-controlled studies are necessary to establish the safety and effectiveness of the ingredient as an OTC nighttime sleep-aid. At least two EEG studies and at least three clinical studies are necessary. The Panel has determined that an appropriate dosage for testing should be limited to 25 to a maximum 50 mg single dose at bedtime.

(3) *Methapyrilene hydrochloride and methapyrilene fumarate.* The Panel concludes that methapyrilene hydrochloride and methapyrilene fumarate are probably safe and may be effective as OTC nighttime sleep-aids in appropriate dosages (25 to a maximum 100 mg single dose at bedtime). The Panel considers it feasible to handle both salts of methapyrilene (hydrochloride and fumarate) as similar drugs because their molecular weights are in the ratio of 1(base):1.1 (hydrochloride):1.5(fumarate). Most studies have been performed with the hydrochloride salt whose weight is close to that of the base. The ingredients are currently marketed as OTC sleep-aids which contain 10 to 26 mg per tablet or capsule, except one which contains 50 mg. The Panel notes that the recommended dosage of the various OTC preparations (25 to 50 mg) is substantially below the 100 mg dose at which patients receiving the drug for various allergies experienced drowsiness (Ref. 1). There is some evidence of effectiveness at a bedtime dose of 50 mg (Refs. 2 and 3) but others report drowsiness only at 100 mg (Ref. 1). The Panel has placed the ingredients in Category III since it has insufficient information on the safety and effectiveness of these active ingredients. The Panel has determined that further testing in well-controlled studies is required to assure the effectiveness of the suggested dosage of 25 to a maximum 100 mg single dose at bedtime. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation.)

Methapyrilene was introduced clinically by Feinberg and Bernstein 1 year after diphenhydramine (Ref. 4). Its antihistaminic and antianaphylactic activity was verified in experimental animals and its antiallergenic activity documented in a varied series of 253 patients, whose average dose was 50 mg orally 1 to 4 times daily; a few patients received 100 mg doses, but these were frequently not well tolerated. In this apparently uncontrolled study, side effects were noted in approximately 25 percent of the patients. Sedation was the most common side effect, occurring in 48, or 19 percent, of the patients studied. The degree of sedation was not as great as that produced by diphenhydramine, but equaled or exceeded that of tripelennamine.

Kierland and Potter (Ref. 5) compared methapyrilene with diphenhydramine and tripelennamine in 126 dermatologic patients. Doses, given 3 or 4 times daily, were usually 100 mg of methapyrilene and 50 mg of the other two drugs. Improvement was comparable with the three drugs. Drowsiness was observed in 10 of the 126 patients receivng methapyrilene, 3 of 47 with diphenhydamine and 1 of 44 with tripelennamine, although the authors noted that the degree of drowsiness was more marked with diphenhydramine than with either of the other drugs.

The Friedlanders (Ref. 1) also verified antiallergic effectiveness of methapyrilene in 85 of 117 patients. Dosage was usually 100 mg 4 times daily for adults and 25 to 50 mg daily for children. One or more side effects, generally mild, occurred in about 25 percent of the patients, usually at the 100-mg (adult) dose level, and were frequently obviated by reduction in dosage to 50 mg. Of special interest was that drowsiness was observed in 19, or 16 percent, of the patients studied.

The classic paper on the hypnotic efdence of methapyrilene, offered in evidence for its effectiveness as a nighttime sleep-aid, is the study of Straus et al. (Ref. 2). In that study the authors compared 50 mg of methapyrilene with 100 mg of phenobarital and placebo under double-blind conditions in 54 male insomniac patients in a Veterans Administration hospital. The experimental design called for each patient to receive each medication 6 times for a total of 18 nights in 3 weeks (a few nights were missed). Drug administrations were randomized, except that no drug succeeded itself. Evaluations of effectiveness were objective (graded by nurses observing the patients hourly during the night) and subjective (as reported by the patients to a physician the next day) reports of three criteria: falling asleep (sleep latency), staying asleep and overall evaluation. A 4-point scale was used, ranging from 0 (no sleep response) to 3 (excellent sleep response). The data indicate that both methapyrilene and phenobarital were more efficient than placebo in their hypnotic effect. The nurses' observations found methapyrilene more effective than phenobarbital in inducing sleep (but the patients could not distinguish between the two compounds); in overall evaluation the patients favored phenobarbital (but the nurses could not differentiate between the two); and for staying asleep, neither patients nor nurses could distinguish between them. The authors concluded that the two drugs exerted approximately equal hypnotic effects, in each case significantly greater than that of the placebo. It should be noted that phenobarbital, with its known slow onset of

V40236 DEC 8 75 XUM

action, is not the ideal barbiturate hypnotic; secobarbital or pentobarbital would have been better choices for comparison. Nevertheless, the study does provide data demonstrating hypnotic effectiveness of methapyrilene in 50-mg doses.

In another study, Shapiro (Ref. 6) used methapyrilene from 1 to 66 days as a sedative in 33 hyperactive children ranging in age from 4 weeks to 12 years. The drug produced sleep and relaxation of hyperactive states during the daytime in 24 of 31 children, with nausea in one only. Nowhere in the article is the dosage defined.

Noell et al. (Ref. 7), in a daytime EEG study with over 3,000 Air Force volunteers, found that, of 33 antihistamines studied, methapyrilene 50 mg ranked eighteenth in time to "end of wakefulness" and fifth in time to "onset of sleep." In both of these effects methapyrilene scored significantly better than placebo but not nearly as well as secobarbital 100 mg.

Feinblatt and Ferguson (Ref. 3) compared methapyrilene niacinate, methapyrilene hydrochloride and placebo in a double-blind study involving 53 patients with insomnia. The dose of each methapyrilene salt was 50 mg (calculated as methapyrilene base). Both were considerably more effective than placebo, inducing "satisfactory sleep" in 37 (70 percent) of the 53 cases, "partial relief" in 9 (17 percent) and failing in 7 (13 percent).

More recently, Teutsch et al. (Ref. 8) used subjective responses to evaluate sleep following pentobarbital 100 mg, diphenhydramine 50 mg, methapyrilene 50 mg or placebo in 150 patients in two Veterans Administration hospitals. The four preparations, in identical capsules, were administered by a nurse-observer on each of 4 consecutive nights of a randomized program. Next morning the patients reported to the nurse how well they had slept, the time taken to fall asleep, how long they had slept, and how the sleep compared with their usual night's sleep at home. For all response variables, both pentobarbital and diphenhydramine were found significantly better than placebo when evaluated by the subjective question, "How long did you sleep?" In one of the two hospitals, methapyrilene was superior to placebo while in the other hospital it was not.

The Panel is aware of instances of poisoning, either accidental or suicidal, with methapyrilene. For example, fatalities have included a 15-month old girl who developed hyperpyrexia, cerebral edema, upper nephron nephrosis and uremia (Ref. 9) and an adult suicide who died in convulsions (Ref. 10). Examples of nonfatal cases include a 20-month-old child (Ref. 11) and two adults (Ref. 12), all manifesting convulsions, and a pregnant female with a toxic psychosis mimicking eclampsia (Ref. 13).

The Panel has also reviewed a number of additional studies in which methapyrilene was used in combination with salicylamide and scopolamine (Ref. 14). The Panel concludes that the weight of evidence is clearly in the direction of a positive effect: methapyrilene in these combinations almost certainly is able to produce drowsiness, EEG shifts, and reduced sleep latency. Since the effects are probably present but not strong with 50 mg of methapyrilene and since this appears to be a relatively safe drug, doses of 75 mg or 100 mg seem worth exploring (Ref. 14).

On the basis of evidence presently at hand, the Panel concludes that methapyrilene hydrochloride or methapyrilene fumarate in dosages of 25 to a maximum 100 mg in a single dose at bedtime may be effective as an OTC nighttime sleep-aid. The Panel recommends that a minimum of five additional well-controlled studies are necessary to establish the safety and effectiveness of the ingredient as an OTC nighttime sleep-aid. At least two EEG studies and at least three clinical studies are necessary. Should anticholinergic or other side effects prove not serious in these additional studies and should these studies in dosages of 50 mg and possibly up to 100 mg prove methapyrilene to be effective, i.e., significantly better than placebo in improving sleep in one or more sleep parameters, this drug could be moved from Category III to Category I.

(4) *Phenyltoloxamine dihydrogen citrate.* The Panel concludes that in appropriate dosage (100 to a maximum 200 mg single dose at bedtime), phenyltoloxamine dihydrogen citrate may be both safe and effective as an OTC nighttime sleep-aid, but further evidence of safety and effectiveness is needed. This drug is available on an OTC basis in a dose of 30 mg as an ingredient in a combination analgesic calmative preparation.

Phenyltoloxamine (also called phenoxadrine), one of the ethanolamine group of antihistamines, is also marketed in OTC combination products (22–89 mg of the dihydrogen citrate salt) for the treatment of bronchial asthma, allergic coryza, allergic cough, headache and other pain, and gastric hyperacidity due to nervous tension.

The Panel has placed the ingredient in Category III (MH) with a restriction on marketing since it is not currently marketed as an OTC nighttime sleep-aid, and further testing is required to demonstrate its safety and effectiveness for this indication. The Panel understands that the Agency can place this ingredient in Category II instead of Category III (MH) which has the effect of prohibiting marketing until an approved new drug application (NDA) is obtained or until the OTC nighttime sleep-aid monograph is amended to include the ingredient.

Phenyltoloxamine is a potent histamine antagonist, and the early literature on this drug stresses its apparently low acute and chronic toxicity. Extensive clinical studies have provided evidence that the drug is effective in relieving vasomotor rhinitis, hay fever, pruritis, eczema, urticaria, asthma, and certain allergic drug reactions (Ref. 1). Like other antihistamines, the drug has distinct local anesthetic properties and some antispasmodic activity. In addition, LaVerne (Ref. 2) lists the following properties without documentation: autonomic suppressant, adrenergic stimulant sedative, mild hypnotic effect, and no adverse effect on mental acuity. After the 1957 report by Sainz (Ref. 3) on the effects of the drug on psychotic patients, phenyltoloxamine achieved the reputation of being a "phrenotropic" or tranquilizing drug. A number of reports then appeared on its therapeutic usefulness as a sedative (Refs. 4, 5 and 6).

[3] Cited OTC Volumes refer to the submissions made by interested persons pursuant to the call for data notices published in the FEDERAL REGISTER of August 22, 1972 (37 FR 16885) and May 25, 1973 (38 FR 13763). The volumes are on file in the office of the Hearing Clerk, Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, MD 20852.

The side effects of phenyltoloxamine are apparently mild in therapeutic doses, soporific (sleep-inducing) effects are low and occur in less than 7 percent of patients (Ref. 7).

In general, the mechanism of central nervous system depression by phenyltoloxamine is unknown, although a report by DeSalva and Oester (Ref. 8) suggests that phenyltoloxamine acts similarly to mephenesin and morphine sulfate in depressing polysynaptic reflexes in cats. Such a test has traditionally been used for studying central muscle relaxant activity, which may be indicative of sedative or tranquilizing potential.

The only study found concerning the absorption and fate of phenyltoloxamine was performed by Hoekstra et al. in 1953 (Ref. 9). Extrapolating from experiments performed in dogs, rats and mice for other purposes, they concluded that phenyltoloxamine is readily absorbed from the gastro-intestinal tract and peritoneal cavity and distributed rapidly throughout the body. Very little is known of its destruction, conjugation, or excretion, since attempts to isolate unchanged phenyltoloxamine or certain possible breakdown products from the urine of dogs were not successful. Hoekstra et al. (Ref. 9) also did acute toxicity studies in mice which compared the LD_{50}'s of phenyltoloxamine hydrochloride, phenyltoloxamine dihydrogen citrate, diphenhydramine hydrochloride and tripelennamine. Phenyltoloxamine hydrochloride was one-fifth as toxic intraperitoneally and one-twelfth as toxic orally as when given intravenously. It was one-half as toxic as tripelennamine and two-thirds as toxic as diphenhydramine hydrochloride when intraperitoneal LD_{50}'s were compared.

Acute toxicity studies of various doses of phenyltoloxamine in a few rats showed that oral doses greater than 680 mg/kg caused death preceded by hyperactivity, excitement, convulsions and respiratory depression. In dogs, intravenous doses above 20 mg/kg caused death, while lower doses produced ataxia, excitement followed by depression, and slight narcosis (Ref. 9).

Finally, limited chronic studies showed that dogs tolerate phenyltoloxamine dihydrogen citrate in daily oral doses of 20 and 40 mg/kg (calculated in terms of active moiety) with no untoward effects. There were no indications of blood dyscrasia at any time during the experiments (Ref. 9).

In general, clinical studies in man in which phenyltoloxamine has been evaluated as an antihistamine consistently show few side effects with doses of 25 to 50 mg of the dihydrogen citrate salt. Sainz (Ref. 3) performed a preclinical study in 48 patients to determine side effects and toxicity and found that mild drowiness appeared at oral doses above 200 mg 4 times a day, or with single doses of 400 mg. Ataxia or abnormal reflexes were not noted at oral doses of 400 mg 4 times a day; there were no extrapyramidal symptoms; the EEG was not affected; and a slight blood pressure increase was seen. Doses higher than 200 mg 4 times a day produced adrenergic stimulation (increased salivation, gastritis, and diarrhea). Heartburn was found in 14 percent of patients taking the drug, and occasionally nausea was seen. No changes were noted in metabolic, nutritional, endocrine, hematologic, urologic or liver function studies. Sainz concluded that the drug is not only safe but remarkably free from undesirable reactions at oral doses of 100 mg 4 times daily.

Cronk and Naumann (Ref. 10) gave 2,380 allergic patients with nonspecific upper respiratory infections 100 to 600 mg of phenyltoloxamine dihydrogen citrate daily and saw only three cases of side effects caused by the drug. These were manifested as a mild soporific state after 200, 300 and 600 mg of the salt, and in no case was the side effect severe enough to warrant discontinuation of the drug. Although this study suggests that the incidence of drowsiness with phenyltoloxamine is low, a later study by Fleischmajer et al. (Ref. 4) found a much higher incidence of central nervous system depression. Fifty patients received the drug (unidentified salt) for treating allergic cutaneous disorders in doses of 100 mg 3 times a day (after meals) and 200 mg at bedtime. In 39 patients (78 percent) there was excellent relaxation, lessening of inner tension, and improvement in the ability to sleep. Most of these patients noted a pleasant calmness within 30 to 60 minutes after taking the drug. The other side effects noted were blurred vision, vomiting, tachycardia, dry mouth, and marked hypnosis, but only 3 patients discontinued therapy because of the severity of these effects.

Finally, in a study designed to test the usefulness of phenyltoloxamine in chronic schizophrenics, Barsa and Saunders (Ref. 11) gave 60 female patients gradually increasing doses of phenyltoloxamine (unidentified salt), with the highest dose reached being 800 mg 4 times a day. The patients received the drug for 3 to 5 months. It was seen that when the dose was below, 1,600 mg per day, most of the patients were stimulated, becoming more alert, but also more restless and irritable. As the daily dose went above 1,600 mg, the excessive stimulation disappeared and the psychosis appeared to improve. However, most of the patients could not tolerate the high dose. Forty patients (67 percent) complained of nausea or loss of appetite: 10 of these also experienced vomiting. Fifty patients showed an average weight loss of almost 5 kg (11 lb). Other patients complained of generalized weakness, fainting, ataxia, parkinson-like symptoms, and generalized tremulousness. All of these side effects disappeared when the dosage was reduced. Hematological tests, liver function tests, and urinary studies showed no significant changes in any of the patients.

Few reports on tolerance to phenyltoloxamine were found in the literature. Cronk and Naumann (Ref. 10) mentioned in passing that at the end of their experiments considerable adaptation had apparently developed in that the sedation effect had become subjectively less severe after 200 to 600 mg of dihydrogen citrate salt per day for 3 days.

Although the Panel could find nothing in the literature on intеactions of phenyltoloxamine with other drugs, it is expected that, like other antihistamines, phenyltoloxamine could interact with central nervous system depressants.

The average oral antishistamine dose of the dihydrogen citrate salt for adults is 50 mg 3 to 4 times daily. This may be increased if the desired therapeutic response is not obtained or if side effects do not become pronounced (Ref. 7). In one study such doses produced a rather low incidence of drowsiness, around 7 percent (Ref. 7), but another study (Ref. 4) suggests a much higher incidence of central depression (78 percent), with higher doses (100 mg 3 times a day, unspecified salt). Single doses of 400 mg (unspecified salt) produced sedation and moderate hypnotic effect in 100 percent of healthy volunteers in one study (Ref. 12).

Doses higher than 1,600 mg per day (unspecified salt in 4 divided doses) in humans apparently can be considered the upper limit of usage of the drug, since above this amount generalized toxicity is observed in schizophrenic patients (Ref. 11). Below this dose, however, signs of central nervous system stimulation were apparent in the same patients.

No literature was found concerning poisoning or doses which cause death in humans.

Two uncontrolled and three controlled studies were found concerning the effectiveness of phenyltoloxamine as a sedative. Although insufficient information is available, it appears that a study by Sainz (Ref. 3) was uncontrolled. Phenyltoloxamine (dihydrogen citrate salt) was used to treat 227 cases of psychotic behavior, using oral doses of 100 to 500 mg 4 times a day. Sainz concluded that the drug has a powerful affective and behavioral effect, although it does not produce euphoria, exhilaration, mental cloudiness, or confusion. Addiction and withdrawal reactions were not noted after 6 months of continued high dosage in certain patients. For certain anxieties, the calming effect produced by the drug is, in Sainz' opinion, slightly more pronounced than that produced by phenobarbital and the meprobamates; and because of the absence of immediate or eventual reactions, much safer and preferable to either.

The other uncontrolled study was by Fleischmajer et al. (Ref. 4), who gave 500 mg per day (unspecified salt) by mouth to 50 patients with a variety of dermatoses in whom a tension factor was believed to be associated with the disorder. They found that in 39 of the patients there was excellent relaxation, lessening of inner tension, and an improve-

V40236D EC 8 75 XUM

ment in the ability to sleep. They evaluated various dosage schedules and recommended 200 mg for nighttime sedation, with the comment that the ideal individual dose should be determined for each person.

The first controlled study, by Noell et al. (Ref. 5) was performed on over 3,000 men for the purpose of evaluating the sedative effects of more than 20 antihistamines by electroencephalographic methods and comparing these effects with those of barbiturate and nonbarbiturate hypnotics. Phenyltoloxamine (dihydrogen citrate salt) 50 mg was significantly better than placebo and ranked better than 50 mg of methapyrilene hydrochloride in the experiment on determination of onset of sleep. The dihydrogen citrate salt ranked better than diphenhydramine hydrochloride 50 mg, considered by the authors one of the three most sedating antihistamines.

The second controlled study (Ref. 12) was a comparative double-blind study with reserpine and placebo on 15 volunteers who received single oral doses of 400 mg of phenyltoloxamine (unspecified salt) 5 mg of reserpine, or placebo. Physiological measurements and a battery of psychological performance and learning tests were used to determine drug effects on behavior and function of the individuals. The results showed that 400 mg of phenyltoloxamine produced sedation and a moderate hypnotic effect, reaching a peak in 4 to 5 hours. Although latency and duration of sleep itself were not measured in this study, at the peak action of the drug there was drowsiness and a slowing of psychomotor and mental performance, followed by a state of relaxation, increased learning, and improved performance.

The third controlled study (Ref. 6) evaluated the effectiveness of phenyltoloxamine (unspecified salt, 50, 100, and 200 mg orally) as a daytime sedative, comparing it with 2 doses of phenobarbital and a placebo. One hundred thirty-one ambulatory patients, all of whom required a sedative for control of an anxiety state, were used. The workers concluded that phenyltoloxamine 3 to 4 times daily for several weeks of continuous therapy is safe. Although they did not make any comparisons with phenobarbital in their discussion, it appears that 100 mg of phenyltoloxamine was equivalent to 15 mg of phenobarbital in a "combined sedation and hypnotic effect" measure that they presented.

In summary, the Panel believes that the available data on the safety and effectiveness of phenyltoloxamine dihydrogen citrate in the dose range of 100 to 200 mg are not adequate to permit its use as an OTC nighttime sleep-aid. There is some evidence that the drug may have effectiveness as an OTC nighttime sleep-aid; for example, in one study (Ref. 5) the drug ranked better than methapyrilene hydrochloride when measuring "end of wakefulness" and better than diphenhydramine hydrochloride, on determination of "onset of sleep."

Since the ingredient is not currently marketed as an OTC sleep-aid but is currently available in an OTC combination product promoted as a calmative, it should be placed in Category III (MH) with a marketing hold during the testing provided. The Panel concludes that the available reports on the safety of phenyltoloxamine are not adequate to permit its use as an OTC nighttime sleep-aid. The Panel recommends that a minimum of five additional well-controlled studies are necessary to establish the safety and effectiveness of the ingredient as an OTC nighttime sleep-aid. At least two EEG studies and at least three clinical studies are necessary. The Panel has determined that an appropriate dosage for testing should be limited to 100 to a maximum 200 mg single dose at bedtime.

(5) *Pyrilamine maleate.* The Panel concludes that there is insufficient information on the safety and effectiveness of pyrilamine maleate as an OTC nighttime sleep-aid and has therefore placed the ingredient in Category III. Described as an effective antihistamine with low incidence of sedation (Ref. 1), it appears ancillary to methapyrilene as an ingredient in three currently marketed OTC products promoted for sleep. The usual single OTC dose for an adult is 25 to 50 mg. The Panel has determined that further testing in well-controlled studies is required to assure the safety and effectiveness of a suggested dosage of 25 to a maximum 50 mg single dose at bedtime. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation).

Pyrilamine was discovered in France (Ref. 2) 2 years after the introduction of Antergan, the first antihistamine used clinically (Ref. 3). Pyrilamine effectively inhibits experimental production of skin wheals by histamine (Ref. 4) and can prevent the increase in capillary permeability ordinarily produced by histamine (Ref. 5). In addition to its effectiveness as an antihistamine, pyrilamine also possesses local anesthetic activity (Refs. 6 and 7) and even exerts a mild analgesic action (Ref. 8).

In doses of 25 to 50 mg, anorexia, nausea and vomiting are commonly encountered but can be minimized by the simple precaution of taking this ingredient at mealtimes. However, the Panel believes this is not possible when pyrilamine is used as an OTC nighttime sleep-aid. The Panel has located only one study pertaining to the hypnotic potential of pyrilamine used alone (Ref. 9). This study provides some evidence that pyrilamine maleate 50 mg is superior to placebo in reducing the time to "end of wakefulness" by EEG criteria but not in the subjective evaluation of "time to sleep onset." Subjects were military personnel studied under daytime nap conditions.

The Panel is aware of instances of accidental poisoning with pyrilamine. For example, two fatalities of accidental poisoning have been reported in the literature (Ref. 10). In one case a 15-month-old infant died 6 hours after ingestion of 1,500 mg of the drug, and in a second case a 23-month-old infant died 6 hours after ingestion of 10 tablets (dose unspecified). Both victims exhibited coma and/or convulsions previous to death. The Panel therefore believes that when further testing is conducted, special attention should be given to the minimum dosage level required for effectiveness.

The Panel concludes that insufficient data are available on the safety and effectiveness of pyrilamine maleate as an OTC nighttime sleep-aid and has therefore placed the ingredient in Category III. Further testing is necessary in a suggested dosage of 25 to a maximum 50 mg single dose at bedtime. The Panel recommends that a minimum of five additional well-controlled studies are necessary to establish the safety and effectiveness of the ingredient as an OTC nighttime sleep-aid. At least two EEG studies and at least three clinical studies are necessary. Should studies show safety and effectiveness, this drug could be moved from Category III to Category I.

Labeling

It is the view of the Panel that the following label claims would be acceptable for OTC nighttime sleep-aid products if sufficient data were provided to substantiate their use. Labeling such as "Reduces time to fall asleep in persons with difficulty falling asleep," "Reduces number of awakenings in persons who wake frequently during the night," and "Prolongs sleep," may be valid if proven by well-controlled studies. (See paragraph II D below—Data Required for OTC Nighttime Sleep-Aid Ingredient Evaluation.)

D. DATA REQUIRED FOR OTC NIGHTTIME SLEEP-AID INGREDIENT EVALUATION

The Panel suggests the following guidelines for the evaluation of safety and effectiveness of an agent to be used as an OTC nighttime sleep-aid:

1. *Minimum requirements to determine safety and effectiveness.* The active ingredient must be safe in the doses suggested on the labeling for OTC use. Safety should be evaluated using the current requirements for preclinical testing in animals as defined in 21 CFR 312.1(a)(2)6.a. Regarding effectiveness, a number of important variables must be considered: (1) sleep latency (time required to fall asleep), (2) number of awakenings, (3) total time spent awake, (4) sleep duration, (5) sleep quality, as estimated by the sleeper, (6) sleep stages and cycles evaluated by EEG and polygraphic criteria, and (7) side effects. Typically, an OTC medication might be tested to determine whether it reduces sleep latency (or possibly increases sleep duration) without detrimental effects on the other variables.

A target population must be identified so that wherever possible in studies of effectiveness, subjects tested are similar to those who will eventually take the drug. For OTC nighttime sleep-aids, the population would consist of individuals with symptoms of mild or occasional sleep disturbance.

It is important to provide both subjective and objective assessment of sleep. Certain important aspects, such as the subject's estimate of the quality of sleep and feeling state in the morning, can only be assessed subjectively. On the other hand, objective sleep laboratory studies have obvious advantages to assess objectively and exactly continuous measures of sleep, thus providing exact measures of sleep latency, sleep duration, number of awakenings, and other variables of interest. Other clinical aspects can also be assessed both subjectively and objectively.

Any claimed ingredient(s) or labeling claim(s) classified by the Panel as Category III should be evaluated using the concepts and methodology described below in the suggested guidelines.

2. *Sleep laboratory studies.* A small number of appropriate subjects (e.g., 6 to 12 per study) should be studied intensively in a sleep laboratory. Sleep laboratory studies should involve the use of both placebo and active medication in a properly controlled design. The exact design would depend on individual drug factors, such as time required for washout, necessity in some cases for studies of continuous administration, etc. This would allow precise determination of sleep latency, sleep duration, number and length of awakenings, and time spent in the various sleep stages. Such a study can help determine effectiveness and can also be used as a safety or toxicity study since disturbances of sleep and mood can be studied during and after drug administration. Such laboratory studies would ideally include investigation of the drug when taken on multiple consecutive nights and after discontinuation, since withdrawal effects after continuous administration can be of importance. However, since the drug is an OTC preparation to be taken as a single dose for occasional insomnia, such long-term studies are not absolutely essential, though still advisable.

3. *Clinical studies in a suitable target population.* A large number of appropriate subjects should be studied for subjective effects on sleep. Subjects should be mild insomniacs falling directly within the target population expected to take the drug. Such a study should preferably use separate large groups, perhaps 40 to 80 subjects per group, since intergroup comparisons have statistical advantages. A well planned crossover study, however, might also be acceptable. If several doses of a drug are to be studied, or if a combination of several ingredients is being studied, a larger number of groups is required. For instance, if a combination containing two ingredients (A+B) is studied, a design should include four separate groups: one taking placebo, one taking A, one taking B and one taking A+B. Subjects are to be assigned by systematized randomization with packaging and coding of the drug on an individual patient basis rather than on a treatment group basis. The Panel is concerned that the integrity of the study be maintained and that subjects are not able to determine drug from placebo, since the findings are heavily dependent on subjective parameters. The Panel suggests that each dose unit (drug or placebo) be singly identified by code and administered singly (e.g., in envelopes) in a predetermined sequence.

The variables to be investigated include the subject's estimate of quality of sleep, sleep latency, number of awakenings, sleep duration, how well he feels in the morning, and a report of any side effects.

In certain cases other designs may be reasonable; for instance, a design in which the subject indicates a preference between two treatments (drug versus placebo) may be used but would not be considered a pivotal study.

4. *Clinical studies for nighttime sleep-aids.*—a. *Objectives.* The overall objectives are: (1) to determine the effects of the drug on sleep in individuals with symptoms of mild insomnia likely to use such an OTC drug in the target population, (2) to determine the subjects' estimate of quality of sleep, an estimate of how well they feel in the morning and (3) to determine any preferences the subjects may have between 2 nights (drug versus placebo).

These studies, if results are clinically significant, will provide an extension of comparative controlled studies to confirm fully in a target population the drug's basic nighttime sleep-aid activity and to provide more specific information about symptoms and subject types in which the drug is especially effective. The studies will also establish an optimal dosage for the target population for which it is intended under conditions which more closely resemble those of actual OTC use.

b. *Sample considerations.* Subjects should be mild insomniacs falling directly within the target population expected to use the drug. Subjects with severe or chronic insomnia are not candidates for self-medication since they should be under the supervision of a physician.

A greater variety of populations differing as to age, sex, diagnostic categories, social class, treatment setting, previous treatment, etc., may be studied. Within each study, groups of subjects should be selected to be as homogeneous as possible regarding the variables above. In any case, full reporting of subjects' characteristics is necessary to allow for adequate interpretation of results. Exclusions should be stated.

Females of childbearing age may be included if results of animal reproductive and teratologic studies are satisfactory. However, the Panel believes that new drugs not intended for lifesaving use should not be used in women known

V 40 236 DEC 8 75 XUM

to be pregnant or who are nursing a baby.

c. *Sample size.* The studies should use separate large groups containing 40 to 80 subjects per group. In a study comparing separate groups, a minimum of two groups (drug and placebo) are necessary. A large number of groups are required if several doses of a drug are studied or if a combination of several ingredients is evaluated, since each ingredient should be compared to the combination and a placebo.

d. *Setting.* Varying environmental influences should be decreased as much as possible in each study. Different treatment environments may be used which should be similar to those likely to be found among users (consumers) of such OTC products. Since these drugs are indicated for nighttime use, their action should not persist into the daytime hours or beyond the intended period of sleep.

e. *Investigators.* The investigators should be experienced in evaluating drugs affecting the central nervous system; and in the conduct of clinical trials; they should have ready access to the target population group for whom the nighttime sleep-aid may be indicated.

f. *Design.* Of primary importance are well-controlled studies designed to confirm fully the effectiveness of the drug as a nighttime sleep-aid. Special consideration should be given to controls, duration of study, dosage, and design which do not interfere with validity (biostatistical consultation is recommended), to accommodate greater variations in settings and subjects.

g. *Duration.* The duration of studies may vary from 1 to 2 weeks. In most cases the drug will be taken as a single dose for occasional insomnia, and therefore long-term studies are not absolutely essential. However, the Panel believes that such studies are advisable.

h. *Assessment.* Activity as a nighttime sleep-aid should be determined by accepted methods. Determination of clinical effectiveness should include subjective reports from patients or subjects and EEG and inpatient studies should also include objective measures.

5. *General concepts for conducting clinical drug evaluation of OTC nighttime sleep-aids.* The Panel concurs with the current regulations for conducting clinical trials evaluating safety and efficacy as defined in 21 CFR 314.111(a)(5)(ii). The desired studies shall include a systematic assessment of possible adverse side effects as discussed above under clinical studies for nighttime sleep-aids and shall include continued surveillance for adverse side effects after marketing.

6. *Minimum data required for classification as a Category I ingredient.* In summary, the Panel believes that similar methodology should be used in the evaluation of an OTC nighttime sleep-aid as in the evaluation of a prescription hypnotic with two major exceptions:

(1) Only those who are occasionally insomnic are included.

(2) A larger patient sample than is customary in the evaluation of prescription drugs is probably necessary for a parallel design study (for example, 80 and not 40 patients per drug group may be needed), since relatively smaller clinical effects may be encountered.

E. COMBINATIONS OF ACTIVE INGREDIENTS

1. *General statements.* The Panel concurs with the regulation (21 CFR 330.10(a)(4)(iv)) which states:

> An OTC drug may combine two or more safe and effective active ingredients and may be generally recognized as safe and effective when each active ingredient makes a contribution to the claimed effect(s); when combining of the active ingredients does not decrease the safety or effectiveness of any of the individual active ingredients; and when the combination, when used under adequate directions for use and warnings against unsafe use, provides rational concurrent therapy for a significant proportion of the target population.

The Panel concludes that, in general, the fewer the ingredients, the safe and more rational the therapy. The Panel believes that the interests of the consumer are best served by exposing the user of OTC drugs to the fewest ingredients possible at the lowest possible dosage regimen consistent with a satisfactory level of effectiveness.

The Panel further concludes that OTC drugs should contain only such inactive ingredients as are known to be safe and are necessary for pharmaceutical formulation.

2. *Requirement of significant contribution.* The Panel has determined that each claimed active ingredient in a combination must make a significant contribution to the claimed effect or effects.

The Panel could not establish the percent of contribution that an active ingredient must make to the effectiveness of the product for that contribution to be considered "significant." The Panel concludes that where a combination product is permitted, as discussed below, it is sufficient to demonstrate in well-controlled clinical trials that each of the ingredients makes a statistically significant contribution to the claimed effect. (See paragraph II D above—Data Required for Nighttime Sleep-Aid Ingredient Evaluation.) As long as "statistical significance" is shown in meaningful sample sizes, the Panel concludes that the contribution toward nighttime sleep-aid activity will also have been shown to be clinically "significant."

3. *Single active ingredients.* The Panel believes that the most desirable product for the consumer is one that contains the least number of ingredients. A product containing a safe and effective single ingredient is preferred to one having multiple active ingredients because of the reduced risks of toxic effects, allergic and/or idiosyncratic reactions, and possibly unrecognized and undesirable drug interaction(s). Because of these increased risks, the Panel further believes that the use of two active ingredients of the same pharmacological class in the same preparation is not rational.

This view of the Panel applies to all ingredient combinations that the Panel has reviewed; even the antihistaminic drugs cause non-dose-related adverse reactions, such as drug allergy. In other words even the presence of two antihistamines may increase the risk that a subject will have an allergic response to the OTC preparation. A person may not be allergic to one of the two active ingredients whereas he might respond with an allergic reaction to the other. Paradoxically, such hypersensitivity reactions do occur to the antihistamines, drugs which are themselves often used to treat allergic responses.

Certain problems peculiar to the formulation of combination products should be stated explicitly before dealing with specific cases. First of all, there are situations where the use of a combination is appropriate and clearly rational. Such an example is the case of the "triple sulfas" described below.

The misconception about the safety of using more than a single member of a pharmacologic class of drugs seems to be based upon a very special case. When the sulfonamides were introduced to clinical medicine, it became apparent that their low solubilities (particularly in the large doses nedeed to treat certain bacterial infections of the urinary tract) could result in precipitation of crystalline drug in the kidney. This problem was solved by using combinations of sulfonamide drugs, e.g., "triple sulfas," such that each of the three sulfonamides was present in an amount too small to crystallize out in the kidney but such that the combined three sulfonamides provided an effective therapeutic concentration. The basis for this effect is the fact that the solubility of each member of the series is independently determined. No such problem of dosage scheduling that approaches saturation leading to crystallization has been noted by the Panel in its review of the antihistamine drugs submitted.

The Panel is aware of other cases where multidrug therapy is rational. Two different antibiotics may be given together for an organism known to be sensitive to the combination. Perhaps one of the best known combinations is the use of multivitamin preparations for the treatment of nutritional deficiencies. In these last two cases, the combination is used to achieve a certain convenience where the individual active ingredients are known to be effective separately. The Panel recognizes that in vitamin and in certain antibiotic therapy, a large dose of drugs usually, but not always, carries no more risk than a smaller dose. This is an unusual situation in medicine.

If an OTC nighttime sleep-aid is indicated, it may very well be that a consumer will need one or two doses to get the intended effect. An occasional subject may need half of the suggested dose. If an analgesic is also needed, the consumer, through experience, will be able to judge wether he needs one, two, or one-half of the usually recommended OTC analgesic dose. If a consumer needs an OTC nighttime sleep-aid alone or an OTC analgesic alone, it would be an irrational act to take a combination product.

The Panel questions the advantage the combination confers. If the consumer cannot fall asleep readily, he may wish to take an OTC nighttime sleep-aid for this condition. He may also have some discomfort due to an injury, infection, burn or other ailment and may wish to take an OTC analgesic. The Panel feels that the likelihood that a combination drug will contain the optimal dose is less than if the consumer is permitted to make this decision, that is, to take individually an analgesic and/or nighttime sleep-aid.

Evidence accumulated during the last 20 years indicates at least a 10-fold difference within the population in the rate of disappearance from the body for most drugs subject to metabolism. Moreover, different kinds of drugs are eliminated at different rates by each individual.

In light of present knowledge, it is not wise to give two or more different active ingredients in fixed combinations to different individuals.

In addition, it does not make sense unless there is information that the effective dose of each active ingredient is known for the individual taking such a combination.

A very simple exercise will demonstrate the decreasing benefit to be expected when two or more active ingredients are combined in a single preparation. Suppose that 60 percent of the population requires one unit of drug A for relief of pain. Now, combine A with ingredient B, a drug that promotes sleep. Assume that, by good fortune, a dose of B is found that will have a favorable effect on 60 percent of the population. The chances that the 60 percent who need one unit of A will also need one unit of B is 0.60x0.60, or 36 percent. Thus, by combining we have reduced the chance of a successful outcome for both indications from these preparations. (The number of people who need half of A and half of B or two of A and two of B are vanishingly small and may be ignored for present purposes.) One could add yet a third active ingredient (certainly not unheard of) and find that the appropriate population for this preparation would be 0.60 x 0.60 x 0.60, or 22 percent of consumers.

Thus the Panel believes, that even if the addition of another active ingredient represents addition of a potential benefit to an existing product, the changes that the consumer will benefit from a fixed combination is in fact less likely than if that individual has the option to use active ingredients separately.

The Panel notes that individuals metabolize different active ingredients at vastly different rates and may eliminate them at different rates.

These biochemical differences are the basis for different dosage requirements on the part of individual human subjects. Ordinarily, in a relatively small group of persons there may be as much as a 10-fold difference in the rate of metabolism of a drug. The effect of these differences becomes apparent in the case of drugs used chronically. For OTC drugs used only occasionally and for nonfatal illnesses, it is not necessary to ensure that the dosage provided will be effective for 90 or 100 percent of the population. A 2- to 4-fold variation in the dose needed may be expected to achieve a desired effect in a significant proportion of the population. It has been pointed out above by simple calculations, using the probability of independent events, that combinations may reduce the likelihood of achieving the most effective dosage regimen because of differences between individuals with respect to drug metabolism. The implications of this knowledge for dosage requirements, in the Panel's view, casts some doubt upon the combination of nighttime sleep-aids and analgesics. These remarks are intended to apply to the kinds of active ingredients with which the Panel has been concerned.

In spite of the considerations above, the Panel recognizes the argument that there may be convenience in putting more than one active ingredient into the same product. The Panel concludes that if a combination contains an analgesic and a nighttime sleep-aid, both of which are safe and effective when used alone, it is convenient to combine the ingredients in a combination for the treatment of concurrent symptoms. The Panel would recognize the combination as safe and effective (effective as both a nighttime sleep-aid and as an analgesic in a significant proportion of the population having both sleeplessness and pain at the same time). The Panel concludes that permission to market such a combination should be granted. However in the opinion of this Panel, it will be necessary to demonstrate that there exists a well-defined target population that requires both a nighttime sleep-aid and an analgesic. Several studies are necessary using a factorial design demonstrating that the combination is safe and effective for a significant proportion of the target population requiring relief from both symptoms of pain and sleeplessness.

The labeling of a combination product of the type described above should reflect its limited applicability to persons with both symptoms, pain and sleeplessness, who respond favorably to the unit dose of each active ingredient in the combination The labeling should indicate that only that portion of the target population having both indications at the same time may be expected to derive effective and safe responses to the fixed combination.

It is an established medical principle to give only those medications, preferably as single entities, necessary for the safe and effective treatment of the patient. This principle applies equally to self-medication. To add needlessly to the patient's medication increases the risk of adverse reactions. Therefore, only single ingredients of each pharmacologic class should be permitted in Category I combinations. Combinations containing more than one active nighttime sleep-aid ingredient of the same pharmacological class are classified as Category II products.

4. *Active ingredients not reviewed by the Panel.* Each claimed active ingredient must be an ingredient that has been reviewed by the Panel. If a product contains an active ingredient that has not been reviewed by the Panel and consequently is not found in this document, such ingredient is automatically classified as a Category II ingredient; i.e., it is not generally recognized as safe and/or effective. Appropriate animal and human testing and prior approval by the Food and Drug Administration are required before a product containing such an ingredient may be marketed.

5. *Review of submitted combination products.* The Panel considered only those combination products submitted pursuant to the notice published in the FEDERAL REGISTER of August 22, 1972 (37 FR 16885) and included above in paragraph II A. The Panel recognizes that other combinaton products may be in the market place, but it has either no knowledge of such products or insufficient data with respect to such products to make a reasonable judgment of safety and/or effectiveness.

Accordingly, the Panel recommends that any new combination, or any presently marketed combination not submitted to this Panel, be evaluated through the new drug procedures or be the subject of an appropriate petition to the Commissioner to review or amend the OTC nighttime sleep-aid monograph.

6. *Combinations containing irrational ingredients.* The Panel has reviewed those nighttime sleep-aid ingredients which are in combination with such nonnighttime sleep-aid ingredients as vitamins and passion flower extract. The Panel considers such combination to be irrational.

For example, generally, a healthy individual ingesting a well-balanced diet will receive adequate daily vitamin intake. The Panel defers to the OTC Vitamin, Mineral and Hematinic Panel on the safety, effectiveness and labeled claims for vitamins. However, the Panel is of the opinion that most clinicians agree that the therapeutic use of vitamins should be restricted to the treatment of unequivocal deficiency states or as dietary supplements in certain clinical situations, such as (1) inadequate intake due to poor diet, (2) malabsorption, (3) pregnancy, or (4) hypermetabolic states producing increased tissue requirements.

The proper functioning of all cells requires an adequate intake of all vitamins (water-soluble and fat-soluble). It is misleading to assume or propose that individuals consuming certain OTC sleep-aids, tranquilizers and sedatives have selected deficiencies of just those water-soluble vitamins discussed in this document. Vitamin deficiencies are generally manifold and not restricted to one or two vitamins. If treatment of vitamin deficiencies is indicated, high doses are used and ordinarily several vitamins are given, particularly in the case of water-soluble vitamins. Also, there is virtually nothing in the current medical or pharmaceutical literature to support the inclusion of selected water-soluble vitamins in the OTC nighttime sleep-aids, daytime sedatives, or stimulants. The water-soluble vitamins discussed in this

V 40 236 DEC 8 75 XUM

document appear to be of no use in conditions unassociated with vitamin deficiency or impending deficiency. In addition to the irrationality, there is a danger in the possibility that administration of one or two vitamins in small amounts may delay proper diagnosis and treatment in occasional cases of true deficiency. The vague suggestion in the labeling of such products is that "nerves" may be the reason for wakefulness, anxiety or agitation and that B-vitamins are good for the nerves. This claim whether explicit or implicit in the labeling is not supported by objective and conclusive clinical data.

7. *Criteria for determining Category I combinations.* Although the Panel has not placed any products containing combinations of active ingredients in Category I, it feels that appropriate guidelines are necessary. Accordingly, to qualify as a Category I combination, i.e., one that is generally recognized as safe and effective, each of the following conditions must be met:

a. The combination should include only one Category I active nighttime sleep-aid ingredient from a given pharmacological class when such ingredient(s) is identified.

b. Each ingredient in the subject combination will have to be present within the dosage range for a Category I active nighttime sleep-aid ingredient when each such ingredient is identified.

8. *Criteria for Category II combination products.* A combination is classified by the Panel as a Category II product, i.e., one that is not generally recognized as safe and/or not generally recognized as effective, if any of the following apply:

a. The combination contains two or more antihistamines as nighttime sleep-aid ingredients.

b. The combination contains any ingredient that is listed elsewhere in this document as a Category II ingredient.

c. The combination contains any active nighttime sleep-aid ingredient that has not been reviewed by the Panel and accordingly not listed in this document.

d. The combination contains a nighttime sleep-aid ingredient combined with a nonnighttime sleep-aid ingredient which the Panel has found to be an irrational ingredient.

e. The following combinations have been classified by the Panel as Category II:

(1) *Combinations containing two or more antihistamines.* The Panel concludes that there is no rationale for combining two or more drugs of the same pharmacologic class to achieve a desired effect. There are no data to support claims of safety and effectiveness of such combinations.

(2) *Combinations containing bromides (ammonium, potassium and sodium).* The Panel concludes that combinations containing ammonium bromide, potassium bromide or sodium bromide are not safe for OTC use.

(3) *Combinations containing scopolamine compounds (scopolamine aminoxide hydrobromide and scopolamine hydrobromide).* The Panel concludes that combinations containing scopolamine aminoxide hydrobromide or scopolamine hydrobromide are not safe at dosage levels possibly effective at OTC nighttime sleep-aids.

(4) *Combinations containing passion flower.* The Panel concludes that there is no rationale for adding passion flower to a nighttime sleep-aid. The relationship between the ingredient and sedation has not been demonstrated.

(5) *Combinations containing vitamins (all vitamins, including thiamin (vitamin B_1), niacin (nicotinic acid), and niacinamide).* The Panel concludes that there is no rationale for adding vitamins to a nighttime sleep-aid. The relationship between vitamins and sedation has not been demonstrated.

9. *Criteria for Category III combination products.* A combination is classified as a Category III combination if the nighttime sleep-aid active ingredient is classified as Category III elsewhere in the document.

The following combinations have been classified by the Panel as Category III:

a. *Combinations containing methapyrilene and certain analgesics (acetaminophen, aspirin, and salicylamide).* These combinations are placed in Category III for two reasons, (1) the sleep-aid components have been categorized as Category III by the Panel; and (2) the Panel has insufficient information to identify a meaningful target population. Additional studies are required to show that there is a target population requiring ingredients for both pain and sleep. Experimental design for such studies should include double-blind investigations using a factorial design testing the combination against each ingredient and placebo. If evidence is not forthcoming within 3 years that each ingredient (e.g., the claimed nighttime sleep-aid and the analgesic) makes a meaningful contribution to the claimed effect, these products should be withdrawn from the market.

The Panel concludes that combinations containing a nighttime sleep-aid and an analgesic are not rational therapy for patients suffering from sleeplessness or pain alone.

In a combination drug containing a nighttime sleep-aid ingredient and one or more analgesic compounds such as acetaminophen, aspirin or salicylamide, these latter ingredients are considered only as analgesics. If the analgesic component is judged effective by the OTC Panel on Internal Analgesics, if the sedative component can be proved to be an effective nighttime sleep-aid, and if well-controlled studies can identify a meaningful target population for use of such a combination, then the combination may prove to be rational for concurrent use, i.e., for sleeplessness when accompanied by pain. For example, in a currently marketed sleep-aid combination product containing methapyrilene and analgesics reviewed by the Panel, the manufacturer recommends "For best results, adults take two tablets at bedtime to help relieve pain and aid sleep." Thus, according to the manufacturer's claim, this particular combination is recommended for nighttime use in patients suffering from a combination of pain and insomnia or from "insomnia expectation." The analgesic combination, when taken as recommended, namely, two tablets, seems to be a fairly appropriate mild analgesic, although the final decision regarding this effect is deferred to the OTC Internal Analgesic Panel. The sleep-inducing properties of methapyrilene 50 mg (2 tablets) have been discussed earlier. The Panel concluded that at least some evidence exists that methapyrilene may induce sleep slightly faster than placebo and therefore placed methapyrilene in Category III.

Whether the combination of an analgesic and a nighttime sleep-aid enhances the effectiveness of either type of agent cannot be answered from the data reviewed. Only a factorial design (Ref. 1) comparing the combination with a placebo would provide the answer. One may well postulate that once pain is relieved by the analgesic component, the patient will sleep even without a nighttime sleep-aid. On the other hand, the nighttime sleep-aid may indeed provide additional benefits. The studies submitted do not provide an answer to these uncertainties.

In any studies designed to evaluate such a combination, subjects selected should be individuals with pain as well as sleep problems. A more elaborate design could include a group of subjects with both pain and sleep problems, a group of subjects with only sleep problems, and a group of subjects with only pain, but the first factorial design is considered sufficient.

The data presented to the Panel do not establish whether patients use the combination primarily for pain or primarily for sleep induction. The combination seems to be proposed primarily as a pain reliever, implying that if one does not have pain, one will sleep well. The combination is not suggested for the general insomniac.

The manufacturer produced seven well-designed, well-controlled studies in support of his claim: Four of these studies were "analgesic-sedative studies" conducted in patients suffering primarily from pain, possibly associated with secondary sleep disturbances (Refs. 2 through 5); one was a study of chronic insomniacs in an outpatient population (Ref. 6); one was a study conducted in a nursing home (Ref. 7); and one was an experimental study conducted in normal subjects who were loaded with water to produce wakefulness (Ref. 8).

All seven studies were generally well done, some involving an acute type of experiment, with each patient receiving one medication; a few studies involved giving medication to geriatric patients and other outpatients over a longer period of time. The most clear-cut and best designed experiments are some of the acute experiments (Ref. 3). They indicate clearly that the combination is more effective than placebo in inducing sleep, creating a better quality of sleep, and reducing pain. But even here, some authors have used letters (i.e., A, B) and

not randomly selected numbers for patient assignment, thus allowing for possible breaking of the double-blind by associating improvement with a given letter. The problem with all of these investigations is that they were designed to show effectiveness of the combination. They were not designed to find out whether both the analgesic and antihistamine medications are needed or whether all patients with pain and pain-related insomnia, or even only expected insomnia, would have been improved just as well with only the analgesic medication.

These seven well-designed studies do not define the relative effectiveness of the hypnotic and analgesic ingredients in the combination.

In an analgesic nighttime sleep-aid combination such as that discussed above, the Panel comments as follows:

The general regulations for the OTC review require this Panel to address drug active ingredients and claims, rather than finished total products. In this case, the Panel is required to determine which ingredient in the combination product has activity as a nighttime sleep-aid and which ingredients have activity as analgesics. The Panel cannot, as was suggested in one submission, set aside this requirement and merely determine that the whole product is safe and effective.

The Panel has concluded elsewhere in this document that there are inadequate data on the effectiveness of methapyrilene at the dosage in one of the combinations submitted for review to the Panel to permit its classification as generally recognized as safe and effective (Category I). Accordingly, the combination is placed in Category III with 3 years allowed for testing. A claim for this combination is that it is a safe and effective aid to sleep that is disturbed by pain. The Panel regards such claims primarily as analgesic claims, rather than nighttime sleep-aid claims.

Pain may indeed prevent sleep, as might acid indigestion, coughing or sunburn. If the Panel were to follow the rationale that pain discomfort prevents sleep, and that something which affords relief from pain discomfort can therefore be considered a nighttime sleep-aid, it would be necessary to permit the use of a similar nighttime sleep-aid claim for any ingredient used to treat any condition that might interfere with sleep. Such ingredients might be antacids, cough remedies, or sunburn lotions. It is obvious that such drugs are not intended to induce sleep per se. If evidence is not forthcoming to support the presence of Category III antihistamines such as methapyrilene or pyrilamine as active OTC nighttime sleep-aid ingredients in combination with analgesics, nighttime sleep-aid labeling claims made on the basis of analgesics alone would be misleading.

The Panel is aware that there may well be a significant number of people suffering from both pain and sleeplessness caused by factors other than pain. An analgesic nighttime sleep-aid combination could be rational for such a group, in the Panel's opinion. Its target population, however, would include only those individuals suffering from both symptoms simultaneously. Labeling for such a combination would have to state clearly that it is for use only when both symptoms occur together, not only that one or the other is anticipated.

For combinations containing both antihistamines and analgesics, additional studies are required to show that there is a target population requiring ingredients concurrently for both pain and sleep. Experimental design for such studies should include double-blind investigations using a factorial design testing the combination against each ingredient and placebo. If evidence is not forthcoming within 3 years that each ingredient (e.g., the sleep-aid and the analgesic) makes a meaningful contribution to the desired effect, the product should be withdrawn.

10. *Inactive ingredients.* The Panel concludes that OTC drugs should contain only such inactive ingredients as are necessary for pharmaceutical formulation and are known to be safe (e.g., talc is considered unsafe).

F. INACTIVE INGREDIENTS

The Panel is aware that "active ingredients" are defined as those which contribute to the claimed effect of a drug. All other ingredients in the drug are regarded as "inactive ingredients" even though they may have pharmacologic activity at higher concentrations or in other formulations.

With respect to the safety of "inactive ingredients" in OTC nighttime sleep-aids, daytime sedatives and stimulants, the Panel has been concerned about flavoring agents, coloring agents and particularly talc. Because of the safety considerations, the Panel has prepared the following statement on talc:

Talc

The presence of talc in foods, drugs, water and beverages has been noted (Refs. 1, 2 and 3). Inhaled talc containing asbestos is known to be hazardous, and even carcinogenic. The effect of ingested talc in man is not known, but animal experiments indicate that talc and asbestos, commonly a contaminant of talc, do cross the intestinal epithelium and become widely disseminated (Refs. 4 and 5). In addition, a high incidence of stomach cancer has been noted in Japanese men who eat talc-coated rice (Ref. 1). Langer has stated that talc is contaminated often with asbestos and that this contamination is difficult to detect except by x-ray diffraction and electron microscopy (Ref. 6). This is an important consideration because the carcinogenic potential of asbestos is well established.

One property of asbestos used to differentiate it from other fibrous minerals is the step-like ends of the fibers as seen with the electron microscope (Refs. 7 and 8). This is evident at magnifications of 20,000 to 25,000 and helps to detect asbestos fibers in the presence of other silicates such as talc or glass which do not share this feature (Refs. 9 and 10). The detection of the different forms of asbestos requires a combination of chemical treatment and x-ray diffraction analysis as well as electron microscopy. A complicating factor is the particle size of the fiber which is a function of the method of preparation for industrial use (Ref. 7).

It is strongly urged by this Panel that talc containing asbestos, a nonessential ingredient, not be permitted to be formulated in OTC products that are meant to be ingested. Substitute materials are available. The Panel notes that talc is described in the United States Pharmacopeia XIX as a pharmaceutic aid but is designated for external use only. The Panel notes also the statement by the Commissioner published in the FEDERAL REGISTER of March 14, 1975 (40 FR 11865) in which the problem of the nonessential and avoidable use of talc is discussed. The Panel concludes that due to the lack of safety, talc containing asbestos should not be permitted in OTC nighttime sleep-aids, daytime sedatives and stimulants.

III. Daytime Sedatives

A. General Discussion

1. *Definition of terms.* As indicated in the beginning of this document, the Panel is unable to define the term "tranquilizer" in relation to drugs for OTC use. The Panel concludes that "tranquilizer" drugs are more properly identified with medically prescribed psychotropic drugs (such as chlordiazepoxide and diazepam) which are available only by prescription and are "controlled substances" under the Federal Controlled Substances Act. It is the view of the Panel that the term "tranquilizer" in relation to OTC products is misleading to the consumer for it promises a qualitatively different effect from that which an OTC drug can provide. Therefore, the Panel has adopted and uses the term "OTC daytime sedative" to describe an OTC drug claiming daytime mood modifying indications such as "for the relief of occasional simple nervous tension."

2. *Benefits and risks.* The Panel is charged with examining the broad area of benefits and risks of OTC medications. The risks of OTC daytime sedatives are discussed in detail below when specific classes of ingredients are considered. The Panel will consider first the question of benefit. The possible determination of whether a benefit is produced by a drug must precede testing for "effectiveness." The Panel recognizes that even the most convincing demonstration of effectiveness in producing a change is worthless if the change is detrimental or is of no benefit to the consumer. This consideration is always present, though in some instances the benefit obtained is relatively obvious. The Panel agrees that being relieved of a headache is a benefit, and this Panel has specifically agreed that being relieved of difficulty in falling asleep can be a benefit. However, the Panel is not convinced that there is a benefit inherent in the changes claimed to be produced by OTC daytime sedatives.

The labels suggest these substances are useful for "occasional simple nervous tension," "nervous irritability," "simple nervousness due to common everyday overwork and fatigue." The claims further suggest use of these products as "calmatives," that provide "a relaxed feeling" and that "gently soothe away the tension." The Panel questions whether these claims refer to any definable illness, syndrome or condition requiring medication. And the Panel has grave doubts as to whether the relief of such a "state" constitutes a benefit to the user.

In a situation characterized by a nonexistent or almost nonexistent benefit, even a small or moderate risk clearly produces an unacceptably low benefit-to-risk ratio.

The major class of drugs reviewed for use as OTC daytime sedatives is the antihistamine group. In its discussion of OTC nighttime sleep-aids, the Panel has concluded that some antihistamines are probably useful, at appropriate doses, in producing drowsiness and sleep. This same effect, however, constitutes a risk in daytime use. The Panel concludes the sedative effect of OTC nighttime sleep-aids can be hazardous in ambulatory patients whose daytime activities require mental alertness and coordination. This may occur due to the residual effects of antihistamines persisting into the waking state after treatment of sleep difficulties. This implies that a consumer taking the same drug during the waking hours would be at greater risk from drowsiness, reduced reflex response and the like because his body would not have had time to eliminate a large proportion of the drug. Thus, drowsiness and reduced ability to respond must be considered a risk in daytime use.

In the case of antihistamines the Panel doubts that there is any anti-anxiety effect separable from the production of drowsiness. The Panel believes that such anti-anxiety psychotropic activity, if it exists, most likely would be masked by the drowsiness effect.

3. *Suitable target population.* Based on the available scientific data submitted for currently marketed products and a review of the literature, the Panel at this time is unable to determine any demonstrable indications for which available OTC daytime sedatives are useful.

An appropriate and properly defined condition, and clearer than presently used claims for a suitable target population requiring such medication, must be established through the testing guidelines set forth later in this document before meaningful studies of effectiveness can be undertaken. (See paragraph III .D below—Data Required for OTC Daytime Sedative Ingredient Evaluation.)

The Panel is aware of the argument that there is a population which has anxiety symptoms for a short period of time, e.g., illness in the family, change in circumstances, loss of job, in which there would be some possible benefit from use of an OTC product while the person is adjusting to and overcoming this altered mood. One may well assume that such short term mild anxiety symptoms will clear up without treatment and/or are susceptible to the placebo effect. It is contended by others that the OTC product would either reduce the duration of symptoms or improve the person's symptoms during the period of stress. The Panel entirely disagrees with this view and believes that studies are needed to identify and define clearly such a target population for whom these drugs are intended to provide relief.

4. *Measurements of tension.* The Panel notes that whereas with the present state of medical knowledge normal tension or changes in mood cannot be properly defined or measured quantitatively in a target population for OTC use, other forms of tension can be measured. For example, depression, anxiety, somatic complaints attributed to emotional factors and psychoneurotic states can be measured and it is possible to note modifications or decreases in psychic tension with the use of tranquilizers.

There should be some mechanism to determine the level of tension for these anxiety-like symptoms which at this time the Panel believes to be so subtle, transient, and subjective, that they are difficult to measure. As studies are confined to more and more benign conditions, the likelihood of discriminating between drug and placebo effect becomes smaller and smaller, and questions of practical significance become more and more central. The Panel concludes that it is necessary to prove the safety and effectiveness of the ingredients classified as Category III for the indication "occasional simple nervous tension."

5. *Duration of treatment.* Another problem arises when the Panel attempts to determine the appropriate duration for use of an OTC preparation. It is the view of the Panel that if a suitable indication is identified, then an OTC daytime sedative should not be used beyond 2 weeks for a single episode. If an individual has "occasional simple nervous tension" every day for longer than 2 weeks, then he is likely to be taking an OTC daytime sedative for a condition which requires medical intervention. The Panel is concerned that such self-treatment with an OTC daytime sedative may encourage an individual to use these products at higher doses than recommended, or for longer than a 2-week period, and would increase the likelihood of undesirable side effects developing. In addition, such an individual would probably not seek appropriate medical assistance thereby risking more severe psychiatric symptoms.

6. *Summary of findings.* The Panel concludes that an OTC daytime sedative should not induce excessive drowsiness, reduce alertness, or produce physiologic dependency, tolerance with continued use, or significant toxicity in accidental overdose. In addition, an OTC daytime sedative should exhibit significant effectiveness in relieving anxiety-like symptoms of occasional single nervous tension as demonstrated in well-controlled, double-blind clinical studies in comparison with placebo and positive controls (Ref. 1).

The Panel finds no evidence of benefit from OTC daytime sedatives. The Panel questions whether an appropriate target population exists; and the Panel believes that any possible "anti-anxiety" benefit is inextricable from the "drowsiness" risk. For these reasons the Panel concludes that the benefit-to-risk ratio for this group of agents is unacceptably low.

REFERENCE

(1) Rickels, K. and P. T. Hesbacher, "Over-the-Counter Daytime Sedatives: A Controlled Study," *Journal of the American Medical Association*, 223:29–33, 1973.

7. *Minority statement of the Panel.* Because the Panel was unable to totally agree on all aspects of this document, the following minority statement is made:

For the group of drugs classed as OTC daytime sedatives the minority has found no clear evidence of effectiveness, and no sharply defined indications. If the antihistamines are used in doses that have sedative effects these will be due to a general, nonspecific central nervous system depression.

If effective, in larger doses, the central depression carefully outlined for the use of these drugs as OTC nighttime sleep-aids would be dangerous to the user and/or others in the view of the minority. Such effects have been observed as side effects in the use of antihistamines for treatment of hypersensitivity, motion sickness and other indications. Effects on driving a motor car or operating other machinery are difficult to evaluate. Sensitive techniques for such measurements are still in the process of development. The Panel's discussion holds out little hope of proving effectiveness and describes several kinds of clinical trials of more or less difficulty. Such trials would, if properly conducted, take considerable time, probably 4 to 6 years to prove effectiveness and to deal with the difficult evaluation of safety.

We believe this interval would constitute an extraordinary time to market a group of drugs not deemed effective by the minority at present doses and most probably unsafe at higher doses.

As evidence for the possible adverse effects of effective doses the minority cites the discussion (elsewhere in this document) of the warnings about antihistamines used as nighttime sleep-aids.

In accordance with these comments in the introductory section above for OTC daytime sedatives, the minority believes that the OTC daytime sedatives should be classified as Category II.

B. Safety and Effectiveness

The Panel finds that currently marketed products which have been classified as OTC daytime sedatives generally contain antihistamines, scopolamines or bromides either singly or in combinations. Scopolamines and bromides have been found by the Panel to be unsafe for OTC use and will be further discussed below. Antihistamines, as stated previously in the discussion pertaining to OTC nighttime sleep-aids, may, in addition to their antihistaminic action, induce drowsiness when used in the treatment of allergies. (See paragraph II C 3.a. above—Antihistamines.)

Furthermore, with respect to the profile of pharmacological activities of the antihistamines, the Panel finds that there is little or no evidence that such drugs poses anti-anxiety psychotropic properties comparable to those demonstrated in clinical studies with the prescription tranquilizers. In the Panel's view, at best, some antihistamines may produce a very small incidence of low intensity sedative activity which would be difficult to demonstrate in a significant portion of the population. Any anti-anxiety psychotropic activity, if it exists, most likely would be related to the "drowsiness" effect of the antihistamines.

Therefore, the Panel is concerned with a possible danger in "treating" simple and transient variations in normal mood and behavior with OTC products containing antihistamines or any similar sedating agent. The Panel believes that such drugs affecting mind and mood have much broader implications than other OTC classes of drugs (e.g., antacids, laxatives) in that alterations in an individual's mood indirectly affects other individuals. There is also possible danger that because of the excessive sedation, individuals with normal anxiety-like symptoms will involuntarily and unwittingly suffer reduced alertness, ability to concentrate and motor coordination. It is the view of the Panel that such use will restrict the individual's ability to cope with his environment. In the case of antihistamines, depressant effects appear at low concentrations and excitatory effects at high concentrations (Ref. 1); however, this varies from person to person. In some cases the excitatory effect is dominant even at low concentrations, and in other cases antihistamines produce depression throughout the normal dosage range so that therapeutic effects lack predictability.

In the general population, many people experience tension and most people have learned how to deal with it. Where tension becomes disabling, some individuals need medical assistance (e.g., counseling) and/or psychotropic medication. In such cases, effective psychotropic drugs do exist but are available only on prescription. In the review of the ingredients submitted and identified in paragraph I A 2 of this document, the Panel concludes that it is highly unlikely that such ingredients could be shown to be effective because normal tension or anxiety is difficult to measure in a target population by current medical standards.

A suggestion was made in one submission (Ref. 2) to replace alcohol use (or abuse) with OTC daytime sedatives when individuals, emotionally upset or unable to cope with particular life stresses, would normally turn to alcohol. The Panel is aware that there is massive alcohol abuse in the U.S. and that there are also thousands of people who misuse and abuse drugs in this country.

Since the primary function of OTC products is to relieve symptoms of self-limiting diseases not requiring medical intervention, the Panel has concluded that OTC daytime sedative self-medication is not safe and not effective in the treatment of serious emotional and behavioral problems, including chronic alcohol and/or drug abuse. A substitution of OTC daytime sedatives for alcohol will certainly not exert any constructive effects on the individual's basic psychological or environmental problems. Where individual subjects are using alcohol to resolve serious personal life stress problems, they most likely would require medical and often psychiatric intervention. Use of an OTC daytime sedative as a substitute for alcohol in relieving life stress is particularly contraindicated since it delays proper medical treatment.

The Panel also takes note of the fact that there is a very high frequency of cases of poisoning involving simultaneous use of sedative drugs and alcohol; the additive effects of these agents can lead to serious toxicity. The Panel is not aware of any data to support the contention that nonuse of daytime sedatives marketed for "occasional simple nervous tension," or the like, leads to abuse of alcohol or alcoholism. The epidemiology of alcohol abuse is an extremely complex subject that allows very few "causative" statements to be made. It is conceivable that there may be situations where drugs should be substituted for alcohol abuse but that is more properly the province of the physician with a great deal of experience in dealing with alcohol abuse and certainly is far beyond the scope of this Panel's inquiry.

The Panel concludes, based upon the current available data and the lack of well-defined indications for safe OTC use, that if there is to be pharmacological intervention in cases of anxiety-like symptomatology, the drugs of choice are tranquilizers available by prescription. The Panel notes that these drugs have been extensively studied and evaluated as psychotropic drugs. The Panel recognizes that methapyrilene, pyrilamine and phenyltoloxamine have been marketed for OTC daytime sedative activity. The Panel is unaware of meaningful data which demonstrate that these ingredients have psychotropic activity. Therefore, the Panel has placed methapyrilene, pyrilamine and phenyltoloxamine in Category III since available data are inadequate to show that they are safe and effective as daytime sedatives. However, the Panel emphasizes that the reason for Category III includes the Panel's determination of a low benefit-to-risk ratio and lack of an appropriate target population—not merely insufficient proof of effectiveness.

The Panel has reviewed the available published and unpublished material relating to the effectiveness of products marketed as OTC daytime sedatives. Only one controlled clinical trial evaluating the role of OTC daytime sedatives in mild to moderately anxious patients exists in the literature (Ref. 3). In this study, a claimed OTC daytime sedative containing methapyrilene, pyrilamine maleate and scopolamine is compared with aspirin, a tranquilizer and placebo in a 2-week clinical trial. The results may be summarized as indicating chlordiazepoxide to produce significantly more improvement than the other three agents which did not differ significantly from each other. In fact the OTC product was no different from placebo in effectiveness.

Besides the published study mentioned above, there are only two unpublished reports in the submissions (Refs. 4 and 5).

The first unpublished report (Ref. 4) does not provide enough details to evaluate it fully. This study uses only 25 subjects, and a design which identifies drug and placebo simply as A and B, permitting users to determine which drug they are ingesting, thus destroying the

V 40 236 DEC 8 75 XUM

double-blind design. The study suggests mild sedative activity of the daytime drug, but it is not possible for the Panel to draw conclusions which support the effectiveness of the drug reviewed.

The statistical results in the second unpublished report (Ref. 5) at first sight are more impressive, since the significance obtained is acceptable for clinical studies. However, the fact that patients with headaches had to be omitted for such significance to occur is unfortunate. It is well known that tension often has headache as one of its major symptoms (60 percent of the patients in this study had headache), and breaking any link in the tension-headache-tension cycle by drug treatment is usually sufficient to allay both the tension and the pain. The Panel suggests that one of the major areas for testing is whether an OTC daytime sedative can relieve the tension-headache-tension cycle itself or must be in combination with an analgesic.

One other problem concerns the choice of subjects. These were patients who were seen for "other complaints which did not interfere with the evaluation of the sedative." It was not clear how the investigators were sure of that fact. Almost any complaint considered serious enough for the patient to consult his physician could be associated with some degree of stress, which might conceivably interfere with a tension-sedative treatment program.

The possibility mentioned by the authors that some patients took aspirin during the study period is unfortunate because aspirin could significantly alter the tension state by reducing a headache or other nagging body pains which contributed to the tension state. Since the authors did not indicate the number of patients who took aspirin, it is difficult to evaluate its effect on the results obtained.

Finally, in the first part of the study, in a sample group of 87 patients, drug and placebo responses were practically identical. Drug-placebo differences were only obtained in the crossover portion of the study and no differences were observed comparing the OTC sedative (N=40 patients) and placebo (N=47 patients) when given first (Ref. 6).

This report is the only one available to date which may possibly be considered as providing some support for the effectiveness of an OTC daytime sedative. However, the separation between tense individuals who have and who do not have headache, both for the purpose of producing statistical significance in the study and for identifying potential users of the OTC drug in practice, does not seem to be a realistic approach in light of the frequent occurrence of headaches in tense individuals. In addition, the OTC drug was often used only once daily, and without having data as to the time of day the drug was taken. One cannot exclude the possibility that the OTC drug was primarily used in the evening, as a mild sleep inducer and not as a daytime sedative, since it might tend to slant the results toward greater effectiveness.

In summary, the Panel is aware of only one published controlled study (Ref. 3). This study established clearly the methodology for clinical studies of OTC daytime sedatives and the ineffectiveness of the OTC sedative combination in relieving mild anxiety tension. The only claims of effectiveness of OTC daytime sedatives have been offered by two submissions to the Panel (Refs. 5 through 8). Of the data submitted, only one study (Ref. 5) presents data on the effectiveness of OTC daytime sedatives and that study has deficiencies discussed earlier in this document.

After reviewing all available data, the Panel therefore concludes that there is lack of sufficient evidence presently available to support the use of OTC daytime sedatives. Only after an indication can be identified, the sedating effects of antihistamines are resolved and a number of well-designed double-blind clinical studies demonstrate significant drug-placebo differences, could such drugs be recommended for OTC daytime sedative use. The Panel doubts however that the claimed effects are more than placebo effects.

Labeling

The Panel has found difficulty in establishing labeling for OTC daytime sedatives. Since currently marketed products contain antihistamines, the Panel recommends that such products contain the following warning: *"Caution:* This product contains an antihistamine drug and may cause drowsiness. Avoid driving a motor vehicle or operating heavy machinery." The Panel recommends that the term "antihistamines" should be prominently written and displayed in large letter print on the label of OTC daytime sedatives. Since OTC daytime sedatives contain ingredients similar to those in OTC nighttime sleep-aids, the Panel recommends many of the warnings established above for OTC nighttime sleep-aids. (See paragraph IIC1. above—*Conditions under which nighttime sleep-aids are generally recognized as safe and effective and are not misbranded.*)

The Panel recommends that Category III products be labeled as follows: *"Warning:* This product has not been demonstrated to be effective to the satisfaction of the Food and Drug Administration." In addition, the Panel is concerned about advertising claims of effectiveness for OTC daytime sedatives before clinical studies demonstrate effectiveness. The Panel concludes that such advertising is unfair to the consumer and should be banned during this period of testing.

C. CATEGORIZATION OF DATA

1. *Conditions under which daytime sedatives are generally recognized as safe and effective and are not misbranded.*

Active Ingredients

After carefully reviewing all data available, the Panel is unaware of any active ingredients which are safe and effective and not misbranded.

Labeling

The Panel concludes that the warnings applicable to OTC nighttime sleep-aids are, in general, also appropriate for OTC daytime sedatives.

The Panel recommends the following general labeling for daytime sedative active ingredients to be generally recognized as safe and effective and not misbranded:

a. *Indications.* [Reserved].

b. *Warnings.* (1) "For adults only. Do not give to children under 12 years of age."

(2) "Do not take this product if pregnant or if nursing a baby."

(3) "Do not take this product if you are presently taking a prescription or other OTC drug, without consulting your physician or pharmacist."

(4) "If condition persists continuously for more than 2 weeks, consult your physician."

(5) "Take this product with caution if alcohol is being consumed."

(6) For products containing an antihistamine: *"Caution:* This product contains an antihistamine drug and may cause drowsiness. Avoid driving a motor vehicle or operating machinery."

2. *Conditions under which daytime sedatives are not generally recognized as safe and effective or are misbranded.*

Active Ingredients

After carefully reviewing all data submitted, as well as additional evidence provided by consultants to the Panel and the results of an extensive literature search, the Panel concluded that the following OTC daytime sedative ingredients should either be removed from or not permitted on the market because of inadequate safety data relating to toxicity and excessive sedation, as well as no effectiveness data. The Panel found no scientific basis or even sound theoretical reasons for claimed effectiveness of these following ingredients to be used in OTC daytime sedatives:

Active Ingredients

Antihistamines
- Diphenhydramine hydrocholoride
- Doxylamine succinate

Bromides
- Ammonium bromide
- Potassium bromide
- Sodium bromide

Scopolamine Compounds
- Scopolamine aminoxide hydrobromide
- Scopolamine hydrobromide

Miscellaneous Compounds
- Acetaminophen
- Aspirin
- Salicylamide
- Niacinamide
- Thiamine hydrochloride

a. *Antihistamines.* The Panel has exhaustively reviewed the literature relating to the use of these antihistamines as OTC nighttime sleep-aids and daytime sedatives and concludes that while the pharmacological effects of these compounds may be of value as nighttime sleep-aids as discussed earlier in this document, there are insufficient data to determine if these antihistamines are safe or effective as daytime sedatives for OTC use.

(1) *Diphenhydramine hydrochloride.* The Panel concludes that diphenhydramine hydrochloride cannot be generally recognized as safe or effective because there are no data to support clinical effectiveness as a daytime sedative product. The Panel notes that no submission was received for this ingredient as an OTC daytime sedative and that it has never been marketed for this activity. In addition, unlike the extensive clinical use of diphenhydramine as a nighttime sleep-aid, there are no clinical reports or clinical experience with this ingredient as a daytime sedative.

In the discussion above relating to diphenhydramine hydrochloride for use as a nighttime sleep-aid, the Panel has carefully set forth the action as well as side effects of this ingredient. From this discussion the Panel is unable to determine how this ingredient should be employed in OTC daytime sedatives. All of the discussion in the nighttime sleep-aid area tends to show diphenhydramine hydrochloride as an ingredient which will result in excessive drowsiness at therapeutic levels resulting either in sleep or decreased motor function, (e.g., inability to function properly when driving or operating machinery).

(2) *Doxylamine succinate.* The Panel concludes that doxylamine succinate cannot be generally recognized as either safe or effective because there are no data to support clinical effectiveness as a daytime sedative product. The Panel notes that no submission was received for this ingredient as an OTC daytime sedative and that it has never been claimed or marketed for this activity.

In the discussion above relating to doxylamine succinate for use as a nighttime sleep-aid, the Panel has carefully set forth the action as well as side effects of this ingredient. From this discussion the Panel is unable to determine how this ingredient should be employed in OTC daytime sedatives. All of the discussion in the nighttime sleep-aid area tends to show doxylamine succinate as an agent which will cause drowsiness, although only two clinical reports on the effectiveness of doxylamine as a nighttime sleep-aid have been found. No reports have been found on the use of this ingredient as a daytime sedative.

b. *Bromides (ammonium, potassium, sodium).* Based on the discussion above relating to bromides for use as a nighttime sleep-aid, the Panel concludes that they are unsafe as daytime sedatives. If taken over the period of time needed to reach therapeutic levels, severe toxic symptoms frequently occur. This is because bromides and chlorides are cleared from the kidney, but bromide clearance is slightly less efficient, so that the bromide level tends to build up.

The only submitted product suggests a dosage level of not less than 600 mg and not more than 1,800 mg per day of a combination of all three bromide salts. This product, which claims "calmative" action, sets no limit on the length of use of bromides. Yet, to use the bromides chronically without monitoring the patient's chloride balance and serum bromide is, in the Panel's view, not safe medical practice since small changes in chloride intake or small changes in renal function can lead to severe poisoning.

The Panel concludes that ammonium bromide, potassium bromide and sodium bromide, which act by displacement of body chloride, if taken in dosage levels presently recommended, do not act as daytime sedatives in a single dose. If taken over the period of time needed to reach therapeutic levels, severe toxic symptoms frequently occur. In addition, bromides readily cross the placental barrier, which might result in teratogenic effects such as mental retardation of the offspring.

The discussion of bromides in the nighttime sleep-aids section shows not only that the bromides are agents which, once they finally reach therapeutic levels, can cause excessive drowsiness, but also shows them to possess sufficient toxic characteristics to render them unsuitable for use as OTC daytime sedatives.

c. *Scopolamine compounds (scopolamine hydrobromide, scopolamine aminoxide hydrobromide).* The Panel concludes that these compounds are unsafe because of their extensive toxicity and are ineffective in presently marketed dosages.

In the discussion above relating to scopolamine for use as a nighttime sleep-aid, the Panel has carefully set forth the action as well as toxic effects of this ingredient. From this discussion the Panel is unable to determine how this ingredient should be employed in OTC daytime sedatives. All of the discussion in the nighttime sleep-aid area tends to show scopolamine compounds as agents which may result in extensive toxicity without any data to support their clinical effectiveness as daytime sedatives.

d. *Miscellaneous compounds (acetaminophen, aspirin, salicylamide, niacinamide, thiamine hydrochloride).* The Panel concludes that these compounds are irrational for use either singly or in combination as daytime sedatives. The Panel is unaware of any data for analgesics (acetaminophen, aspirin, salicylamide), or vitamins (niacinamide, thiamine hydroehloride) which support their use as daytime sedatives.

Labeling

As stated in the beginning of this section, the Panel has concluded that there appear to be no clear cut indications for the use of OTC daytime sedatives, and that the area of normal or relatively normal variations in mood is probably not an appropriate one for pharmacological intervention. An indication has not been clearly identified. All but one labeling claim has been placed in Category II. Therefore, claims such as "nervous irritability," "nervous tension headache," "simple nervousness due to common everyday overwork and fatigue," "a relaxed feeling," "calmative," "calming down and relaxing," "gently sooth away the tension," and "resolving that irritability that ruins your day," shall not be used. Only the labeling claims in Category III identified below may be used during the testing period provided.

3. *Conditions under which the available data are insufficient to permit final classification at this time.* The Panel concludes that adequate and reliable scientific evidence is not available to permit final classification of the claimed active ingredients and labeling listed below:

Active Ingredients

Antihistamines
- Methapyrilene fumarate
- Methapyrilene hydrochloride
- Phenyltoloxamine dihydrogen citrate
- Pyrilamine maleate

a. *Antihistamines.* As noted in the discussion above, the Panel finds that there is little or no evidence that antihistamines possess desirable daytime sedative properties.

(1) *Methapyrilene hydrochloride, methapyrilene fumarate, pyrilamine maleate.* The Panel concludes that there is insufficient evidence to permit final classification of methapyrilene hydrochloride, methapyrilene fumarate and pyrilamine maleate for use in a daytime sedative product. The methapyrilenes appear in a number of marketed OTC products with daytime sedative claims. Pyrilamine appears in one OTC combination marketed product submitted to the Panel and, therefore, there are no data on the single ingredient.

In the discussion above relating to the methapyrilenes and pyrilamine for use as nighttime sleep-aids, the Panel has carefully set forth the actions as well as side effects of these ingredients. From these discussions, the Panel is unable to determine how these ingredients should be employed in OTC daytime sedatives. The Panel concludes that additional studies as outlined in the testing guidelines below are necessary to demonstrate the safety and effective-

V40236 DEC 8 75 XUM

ness of these ingredients as daytime sedatives. The Panel concludes that the dosage to be marketed during the testing period provided be limited to 25 to a maximum 50 mg single dose up to 4 times a day for methapyrilene (fumarate and hydrochloride) and to 10 to a maximum 25 mg single dose up to 4 times a day for pyrilamine maleate in studies of safety and effectiveness as daytime sedatives.

(2) *Phenyltoloxamine dihydrogen citrate.* The Panel concludes that there is insufficient evidence to permit final classification of phenyltoloxamine dihydrogen citrate for use in a daytime sedative product. The drug is currently promoted as a "calmative" in an OTC combination drug product. Since the drug is being marketed in a combination and no data are available on the ingredient alone as an OTC drug, the Panel has placed it in Category III as a daytime sedative.

In the discussion above relating to phenylotoloxamine dihydrogen citrate for use as a nighttime sleep-aid, the Panel has carefully set forth the actions as well as side effects of this ingredient. From these discussions, the Panel is unable to determine how this ingredient should be employed in OTC daytime sedatives. The Panel concludes that additional studies as outlined in the testing guidelines below are necessary to demonstrate the safety and effectiveness of this ingredient as a daytime sedative. The Panel concludes that the dosage to be marketed during the testing period provided be limited to 50 to a maximum 100 mg single dose up to 4 times daily for phenyltoloxamine dihydrogen citrate in studies of safety and effectiveness as a daytime sedative.

Labeling

It is the view of the Panel that there are insufficient data to permit final classification of the following labeling claim for an OTC daytime sedative product. Labeling for Category III shall only include "occasional simple nervous tension." This is the only labeling claim that may be used for such products during the 3-year testing period provided for the additional studies which are necessary and are described below. (See paragraph III D below—Data Required for OTC Daytime Sedative Ingredient Evaluation). The Panel further concludes that Category III products be labeled as follows: "*Warning:* This product has not been demonstrated to be effective to the satisfaction of the Food and Drug Administration."

D. DATA REQUIRED FOR OTC DAYTIME SEDATIVE INGREDIENT EVALUATION

The Panel is unable to determine a class of drugs that are safe and effective in the relief of anxiety-like symptoms for daytime OTC use. The Panel has classified the antihistamine ingredients methapyrilene, pyrilamine and phenyltoloxamine, currently marketed in combination products for daytime sedative use, in Category III. The Panel is of the opinion that if an indication for an appropriate population can be properly defined with labeling that clearly explains the use and limits of OTC daytime sedative products, then testing of appropriate active ingredients in a maximum dosage and container size might be feasible to demonstrate the safety and effectiveness of the ingredients. The Panel doubts, however, that any such effectiveness can be differentiated from the placebo effect. Were such testing to occur the Panel believes that the following guidelines should be considered for the evaluation of safety and effectiveness of an agent to be used as an OTC daytime sedative.

Any claimed ingredient(s) or labeling claim classified by the Panel as Category III should be evaluated using the concepts and methodology described below in the suggested guidelines.

1. *Minimum requirements to determine safety and effectiveness.* The active ingredient must be safe in the doses suggested on the labeling for OTC use. Safety should be evaluated using the current requirements for preclinical testing in animals as defined in 21 CFR 3.2.1(a)(2)6.a.

If an active ingredient is used as an OTC daytime sedative in doses sufficient to be effective, any central nervous system depression then becomes a potentially hazardous effect in addition to any therapeutic action that may be achieved. In the daytime, any deficit in the rate of reaction to stimuli, in alertness and/or motor coordination or in sensory discrimination may endanger the user of the drug. In the event that the user is the operator of a mechanical device or vehicle, he may endanger himself or other persons. These considerations weigh heavily in the opinion of the Panel because it is the view of the Panel that such deficits in motor and sensory function will be incurred if large enough doses of the active ingredient are employed to be effective in a daytime sedative. Thus, the effects of an active ingredient which are acceptable and even desirable from use of an OTC nighttime sleep-aid product may be dangerous and are certainly unacceptable for an OTC daytime sedative.

Evidence should be provided that the drug does not, in doses recommended, cause such impairment of motor or sensory performance that the subject may endanger himself or others. This applies to household appliances, the operation of machinery including surface, subsurface, or airborne vehicles, lathes, production-line equipment and the like. It includes the possibility of failure to react fast enough to an oncoming auto or other vehicle while crossing a street as a pedestrian. These cases are intended to be illustrative and not all-inclusive.

A drug used for self-treatment of symptoms such as "occasional simple nervous tension" must be more effective than a placebo. The Panel recognizes that such proof is difficult to demonstrate for an OTC daytime sedative because the "disease" or symptom is generalized and at best is ill-defined. The Panel is concerned that since such an episode is likely to be transient or at least poorly defined, anecdotal evidence of effectiveness has been the only type adduced. On the other hand, the usual clinical trials may not accurately reflect the actual effect of the drug.

Conventional drug trials, properly double-blinded, should demonstrate a dose-response effect and, hence, safety and effectiveness of the drug. If this cannot be achieved, proof of effectiveness becomes more difficult. In addition, there should be provision for large scale field studies in a well-defined target population requiring such OTC drug use, properly carried out by objective investigators. Such trials can be done by dispensing unlabeled drugs and placebos, including drugs known to be effective, to carefully selected control and experimental subjects. Information may be collected by questionnaire and/or interview. The interpretation of the complaint and of the effect (What is "nervousness"? and What constitutes relief of anxiety?) make inquiries of this type difficult but not impossible.

The problem of effectiveness is difficult because its appraisal involves subjective responses. These responses can be interpreted by statistical methods, but, first, they must be defined sharply and indications for the use of the drugs must be sharply defined too. Psychological scales exist and may be used in the clinical trials. Methods for setting forth criteria of anxiety, selecting subjects, and the use of rating scales of anxiety do exist as discussed in the volume edited by Levine et al. (Ref. 1), the FDA guidelines for evaluation of psychotropic drugs (Ref. 2) and in the Panel's testing guidelines described below.

2. *Assessment of suitable target population.* A number of appropriate subjects displaying mild to moderate symptoms of anxiety and tension who would most likely use such OTC products must be identified. The Panel is unable to determine any proper indications for the use of an OTC daytime sedative. A well-defined condition(s) existing in a suitable target population requiring such medication must be established before meaningful studies of effectiveness can be undertaken.

3. *Clinical studies in a suitable target population.* If a target population is identified, subjects should be studied for subjective effects for the proposed claims. Subjects should exhibit such anxiety-like symptoms within the target population expected to take the drug. The Panel suggests several well-controlled studies utilizing two major approaches: (1) Continuous treatment studies of 2-week duration, where the drug is continuously given about 3 to 4 times daily, using between-patient design. The patient evaluates his emotional state daily as well as more intensively weekly, and the physician evaluates the patient also at weekly intervals. (2) Occasional use studies, in which the drug is used as needed, i.e., only occasionally, for temporary symptoms. The patient evaluates his or her emotional state before and after he takes his medication for a given symptom occurrence. The physician will monitor the patient at infrequent intervals. In this latter group of studies a between-patient or a within-patient (crossover) design may be utilized. Although not required, a positive control could be used for measuring the activity of the drug against that of a known psychotropic drug. Such addition would also serve as a yardstick of the appropriateness and sensitivity of the study population for detecting drug-placebo differences. If several doses of a drug are to be studied, a larger number of groups is required. For instance, if a combination containing two ingredients (A+B) is studied, the design should include four separate groups, one taking placebo, one taking A, one taking B and one taking A+B. Subjects are to be assigned by systematized randomization with packaging and coding of the drug on an individual patient basis rather than on a treatment group basis. The Panel is concerned that the integrity of the study be maintained, that subjects are not able to determine drug from placebo, since the findings are heavily dependent on subjective responses.

The variables to be investigated include the subject's estimate of relief for the claimed effect and a report of any side effects.

4. *Guidelines for studies of daytime sedatives.* a. *Objectives.* The overall objectives are: (1) to determine the effects of the drug in individuals with mild to moderate symptoms of anxiety and tension likely to use such an OTC drug, (2) to determine the subjects' estimate of improvement for the claimed symptoms, an estimate of how well they fell after drug treatment and (3) to determine any preferences the subjects may have between treatments (drug versus positive control or placebo).

b. *Sample considerations.* Subjects should exhibit mild to moderate symptoms as suggested for the labeling claims, e.g., simple nervous tension. Subjects with severe or chronic anxiety-like symptoms are not candidates for self-medication, since they should be under the supervision of a physician.

A variety of populations differing as to age, sex, diagnostic categories, social class, treatment setting, previous treatment, etc., may be studied. Within each study (or subgroup in studies of sufficient size), subjects should be selected to be as homogeneous as possible regarding the variables above. Patients with strong sociopathic trends, alcoholism, organic brain disorder, character disorder, evidence of schizophrenia or glaucoma and patients in need of analgesic, hypnotic, or anticholinergic medication should be excluded. In any case, full reporting of subjects' characteristics is necessary to allow for adequate interpretation of results. Exclusions should be stated.

c. *Sample size.* The study should use separate large groups containing 40 to 80 subjects per group. In a study comparing separate groups, a minimum of two groups (drug and placebo) are necessary. A large number of groups are required if several doses of a drug are studied or if a combination of several ingredients are evaluated, each ingredient should be compared to the combination and a placebo. This sample is about twice the size recommended for anti-anxiety prescription drug testing (Ref. 1). This large sample size is needed because the effects being investigated are expected to be small in relation to those found for psychotropic drugs.

d. *Setting.* Environmental variation in influences should be decreased as much as possible in each study. Different treatment environments may be used which should be similar to those likely to be found among users (consumers) of such OTC products.

e. *Investigators.* The investigators should be experienced in evaluating drugs affecting the central nervous system and in the conduct of clinical trials. The Panel recommends that evidence for the qualifications of investigators should be provided to the FDA prior to onset of any study. The Panel has recommended this (1) to ensure a high quality and reliability of the investigations and (2) to protect the health of human subjects who participate in such studies.

f. *Design.* Of primary importance are well-controlled studies designed to investigate the safety and effectiveness of the drug as a daytime sedative. Special consideration should be given to controls, duration of study, dosage, and design which do not interfere with validity (biostatistical consulation is recommended) to accommodate greater variations in settings, and subjects. A washout period may be applicable in the limited treatment clinical studies, but may be omitted in the occasional-use and consumer survey studies when a broader experience with the drug is being gathered.

g. *Dosage.* A flexible dosage schedule should be used with increasing amounts up to the dosage level proposed to be available for OTC drug use.

h. *Duration.* The duration of studies may vary from 1 to 2 weeks. In most cases the drug will be taken for temporary relief and occasional use, and therefore, long-term studies are not absolutely essential. However, the Panel believes that such studies are advisable.

i. *Assessment.* Activity as a daytime sedative should be determined by standard validated rating scales. Ratings should be repeated at intervals during the treatment regimen in addition to a baseline evaluation. Determination of safety and effectiveness should include subjective reports from patients or subjects and objective reports by professional observers, e.g., observations of a nurse. Assessment measurements should also include appropriate scales to distinguish between sedation and occasional nervous tension.

5. *Suggested studies for evaluation of daytime sedatives.* The Panel concludes that any one of the following studies could be performed to demonstrate the safety and effectiveness of a daytime sedative:

a. *Continuous treatment study.* A study of 2 weeks could be performed in individuals who use these products on a continuing basis. Patients should be evaluated by a physician frequently, in the following sequence: previous to beginning the study, perhaps every 3 days during the study, and at the completion of the study. Patients should also evaluate themselves with global improvement measures and more circumscribed rating scales.

b. *Occasional use study.* Such a study could be performed in patients with symptoms requiring the drug for occasional use only, perhaps once or twice a week. In these cases, a patient could maintain a personal log with a subjective evaluation of symptom relief. In such a study, global ratings and mood scales (adjective check test) may represent relevant outcome criteria. In such a study, the subject would be evaluated by a physician on a more infrequent basis.

6. *Minimum data required for classification as a Category I ingredient.* The Panel recommends that the testing guidelines above be used; they are adopted from the recent FDA guideline draft on psychotropic drugs (Ref. 2) as well as on the recently published book by Levine et al. (Ref. 1).

The Panel recommends that at least two studies using each of the two suggested designs be carried out initially. Further studies should then be carried out using the study type which was most sensitive in detecting drug-placebo differences in the original four studies. This is necessary to demonstrate that any observed differences in treatment effects were not of a spurious nature.

If the four original studies should all be unable to differentiate drug and placebo, further testing would seem inadvisable. On the other hand, if all four original studies showed clear-cut drug-placebo differences, future studies would also not be needed and the particular drug in question could be moved from Category III to Category I.

E. COMBINATIONS OF ACTIVE INGREDIENTS

As noted earlier in this document, the Panel has not identified an indication or appropriate active ingredients for use in OTC daytime sedatives. If a properly defined indication can be identified and appropriate active ingredients found, the Panel refers to the guidelines and criteria for combinations of active ingredients for nighttime sleep-aids. (See paragraph II E above—Combinations of Active Ingredients.)

The discussion in the nighttime sleep-aids section relating to combinations of nighttime sleep-aids and nonnighttime sleep-aid ingredients would also be applicable to daytime sedative products. There was one combination containing the antithistamine phenyltoloxamine dihydrogen citrate, an analgesic and caffeine, in a submitted product which

V40236 DEC 8 75 XUM

claimed both calmative action and enhanced pain relief. However, neither that submission nor any other data reviewed by the Panel indicated that OTC analgesics have sedative action. In fact, the particular combination submitted usefully divided its analgesic and "calmative" claims and attributed the calmative action only to phenyltoloxamine (Ref. 1). As to the claimed enhancement of the analgesic effect which results when the analgesic is combined with an antihistamine, the Panel defers to the OTC Internal Analgesic Panel for such a determination. The Panel places the combination in Category III.

IV. Stimulants

A. General Discussion

The Panel is aware of the use of either prescription drugs (e.g., amphetamines, desoxyephedrine) or OTC drugs (e.g., caffeine) by many individuals to promote wakefulness and to decrease the sense of fatigue and boredom in performing tedious work over rather long periods of time. Such drugs are referred to as stimulants and are used to increase mental alertness. For example, caffeine is commonly used as an aid to automobile driving, especially for the relief of the phenomenon "highway hypnosis" encountered during extensive periods of continuous driving. Currently marketed OTC products are promoted with such claims as "keep alert," "restore mental alertness," and "for fast pick-up."

The Panel believes that a suitable adult target population exists which can benefit from the occasional use of safe and effective OTC stimulant drugs. In cases where mental alertness or motor performance is necessary, such drugs can modify fatigue states to allow successful completion of a required task. The Panel is of the opinion that use of such OTC products by individuals under 12 years of age should only be under the advice and supervision of a physician.

The Panel concludes that an ideal OTC stimulant preparation must be able to produce enhanced motor performance when such performance is reduced because of fatigue or drowsiness. The therapeutic effect should be of sufficient duration to be useful in accomplishing a particular task. For example, the drug should permit an automobile driver to maintain normal performance in completing a reasonably short journey to a stopping place. Hence, such products are for ocasional use only and never for more than 1 to 2 weeks except under the advice and supervision of a physician.

B. Safety and Effectiveness

The Panel concludes that the ideal OTC stimulant preparation should produce stimulation without untoward physiological effects on the central nervous system or the cardiovascular system or other acute toxic signs. Such undesirable effects would include an appreciable number of abnormalities of rate and/or rhythm of the heart or of respiration, or excitement or other undue disturbances of central nervous system function. In general, side effects that follow use of the drug should not be of such a degree or quality as to offset the beneficial effects of the drug. For example, excessive nervous system stimulation to an extent that would exceed the effect required to reduce fatigue could reduce the efficiency of motor vehicle operator. The drug should produce enhanced performance without leading to a dangerous and unanticipated letdown after the therapeutic effect is achieved. There should be no distressful effect upon peripheral nervous functions, such as an obvious tremor or incoordination caused by the stimulant. There should be no interference of a significant degree with the normal pattern of sleep, including the quality, distribution in time, and the quantity of REM sleep. REM or D-state is rapid-eye-movement sleep associated with dreaming. When the amount of such sleep is reduced, it may lead to excess restlessness or irritability in the waking state. The drug should be for occasional use of not more than 2 weeks, and there should neither be tolerance nor dependence after such use. There should be a safe margin between the toxic and therapeutic doses of the drug. There should be no interactions of a dangerous or unpleasant nature between the drug and the other commonly employed drugs, foods or beverages when these are taken concomitantly.

C. Categorization of Data

1. Conditions under which stimulant products are generally recognized as safe and effective and are not misbranded.

Active Ingredient

The Panel concludes that caffeine is safe and effective for use as a stimulant when used in the recommended oral dose of 100 to 200 mg not more often than every 3 to 4 hours.

The Panel has not encountered any reports of fatal accidents after oral ingestion of caffeine and concludes that the incidence of fatal toxicity is low. The fatal dose for man is probably far greater than recommended doses since ingestion of up to 10 gm was followed by complete recovery in 6 hours (Ref. 1). With doses of 1 gm, insomnia, anxiety, irritability, muscle twitching, headache and nausea may be experienced. Palpitations, tachycardia and cardiac irregularity may also occur (Ref. 2).

Death was reported after intravenous administration of 3.2 gm. In such cases, there may well be other factors. Too rapid injection of almost any drug can cause cardiorespiratory collapse and death. A review of acute and chronic toxicity with regard to caffeine has been prepared by Peters (Ref. 2). Severe poisoning causes cardiovascular collapse, including a fall in blood pressure. Vomiting and convulsions have followed oral doses of 10 gm of caffeine with complete recovery in 6 hours.

Chronic ingestion of caffeine in larger than recommended doses can lead to "habituation" which is a mild form of drug addiction. When this occurs, caffeine, usually taken in the form of beverages, is required to feel "normal." Withdrawal symptoms are not severe or life-threatening (Refs. 3, 4, and 5). However, the Panel recommends that products containing caffeine should not include claims such as "non-habiting-forming" in their labeling. Caffeine affects the pattern of REM sleep (rapid-eye-movement sleep, "D state" sleep) but not the total amount of REM sleep (Ref. 6).

The Panel notes that coffee (or strong tea) contains about 100 mg caffeine per cup, the same amount as the usual recommended dose of caffeine currently marketed in OTC preparations. The literature contains much information about studies on coffee drinkers vs. noncoffee drinkers.

The stimulating effect of caffeine (100 to 200 mg) on motor performance has been quite consistently reported by many investigators using a variety of experimental designs and tests of performance. The drug is most effective in the presence of fatigue, restoring alertness and the ability to perform tasks requiring muscular coordination with greater facility and less error. Reports of such effects can be explained on the basis of central nervous system (brain) stimulation and do not depend on peripheral effects, such as direct effects on the retina, improvement in "night vision," or the like (Refs. 7 through 10). In large doses, caffeine can stimulate respiration, but drugs are not ordinarily used for this effect in present-day clinical medicine (Ref. 11).

Chemically, caffeine is 1,3,7-trimethylxanthine. It is an alkaloid that occurs in plants (coffee, tea, cocoa, cola) widely distributed around the world. Because of its ubiquitous use and availability from nondrug sources, the Panel felt that its assessment of the compound should be based on an "in-depth" review of its pharmacology.

Approximately 7 million kg of caffeine in coffee are consumed each year in the United States (Ref. 12). As mentioned above, 1 cup of coffee contains about 100 to 115 mg of the drug. The major pharmacological effects are on the central nervous system and the cardiovascular system. It is also diuretic and stimulates gastric secretion.

Caffeine stimulates the cerebral cortex and medullary centers. In usual doses, it causes wakefulness and alertness. As a beverage form, caffeine in coffee (among others) has been habit-forming in a proportion of the population. This "habituation" is probably a weak form of "addiction" in that differences may be detected between persons who use coffee regularly and those who do not use it at all. Goldstein and colleagues showed that chronic coffee drinkers given decaffeinated coffee showed sleepiness and irritability whereas noncoffee drinkers given caffeine-containing coffee showed upset stomachs and jitteriness due to caffeine. Users of coffee felt increased alertness and "contentedness" when given caffeine in their "coffee" (Ref. 3). In a related study conducted by questionnaire, it was found that chronic users of coffee did not experience as much wakefulness due to coffee as did nonusers. Moreover, they experienced unpleasant symptoms when morning coffee was omitted (Ref. 4). Additional evidence for an addiction of some degree is the finding that sudden withdrawal of caffeine produced severe headache in a majority of trials among volunteer subjects. The headache produced in these young adults was relieved by aspirin, but more efficiently by caffeine (Ref. 5.) Many of the persons studied by these authors were subject to migraine headaches. It is noteworthy that caffeine, generally in large doses, is used in the treatment of migraine.

The stimulatory effect of caffeine on motor performance has been quite consistently reported. The clearly effective central stimulation caused by caffeine ingestion has been supported by carefully designed studies (Refs. 3, 4, 7, 8 and 13).

In a comprehensive review of the effects of stimulant drugs, Weiss and Laties (Ref. 9) concluded that caffeine can enhance "a wide range of behavior * * * all the way from putting the shot to monitoring a clock face." There is evidence from a variety of studies that nervousness, headache, and irritability, for example, may accompany the use of large doses, 240 mg of caffeine and above. There seems to be no evidence of serious types of addiction, and their conclusion is that the incident of habituation is quite low.

Studies that measure ability to perform simulated driving tests with adequate lighting and in conditions of reduced lighting were submitted by one of the manufacturers of a drug containing caffeine (Ref. 10). All responses that were favorable may be explained on the basis of enhanced central nervous system performance and did not seem to involve improvement in vision at the level of the orb itself, that is, cornea to retina. In so far as any may be demonstrated, effects on "night vision" are probably due to enhanced alertness (Ref. 10).

Caffeine has a stimulant action on the heart and can increase cardiac output. Sollmann (Ref. 14) states that methylxanthines (which include caffeine) are useful potentially in acute heart failure, but the effects appear to be manifold and unpredictable. Theophylline, another xanthine, is said to be more effective than caffeine in stimulating the output of the failing heart by a direct inotropic effect.

For OTC oral use as a stimulant, citrated caffeine is currently available in 60 and 120 mg oral tablets. Caffeine is also added to headache remedies containing salicylates and acetaminophen, and to ergotamine for the relief of migraine. The Panel defers to the OTC Internal Analgesic Panel the determination of the safety and effectiveness of caffeine for the relief of headache or migraine.

Caffeine and sodium benzoate are given also by physicians in dosages of 0.5 to 1.0 gm for subcutaneous or intramuscular use as a central nervous system stimulant. Small doses seem to enhance alertness and ability to perform learned tasks. Large doses can stimulate respiration. Caffeine and other xanthines are often used as acetate, benzoate, or salicylate salts. Forming the salt simply increases solubility; it does not affect action. Addition of sodium benzoate probably assists absorption in the acid pH of the stomach, although the nonionic form would probably be well absorbed from the intenstine. In any case, the drug appears to be well absorbed when given by mouth (Ref. 15).

The exact mechanism of action of caffeine is not precisely known.

The problem of mutagenicity of caffeine has been reviewed by the Panel. There is evidence that concentrations of caffeine many times higher than would ordinarily be found in human or animal tissues cause certain mutations in the bacterium *Escherichia coli*, and in the fungus *Ophiostoma multiannulatum* (Refs. 16 and 17). Caffeine has also been reported to induce chromosome aberrations in onion root tips and in human cells in vitro (Refs. 18 and 19). Very careful studies in mammals have failed to reveal evidence of mutagenicity (Refs. 20 and 21).

Caffeine causes chromosome breakage in the human lymphocyte in tissue culture (Refs. 20, 22, 23 and 24) but no evidence for this action in vivo in man or other mammals has been found (Ref. 20). The mechanism of the chromosome breakage has been studied, but not explained (Ref. 25). Lymphocytes from human volunteers ingesting 800 mg caffeine daily (equivalent to 8 cups of coffee) for 30 days showed no increase in chromosome damage when the cells were placed in culture. In the human volunteers, the peak plasma levels were 29.6 mcg/ml of caffeine, over 3-fold greater than any preexperiment level. There was no increase in chromosome breakage when these cells were cultured.

HeLa cells were exposed to concentrations of caffeine in the medium about 10 times greater than that found in vivo in plasma of human subjects drinking 8 cups of coffee per day (800 mg caffeine). There was no increase in chromatid breaks in cultures studied through 48 generations of the HeLa cells (Ref. 26).

Looking for mutagenic indications, different concentrations of caffeine in vitro were studied for an antimitotic action on cell division of human lymphocytes stimulated to divide by phytohemagglutinin, a plant product. Concentrations of caffeine in the medium that interfered with cell division were about 100 fold greater than would be encountered in human tissues after an intake of a usual dose of caffeine or right after drinking a cup of strong coffee (approximately 100 mg caffeine) (Ref. 27). In one study, the effects of three xanthines, theobromine, theophylline, and caffeine were studied for their effectiveness in blocking mitosis of human lymphocytes in 72-hour culture. High concentrations of caffeine (10^{-3} to 10^{-4} molar) were needed to demonstrate cytostatic and antimitotic effects. It was concluded that any mutations in man caused by caffeine at concentrations ordinarily achieved would have to occur at a rate too low to be detectable (Ref. 28).

The suspected role of caffeine in mutagenesis and also teratogenesis has led to a scrutiny of this substance, a scrutiny that is almost certainly more intensive and extensive that that conducted for any other commonly ingested food or drug. Teratogenicity of caffeine can be detected in rats if sufficiently high doses are given; these are of the order of 250 mg/kg and would be equivalent to 100 cups of coffee containing 125 mg of caffeine each. Metabolism of caffeine in man is rapid, and it may be that this protects man from teratogenic effects (Ref. 29). A review of the mutagenic effects, in particular dominant lethal tests, shows less evidence for organisms higher than bacteria, fungi, and higher plants (Ref. 29).

The safety of coffee has been questioned recently by a drug surveillance group (Ref. 30). The findings of the group suggested an increase of serious heart disease among heavy coffee drinkers. However, there was no positive association among tea drinkers. This would appear to exclude implication of caffeine present in both coffee and tea. The report has been criticized by others who indicate further evidence is needed to demonstrate a role of coffee in the genesis of cardiovascular disease (Ref. 31). These other investigators found no evidence for the role of coffee in any increased risk of death because of cardiovascular disease in a large, well-known (Framingham study) prospective study of factors involved in the genesis of coronary heart disease (Ref. 32). No generally accepted evidence would implicate caffeine as a danger in this regard. Furthermore, another recent publication using large numbers of subjects has not supported the contention about coffee drinking promulgated by the Drug Surveillance Group (Ref. 33). The Panel concludes that there is inconclusive evidence linking coffee and/or caffeine to cardiovascular disease. In another study of paired, control patients, there was a higher incidence of myocardial infarction with very high consumption of coffee. Caffeine was implicated only indirectly, on the basis of elevation of serum lipids evoked by caffeine administration (Ref. 34). In a study of 1,700 men between the ages of 40 and 55 years (Ref. 35), there was said to be an "increasing incidence of angina pectoris and of myocardial infarction with survival" among men consuming 5 or more cups of coffee a day. Curiously, the death rate was highest among those who took no coffee or consumed 5 or more cups of coffee per day. There is no level of significance given and the number of deaths is small.

In contrast to the irritating qualities of many coffee extracts, caffeine itself does not seem to cause irritation of the gastrointestinal tract in the usual doses. This is an advantage when the drug is used for its stimulant properties.

The observations that suggest some central stimulation that leads to, or is

V 40 236 DEC 8 75 XUM

associated with, a mild form of addiction to caffeine raise questions about long-term use. The Panel questions if subjects are paying some price not yet detected. This appears to be true for most hypnotics in that we now know that there are, at the least, changes in the amount of rapid-eye movement (REM) sleep and that some kind of deficit is built up. This occurs in addition to the separate risk of addiction to the hypnotic itself. In the case of stimulants used to enhance the performance of school children deemed hyperactive, Sroufe and Stewart have suggested that there may be no persistent effect of drug therapy upon these children, but that they become dependent upon the stimulant drugs to maintain a level of performance not much different from pre-drug performance (Ref. 36).

In summary, the panel believes that caffeine as an OTC stimulant appears to be safe and effective. It is reasonably nontoxic in that fatal doses for man are estimated to be greater than 10 gm by mouth.

Caffeine has the ability to produce a low grade of "addiction" that is commonly referred to as "habituation," and has been most extensively studied in coffee drinkers. The Panel believes this is not a dangerous problem and does not believe that a warning regarding habituation is necessary. However, the Panel recommends that stimulant products containing caffeine should not include in the labeling a suggestion such as "non-habit-forming."

Caffeine has not been shown to be mutagenic to man or mammals, although there are some weak mutagenic effects that can be demonstrated in certain bacterial viruses. The claim that coffee drinkers have more heart disease than noncoffee drinkers is not proven to the satisfaction of the Panel and is not relevant because it does not extend to caffeine. The claim relating to heart disease has involved coffee and has "absolved" tea drinkers (who ingest caffeine in their tea). The possibility that extensive daily caffeine intake (tablets, coffee, cola drinks, etc.) may mimic neurotic anxiety reaction has recently been raised (Ref. 37). Labeling will therefore include a warning to this effect.

The addition of substances to caffeine preparations as marketed should be closely scrutinized. Since the addition of proprietary flavors such as menthol and peppermint or sugars or their substitutes encourages ingestion by children, they serve to enhance the possibility of poisoning. The Panel opposes inclusion of these substances. Talc should also be removed from any preparations intended for human consumption. It is nonessential, and its safety is in question. Only talc that contains no asbestos fibers should be permitted to enter the body by any route. To ensure this, the source and composition of each talc lot need to be known. There is no generally available or "official" test for the presence of asbestos fibers in talc insofar as the Panel knows. Evidence is at hand that asbestos fibers can cause chronic respiratory disease, adenocarcinoma of the lung, and mesothelioma of the pleura and peritoneum when such fibers are inhaled. There is also evidence that ingestion of asbestos by animals can cause cancer. (See paragraph II F above—Inactive Ingredients.)

Labeling

The Panel recommends the following labeling for stimulant active ingredients to be generally recognized as safe and effective and not misbranded:

a. *Indications.* "Restores mental alertness or wakefulness when experiencing fatigue or drowsiness."

b. *Warnings and/or cautions.* Labeling should contain the following warnings:

(1) *"Caution:* Do not exceed recommended dose since side effects may occur which include increased nervousness, anxiety, irritability, difficulty in falling asleep and occasionally, disturbances in heart rate and rhythm called palpitations."

(2) "For occasional use only. If fatigue or drowsiness persists continuously for more than 2 weeks, consult a physician."

(3) "For adults only. Do not give to children under 12 years of age."

(4) The Panel recommends that an OTC stimulant product containing caffeine should also include the following warning:

"Contains caffeine. Do not take this product with large amounts of caffeine containing beverages such as coffee, tea or cola drinks." The Panel believes such a warning is necessary since an average cup of coffee or strong tea contains an amount of caffeine about equal to that in the average dose of OTC products. Certain cola drinks also contain a significant amount of caffeine and should also be included in the warning.

2. *Conditions under which stimulant products are not generally recognized as safe and effective or are misbranded.* After carefully reviewing all data submitted, as well as additional evidence provided by the FDA and consultants to the Panel and the results of an extensive literature search, the Panel found no scientific basis or even sound theoretical reasons for claimed effectiveness of a number of ingredients used in OTC stimulants. In addition, certain labeling claims are clearly misleading. For example, statements or suggestions that stimulants and stimulant combination products (with nonstimulant ingredients) "increase sensual pleasure" are undocumented claims in the presently available literature and are, therefore, unacceptable to the Panel.

The Panel concludes that stimulant products containing the following ingredients should be removed from the market unless further scientific testing supports their use, because there are no data to support their use alone or in combination as a stimulant. The Panel has determined that these ingredients have no action as a stimulant nor do they contribute to the claimed effectiveness of a stimulant (e.g., caffeine) as an ingredient in a combination product.

Active Ingredients

Combinations of Caffeine with Nonstimulant Active Ingredients:

Ammonium chloride
Ginseng
Vitamins

a. *Ammonium chloride.* The Panel concludes that a combination product in which caffeine is combined with ammonium chloride is not rational for use as an OTC stimulant preparation. The Panel is unaware of any data which demonstrate a role for use of ammonium chloride, either alone or in combination with caffeine as a stimulant.

The Panel is aware that products containing ammonium chloride and caffeine are promoted for premenstrual tension with the claim "helps relieve premenstrual symptoms: swelling, weight gain and fatigue."

The Panel, after a review of the literature, has not found acceptable evidence that the use of ammonium chloride and caffeine is rational for the purpose of reducing fatigue. Caffeine alone may be expected to increase rather than decrease associated nervousness. The use of ammonium chloride for other claims has been deferred by the Panel to the OTC Internal Miscellaneous Panel as to the safety and effectiveness of this ingredient.

b. *Ginseng.* The Panel concludes that there is no rationale for adding ginseng to a stimulant drug.

The Panel found no data to suggest a stimulant action for ginseng or for potentiation or enhancement of the stimulant effect of caffeine. After an extensive review of the available scientific literature, the Panel found no reasonable studies or supporting documentation to suggest ginseng in combination with caffeine to affect or enhance sexual drives or awareness.

c. *Vitamins.* The Panel concludes after an extensive review of the available scientific literature, that there is no acceptable medical rationale for combining vitamins (especially Vitamin E) with caffeine. The Panel further makes reference to the discussion of vitamins in the section on nighttime sleep-aids (See II above—*Nighttime Sleep-Aids.*) The Panel found no acceptable rationale to explain the combination of caffeine and vitamins.

The Panel defers to the OTC Vitamin, Mineral and Hematinic Drug Product Panel on the safety, effectiveness and labeled claims for vitamins. The Panel notes that the proper functioning of all cells requires an adequate intake of all vitamins (water-soluble and fat-soluble). It is misleading to assume or propose that individuals consuming stimulant drugs have certain deficiencies. There is virtually nothing in the current medical or pharmacological literature to support the inclusion of selected vitamins in OTC stimulants. In addition, the small amounts of water-soluble vitamins contained in OTC stimulants are virtually homeopathic due to the fact that vitamins are rapidly excreted in the urine. This provides no rationale to support the inclusion of these ingredients in products designed to provide CNS stimulation.

The Panel strongly believes that polypharmacy and a "shotgun" approach to treatment of symptoms with fixed-dose combinations have no rational therapeutic basis.

The value of the placebo effect in the management of psychosomatic illness and minor neuroses is obvious. It is extremely doubtful however, that the inclusion of vitamins in a self-prescribed stimulant enhances any placebo effect these products may confer.

Labeling

In one submission, a combination product containing caffeine with ginseng is claimed to "increase sensual awareness and pleasure." Although not stated explicitly, it is apparent to the Panel that the intent of this labeling is to equate sensual awareness and pleasure with increased sexual capability and pleasure. The utility of ginseng has been discussed previously where is was stated that no evidence of enhanced sexual experience or potency has been found. In the case of caffeine, the Panel is unaware of any studies that clearly show an enhancement of sensual or sexual experience by the ingestion of this drug. Certainly no submissions to the Panel deal with this indication. In the absence of any positive evidence for an effect an sensual or sexual experience, the Panel objects to labeling that states or implies "increases sensual pleasure."

In the same submission, caffeine with vitamin E is claimed to "increase sensual (sexual) awareness." The Panel, after an extensive review of the available medical and scientific literature, found no reasonable supporting documentation to even suggest that vitamin E in combination with caffeine affects or enhances the sensual (sexual) experience in man. In the Panel's opinion, neither ingredient has been shown to affect sexual experience in man and therefore such claims are false and misleading.

The Panel also concludes that labeling claim(s) that suggest a product containing caffeine is "non-habit-forming" are misleading and should not be allowed. Prolonged ingestion of caffeine especially in larger than recommended doses can lead to habituation. (See paragraph IV C 1. Conditions under which stimulant products are generally recognized as safe and effective and are not misbranded.

3. *Conditions under which the available data are insufficient to permit final classification at this time.* The Panel concludes that adequate and reliable scientific evidence is not available to permit final classification of the claimed labeling listed below:

Labeling

The question of whether a stimulant such as caffeine "enhances performance" in the nonfatigued state cannot be answered definitively at this time. Although there are some suggestions, but not proof, that this may be true, additional evidence in well-controlled trials would be necessary for such an indication to be included in the labeling. If such proof is obtained, it must also be demonstrated, in the same human subject, that no side effects accompany enhanced performance. In the case of caffeine, such side effects would include, among others, tremor, palpitations, and nervousness.

Therefore, under the Federal Food, Drug and Cosmetic Act (secs. 201, 502, 505, 701, 52 Stat. 1040–1042 as amended, 1050–1053 as amended, 1055–1056 as amended (by 70 Stat. 919 and 72 Stat. 948) (21 U.S.C. 321, 352, 355, 371)) and the Administrative Procedure Act (5 U.S.C. 553, 554, 702, 703, 704) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Subchapter D of Title 21 of the Code of

V40236 DEC 8 75 XUM

Federal Regulations be amended by adding new Parts 338, 339, and 340 to read as follows:

PART 338—NIGHTTIME SLEEP-AID PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

Subpart A—General Provisions

Sec.
338.1 Scope.
338.3 Definition.

Subpart B—Active Ingredients

338.10 Nighttime sleep-aid active ingredients. [Reserved]
338.40 OTC product container.

Subpart C—[Reserved]

Subpart D—Labeling

338.50 Labeling of nighttime sleep-aid products.

AUTHORITY: Secs. 201, 502, 505, 701, 52 Stat. 1040–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321, 352, 355, 371). (5 U.S.C. 533, 554, 702, 703, 704).

Subpart A—General Provisions

§ 338.1 Scope.

An over-the-counter nighttime sleep-aid product in a form suitable for oral administration is generally recognized as safe and effective and is not misbranded if it meets each of the conditions in this Part 338 and each of the general conditions established in § 330.1 of this chapter.

§ 338.3 Definition.

As used in this part, "nighttime sleep-aid" is an agent which helps to reduce difficulty in falling asleep including delayed sleep, frequent awakenings, light sleep or reduced duration of sleep.

Subpart B—Active Ingredients

§ 338.10 Nighttime sleep-aid active ingredients. [Reserved]

§ 338.40 OTC product container.

The OTC product container shall contain not more than any established maximum quantity for an applicable active ingredient identified in § 338.10.

Subpart C—[Reserved]

Subpart D—Labeling

§ 338.50 Labeling of nighttime sleep-aid products.

(a) *Indications.* The labeling shall identify the product as a "nighttime sleep-aid" to "reduce difficulty in falling asleep." Labeling may also include the phrases: "Helps fall-asleep" and "For relief of occasional sleeplessness".

(b) *Directions for use.* The labeling of the product contains the recommended dosage and appropriate directions under the heading "Directions", e.g., once daily at bedtime broken down by age groups, if appropriate, followed by "or as directed by a physician".

(c) *Warnings.* The labeling of the product contains the following general warning(s) under the heading "Warnings":

(1) "For adults only. Do not give to children under 12 years of age."

(2) "Do not take this product if pregnant or if nursing a baby."

(3) "Do not take this product if you are presently taking a prescription drug or other OTC drug, without consulting your physician or pharmacist."

(4) "If condition persists continuously for more than 2 weeks, consult your physician. Insomnia may be a symptom of serious underlying medical illness."

(5) "Take this product with caution if alcohol is being consumed."

(6) For products containing an antihistamine: *"Caution:* This product contains an antihistamine drug."

PART 339—DAYTIME SEDATIVE PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

Subpart A—General Provisions

Sec.
339.1 Scope.
339.3 Definition.

Subpart B—Active Ingredients

339.10 Daytime sedative active ingredients. [Reserved]
339.40 OTC product container.

Subpart C—[Reserved]

Subpart D—Labeling

339.50 Labeling of daytime sedative products.

AUTHORITY: Secs. 201, 502, 505, 701, 52 Stat. 1040–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321, 352, 355, 371); (5 U.S.C. 553, 554, 702, 703, 704).

Subpart A—General Provisions

§ 339.1 Scope.

An over-the-counter daytime sedative product in a form suitable for oral administration is generally recognized as safe and effective and is not misbranded if it meets each of the conditions in this Part 339 and each of the general conditions established in § 330.1 of this chapter.

§ 339.3 Definition.

As used in this part, daytime sedative is an agent which claims relief of occasional nervous tension.

Subpart B—Active Ingredients

§ 339.10 Daytime sedative active ingredients. [Reserved]

§ 339.40 OTC product container.

The OTC product container shall contain not more than any established maximum quantity for an applicable active ingredient identified in § 339.10.

Subpart C—[Reserved]

Subpart D—Labeling

§ 339.50 Labeling of daytime sedative products.

(a) *Indications.* The labeling shall identify the product as a "daytime sedative".

(b) *Directions for use.* The labeling of the product contains the recommended dosage and appropriate directions under the heading "Direction", e.g., once daily broken down by age groups if appropriate followed by "or as directed by a physician".

(c) *Warnings.* The labeling of the product contains the following general warning(s) under the heading "Warnings":

(1) "For adults only. Do not give to children under 12 years of age".

(2) "Do not take this product if pregnant or if nursing a baby".

(3) "Do not take this product if you are presently taking a prescription drug or other OTC drug, without consulting your physician or pharmacist".

(4) "If condition persists continuously for more than 2 weeks, consult your physician".

(5) "Take this product with caution if alcohol is being consumed."

(6) For products containing an antihistamine: *"Caution:* This product contains an antihistamine drug and may cause drowsiness. Avoid driving a motor vehicle or operating machinery."

PART 340—STIMULANT PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

Subpart A—General Provisions

Sec.
340.1 Scope.
340.3 Definition.

Subpart B—Active Ingredients

340.10 Stimulant active ingredients.

Subpart C—[Reserved]

Subpart D—Labeling

340.50 Labeling for stimulant products.

AUTHORITY: Secs. 201, 502, 505, 701, 52 Stat. 1040–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948 (21 U.S.C. 321, 352, 355, 371); (5 U.S.C. 553, 554, 702, 703, 704).

Subpart A—General Provisions

§ 340.1 Scope.

An over-the-counter stimulant product in a form suitable for oral administration is generally recognized as safe and effective and is not misbranded if it meets each of the conditions in this Part 340 and each of the general conditions established in § 330.1 of this chapter.

§ 340.3 Definition.

As used in this part, "stimulant" is an agent which restores mental alertness or wakefulness during fatigue or drowsiness.

Subpart B—Active Ingredient

§ 340.10 Stimulant active ingredient.

The active ingredient of the product consists of caffeine when used within the dosage limit established: adult oral dosage 100 to 200 mg not more often than every 3 to 4 hours.

Subpart C—[Reserved]

Subpart D—Labeling

§ 340.50 Labeling of stimulant products.

(a) *Indications.* The labeling shall identify the product as a "stimulant" that "restores mental alertness or wakefulness when experiencing fatigue or drowsiness".

(b) *Directions for use.* The labeling of the product contains the recommended dosage and appropriate directions, identified in § 340.10, under the heading "Directions" followed by "except under the advice or supervision of a physician".

(c) *Warnings.* The labeling of the product contains the following warning(s) under the heading "Warnings":

(1) *"Caution:* Do not exceed recommended dose since side effects may occur which include increased nervousness, anxiety, irritability, difficulty in falling asleep, and occasionally disturbances in heart rate and rhythm called palpitations".

(2) "For occasional use only. If fatigue or drowsiness persists continuously for more than 2 weeks, consult a physician."

(3) "For adults only. Do not give to children under 12 years of age".

(4) For products containing caffeine: *"Contains caffeine.* Do not take this product with large amounts of caffeine-containing beverages such as coffee, tea or cola drinks".

Interested persons may, on or before March 8, 1976, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Additional comments replying to any comments so filed may also be submitted on or before April 8, 1976. Received comments may be seen in the above office during working hours, Monday through Friday.

It is hereby certified that the economic and inflationary effects of this proposal have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: December 1, 1975.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

PART III:

DEPARTMENT OF LABOR

Office of the Secretary

■

FARM LABOR CONTRACTORS

Registration Requirements

V40236 DEC 8 75 XUM

DEPARTMENT OF LABOR

Office of the Secretary

[29 CFR Part 40]

FARM LABOR CONTRACTORS

Revised Registration Requirements

The Farm Labor Contractor Registration Act of 1963 (7 U.S.C. 2041, *et seq.*) was amended on December 7, 1974 (Pub. L. 93–518), to provide, among other things, revised requirements for registration of farm labor contractors furnishing migrant agricultural workers and for the assessment of civil money penalties for violations of the Act. It is therefore necessary that Regulations, Part 40 be revised to reflect the requirements of the amended law.

It is proposed to revise Part 40 by issuing two subparts, Subpart A consisting of substantive requirements and Subpart B consisting of the rules of practice. This proposal requests comments only on Subpart A. Subpart B which is procedural in character, will be published shortly.

This proposed Subpart A states the requirements for issuance, renewal, revocation, suspension, or refusal to renew Certificates or Registration and Farm Labor Contractor Employee Identification Cards, and the requirements for Certificates of Registration authorizing the transportation and housing of migrant workers and insurance requirements to be complied with by persons transporting workers. It also provides for issuance of a notice of an assessment of a civil money penalty for violation of the Act or regulations issued thereunder and describes the factors to be considered in assessing the amount of such penalty.

Upon final publication of this Subpart A and the publication of Subpart B, the present Part 40 will be rescinded, provided however that any pending administrative proceedings instituted under existing §§ 40.16 through 40.26 in progress at the time of issuance of the new Part 40 will be carried through to completion under the present §§ 40.16 through 40.26.

Interested persons may submit written data, views, comments or arguments to the Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C., 20210. Such comments will be received until January 22, 1976.

All material received in response to this invitation will be available for public inspection during normal business hours in Room S–3502 at that address.

Upon evaluation of the comments, the proposed revisions to Part 40, as published herein and as may be revised as a result of such comments, will be published.

Accordingly, it is proposed that the new 29 CFR Part 40, Subpart A, will read as follows:

PART 40—FARM LABOR CONTRACTOR REGISTRATION

Subpart A—Registration of Farm Labor Contractors and Their Full-Time Employees

GENERAL

Sec.
40.1 Purpose and scope.
40.2 Definitions.
40.3 Certificate of Registration required.
40.4 Farm Labor Contractor Employee Identification Card required.
40.5 Corporations, partnerships, associations and other organizations.
40.6 Public central registry.
40.7 Compliance with State statutes.

REGISTRATION REQUIREMENTS

40.11 Filing of applications for Certificate of Registration.
40.12 Execution of application for Certificate of Registration.
40.13 Appointment of Secretary as agent for substituted service.
40.14 Motor vehicle liability insurance.
40.15 Proof of financial responsibility in lieu of insurance.
40.16 Qualifications and eligibility of insurance carriers.
40.17 Duration of insurance or liability bond.
40.18 Limitations on cancellation of insurance or liability bond.
40.19 Authorization to transport migrant workers.
40.20 Authorization to house migrant workers.
40.21 Expiration and renewal of Certificate of Registration.
40.22 Replacement of Certificate of Registration.

EMPLOYEE IDENTIFICATION

40.31 Filing of application for Farm Labor Contractor Employee Identification Card.
40.32 Execution and Content of application for Farm Labor Contractor Employee Identification Card.
40.33 Authorized use of Farm Labor Contractor Employee Identification Card.
40.34 Replacement of Farm Labor Contractor Employee Identification Card, lost card or change of employment.
40.35 Expiration and renewal of Farm Labor Contractor Employee Identification Card.

ACTION ON APPLICATIONS

40.41 Office of filing, action.
40.42 Issuance, refusal to issue, suspension, revocation or refusal to renew: Farm Labor Contractor Certificate of Registration or Farm Labor Contractor Employee Identification Card.

OBLIGATIONS AND PROHIBITED ACTS

40.51 Obligations of a farm labor contractor.
40.52 Obligations of person holding valid Farm Labor Contractor Employee Identification Card.
40.53 Obligations of grower, processor, and other user.
40.54 Discrimination prohibited.

VIOLATIONS AND SANCTIONS

40.61 Report of violations, investigations, issuance of subpenas.
40.62 Sanctions.
40.63 Certificates of Registration and Farm Labor Contractor Employee Identification Cards—grounds for revocation or suspension or refusal to issue or to renew.
40.64 Denial of facilities and services of Wagner-Peyser Act.
40.65 Civil money and other administrative penalties.
40.66 Waiver of rights.

AUTHORITY: Sec. 14, 78 Stat. 924, and section 17, 88 Stat. 1659 (7 U.S.C. 2053); Secretary's Order No. 32–72, 37 FR 22660; and Employment Standards Order 1–74, 39 FR 33841.

Subpart A—Registration of Farm Labor Contractors and Their Full-Time Employees

GENERAL

§ 40.1 Purpose and scope.

(a) The Farm Labor Contractor Registration Act of 1963, as amended ("the Act"), requires certain persons to obtain Certificates of Registration or Farm Labor Contractor Employee Identification Cards prior to performing any activities which constitute engagement in farm labor contracting within the meaning of the Act and prescribes certain responsibilities for holders of such certificates or employee identification cards. In addition, persons to whom farm workers are furnished by farm labor contractors also have specific responsibilities. Migrant workers who engage solely in agricultural employment and do not perform any of the enumerated farm labor contractor activities within the meaning of the Act need not obtain a Certificate of Registration or a Farm Labor Contractor Employee Identification Card.

(b) The Act empowers the Secretary of Labor to enforce the Act, conduct investigations, issue subpenas, and, in the case of designated violations of the Act, to impose sanctions, including the refusal to issue or to renew or the suspension or revocation of a Certificate of Registration or Farm Labor Contractor Employee Identification Card. As provided in the Act, the Secretary is empowered, among other things, to impose an assessment and to collect a civil money penalty of not more than $1,000 for each violation, to deny a person the facilities and services available under the Wagner-Peyser Act, to seek a temporary or permanent restraining order in a Federal District Court, and to seek the imposition of criminal penalties on farm labor contractors or their employees who willfully and knowingly violate any provisions of the Act.

(c) This Subpart A sets forth the substantive regulations promulgated by the Secretary, pursuant to authority contained in the Act, relating to the issuance, renewal or replacement of a Farm Labor Contractor Certificate of Registration or a Farm Labor Contractor Employee Identification Card, the obligations and responsibilities of persons issued such certificates or identification cards, the obligations and responsibilities of persons furnished farm workers by farm labor contractors, the grounds for refusal to issue or to renew or for the revocation or suspension of such certificates or identification cards, and the sanctions authorized by the Act. It also provides for the imposition of civil money penalties for violation of the Act or regulations issued thereunder and indicates factors to be considered by the Secretary of Labor or authorized representative in assessing the amount of such penalty.

(d) Subpart B sets forth the rules of practice for administrative hearings relating to a refusal to issue or to renew, or the suspension or revocation of either document. It also outlines the procedure for filing a challenge to a proposed administrative action relative to violations and summarizes the methods provided for collection and recovery of the civil money penalty.

§ 40.2 Definitions.

For purposes of this part:

(a) The term "person" includes any individual, partnership, association, joint stock company, trust, or corporation.

(b) The term "farm labor contractor" means "any person, who, for a fee, either for himself or on behalf of another person, recruits, solicits, hires, furnishes or transports migrant workers (excluding members of the contractor's immediate family) for agricultural employment. This term shall not include—

(1) Any nonprofit charitable organization, public or nonprofit private educational instiuttion, or similar organization;

(2) Any farmer, processor, canner, ginner, packing shed operator, or nurseryman who personnally engages in any such activity for the purpose of supplying migrant workers solely for his own operation;

(3) Any full-time or regular employee of any entity referred to in Paragraph (b)(1) or (2) of this section who engages in such activity solely for his employer on no more than an incidental basis;

(4) Any person who engages in such activity—

(i) Solely within a 25 mile intrastate radius of his permanent place of residence and

(ii) For not more than 13 weeks per year;

(5) Any person who engaged in any such activity for the purpose of obtaining migrant workers of any foreign nation for employment in the United States, if the employment of such workers is subject to—

(i) An agreement between the United States and such foreign nation or

(ii) An arrangement with the Government of any foreign nation under which written contracts for the employment of such workers are provided for and the enforcement thereof is provided for through the United States by an instrumentality of such foreign nation;

(6) Any full-time or regular employee of any person holding a Certificate of Registration under this Act; or

(7) Any common carrier or any full-time regular employee thereof engaged solely in the transportation of migrant workers.

(c) The term "fee" includes any money or other valuable consideration paid or promised to be paid to a person for services as a farm labor contractor.

(d) The term "agricultural employment" means employment in any service or activity included within the provisions of Section 3(f) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 203(f)), or Section 3121(g) of the Internal Revenue Code of 1954 (26 U.S.C. 3121(g)) and the handling, planting, drying, packing, packaging, processing, freezing, or grading prior to delivery for storage of any agricultural or horticultural commodity in its unmanufactured state.

(e) The term "migrant worker" means an individual whose primary employment is in agriculture, as defined in Section 3(f) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 203(f)), or who performs agricultural labor, as defined in Section 3121(g) of the Internal Revenue Code of 1954 (26 U.S.C. 3121(g)), on a seasonal or other temporary basis.

(f) The term "immediate family" of the farm labor contractor includes only—

(1) A spouse;

(2) Children, stepchildren, and foster children; and

(3) Parents, stepparents, and foster parents.

(g) The term "Secretary" means the Secretary of the United States Department of Labor or the Secretary's duly authorized representative.

(h) "Administrator" means the Administrator of the Wage and Hour Division, Employment Standards Administration, United States Department of Labor, and such authorized representative as may be designated by the Administrator to perform any of the functions of the Administrator under this part.

(i) "Solicitor of Labor" means the Solicitor, United States Department of Labor, and includes attorneys designated by the Solicitor to perform functions of the Solicitor under this part.

(j)(1) The "Administrative Law Judge" means a person appointed as provided in 5 U.S.C. 3105 and Subpart B of Part 930 of Title 5 of the Code of Federal Regulations (see 37 FR 16787) and qualified to preside at hearings under 5 U.S.C. 557.

(2) The "Chief Administrative Law Judge" means the Chief Administrative Law Judge, United States Department of Labor, Washington, D.C. 20210.

(k) The term "State" means any of the States of the United States, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and Guam.

(l) "Convicted" means that a final judgment of guilt has been rendered by a court of competent jurisdiction from which no opportunity for appeal remains.

(m) A "full-time or regular employee" who is required to obtain a Farm Labor Contractor Employee Identification Card is a person who performs farm labor contracting activities solely on behalf of a farm labor contractor holding a valid Certificate of Registration and is not an independent contractor.

(n) A "Certificate of Registration" is the certificate issued by the Administrator which permits a person to engage in activities as a farm labor contractor.

(o) A "Farm Labor Contractor Employee Identification Card" is a card issued pursuant to this part permitting a full-time or regular employee of a person holding a valid Certificate of Registration to engage in activities as a farm labor contractor.

(p) A farm labor contractor is deemed an "owner" of a vehicle or housing facilities if said person has a legal or equitable interest therein.

(q) A farm labor contractor is in "control" of a vehicle or housing facilities if said person is in charge of or has the power or authority to oversee, manage, superintend or administer the vehicle or housing, either personally or through an authorized agent or employee acting on behalf of said farm labor contractor, irrespective of whether compensation is paid for acting in any of the aforesaid capacities.

(r) An "illegal alien" is any person who is an alien not lawfully admitted for permanent residence or who has not been authorized by the Attorney General to accept employment.

(s) A "common carrier" by motor vehicle is one which holds itself out to the general public to engage in transportation of passengers for hire, whether over regular or irregular routes, and which holds a valid certificate of authorization for such purposes from an appropriate local, State or Federal agency.

(t) The "Wagner-Peyser Act" is the Act of June 6, 1933 (48 Stat. 113; codified in 29 U.S.C. 49, *et seq.*), providing *inter alia* for the establishment of the U.S. Employment Service.

(u) The term "Employment Service of the various States" means a State agency vested with all powers necessary to cooperate with the U.S. Employment Service under the Wagner-Peyser Act.

§ 40.3 Certificate of Registration required.

Any person who desires to engage in any activity as a farm labor contractor, as defined in the Act and these regulations, must first obtain a Certificate of Registration authorizing each such activity.

§ 40.4 Farm Labor Contractor Employee Identification Card required.

Any person desiring to engage in recruiting, soliciting, hiring, furnishing, or transporting migrant workers solely on behalf of a farm labor contractor holding a valid Certificate of Registration, issued pursuant to the Act and these regulations, as a full-time or regular employee of such contractor must obtain a Farm Labor Contractor Employee Identification Card authorizing such activity or activities. Such identification card must be obtained prior to the employee's engagement in any of the aforementioned

V 40 236 DEC 8 75 D XUM

farm labor contractor activities and must show the name of the farm labor contractor for whom such activities are to be performed.

§ 40.5 Corporations, partnerships, associations and other organizations.

Any corporation, partnership, association or other organization which is a farm labor contractor within the meaning of the Act must obtain a Certificate of Registration. Any officer, director, or employee of such a corporation, or partner or employee of a partnership, or officer, member or employee of an association or any other organization, who engage in farm labor contractor activities as a full-time or regular employee of such business organization, shall obtain a Farm Labor Contractor Employee Identification Card prior to so engaging.

§ 40.6 Public central registry.

The Administrator shall maintain a public central registry of all persons issued Certificates of Registration or Farm Labor Contractor Employee Identification Cards. Requests for information concerning such registry may be directed to the Administrator, Wage and Hour Division, U.S. Department of Labor, Washington, D.C. 20210.

§ 40.7 Compliance with State statutes.

This Act and the provisions contained herein are intended to supplement State action and compliance with this Act shall not excuse anyone from compliance with appropriate State law and regulation.

REGISTRATION REQUIREMENTS

§ 40.11 Filing of applications for Certificates of Registration.

(a) Applications for an initial or renewal Certificate of Registration are available at, and may be filed in, any office of the Employment Service of the various States.

(b) Registration under the Federal law is required whether or not licensing or registration of farm labor contractors is required under State law.

§ 40.12 Execution of application for Certificate of Registration.

(a) The application shall set forth the information required thereon, shall be subscribed and sworn to by the applicant, and shall have attached the applicant's fingerprints on Form FD–258 as prescribed by the U.S. Department of Justice.

(b) Any corporation, partnership, association, or other entity which holds a valid Certificate of Registration shall within 10 days report any change in its officers, directors, or membership in writing by registered mail to the regional office which initially issued the Certificate of Registration.

§ 40.13 Appointment of Secretary as agent for substituted service.

No Certificate of Registration shall be issued unless and until each applicant executes a writing which shall be subscribed and sworn to and which shall contain the following declaration:

I do hereby designate and appoint the Secretary of Labor, United States Department of Labor, as my lawful agent to accept service of summons in any action against me, at any and all times during which I have departed from the jurisdiction in which such action is commenced or otherwise have become unavailable to accept service, and under such terms and conditions as are set by the court in which such action has been commenced.

§ 40.14 Motor vehicle liability insurance.

Before any person may transport, within the meaning of the Act, migrant workers and their property in any vehicle which such person owns, operates, controls, or causes to be operated, compliance with the insurance or financial responsibility requirements of the Act must be shown by submitting the following, except to the extent that other arrangements pursuant to § 40.15 of this part have been approved by the Secretary:

(a) A completed Farm Labor Contractor Motor Vehicle Liability Certificate of Insurance showing that the passenger hazard is included (as evidence of liability insurance which covers the workers while being transported). Such certificate represents that a motor vehicle liability insurance policy, including a Farm Labor Contractor Liability Endorsement, provides insurance in an amount not less than that required under the law or regulation of any State in which such applicant operates a vehicle in connection with the business, activities or operation as a farm labor contractor; but in no event shall the coverage be less than the amounts applicable to vehicles used in the transportation of passengers under the Interstate Commerce Act and regulations promulgated pursuant thereto. These amounts currently are as follows:

Insurance required for passenger equipment

	12 or less passengers	More than 12 passengers
Limit for bodily injuries to or death of 1 person	$100,000	$100,000
Limit for bodily injuries to or death of all persons injured or killed in any 1 accident (subject to a maximum of $100,000 for bodily injuries to or death of 1 person)	300,000	500,000
Limit for loss or damage in any 1 accident to property of others (excluding cargo)	50,000	50,000

The certificate also represents that the insurance was obtained from an insurance carrier licensed or otherwise authorized to do business in the State in which the insurance is obtained.

(b) If the passenger hazard has been excluded from the Farm Labor Contractor Motor Vehicle Liability Certificate of Insurance referred to in paragraph (a) of this section applicant shall submit in addition to such certificate of insurance a completed Farm Labor Contractor Standard Accident Policy Certificate of Insurance as evidence of the issuance of a Farm Labor Contractor Standard Accident Policy. Said policy or policies shall be issued by an insurance carrier licensed or otherwise authorized to do business in the State in which the insurance is obtained. The coverage afforded by such substitute insurance policy or policies shall not be less than the minimum amounts required in paragraph (a) of this section.

§ 40.15 Proof of financial responsibility in lieu of insurance.

Financial responsibility in lieu of insurance may be evidenced by a liability bond executed by the applicant, identified in the instrument as the "principal," together with a third party, identified in the instrument as the "surety," to assure payment of any liability up to $500,000 for damages to persons or property arising out of the applicant's ownership of, operation of, or causing to be operated any vehicle for the transportation of migrant workers in connection with the business, activities, or operations as a farm labor contractor. The "surety" shall be one which appears on the list contained in Treasury Department Circular 570, or which has been approved by the Secretary under the Employee Retirement Income Security Act of 1974 (Pub. L. 93–406). Treasury Department Circular 570 may be obtained from the U.S. Treasury Department, Audit Staff, Bureau of Government Financial Operations, Washington, D.C. 20226.

§ 40.16 Qualifications and eligibility of insurance carriers.

(a) No certificate of insurance filed by an insurance carrier in accordance with this section will be accepted, unless said insurance carrier meets the following requirements:

(1) The insurance carrier possesses and maintains surplus funds policyholders' surplus) of not less than the minimum amount required by the U.S. Treasury Department, which minimum shall be determined on the basis of the values of assets and liabilities as shown in its financial statements filed with and approved by the insurance department or other insurance regulatory authority of the State of domicile (home State) of such company, except in instances where in the judgment of the Administrator additional evidence with respect to such values is considered necessary; and

(2) The insurance carrier has a general policyholder's rating of B or better in the current issue of "Best's—Insurance Reports—Fire and Casualty," or a "recommended" rating in the current issue of "Best's—Insurance Reports—Life."

(b) If the insurance carrier is not listed in the current issue of Best's, or, if listed, is not assigned a general policyholder's rating of B or better or "recommended" whichever is applicable, such carrier may request approval for eligibility by submitting to the Administrator its latest financial statement, as filed with the insurance department of its home State, on the standard form, with all exhibits and schedules included, and copies of reports of examination on conditions and affairs, as prepared by State supervisory authorities and such other information as the Administrator may request.

§ 40.17 Duration of insurance or liability bond.

Any insurance policy or liability bond which is obtained pursuant to this Act shall provide the required coverage for the full period during which the applicant for a Certificate of Registration shall be engaged in transporting migrant workers within the meaning of the Act during a calendar year. If a policy or liability bond shall expire within 30 days of the date of filing an application for a Certificate of Registration, such Certificate will not be issued unless the applicant shall have submitted written evidence of renewal or extension of said policy or liability bond for the period of time during which migrant workers will be transported. In the event that a policy or liability bond shall expire on a date which exceeds 30 days from the date of application for a Certificate of Registration, proof of renewal or extension of a policy or of a liability bond must be submitted promptly to the regional office which issued the Certificate of Registration.

§ 40.18 Limitations on cancellation of insurance or liability bond.

Any insurance policy or liability bond required by the Act or this part shall provide that it shall not be cancelled, rescinded, or suspended, nor become void for any reason whatsoever during such period in which the insurance or liability bond is required by the Act to be effective, except upon the expiration of the term for which it is written; or unless the parties desiring to cancel shall have first given thirty (30) days notice to the Administrator. The notice will include a statement setting forth the reason for cancellation, rescission, or suspension of such policy or bond. The notice shall be in writing and forwarded via certified or registered mail, addressed to the Administrator of the Wage and Hour Division, U.S. Department of Labor, Washington, D.C. 20210. Said thirty (30) days notice shall commence to run from the date notice is actually received by the Administrator.

§ 40.19 Authorization to transport migrant workers.

(a) No farm labor contractor may transport migrant workers within the meaning of the Act, unless said person shall submit—

(1) Written proof of insurance or financial responsibility;

(2) A statement in the manner prescribed by the Secretary identifying each vehicle to be used by the applicant for the transportation of migrant workers and under the applicant's ownership or control; and

(3) Written proof that every such vehicle is in compliance with all applicable State safety and health standards and with the rules and regulations promulgated by the Bureau of Motor Carrier Safety, Federal Highway Administration of the U.S. Department of Transportation.

(b) If the farm labor contractor is to drive a vehicle for the transportation of migrant workers, the contractor must seek authorization for such activity by—

(1) Submitting on a prescribed form a doctor's certificate with the application for the initial Certificate of Registration and when applying for a renewal certificate with authorization to drive, a new completed doctor's certificate, if the previous certificate is more than 3 years old; and

(2) Submitting evidence of an appropriate license to operate such vehicle.

§ 40.20 Authorization to house migrant workers.

(a) If an applicant for a Certificate of Registration is the owner of or will control facilities to be used for housing migrant workers during any period for which such a certificate is sought, said applicant shall submit—

(1) A statement identifying such facilities; and

(2) Written proof that the housing facilities comply with Federal safety and health standards as prescribed in either 20 CFR 620.4 or 29 CFR 1910.142 and applicable State standards of safety and health. Such written proof may be either a statement signed by the person to whom migrant workers are furnished by a farm labor contractor attesting that the housing facilities comply with Federal safety and health standards and also with applicable State safety and health standards, or a written statement containing an attestation with equal effect and signed by the applicant, or written statements issued by an authorized State and Federal Agency.

(b) Should the required written proof be unavailable at the time of filing an application, the applicant must attest in writing that migrant workers in the applicant's crew will not be housed in any facilities under the ownership or control of the applicant that do not conform to all applicable Federal and State safety and health standards. In such event, if otherwise eligible, the applicant will be issued a Certificate of Registration without a housing authorization. This certificate may be amended to include an authorization to house migrant workers at such time as the required written proof is forthcoming: *Provided*, That such proof as prescribed herein will have been submitted not less than 30 days before actual use or occupancy of the housing facilities to the regional office which had issued the initial certificate.

§ 40.21 Expiration and renewal of Certificate of Registration.

A Certificate of Registration, once issued, may not be transferred or assigned and shall be effective for the remainder of the calendar year during which it was issued unless suspended or revoked. In any case in which an application for renewal of a valid Certificate of Registration submitted in accordance with the requirements of §§ 40.11 through 40.20 of these regulations has been made on or before November 30 of the year preceding the year for which renewal is sought, the authority to operate as a farm labor contractor under an existing certificate shall not expire until the renewal application shall have been finally determined by the Administrator.

§ 40.22 Replacement of Certificate of Registration.

If a Certificate of Registration is lost or destroyed, a duplicate Certificate of Registration may be obtained by the submission to the regional office that issued it or to any regional office of the Employment Standards Administration of a written statement explaining its loss or destruction, indicating where the original application was filed and requesting that a duplicate be issued.

EMPLOYEE IDENTIFICATION

§ 40.31 Filing of application for Farm Labor Contractor Employee Identification Card.

(a) Applications for an initial or renewal Farm Labor Contractor Employee Identification Card are available at, and may be filed in, any office of the Employment Service of the various States.

(b) An Employee Identification Card issued under Federal law is required whether or not registration, licensing or identification of such person is required under State law.

§ 40.32 Execution and Content of application for Farm Labor Contractor Employee Identification Card.

(a) The application shall set forth the information required thereon, shall be subscribed and sworn to by the applicant, and shall have attached the applicant's fingerprints on Form FD–258 as prescribed by the U.S. Department of Justice.

(b) If a full-time or regular employee of a farm labor contractor is to drive any vehicle for the transportation of migrant workers in connection with the business activities or operations of a farm labor contractor, such employee shall seek authorization for such activity by (1) submitting on a prescribed form a doctor's certificate with the application for the initial Employee Identification Card and, when applying for a renewal of such card with authorization to drive, said employee shall submit a new completed doctor's certificate, if the previous certificate is more than 3 years old; and (2) submitting evidence of an appropriate license to operate such vehicle.

§ 40.33 Authorized use of Farm Labor Contractor Employee Identification Card.

(a) Any employee holding a valid Farm Labor Contractor Employee Identification Card described in § 40.4 of this part is authorized to engage in the activity or activities stated on such card solely on behalf of the employee's named employer who is a holder of a valid Certificate of Registration without obtaining a Certificate of Registration as a farm labor contractor in such employee's own name.

(b) The authorization provided by Section 4(b) of the Act and paragraph (a) of this section shall continue as long as the Farm Labor Contractor Employee Identification Card—

V40236 DEC 8 75 XUM

(1) Remains valid;
(2) Is in the immediate personal possession of such holder when engaging in any activity authorized thereby; and
(3) Is exhibited to any person with whom said holder undertakes to deal in such capacity.

§ 40.34 Replacement of Farm Labor Contractor Employee Identification Card, lost card or change of employment.

(a) If a Farm Labor Contractor Employee Identification Card is lost or destroyed, a duplicate card may be obtained by submitting to the regional office that issued it or to any regional office of the Employment Standards Administration a written statement explaining its loss or destruction, indicating where the original application was filed, the name and number of the farm labor contractor by whom employed, and requesting that a duplicate be issued.

(b) A Farm Labor Contractor Employee Identification Card is valid only during the period in which the holder is a full-time or regular employee of the registered farm labor contractor named on the identification card. If, prior to the expiration of the identification card, the holder, through a change in employment, should become a full-time or regular employee of a different registered farm labor contractor, a replacement identification card which names the new employer may be obtained by submitting to the regional office that issued the original card or to any regional office of the Employment Standards Administration a written statement that includes the date of the change in employment status and the name, home address, current address and certificate registration number of the new employer.

(c) Any change of employment referred to in paragraph (b) of this section must be reported immediately.

§ 40.35 Expiration and renewal of Farm Labor Contractor Employee Identification Card.

(a) A Farm Labor Contractor Employee Identification Card, once issued, may not be transferred or assigned and shall expire on December 31 of the year of issuance, unless suspended or revoked prior thereto. The holder of such a card may request renewal of such card by executing and filing in any office of the Employment Service of the various States, the following—

(1) An application for renewal;
(2) Upon request, a completed U.S. Department of Justice Fingerprint Card, Form FD–258; and
(3) A prescribed doctor's certificate and appropriate operator's license in accordance with § 40.32(b), if such applicant is to be engaged as a driver for transporting migrant workers.

(b) In any case in which an application for renewal of an Employee Identification Card has been submitted in accordance with the requirements of paragraph (a) of this section on or before November 30 of the year preceding the year for which renewal is sought, the authority to operate as a full-time or regular employee of a holder of a Certificate of Registration shall not expire until the renewal application shall have been finally determined by the Administrator.

ACTION ON APPLICATIONS

§ 40.41 Office of filing, action.

Each application for a Certificate of Registration or a Farm Labor Contractor Employee Identification Card filed at any of the offices designated in §§ 40.11 and 40.31 respectively shall be transmitted promptly to the appropriate regional office of the Employment Standards Administration.

§ 40.42 Issuance, refusal to issue, suspension, revocation or refusal to renew: Farm Labor Contractor Certificate of Registration or Farm Labor Contractor Employee Identification Card.

(a) The Administrator or authorized representative shall:

(1) Review each application transmitted by the offices of filing and determine whether such application is complete and properly executed.

(2) When appropriate, notify the applicant in writing of any incompleteness or error in execution of an application and return the application for correction and completion.

(3) Determine after appropriate investigation whether the applicant has complied with the requirements of the Act and this part and if appropriate issue a Certificate of Registration or a Farm Labor Contractor Employee Identification Card authorizing the performance of any or all activities permitted under the Act.

(b) The Administrator may refuse to issue, may suspend, revoke or refuse to renew a Certificate of Registration or a Farm Labor Contractor Employee Identification Card when an investigation presents grounds as set forth in § 40.63 of this part for such action.

OBLIGATIONS AND PROHIBITED ACTS

§ 40.51 Obligations of a farm labor contractor.

The Act and these regulations imposes the following obligations on all farm labor contractors:

(a) The farm labor contractor shall obtain an appropriate Certificate of Registration before engaging in any activities of a farm labor contractor.

(b) The farm labor contractor shall provide the Secretary with a notice of each and every address change within 10 days after such change of address.

(c) Whenever a farm labor contractor obtains a vehicle or learns of the intended use of a vehicle for the transportation of migrant workers by said contractor and such vehicle or vehicles are under the contractor's ownership or control, said contractor shall, within 10 days after he obtains or learns of such intended use—

(1) Furnish a statement which shall identify each such vehicle;

(2) Provide written proof that each such vehicle conforms to all applicable Federal and State safety and health standards; and

(3) Furnish written proof of insurance or financial responsibility for such vehicle or vehicles to the office which originally had issued the Certificate of Registration.

(d) If the farm labor contractor is to drive a vehicle for the transportation of migrant workers, the contractor must seek advance authorization for such activity by (1) submitting on a prescribed form a doctor's certificate with the application for the initial Certificate of Registration and when applying for a renewal certificate with authorization to drive, a new completed doctor's certificate, if the previous certificate is more than 3 years old; and (2) submitting evidence of an appropriate license to operate such vehicle.

(e) If the contractor obtains housing facilities, or learns that certain facilities will be used for housing migrant workers and such facilities are under the ownership or control of the contractor, said contractor shall provide the documentation as prescribed in paragraph (a) of § 40.20 to the regional office which had issued the initial certificate. This document shall be submitted within 10 days after the contractor obtains or learns of the intended use of such real property and prior to its actual use.

(f) A registered farm labor contractor shall carry the Certificate of Registration at all times while engaging in farm labor contracting activities and shall exhibit the same to all persons with whom the contractor intends to deal as a farm labor contractor prior to so dealing.

(g) The farm labor contractor shall ascertain and disclose to the worker to the best of the contractor's knowledge and belief at the time the worker is recruited, the following information in writing and in a manner understandable by such worker on form WH–416 (information on wages and working conditions)—

(1) The area of employment;
(2) The crops and operations on which the worker may be employed;
(3) The transportation, housing, and insurance to be provided the worker;
(4) The wage rates to be paid the worker;
(5) The charges to be made by the farm labor contractor for such contractor's services;
(6) The period of employment;
(7) The existence of a strike or other concerted stoppage, slowdown, or interruption of operations by employees at a place of contracted employment; and
(8) The existence of any arrangements between the farm labor contractor and any owner, proprietor, or agent of any commercial or retail establishment in the area of employment, under which the contractor is to receive a commission or any other benefit resulting from any sales provided to such establishment from the migrant workers.

(h) Upon arrival at a given place of employment, the farm labor contractor shall post in a conspicuous place a written statement of the terms and conditions of that employment in a language in which the workers are fluent and written in a manner understandable by such workers.

(i) In the event the contractor owns, manages, supervises, or otherwise controls the housing facilities, such person shall post in a conspicuous place the terms and conditions of occupancy in a language in which the worker is fluent and in a manner understandable by such worker.

(j) In the event the farm labor contractor pays the migrant workers engaged in agricultural employment, either on behalf of such contractor or on behalf of another person, such contractor shall keep payroll records which shall show for each worker in each workweek of the payroll period, name in full, home address, total earnings, itemized statement of all withholdings or deductions from earnings, net earnings, the hours worked each day, the total hours worked each workweek, and hourly rate of pay. If the worker is employed on a time basis other than hourly, this record shall also show the time period constituting the basis for payment. In addition, if the worker is employed on a piece rate basis, the payroll records shall show the number of units of work performed and the rate per unit.

(k) The farm labor contractor shall provide to each migrant worker engaged in agricultural employment with whom the contractor deals in a capacity as a farm labor contractor a statement of all sums paid to such contractor (including sums received on behalf of such migrant worker) on account of the labor of such migrant worker. The farm labor contractor shall also provide each such worker with an itemized statement showing all sums withheld by said contractor from the amount received on account of the labor of such worker, and the purpose for which such sums were withheld.

(l) The contractor shall provide to the person to whom a migrant worker is furnished all information and records required to be kept by such contractor under paragraph (j) of this section and all information required to be provided to any migrant worker under paragraph (k) of this section.

(m) The farm labor contractor shall promptly pay or contribute when due to the individuals entitled thereto all moneys or other things of value entrusted to said farm labor contractor by any farm operator for such purposes.

(n) A farm labor contractor shall refrain from requiring any worker to purchase any goods solely from such farm labor contractor or any other person.

(o) The farm labor contractor shall refrain from violating or from taking any action in violation of Section 5(b) of the Act.

(p) A farm labor contractor shall refrain from recruiting, employing or utilizing with knowledge the services of any person who is an alien not lawfully admitted for permanent residence or who has not been authorized by the Attorney General to accept employment, and must evidence an affirmative showing of a *bona fide* inquiry of each prospective employee's status as a United States citizen or as a person lawfully authorized to work in the United States. Such affirmative showing will be deemed to be met by written documentation that reliance in good faith was based on any of the following:

(1) Acceptable evidence of United States citizenship—
(i) Birth certificate.
(ii) Certificate of citizenship.
(iii) Certificate of naturalization.
(iv) U.S. identification card (INS—Form I–179 or I–197).
(v) Passport issued by United States identifying person as citizen of United States.
(vi) Consular report of birth (State Department Form FS–240).

(2) INS—Form I–151, Alien Registration Receipt Card (green card), which is proof that the alien has been lawfully admitted to the United States for permanent residence and may accept any employment in this country without restriction. It is a green or blue-green wallet-sized laminated card, bearing a photograph of the alien and contains information concerning his alien registration number, date of admission as an immigrant, birth date and sex.

(3) INS—Form I–94 (with or without a passport)—
(i) INS—Form I–94 bearing an employment authorization consisting of the words "Employment Authorized."
(ii) INS—Form I–94 bearing the designation of H–2, as endorsed on the front or back of the form, authorizing a person to engage only in agricultural employment during the period of such person's authorized stay in the United States.

(q) A farm labor contractor is responsible for assuring that every full-time or regular employee employed by such Contractor has obtained either a Farm Labor Contractor Employee Identification Card or a Certificate of Registration, as required by the Act and these regulations, prior to such employee's engagement in any activity enumerated in Section 3(b) of the Act.

§ 40.52 Obligations of person holding a valid Farm Labor Contractor Employee Identification Card.

Any person holding a valid Farm Labor Contractor Employee Identification Card in accordance with the provisions of §§ 40.31 through 40.35 of this part is subject to and is required to comply with all of the provisions of the Act and these regulations to the same extent as if said person had been required to obtain a Certificate of Registration in such person's own name.

§ 40.53 Obligations of grower, processor, and other user.

Any person who is furnished any migrant worker by a farm labor contractor shall—

(a) Maintain all payroll records required to be kept by such person under Federal law;

(b) Obtain and maintain records containing the information required to be provided to such person by the farm labor contractor under Section 6(e) of the Act and § 40.51(1) of this part with respect to migrant workers paid by a farm labor contractor; and

(c) determine before engaging the services of a farm labor contractor to supply farm labor that the contractor possess a Certificate of Registration that is in full force and effect at the time he contracts with the farm labor contractor.

§ 40.54 Discrimination prohibited.

(a) Any person is deemed to have violated the Act if he intimidates, threatens, restrains, coerces, blacklists, discharges, or in any manner discriminates against any migrant worker who for just cause—

(1) filed a complaint with reference to this Act with the Secretary of Labor; or

(2) instituted or caused to be instituted any proceeding under or related to this Act; or

(3) has testified or is about to testify in any proceeding under or related to this Act; or

(4) has exercised on behalf of others any right or protection afforded by this Act to such persons.

(b) A complaint alleging such discriminatory conduct may be filed with the Secretary within 180 days after the happening of such unlawful acts.

VIOLATIONS AND SANCTIONS

§ 40.61 Report of violations, investigations, issuance of subpenas.

(a) Any person may report a violation of the Act or regulations of this part to the Administrator by advising any local office of the Employment Service of the various States, or any office of the Employment Standards Administration, U.S. Department of Labor, or any other representative of the Administrator. The office or person receiving such a report shall refer it to the regional office of the Employment Standards Administration for the region in which the reported violation is alleged to have occurred and the Administrator shall direct that an appropriate investigation of any alleged violation shall be made.

(b) The Administrator, upon receipt of a complaint or upon his own initiative, may investigate and gather data respecting such case, may enter and inspect such places and records (and make copies thereof), may question persons being investigated or proceeded against, may issue subpenas requiring the attendance and testimony of witnesses or the production of any documentary or other evidence from any place in the United States at any designated place of hearing as may be appropriate, to determine whether a violation of this Act or this part has been committed. In connection with the foregoing, the said officer or his agent may administer oaths and affirmations, examine witnesses and receive evidence.

(c) In case of disobedience to a subpena, the aid of a Federal District Court

V 40 236 DEC 8 75 XUM

which is authorized to issue an order requiring the person or business organization to obey such subpena may be invoked.

(d) Investigations are to be conducted in a manner which protects the confidentiality of any complainant or other person who provides information on a confidential basis.

§ 40.62 Sanctions.

(a) Violations of the Act or regulations thereunder may result in the imposition of civil injunctive relief or, in the case of willful and knowing violations by a farm labor contractor or employee thereof, the imposition of criminal sanctions. In addition, civil money penalties of not more than $1,000 for each violation may be assessed administratively. Further, administrative action may be taken to suspend, revoke, refuse to issue or renew a Certificate of Registration or Employee Identification Card, and to deny the facilities and services afforded by the Wagner-Peyser Act. The taking of any one of the above actions shall not be a bar to the concurrent taking of any other action enumerated in this section.

(b) If, upon the receipt of a complaint in which a worker has alleged discriminatory action of a type specified in section 13(a) of the Act and § 40.54 of this part, the ensuing investigation results in a determination that such discriminatory conduct had been committed, an action shall be instituted in an appropriate Federal District Court to restrain such violation and to seek such other relief as may be appropriate, including rehiring or reinstatement of the worker, with backpay, or damages.

§ 40.63 Certificates of Registration and Farm Labor Contractor Employee Identification Cards—grounds for revocation or suspension or refusal to issue or to renew.

Certificates of Registration and Farm Labor Contractor Employee Identification Cards may be revoked or suspended, or issuance or renewal thereof refused, if the applicant or registrant—

(a) Fails or refuses to comply with any provisions of § 40.51 of this part;

(b) Knowingly has made any misrepresentations or false statements in an application for a Certificate of Registration or for Farm Labor Contractor Identification Card or any renewal thereof;

(c) Knowingly has given false or misleading information to migrant workers concerning the terms, conditions, or existence of agricultural employment;

(d) Has failed, without justification, to perform agreements entered into or arrangements with farm operators;

(e) Has failed, without justification, to comply with the terms of any working arrangements that the applicant or registrant has made with migrant workers;

(f) Has failed to show financial responsibility satisfactory to the Administrator or has failed to keep in effect a policy of insurance as required by Section 5(a) (2) of the Act;

(g) Has recruited, employed or utilized, with knowledge, the services of any person who is an alien not lawfully admitted for permanent residence, or who has not been authorized by the Attorney General to accept employment;

(h) Has been convicted of any crime under State or Federal law relating to gambling or to the sale, distribution, or possession of alcoholic liquors in connection with or incident to his activities as a farm labor contractor; or has been convicted of any crime under State or Federal law involving robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, prostitution, or peonage; where the date of the judgment of conviction of any crime as specified herein has been entered with a period of 5 years preceding the action of the Secretary under this paragraph;

(i) Has failed to comply with rules and regulations as required by §§ 40.19 and 40.20 of this part;

(j) Knowingly employs or continues to employ any person, to whom subsection (b) of Section 4 of the Act applies, who has taken any action, except for that listed in paragraph (f) of this section, which could be used by the Administrator under this section to refuse to issue a Certificate of Registration;

(k) Is not in fact the real party in interest in any such application for a Certificate of Registration and that the real party in interest is a person, firm, partnership, association, or corporation who previously has been denied a Certificate of Registration, has had a Certificate of Registration suspended or revoked, or who does not presently qualify for a Certificate of Registration;

(l) Has failed to furnish, or refused to allow a designated representative of the Administrator to obtain appropriate information necessary to make a determination of eligibility for a Certificate of Registration or a Farm Labor Contractor Employee Identification Card as provided by Sections 5(b) and 7 of the Act;

(m) Has used a vehicle for the transportation of migrant workers, or has used real property for the housing of migrant workers while such vehicle or real property failed to conform to all applicable Federal and State safety and health standards, to the extent any such vehicle or real property has come within the ownership or control of such farm labor contractor;

(n) Has intimidated, threatened, restrained, coerced, blacklisted, discharged, or in any manner discriminated against any migrant worker who has filed a complaint or instituted or caused to be instituted any proceeding or has exercised any right or protection afforded by this Act, whether such action is on behalf of said worker or on behalf of others; or

(o) Has failed to comply with any of the provisions of this Act or any regulations issued thereunder.

§ 40.64 Denial of facilities and services of Wagner-Peyser Act.

(a) (1) Upon determination by the Secretary that a person has knowingly engaged the services of a farm labor contractor who did not possess a valid Certificate of Registraiton as required by the Act, such person may be denied the facilities and services authorized by the Wagner-Peyser Act for a period of up to 3 years.

(2) Evidence that a farm labor contractor possesses a Certificate of Registration that is in full force and effect may consist of—

(i) The Certificate of Registration submitted by the farm labor contractor; or

(ii) A confirmation of such fact obtained from the Secretary's public central registry of all persons issued Certificates of Registration.

(3) If an investigation results in a finding of violation, the Secretary shall notify any person charged with such violation of any proposal to deny such person the facilities and services available under the Wagner-Peyser Act, and of such person's right to request a hearing, as prescribed in Subpart B of this part.

(b) If a farm labor contractor fails or refuses to exhibit a valid Certificate of Registration to all persons with whom he intends to deal in his capacity as a farm labor contractor prior to so dealing, as required by Section 6(a) of the Act and § 40.51(f) of this part, the contractor shall be denied the facilities and services authorized by the Wagner-Peyser Act.

§ 40.65 Civil money and other administration penalties.

(a) Where violations by any persons of the Act or any regulations promulgated thereunder have been disclosed and have resulted in proposals to refuse renewal or issuance or to suspend or to revoke a Certificate of Registration or a Farm Labor Contractor Employee Identification Card or to assess a civil money penalty or to deny persons the services and facilities of the Wagner-Peyser Act, any one so charged is entitled to an opportunity for a proceeding before an administrative law judge as described in Subpart B of this part.

(b) Any assessment of a civil money penalty shall be based on the available evidence and shall take into consideration among others, one or more of the following factors:

(1) Previous history of violation or violations.

(2) The number of migrant workers affected by the violation or violations.

(3) The gravity of the violation or violations.

(4) Efforts made in good faith to comply with the Act.

(5) Explanation of person charged with the violation or violations.

(6) Assurances of future compliance, taking into account the public health, interest or safety.

(7) Financial gain on the part of the violator or financial losses to worker or workers.

§ 40.66 Waiver of rights.

Any agreement by an employee purporting to waive or modify any rights inuring to said person under this Act or rules promulgated thereunder shall be void as contrary to public policy, except a waiver or modification of rights or obligations hereunder in favor of the Secretary shall be valid for purposes of enforcement of the provisions of the Act or rules promulgated thereunder.

Signed at Washington, D.C., on this 28th day of November 1975.

ROBERT C. CHASE,
Deputy Assistant Secretary for Employment Standards.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

■

OPERATIONS REVIEW PROGRAM

Miscellaneous Amendments

V40236 DEC 8 75 XUM

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 63, 91, 105, 121, 123, 129, 135, 137, 145, and 147]

[Docket No. 15196; Notice No. 75-39]

[Notice No. 2]

OPERATIONS REVIEW PROGRAM

Clarifying and Editorial Changes

The Federal Aviation Administration is considering amending Parts 63, 91, 105, 121, 123, 129, 135, 137, 145, and 147 of the Federal Aviation Regulations to make several clarifying and editorial changes.

Interested persons are invited to participate in this proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the Regulatory Docket or Notice Number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, S.W., Washington, D.C. 20591. All communications received on or before March 8, 1976, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

On February 28, 1975, the Federal Aviation Administration, by Notice 75-9 (40 FR 8685), invited all interested persons to submit proposals for consideration during the 1975-76 Operations Review. In that Notice, the FAA announced that it would make available for comment a compilation of the proposals which were to be given further consideration as possible agenda items for the Operations Review Conference (December 1-5, 1975).

On June 4, 1975, the FAA, by Notice No. 75-9A (40 FR 24041), announced the availability of the Compilation of Proposals described in Notice 75-9. As stated in Notice No. 75-9, not all proposals received were included in the Compilation. A number of the proposals excluded from the Compilation pertain solely to nonsubstantive editorial matters and minor clarifying revisions. Those proposals are contained in this Notice.

Many of the proposed changes involve the deletion of compliance dates which have past and no longer have application in the regulations. In some cases, deletion of the date will require minor nonsubstantive changes to the affected section or paragraph. In other cases, an entire section or paragraph will be deleted since the compliance date controlling the substantive requirement has passed. The following sections would be affected by this proposal: §§ 63.45; 91.4; 91.17(c); 91.24(a) and (b); 91.33(c)(3) and (e); 91.43(e); 91.45(a)(2)(iv) and (a)(3)(ii); 91.51(a); 91.52(a) and (g)(4); 91.53(a); 91.90; 91.213(a) and (c); 91.217(a), (b), and (f); 121.55(b) and (c); 121.289(a) and (d); 121.305(j); 121.343(a)(2), (f), and (g); 121.349(c); 121.357(a) and (b); 121.359(a); 121.433a(a); 121.538(b); 121.576; 123.3; 123.11; 129.17(b); 135.2(d) and (e); 135.11; 135.140(a); 135.144; 135.144a; 135.156(e); 135.163(b); 135.167(a); 147.3; and 147.7(e).

In addition to the changes described above, several other minor changes are proposed which would clarify the regulations in question. There follows an enumeration of those sections affected by such changes with a brief explanation for each.

As a result of the deletion of old compliance dates in § 91.24(b), a revision to that paragraph would be necessary for clarity. As proposed, paragraph (b) would be revised by placing the reference to Groups I, II, and III Terminal Control Areas governed by § 91.90 in one subparagraph (rather than three), with the remaining subparagraph covering all controlled airspace of the 48 contiguous States and the District of Columbia above 12,500 feet MSL excluding the airspace at and below 2,500 feet AGL.

Section 91.33(e) would be amended by clarifying the fact that the requirements therein are applicable in all 50 states and the District of Columbia. This change would be necessary due to the deletion of old dates. Furthermore, the requirement that ATC be notified of a failure of the DME at or about 24,000 feet MSL would be applied only to the pilot in command, since the current reference to "each pilot" is ambiguous, can lead to confusion, and is inconsistent with the language in § 91.43(e). With respect to § 91.43(e), the reference to the 48 contiguous States and the District of Columbia and the States of Alaska and Hawaii would be changed to merely cite the 50 states and the District of Columbia.

The deletion of dates in § 91.24 would require concomitant changes in § 91.90. These changes to subparagraphs (a)(3)(iii) and (b)(2)(iii) would significantly reduce the text. In addition, other minor changes to paragraphs (b) and (c) would be necessary to reflect the changes to § 91.24.

Section 91.181(a) would be amended to clarify the applicability of Subpart D of Part 91 to include reciprocating engine powered large airplanes. This clarification would express intent of Subpart D and FAA interpretations of the coverage thereof.

It is proposed to delete from the parachute jumping information requirements of § 105.25(a) the requirement in subparagraph (5) that the "time" of the jump be provided. That requirement is redundant, since subparagraph (1) also requires that information.

Deviation authority granted under Section 121.55(b) terminated September 30, 1970. Consequently, paragraphs (b) and (c) of § 121.55 are superfluous and it is proposed to delete them. With those deletions, the remainder of § 121.55 would be revised accordingly.

In addition to the deletion of old dates in paragraph (b) of § 121.357, it is proposed to clarify paragraph (a) to make that paragraph applicable to both passenger-carrying operations and cargo-only operations. By combining the previous substantive requirements of paragraph (b) with paragraph (a), paragraph (b) can be deleted.

Under § 121.409(c), the programmed hours of training under an approved training program of a Part 121 certificate holder do not apply if the training program for an airplane type includes a course of pilot training and a flight check in an airplane simulator as provided in § 121.424(d). Read by itself, § 121.409(c) has led to a misinterpretation by some certificate holders that the flight check must be made in the simulator. Such an interpretation is not correct, and § 121.424(d) makes it clear that the flight check may be made in an airplane. Consequently, it is proposed to delete the reference to a flight check in 121.409(c)(1), thereby making § 121.424(d) the controlling regulation. For the purpose of consistency, § 121.409(c)(2) applicable to flight engineer training, would be amended in the same manner thereby making § 121.425(c) the controlling regulation as to that training.

It is proposed to revise paragraphs (a) and (b) of § 121.415 to make it clear that the section covers more than initial and transition training for crewmembers and dispatchers and extends to all training categories. In addition, this revision would clarify the requirements for basic indoctrination ground training.

Section 121.432 would be revised by deleting paragraphs (a) and (b) relating to check airman certification of a flight crewmember's proficiency, and the due date for flight checks. These provisions are redundant since paragraphs (b) and (c) of § 121.401 contain substantially the same provisions.

It is proposed to amend § 121.433(c)(1)(i) to clarify the fact that a flight crewmember taking recurrent training must, within the 12 months prior to his serving as a required crewmember, have completed either recurrent ground and flight training or a flight check. The current provisions of § 121.433(c)(1) appear to require both the completion of the training and the flight check, which was not intended.

Section 121.579 makes reference to "automatic pilots" in prescribing minimum altitudes for their use. However, the current term for such flight guidance systems is "autopilot" and it is proposed to adopt that term in place of automatic pilot.

It is proposed to amend Part 123 by deleting § 123.5. Section 123.5 was adopted to provide, with § 123.3, a transition phase for the air travel club regulations which were adopted in Part 123 in 1968. Since that transition period has passed with all air travel clubs now certificated and operating under Part 123, and because § 123.27 prescribes the operating rules applicable to air travel club operations it is proposed to delete § 123.5.

Under § 135.2(d), the holder of an air taxi/commercial operator certificate (ATCO) could, if he applied for operations specifications under Part 121 before February 15, 1970, continue to operate large aircraft without Part 121 operations specifications until his application was either denied or the operations specifications issued. However, since all such applications have been acted upon

by the FAA, § 135.2(d) is superfluous and should be deleted.

Section 135.43(b) would be amneded to make it clear that both aircraft and airmen records required under paragraph (a) of § 135.43 must be retained for 6 months.

As the result of the adoption of Subpart D to Part 91 (Amendment 91-101, effective October 23, 1972, 37 F.R. 14758), a change to § 135.67 is proposed to add a reference to § 91.217 to the list of preflight airworthiness checks a pilot in command must make. This change is necessary since some aircraft operated under Part 135 are required to be inspected under § 91.217.

Part 137 would be amended by changing certain of the terminology used in the Part to reflect provisions of the Federal Environmental Pesticide Control Act of 1972. The terms "economic poison" and "poison" wherever they appear in §§ 137.19 and 137.39 would be changed to "pesticide." In § 137.3, the term "Secretary of Agriculture" would be changed to "Administrator of the U.S. Environmental Protection Agency." In § 137.39, the term "U.S. Department of Agriculture" would be changed to "U.S. Environmental Protection Agency." Finally, in § 137.53(c)(1), the term "periodic inspection" would be changed to "annual inspection" to reflect current requirements.

Section 145.43(b)(3) requires that the employment summary of each employee of a certificated domestic repair station must include, with respect to his past employment record, the terms of employment by month, day, and year. Experience with this requirement indicates that requiring the term of past employment down to the day is burdensome in terms of the safety benefits derived, and therefore that requirement should be deleted.

Section 145.45(f) would be amended to clearly require the applicant for a repair station certificate to provide an inspection procedures manual. Under the current provision, the applicant must "prepare" such a manual but unlike current paragraphs (c), (d) and (e) of § 145.45, he is not specifically required to provide it. The proposed amendment would correct this inconsistency.

It is proposed to amend § 145.71 by changing the reference to "§§ 145.39 to 145.43" to "§§ 145.39 through 145.43" to make it clear that § 145.43 is included in those requirements which a foreign repair station need not meet.

It is proposed to delete § 147.3(b) since all mechanic schools currently in operation are considered by the FAA to be aviation maintenance technician schools under Part 147. Also, in Part 147, it is proposed to amend § 147.38a by making the word "test" plural wherever it appears, to clearly indicate that more than one test is required under Part 147.

In addition to the proposals discussed above, it is also proposed to make several section citation revisions to update cross references to certain sections in Part 61, which was revised in 1973 (Amendment 61-60, effective November 1, 1973, 38 F.R. 3156). The following changes would be made: in § 91.17(a)(1), the reference to § 61.38 would be changed to § 61.69; in § 135.27, the reference to § 61.47(d) would be changed to § 61.57(e); and in § 135.138(b), the references to various provisions of §§ 61.117 and 61.121 would be changed to §§ 61.61 and 61.127, as appropriate.

These amendments are proposed under the authority of sections 313, 314, and 601 through 610 of the Federal Aviation Act of 1958 (49 U.S.C. 1354, 1355, and 1421 through 1430) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend Parts 63, 91, 105, 121, 123, 129, 135, 137, 145, and 147 of the Federal Aviation Regulations, as follows:

PART 63—CERTIFICATION: FLIGHT CREW MEMBERS OTHER THAN PILOTS

1. By revising § 63.45 to read as follows:

§ 63.45 Addition of class ratings to flight engineer certificates.

The holder of a flight engineer certificate who applies for an additional rating on that certificate must—

(a) Pass a practical test for a flight engineer certificate;

(b) Successfully complete an approved flight engineer training course or air carrier training program; or

(c) Submit satisfactory evidence that he has acquired at least 25 hours of flight experience performing the duties and functions of a flight engineer on an airplane specified in § 63.37(a).

PART 91—GENERAL OPERATING AND FLIGHT RULES

§ 91.4 [Amended]

2. By amending § 91.4 by deleting the words "After November 1, 1974, no" and inserting the word "No" in place thereof.

§ 91.17 [Amended]

3. By amending § 91.17(a)(1) by deleting "§ 61.38" and inserting "§ 61.69" in place theerof and by deleting and reserving § 91.17(c).

4. By amending § 91.24 as follows:

§ 91.24 ATC transponder and automatic pressure altitude reporting equipment.

(a) *All airspace: U.S. registered civil aircraft.* For operations not conducted under Parts 121, 123, 127, and 135 of this chapter, ATC transponder equipment used in U.S. registered civil aircraft must meet the performance and environmental requirements of any class of TSO-C74b or any class of TSO-C74c as appropriate, except that the Administrator may approve the use of TSO-C74 or TSO-C74a equipment if the applicant submits data showing that such equipment meets the minimum performance standards of the appropriate class of TSO-C74c and evnrionmental conditions of the TSO under which it was manufactured.

(b) *Controlled airspace: all aircraft.* Except for persons operating helicopters in terminal control areas at or below 1,000 feet AGL under the terms of a letter of agreement, and except for persons operating gliders above 12,500 feet MSL but below the floor of the positive control area, no person may operate an aircraft in controlled airspace unless that aircraft is equipped with an operable coded radar beacon transponder having a Mode 3/A 4096 code capability, replying to Mode 3/A interrogation with the code specified by ATC, and is equipped with automatic pressure altitude reporting equipment having a Mode C capability that automatically replies to Mode C interrogations by transmitting pressure altitude information in 100-foot increments. This requirement applies to—

(1) Group I, Group II and Group III Terminal Control Areas covered by § 91.90 except as provided therein; and

(2) All controlled airspace, of the 48 contiguous states and the District of Columbia, above 12,500 feet MSL, excluding the airspace at and below 2,500 feet AGL.

• • • • • •

5. By revising the first sentence of § 91.33(c)(3) and by revising § 91.33(e) to read as follows:

§ 91.33 Powered civil aircraft with standard category U.S. airworthiness certificates; instrument and equipment requirements.

• • • • • •

(c) • • •

(3) An approved aviation red or aviation white anticollision light system on all U.S. registered civil aircraft. • • •

• • • • • •

(e) *Flight at and above 24,000 feet MSL.* If VOR navigational equipment is required under paragraph (d)(2) of this section, no person may operate a U.S. registered civil aircraft within the 50 states, and the District of Columbia, at or above 24,000 feet MSL unless that aircraft is equipped with approved distance measuring equipment (DME). When DME required by this paragraph fails at and above 24,000 feet MSL, the pilot in command of the aircraft shall notify ATC immediately, and may then continue operations at and above 24,000 feet MSL to the next airport of intended landing at which repairs or replacement of the equipment can be made.

• • • • • •

6. By revising the first sentence of § 91.43(e) to read as follows:

§ 91.43 Special rules for foreign civil aircraft.

• • • • • •

(e) *Flight at and above 24,000 feet MSL.* If VOR navigation equipment is required under paragraph (c)(1)(ii) of this section, no person may operate a foreign civil aircraft within the 50 states and the District of Columbia at or above 24,000 feet MSL, unless the aircraft is equipped with approved distance measuring equipment (DME) capable of receiving and indicating distance information from the VORTAC facilities to be used. • • •

• • • • • •

V40236 DEC 8 75 XUM

§ 91.45 [Amended]

7. By amending § 91.45(a)(2)(iv) by deleting the words "After February 20, 1967," and by deleting from § 91.45(a)(3)(ii) the words "After February 20, 1967, a" and inserting the word "A" in place thereof.

§ 91.51 [Amended]

8. By amending § 91.51(a) by deleting the words "after February 29, 1972."

9. By deleting and reserving § 91.52(g)(4) and revising § 91.52(a) to read as follows:

§ 91.52 Emergency locator transmitters.

(a) Except as provided in paragraphs (e), (f), and (g) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c), and (d) of this section.

• • • • • •

(g) • • •

(4) [Reserved]

§ 91.53 [Amended]

10. By amending § 91.53(a) by deleting the words "July 1 of each of the years 1970 and 1971, and April 1 of each year thereafter" and inserting the words "April 1 of each year" in place thereof.

§ 91.90 [Amended]

11. By amending § 91.90 by—

a. Revising § 91.90(a)(3)(iii) to read as follows:

(iii) The applicable equipment specified in § 91.24;

b. Revising § 91.90(b)(2)(iii) to read as follows:

(iii) The applicable equipment specified in § 91.24, except that automatic pressure altitude reporting equipment is not required for any operation within the terminal control area, and a transponder is not required for IFR flights operating to or from an airport outside of but in close proximity to the terminal control area, when the commonly used transition, approach, or departure procedures to such airport require flight within the terminal control area.

c. Deleting from paragraph (c) the words "After the date specified in § 91.24(b)(3), no" and inserting the word "No" in place thereof.

§ 91.173 [Amended]

12. By inserting a comma between the words "airframe" and "engine" in § 91.173(a)(2)(vi).

13. By revising § 91.181(a) to read as follows:

§ 91.181 Applicability.

(a) Sections 91.181–91.215 prescribe operating rules, in addition to those prescribed in other subparts of this part, governing the operation of large and of turbo-jet-powered multiengine civil airplanes of U.S. registry. The operating rules in this subpart do not apply to those airplanes when they are required to be operated under Parts 121, 123, 129, 135, and 137 of this chapter. Sections 91.127 and 91.129 prescribe an inspection program for large and for turbine-powered (turbojet and turboprop) multiengine airplanes of U.S. registry when they are operated under this subpart or Part 129 or 137 and to small turbine-powered multiengine airplanes operated under Part 135 of this chapter.

§ 91.213 [Amended]

14. By amending § 91.213(a) by deleting the words "after January 22, 1973," and by amending § 91.213(c) by deleting the words "After January 22, 1973, no" and inserting the word "No" in place thereof.

§ 91.217 [Amended]

15. By amending § 91.217 as follows:

(a) By deleting the words ", and after January 22, 1973, except as provided in paragraph (f) of this section," in paragraph (a) and inserting the word "and" in place thereof;

(b) By deleting the words "after January 22, 1973, except as provided in paragraph (f) of this section, ", in paragraph (b); and

(c) By deleting paragraph (f).

PART 105—PARACHUTE JUMPING

16. By revising § 105.25(a)(5) to read as follows:

§ 105.25 Information required, and notice of cancellation or postponement of jump.

(a) • • •

(5) The duration of the intended jump.

• • • • •

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC; FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

§ 121.55 [Amended]

17. By amending § 121.55 by deleting paragraphs (b) and (c), by deleting the designation "(a)", and by redesignating § 121.55(a)(1), (2), (3), (4), and (5) as § 121.55 (a), (b), (c), (d), and (e) respectively.

18. By revising § 121.289 by deleting paragraph (d) and amending paragraph (a) as follows:

§ 121.289 Landing gear: aural warning device.

(a) Each large airplane must have a landing gear aural warning device that functions continuously under the following conditions:

• • • • •

§ 121.305 [Amended]

19. By amending § 121.305(j) by deleting the words "After August 5, 1971, on" and inserting the word "On" in place thereof and by deleting the final paragraph of the section which begins with the words "A certificate holder. . . ."

§ 121.343 [Amended]

20. By amending § 121.343 by—

a. Deleting the words "After September 18, 1973, for" in paragraph (a)(2) and inserting the word "For" in place thereof;

b. Deleting the words "After March 18, 1974, each" in paragraph (f) and inserting the word "Each" in place thereof; and

c. Deleting the words "After September 18, 1972, each" and paragraph (g) and inserting the word "Each" in place thereof.

21. By amending § 121.349(c) to read as follows:

§ 121.349 Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under IFR or over-the-top.

• • • • •

(c) Whenever VOR navigational receivers are required by paragraph (a) or (b) of this section, at least one approved distance measuring equipment unit (DME) capable of receiving and indicating distance information from VORTAC facilities must be installed on each airplane when operated in hte 50 States and the District of Columbia.

• • • • •

§ 121.357 [Amended]

22. By amending § 121.357 by deleting the words, "in passenger-carrying operations," in paragraph (a) and by deleting paragraph (b) and marking it "Reserved".

23. By revising § 121.359(a) to read as follows:

§ 121.359 Cockpit voice recorders.

(a) No certificate holder may operate a large turbine engine powered airplane or a large pressurized airplane with four reciprocating engines unless an approved cockpit voice recorder is installed in that airplane and is operated continuously from the start of the use of the checklist (before starting engines for the purpose of flight), to completion of the final checklist at the termination of the flight.

• • • • •

24. By revising § 121.409(c) as follows:

§ 121.409 Training courses using airplane simulators and other training devices.

• • • • •

(1) A course of pilot training in an airplane simulator as provided in § 121.424(d); or

(2) A course of flight engineer training in an airplane simulator or other training device as provided in § 121.425(c).

25. By amending § 121.415 by deleting the flush paragraph immediately following paragraph (a)(3), and revising paragraphs (a)(1) and (b) as follows:

§ 121.415 Crewmember and dispatcher training requirements.

(a) Each training program must provide the following ground training as appropriate to the particular assignment of the crewmember or dispatcher:

(1) Basic indoctrination ground training for newly hired crewmembers or dispatchers including 40 programmed hours of instruction, unless reduced under § 121.405 or as specified in § 121.401(d), in at least the following—

• • • • •

(b) Each training program must provide the flight training specified in §§ 121.424 through 121.426, as applicable.

• • • • •

§ 121.432 [Amended]

26. By deleting §§ 121.432(a) and (b) and redesignating §§ 121.432(c), (d), (e) and (f) as §§ 121.432(a), (b), (c), and (d) respectively.

§ 121.433 [Amended]

27. By amending § 121.433(c)(1)(i) by deleting the words "and a" and inserting the words ", or a" in place thereof.

§ 121.433a [Amended]

28. By amending § 121.433a(a) by deleting the words, "After December 6, 1973, no" and inserting the word "No" in place thereof.

§ 121.538 [Amended]

29. By amending § 121.538(b) by deleting the words, ", before February 6, 1972,".

§ 121.576 [Amended]

30. By amending § 121.576 by deleting the words "After May 1, 1974, means must be provided" and inserting "The certificate holder must provide means" in place thereof.

§ 121.579 [Amended]

31. By amending § 121.579 by deleting the words "automatic pilot" wherever they appear in the title and text and inserting the word "autopilot" in place thereof.

PART 123—CERTIFICATION AND OPERATIONS: AIR TRAVEL CLUBS USING LARGE AIRPLANES

32. By revising § 123.3 to read as follows:

§ 123.3 Certificate and operation specifications required.

No person may operate an airplane in operations to which this part applies without, or in violation of, an air travel club operating certificate and appropriate operations specifications issued under this part.

§ 123.5 [Reserved]

33. By deleting and reserving § 123.5.

§ 123.11 [Amended]

34. By amending § 123.11(a) by deleting the words "Except as provided in § 123.3(b), the" and inserting the word "The" in place thereof.

PART 129—OPERATORS OF FOREIGN AIR CARRIERS

35. By revising § 129.17(b) to read as follows:

§ 129.17 Radio Equipment.

• • • • •

(b) Whenever VOR navigational equipment is required by paragraph (a) of this section, at least one distance measuring equipment unit (DME), capable of receiving and indicating distance information from the VORTAC facilities to be used, must be installed on each airplane when operated at or above 24,000 feet MSL within the 50 States, and the District of Columbia.

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS OF SMALL AIRCRAFT

§ 135.2 [Amended]

36. By deleting § 135.2(d) and marking it "Reserved", and deleting the words "need not comply until May 15, 1975," in § 135.2(e) and inserting the words "must comply" in place thereof.

37. By revising § 135.11 to read as follows:

§ 135.11 Duration of certificate.

An ATCO certificate is effective until surrendered, suspended, or revoked. The holder of an ATCO certificate that is suspended or revoked shall return it to the Administrator.

§ 135.43 [Amended]

38. By amending § 135.43(b) by deleting the word "or" and inserting the word "and" in place thereof.

39. By revising § 135.67 to read as follows:

§ 135.67 Airworthiness check.

The pilot in command may not begin a flight unless he determines that the following airworthiness inspections have been made—

(a) Those inspections required by § 91.169 or § 135.60 of this chapter as applicable; and

(b) Inspections under § 91.217 when required.

§ 135.127 [Amended]

40. By amending § 135.127 by deleting the reference to "61.47(d)" and inserting "§ 61.57(e)" in place thereof.

41. By revising § 135.138(b) to read as follows:

§ 135.138 Initial and recurrent pilot testing requirements.

(b) No certificate holder may use the services of a pilot, nor may any person serve as a pilot, in any aircraft unless, since the beginning of the 12th calendar month before that service, he passed a flight check given to him by the Administrator or an authorized check pilot in that class of aircraft, if single-engine airplane other than turbojet, or that type of aircraft, if helicopter, multiengine, or turbojet, to determine the pilot's competence in practical skills and techniques in that aircraft or class of aircraft, including at least the maneuvers that are set forth in § 61.127(a) (except (5)), § 61.127(b) (except (7)), § 61.127(c) (except (7)), and § 61.65(c)(1) and (5) of this chapter, and related advisory circulars for pilot certification in the class of aircraft the pilot is to operate. However, a pilot who holds an instrument rating need not demonstrate the instrument flight maneuvers in § 61.65(c)(1) and (5).

• • • • •

§ 135.140 [Amended]

42. By amending § 135.140(a) by deleting the words "After December 6, 1973, no" and inserting the word "No" in place thereof.

§ 135.144 [Amended]

43. By amending § 135.144 and deleting the words "After May 31, 1972, no" and inserting the word "No" in place thereof.

§ 135.144a [Deleted]

44. By deleting § 135.144a.

§ 135.155 [Amended]

45. By amending § 135.155(e) by deleting the words "After March 6, 1965, an" and inserting the word "An" in place thereof.

§ 135.163 [Amended]

46. By amending § 135.163(b) by deleting the words "After October 21, 1972, no" and inserting the word "No" in place thereof.

§ 135.167 [Amended]

47. By amending § 135.167(a) by deleting the words "After April 1, 1971, no" and inserting the word "No" in place thereof.

PART 137—AGRICULTURAL AIRCRAFT OPERATIONS

§ 137.3 [Amended]

48. By amending § 137.3 by deleting—

a. The words "economic poison" wherever they appear and inserting the word "pesticide" in place thereof; and

b. The words "Secretary of Agriculture" in the second paragraph and inserting the words "Administrator of the U.S. Environmental Protection Agency" in place thereof.

§ 137.19 [Amended]

49. By deleting the words "economic poisons" or "poisons" where they appear in §§ 137.19(a), and (e)(1)(ii), (iii), and (iv) (except in the phrase "poison control center"), and inserting the word "pesticides" in place thereof.

50. By amending § 137.39 to read as follows:

§ 137.39 Pesticide Dispensing.

(a) Except as provided in paragraph (b) of this section, no person may dispense or cause to be dispensed from an air craft, any pesticide that is registered with the U.S. Environmental Protection Agency under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135)—

• • • • •

(b) This section does not apply to any person dispensing pesticides for experimental purposes under—

(1) The supervision of a Federal or State agency authorized by law to conduct research in the field of pesticides; or

V 40 236 DEC 8 75 XUM

(2) A permit from the U.S. Environmental Protection Agency issued pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 135).

§ 137.53 [Amended]

51. By amending § 137.53(c)(1) by deleting the word "periodic" and inserting the word "annual" in place thereof.

PART 145—REPAIR STATIONS

§ 145.43 [Amended]

52. By amending § 145.43(b)(3) by deleting the word "date,".

53. By amending § 145.45 by revising the first sentence of paragraph (f) to read as follows:

§ 145.45 Inspection systems.

* * * * * * *

(f) At the time he applies for a repair station certificate, the applicant must provide an inspection procedures manual, and thereafter maintain it in current condition at all times. * * *

§ 145.71 [Amended]

54. By amending § 145.71 by deleting the word "to" in the last sentence and inserting the word "through" in place thereof.

PART 147—AVIATION MAINTENANCE TECHNICIAN SCHOOLS

55. By revising § 147.3 to read as follows:

§ 147.3 Certificate required.

No person may operate as a certificated aviation maintenance technician school without, or in violation of, an aviation maintenance technician school certificate issued under this part.

§ 147.7 [Amended]

56. By deleting § 147.7(c).

§ 147.38a [Amended]

57. By changing the word "test" wherever it appears in § 147.38a to the plural word "tests".

Issued in Washington, D.C., on November 28, 1975.

JAMES M. VINES,
Acting Director,
Flight Standards Service.

PART V:

FEDERAL ELECTION COMMISSION

ADVISORY OPINION REQUESTS

V40236 DEC 8 75 XUM

FEDERAL ELECTION COMMISSION

[Notice 1975–87, AOR 1975–110 and AOR 1975–111]

ADVISORY OPINION REQUESTS

In accordance with the procedures set forth in the Commission's Notice 1975–4, published on June 24, 1975 (40 FR 26660), Advisory Opinion Requests 1975–110 and 1975–111 are published today.

Interested persons wishing to comment on the subject matter of any Advisory Opinion Request may submit written views with respect to such requests within 10 calendar days of the date of the publication of the request in the Federal Register. Such submission should be sent to the Federal Election Commission, Office of General Counsel, Advisory Opinion Section, 1325 K Street, NW., Washington, D.C. 20463. Persons requiring additional time in which to respond to any Advisory Opinion Request will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered by the Commission before it issues an advisory opinion. The Commission recommends that comments on pending Advisory Opinion Requests refer to specific AOR number of the Request commented upon, and that statutory references be to the United States Code citations, rather than to the Public Law Citations.

AOR 1975–110: Contributions by Federal Contractors to State or Local Officials; Contractors Who Bid Competitively on Federal Aid Projects (Request Edited by the Commission).

GENTLEMEN: This is a request for an advisory opinion as to the applicability of 18 U.S.C. § 611, as amended by Pub. L. 93–443, Section 103 (October 15, 1974), to campaign contributions made by Federal contractors for purposes of the election of State or local officials and, in addition to that issue, its particular application to construction contractors who bid competitively on Federal-aid projects. • • •

• • • • • •

• • • [One question is] whether or not construction contractors with Federal-aid contracts are • • • subject to • • • § 611. These Federal-aid contracts local governmental agencies.

• • • [Another question is whether construction contracts involve] "the rendition of personal services or furnishing any material • • • to the United States."

• • • [A further] question • • • is whether or not contracts which are competitively bid are subject to the provisions of § 611. Typically, all construction contracts are competitively bid and awarded to the lowest responsible bidder. There is no negotiation, as that term is commonly used, in the award of public do not involve a contract between the construction contractor and the United States or any of its departments or agencies. They are made directly with state or construction contracts, and it is not clear whether competitive bidding would be covered by the term "negotiation". • • •

[In summary, the following questions are submitted for an advisory opinion]

(1) Does Section 611 prohibit corporate contributions by Federal contractors to candidates for State and local elections?

(2) Are construction contracts covered by Section 611?

(3) If answer to (2) is yes, is a person holding a Federal-aid construction contract with a non-federal agency considered a "Federal Contractor" under Section 611?

(4) Is a competitively bid project covered by Section 611, the same as a negotiated contract?

• • • • •

DAVID C. TREEN,
Member of Congress.

Source: Honorable David C. Treen, House of Representatives, Washington, D.C. 20515, (November 9, 1975).

AOR 1975–111: Contributions to State and Local Candidates by a Candidate for Federal Office (Request Edited by the Commission).

DEAR MR. CURTIS: • • • I have announced publicly that I will be a candidate for re-election to the Congress in 1976. • • • I am submitting • • • [several questions] to you for an [advisory opinion] so that I may have a better understanding as to how campaign funds can be legally spent.

• • • • •

In the State of Louisiana, we hold elections for State officials in off years, with the Congressional elections coming the following year. Of course, every four years there are many • • • campaigns in my Congressional District. During 1975, in the primaries and general election there will be over 1,000 candidates, including incumbents and challengers. • • • [T]he best political investment that a candidate for Congress can make is to help some of the candidates with small financial contributions, who then may reciprocate the favor during the Congressional campaign that follows later.

At the conclusion of my last successful campaign in 1974, I had a $10,000 surplus. I bought a Certificate of Deposit so as to earn interest. The Certificate will mature on January 1, 1976. If I should withdraw these funds at this time and activate [my re-election campaign] then, of course, I would lose substantial interest. Therefore, my political plan • • • is to make small political contributions to a select group of candidates for public State office. Then when I activate my Congressional Account in January 1976 I would draw checks to reimburse whatever account I borrowed the money from for the political expenditures made during 1975.

• • • • •

[My second question relates to the purchase and campaign distribution of fountain pens bearing my name.] • • • These pens have skyrocketed in cost. However, [based on past purchases for other election campaigns] I am protected at a low price • • • but I must finalize the transaction and give • • • firm orders by December 10. Unless I finalize the orders by December 10, I will have to pay 50% more for the pens. So, the same question arises, will I be in compliance with the law if I purchase the fountain pens now, retain them undistributed until 1976, but pay for them out of my personal funds, then reimburse my personal funds for the expenditure after I have activated my political account • • • in January 1976.

• • • • •

OTTO E. PASSMAN.

THIS HANDY REFERENCE IS A "MUST" ON YOUR BOOKSHELF!

1975/1976 EDITION

Whatever happened to the Director of Liquidation? (page 693)

Which agencies have programs concerning American Indians? (page 817)

What is SPARS? (page 762)

The answers to these and many more intriguing questions concerning the Federal Government can be found in the *U.S. Government Manual.*

This official guidebook provides useful information about a wide variety of programs and activities within the three branches of Government, including:

- Agency programs, functions, key officials, and a "Sources of Information" section
- Federal regional government system
- A historical reference to Federal agencies and functions
- Bicentennial activities and programs

This handbook is an excellent reference tool for teachers, students, librarians, businessmen, lawyers, and citizens interested in current information about the U.S. Government.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 984—WALNUTS GROWN IN CALIFORNIA, OREGON, AND WASHINGTON

Marketing Percentages for 1975–76 Marketing Year

Notice was published in the November 6, 1975, issue of the FEDERAL REGISTER (40 FR 51646), regarding a proposal to establish free and surplus percentages and withholding factors for merchantable walnuts for the 1975–76 marketing year as follows: California—66⅔ percent, 33⅓ percent, and 50 percent, respectively; and Oregon-Washington—83⅓ percent, 16⅔ percent, and 20 percent, respectively. The 1975–76 marketing year began August 1, 1975. The proposal was pursuant to the marketing agreement, as amended, and Order No. 984, as amended (7 CFR Part 984), hereinafter referred to collectively as the "order". The order regulates the handling of walnuts grown in California, Oregon, and Washington and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to the "act".

The notice afforded interested persons an opportunity to submit written data, views, or arguments on the proposal. None were received.

The proposed percentages were recommended by the Walnut Marketing Board pursuant to § 984.48 of the order. The Board's recommendation was based on estimates for the current marketing year of supply and inshell and shelled trade demands adjusted for handler carryover. In recognition of marketing and production differences, the order specifies that the surplus percentage for Oregon-Washington be one-half that for California.

The total 1975–76 supply subject to regulation is estimated at 168.7 million pounds kernelweight. Inshell and shelled demands adjusted for handler carryover are estimated at 34.1 and 79 million pounds kernelweight, respectively, or a total adjusted demand of 113.1 million pounds kernel-weight.

The regulation would meet the adjusted total trade demand by establishing the supply of merchantable walnuts available to meet the domestic inshell and shelled demands at maximum quantities that can be expected to be used, while also providing for an ample carryover into the 1976–77 marketing year. The surplus is primarily for export.

After consideration of all relevant matter presented, including that in the notice, the information and recommendations submitted by the Board, and other available information, it is found that establishment of free and surplus percentages and withholding factors under § 984.49 of the order, as hereinafter set forth, will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) The relevant provisions of said marketing agreement and this part require that the free and surplus percentages and withholding factors established for a particular marketing year shall be applicable to all walnuts handled during such year; and (2) the current 1975–76 marketing year began August 1, 1975, and the percentages and withholding factors hereinafter established will automatically apply to all such walnuts beginning with that date.

Therefore, the free and surplus percentages and withholding factors for walnuts during the 1975–76 marketing year are established as follows:

§ 984.222 Free and surplus percentages and withholding factors for walnuts during the 1975–76 marketing year.

The free and surplus percentages and withholding factors during the marketing year beginning August 1, 1975, shall be as follows:

	California	Oregon-Washington
Free percentages	66⅔	83⅓
Surplus percentages	33⅓	16⅔
Withholding factors	50	20

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

(It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular–A–107)

Dated: December 4, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

PART 117—SPECIAL CONSIDERATION FOR VETERANS

Regulations for Implementation

A proposal was issued on June 12, 1975, (40 FR 25032) for a new regulation, Part 117, to give special consideration to veterans. All comments submitted with respect to the proposed regulation were given due consideration. After such consideration, and a full assessment of the Agency's mission, the proposed regulation is hereby adopted, without change, to read as follows:

Sec.
117.1 Introduction.
117.2 Definitions.
117.3 Special Consideration Criteria.

AUTHORITY: 87 Stat. 1023

§ 117.1 Introduction.

This part is established by the SBA to set forth the Agency's policies and criteria relating to giving special consideration to Veterans of the Armed Forces and their survivors or dependents in the administration of SBA programs of assistance.

§ 117.2 Definitions.

As used in this part—

(a) The term "veteran" means a person who served in the active military, naval or air service, and who was discharged or released therefrom under conditions other than dishonorable.

(b) The term "Armed Forces" includes the Army, Navy (with the Marine Corps), and Air Force; the Coast Guard; a unit of the National Guard when called into the service of the United States; and Environmental Science Services Administration, Public Health Service, and other organizations when assigned to and serving with the armed forces.

V40237 DEC 9 75 XUM

(c) The term "survivor" means a widow or widower who has not remarried, child, or dependent parent of a deceased veteran.

(d) The term "dependent" means the spouse, child, or dependent parent of a veteran, as defined further in Sections 152–153 of the Internal Revenue Code.

(e) The term "child" for SBA purposes shall include dependent children, whether a legitimate child, a legally-adopted child, a stepchild who is a member of the veteran's household, or an illegitimate child if so acknowledged in writing by the veteran or determined to be such by a court of competent jurisdiction.

§ 117.3 Special Consideration Criteria.

(a) Special consideration criteria, as defined below, are eligible only to the veteran himself, or to one dependent or survivor. That is, these criteria apply first to the veteran himself if not permanently disabled, and secondly to a dependent if the veteran does not choose to seek SBA assistance. In the case of a deceased or totally and permanently disabled veteran, the benefit would apply to either the unremarried or supporting spouse, or child, or dependent parent. This policy does not preclude the veteran or other dependents or survivors from later applying for SBA assistance under normal criteria outside the special consideration criteria.

(b) Special consideration criteria are as follows:

(1) Indepth management assistance counseling on first interviews. Action will be taken to insure that our management assistance people apprise veterans of SBA's programs and the potential benefits to them.

(2) Revitalize SBA personnel designated as Veterans Affairs Offices and emphasize the need for close cooperation with the local VA offices and organizations having direct interest in veterans' affairs.

(3) Revitalize SBA procurement personnel designated as Veterans Procurement Affairs Advisers to emphasize how veterans can obtain procurement contracts from the Government.

(4) Local media campaigns to get the word to the veteran about SBA ability and desire to help.

(5) Special workshops and training.

(6) Prompt processing of loan applications of any type.

(7) Particular attention to giving maximum loan maturity to veterans.

(8) Loans will not be declined solely because of the lack of collateral, providing the veteran, dependent, or survivor will provide any worthwhile collateral.

(9) On all direct loans, place a liberal interpretation on present deferment policy.

(10) In the awarding of 8(a) contracts, veterans status may be a contributing factor in establishing eligibility as "socially or economically disadvantaged."

(11) In all district offices there shall be one or more loan specialists designated as veterans loan officers.

Effective date: In view of the necessity of implementing, without further delay, the statutory mandate requiring special consideration for veterans in all SBA programs, it is considered imperative and in the public interest and, accordingly, the attendant circumstances are found to constitute good cause for the present regulation becoming immediately effective upon publication. Therefore, it shall become effective December 9, 1975.

(All SBA programs listed in the Catalog of Federal Domestic Assistance Programs under Nos. 59.001–59.025.)

LOUIS F. LAUN,
Acting Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 15197; Amdt. 39-2453]

PART 39—AIRWORTHINESS DIRECTIVES

Britten Norman Ltd. Model BN–2A Airplanes

There have been cracks found on the top, center, and bottom hinge brackets of the rudder on certain Britten Norman BN–2A airplanes that could result in failure of the brackets and possible loss of the rudder control surface. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require an inspection and alteration of top, bottom, and center rudder hinge structures on Britten Norman BN–2A airplanes.

Since this situation requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

BRITTEN NORMAN, LTD. Applies to BN–2A airplanes, all series, certificated in all categories.

Compliance is required as indicated.

To prevent possible failure of the rudder top, center, and bottom hinge brackets with consequent loss of rudder control, accomplish the following:

(a) This paragraph applies to BN–2A airplanes that have not been altered in accordance with both Britten Norman Modifications NB/M/705 and NB/M/777.

(1) Within the next 50 hours' time in service after the effective date of this AD, unless already accomplished within the last 50 hours' time in service, inspect the rudder top, center, and bottom hinge structures for cracks in accordance with Part A and Part B of the section entitled "Inspection" of Britten Norman Service Bulletin No. BN–2/SB. 76, Issue 4, dated February 4, 1975, or an FAA-approved equivalent.

(2) Repeat the inspection required by sub-paragraph (a)(1) of this AD at intervals not to exceed 100 hours' time in service from the last inspection until the action required by sub-paragraph (a)(4) of this AD is accomplished, at which time the inspection interval may be increased to 500 hours.

(3) If cracks are found in any of the bearing mounting plates as a result of the initial inspection required by sub-paragraph (a)(1) of this AD or any of the 100 hour repetitive inspections required by sub-paragraph (a)(2) of this AD, before further flight, either—

(i) Replace the cracked mounting plates with new or serviceable plates of the same part number, or FAA-approved equivalent parts, and continue to inspect in accordance with the provisions of sub-paragraph (a)(2) of this AD; or

(ii) Alter the rudder hinge areas in accordance with Part A and Part B of the section entitled "Rectification" of Britten Norman Service Bulletin No. BN–2/SB.76, Issue 4, dated February 4, 1975, or an FAA-approved equivalent, following which inspect the hinge structure at intervals not to exceed 500 hours' time in service from the last inspection.

(4) Within 500 hours' time in service after the accomplishment of the inspection required by sub-paragraph (a)(1) of this AD, alter the rudder hinge areas in accordance with Part A and Part B of the Section entitled "Rectification" of Britten Norman Service Bulletin No. BN–2/SB.76, Issue 4, dated February 4, 1975, or an FAA-approved equivalent.

(b) This paragraph applies to BN–2A airplanes that have been altered in accordance with both Britten Norman Modifications NB/M/705 and NB/M/777.

(1) Within 500 hours' time in service after the accomplishment of both modifications NB/M/705 and NB/M/777, or within 25 hours' time in service after the effective date of this AD, whichever occurs later, inspect the rudder top, center, and bottom hinge structures for cracks in accordance with Part A and Part B of the section entitled "Inspection" of Britten Norman Service Bulletin No. BN–2/SB.76, Issue 4, dated February 4, 1975, or an FAA-approved equivalent.

(2) Repeat the inspection required by sub-paragraph (b)(1) of this AD at intervals not to exceed 500 hours' time in service from the last inspection.

(3) If cracks are found in any of the bearing mounting plates as a result of the inspections required by sub-paragraphs (b)(1) or (b)(2) of this AD, before further flight, replace the cracked mounting plates with new or serviceable plates of the same part number or FAA-approved equivalent parts and continue to inspect the rudder hinge structures at intervals not to exceed 500 hours' time in service from the last inspection.

This amendment becomes effective December 23, 1975.

Issued in Washington, D.C. on December 1, 1975.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc.75-32997 Filed 12-8-75;8:45 am]

[Docket No. 15196; Amdt. 39-2454]

PART 39—AIRWORTHINESS DIRECTIVES

Societe Nationale Industrielle Aerospatiale (formerly Sud Aviation) Alouette III Helicopters

It has been determined that hydraulic drag damper eccentrics of certain main rotor heads on Aerospatiale Alouette III helicopters have been improperly adjusted causing cracks which could jeopardize safe operation. Since this condition is likely to exist or develop in other helicopters of the same type design, an airworthiness directive is being issued to require disassembly, inspection for cracks, replacement, as necessary, and proper reassembly of the main rotor head hydraulic drag dampers on certain Aerospatiale Alouette III helicopters.

Since this situation requires immediate adoption of this regulation, notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

(Sec. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C 1354(a), 1421, and 1423) sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive.

SOCIETE NATIONALE INDUSTRIELLE AEROSPATIALE, (S.N.I.A.S., formerly Sud Aviation.) Applies to Aerospatiale Alouette III Helicopter Models SA–315B, SE–3160, SA–316B, SA–316C, and SA–319B, certificated in all categories, incorporating main rotor heads P/N's 3160S. 12.10.000 .11 through .14, P/N's 3160S. 12.20.000 .4 through .7, P/N's 3160S. 12.10.000 .1 through .10 modified in accordance with Modification No. S296–AM 1106 or Alouette Service Bulletin No. 65–52, or P/N's 3160S. 12.20.000 .1 through .3 modified in accordance with Modification No. S296–AM 1108 or Alouette Service Bulletin No. 65–52.

Compliance is required as indicated, unless already accomplished.

To prevent failure of the fixed levers of the main rotor head hydraulic drag dampers, accomplish the following:

(a) Upon the effective date of this AD, and thereafter once on each day of operation, until accomplishment of paragraph (c) of this AD, visually inspect each of the three hydraulic damper fixed levers for cracks in the area of the eccentric attachment hole.

(b) If cracks are found in any hydraulic damper fixed levers, before further flight, replace the cracked hydraulic damper fixed lever with a serviceable unit of the same Part number.

(c) Within the next 100 hours' time in service after the effective date of this AD, remove the three hydraulic drag dampers from the main rotor head, inspect, rectify as necessary, and reinstall in accordance with subparagraph 1C of Lama Service Bulletin No. 65.15, dated September 23, 1974, for Model SA–315B, or subparagraph 1C of Alouette Service Bulletin No. 65.101, dated September 23, 1974, for the other designated models, or an FAA-approved equivalent of the applicable Service Bulletin.

This amendment becomes effective December 23, 1975.

Issued in Washington, D.C. on December 1, 1975.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc.75-32998 Filed 12-8-75;8:45 am]

[Docket No. 75-NE-37; Amdt. 39-2450]

PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky S–61 Series Helicopters

Amendment 39–657 (33 FR 14402), AD 68–19–7 established a replacement time for S–61 main rotor blade spindles and required that certain serial number spindles be removed from service. Subsequent to the issuance of Amendment 39–657, the manufacturer substantiated and obtained approval for an increased replacement time for the spindles. Therefore, AD 68–19–7 is being revised to increase the replacement service time for these components.

Since this amendment extends the replacement time, thereby relieving a requirement of AD 68–19–7, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39–657 (33 FR 14402), AD 68–19–7 is amended as follows:

(1) By deleting the number 2400 wherever it occurs in Paragraphs (a) and (b) and inserting in its place: 3000

This amendmcnt becomes effective December 23, 1975.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Burlington, Massachusetts on December 1, 1975.

QUENTIN S. TAYLOR,
Director, New England Region.

[FR Doc.75-32999 Filed 12-8-75;8:45 am]

[Airspace Docket No. 75-WA-18]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Federal Airway and Controlled Airspace

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to redescribe the control area asociated with Jet Route No. 133 outside the continental control area and to realign a portion of V–453 S one degree to overlie V–321, west of King Salmon, Alaska.

Jet routes are described in § 75.100. The controlled airspace associated with those jet routes that lie outside the continental control area are described in § 71.161. Airspace Docket No. 75–AL–5 renumbered both of the end segments of J–133 in § 75.100. These end segments are within the continental control area and their inclusion in § 71.161 is not required. It is necessary, however, to redescribe the remaining section of J–133 in § 71.161 to reflect that change without alteration of its present position. This action accomplishes that purpose. For approximately 24 miles northwest of King Salmon, Alaska, V–453 S is aligned 15° south of the main airway but diverges from V–321 by one degree. Action is therefore taken herein to realign V–453 S to coincide with V–321 for that distance. Since this action does not involve substantive airspace redesignation, it is a minor matter or which the public would have no particular desire to comment. Therefore, notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., January 29, 1976, as hereinafter set forth.

§ 71.125 (40 FR 339) is amended as follows:

In V–453 "including a south alternate;" is deleted and "including a south alternate via INT King Salmon 272° and Dillingham 120° radials;" is substituted therefor.

In § 71.161 (40 FR 345) Jet Route No. 133 is amended to read as follows:

"From Blorka Island, Alaska, to Johnston Point, Alaska."

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, D.C., on December 2, 1975.

EDWARD J. MALO,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.75-33003 Filed 12-8-75;8:45 am]

[Airspace Docket No. 75-SW-77]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zones

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to redescribe the Abilene, Tex. (Dyess AFB), and San Antonio, Tex. (Kelly AFB), control zones without reference to the outer marker beacons which have been decommissioned.

Since these changes are editorial in nature and do not alter the control zones as described in Part 71 of the Federal Aviation Regulations, public comment is not considered necessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective December 9, 1975, as hereinafter set forth.

1. In § 71.171 (40 FR 354), the Abilene, Tex. (Dyess AFB), control zone is amended to read:

ABILENE, TEX. (DYESS AFB)

That airspace within a 5-mile radius of Dyess AFB (latitude 32°25'10" N., longitude 99°51'15" W.); within 2 miles each side of the Dyess ILS localizer S course; extending from the 5-mile-radius zone to 8.5 miles S of the 5-mile-radius zone; within 2 miles each side of the Tuscola VOR 350° radial, extending from the 5-mile-radius zone to 2 miles N of the VOR; and within 2 miles each side of the Abilene VORTAC 353° radial, extending from the 5-mile-radius zone to 8 miles northeast of the VORTAC.

V40237 DEC 9 75 XUM

2. In § 71.171 (40 FR 354), the San Antonio, Tex. (Kelly AFB), control zone is amended to read:

SAN ANTONIO, TEX. (KELLY AFB)

That airspace within a 5-mile radius of Kelly AFB (latitude 29°22'57" N., longitude 98°34'25" W.); within 2 miles each side of the Kelly AFB ILS localizer N course extending from the 5-mile-radius zone to 2 miles north of the 5-mile-radius zone; and within 2 miles each side of the Kelly AFB TACAN 341° radial extending from the 5-mile-radius zone to the TACAN.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, Tex., on November 28, 1975.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

[FR Doc.75-33004 Filed 12-8-75;8:45 am]

[Airspace Docket No. 75-WE-23]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On October 24, 1975 a Notice of Proposed Rule Making was published in the FEDERAL REGISTER (40 FR 49794) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate a new transition area for Page Airport, Page, Arizona.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received and the proposed amendment is hereby adopted without change.

Effective date. This amendment shall be effective 0901 G.m.t., February 12, 1976.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Los Angeles, California on November 28, 1975.

LYNN L. HINK,
Acting Director, Western Region.

In § 71.181 (40 FR 441) the following transition area is added:

PAGE, ARIZONA

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Page Airport (latitude 36°55'35" N., longitude 111°26'53" W.); within 2 miles each side of the Page VOR 340° radial, extending from the 6 mile radius area to 11 miles NW of the VOR; that airspace extending upward from 1200 feet above the surface within 6 miles NE and 9 miles SW of the Page VOR 340° radial extending from the VOR to 18 miles NW of the VOR; and within 6 miles E and 9 miles west of the Page VOR 175° radial extending from the VOR to 11.5 miles S of the VOR.

[FR Doc.75-33005 Filed 12-8-75;8:45 am]

[Airspace Docket No. 75-WE-20]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 73—SPECIAL USE AIRSPACE

Designation of Temporary Restricted Areas

On September 11, 1975, a Notice of Proposed Rule Making (NPRM) was published in the FEDERAL REGISTER (40 FR 42210) stating that the Federal Aviation Administration (FAA) was considering amendments to Part 71 and 73 of the Federal Aviation Regulations that would designate temporary restricted areas in the vicinity of Nellis AFB, Nev., and Edwards AFB/NAS China Lake, Calif., to contain a joint military training exercise, BOLD EAGLE 76 scheduled from 0800 PST, February 4, 1976, through 1800 PST, February 17, 1976. The restricted areas would also be included in the continental control area for the duration of their time of designation.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. Two comments were received. One favored the proposal, but the other objected on the basis that the proposed restricted areas would adversely affect Scenic Airlines, Inc. scheduled air service between Las Vegas, Ely and Elko.

In response to the objection, arrangements have been made for Scenic Airlines aircraft to transit the exercise areas at flight level 190 four times daily in accordance with a schedule and routing requested by the airline. The FAA has therefore concluded that the issue has been satisfactorily resolved.

Subsequent to publication of the NPRM, it was decided that the description of Temporary Restricted Area R-2514 D-1 should be altered to exclude airspace from 200 feet AGL to 800 feet AGL within a 3 nautical mile radius of the Lincoln County and Pioche Airports. Since this change is minor in nature and also reduces the burden on the public, it has been determined that it can be effected by publication in this rule without recourse to additional public notice.

In consideration of the foregoing, Parts 71 and 73 of the Federal Aviation Regulations are amended, effective 0901 G.m.t., January 29, 1976, as hereinafter set forth.

In § 71.151 (40 FR 343) the following restricted areas are included for the duration of their time of designation from 0800 PST, February 4, 1976, through 1800 PST, February 17, 1976:

a. R-2514A—Bold Eagle 76.
b. R-2514B—Bold Eagle 76.
c. R-2514C-1—Bold Eagle 76.
d. R-2514C-2—Bold Eagle 76.
e. R-2514D-1—Bold Eagle 76.
f. R-2514D-2—Bold Eagle 76.
g. R-2514E-1—Bold Eagle 76.
h. R-2514E-2—Bold Eagle 76.

In § 73.25 (40 FR 660) the following restricted areas are added:

A. R-2514A BOLD EAGLE 76

Boundaries. Beginning at Lat. 36°30'00" N., Long. 116°47'00" W.; to Lat. 36°06'00" N., Long. 116°18'00" W.; to Lat. 35°39'00" N., Long. 115°53'00" W.; to Lat. 35°18'45" N., Long. 116°18'45" W.; thence along the eastern and northern boundaries of R-2502E, R-2502N and R-2524 to Lat. 35°36'00" N., Long. 117°26'00" W.; to Lat. 35°40'30" N., Long. 117°25'00" W.; thence along the eastern and northern boundaries of R-2505 to Lat. 36° 14'00" N., Long 117°53'00" W.; to Lat. 36° 30'00" N., to Long. 117°36'00" W.; to point of beginning.

Designated altitudes. 2500 feet AGL to FL 200.

Time of designation. 0800 PST to 1700 PST daily February 11 and 12, 1976; 0001 PST February 13, 1976, to 1800 PST February 17, 1976.

Controlling agency. Federal Aviation Administration, Los Angeles ARTC Center.

Using agency. US Air Force Tactical Air Command/USAF Readiness Command (TAC/USAFRED), Langley Air Force Base, Virginia 23665.

B. R-2514B BOLD EAGLE 76

Boundaries. Beginning at Lat. 34°56'00" N., Long. 117°09'00" W.; to Lat. 35°01'30" N., Long. 116°41'00" W.; to Lat. 35°07'00" N., Long. 116°34'00" W.; thence along the southern boundary of R-2502E and R-2515 to point of beginning.

Designated altitudes. 500 feet AGL to FL 200.

Time of designation. 0800 PST to 1700 PST daily February 11 and 12, 1976; 0001 PST February 13, 1976, to 1800 PST February 17, 1976.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release 34-11681]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Registration of Separately Identifiable Departments or Divisions of a Person as Broker-Dealer

The Securities and Exchange Commission announced today that it has adopted Rule 15b2B-1,[1] effective immediately, in accordance with the Administrative Procedure Act (5 U.S.C. 551 et seq.), and pursuant to the Commission's authority under the Securities Exchange Act of 1934 (the "Act"),[2] particularly sections 2, 3, 15, 17 and 23 thereof.[3]

Rule 15b2B-1 provides that separately identifiable departments or divisions or persons referred to in section 15(b)(2)(B) of the Act (hereinafter referred to as "Broker-Dealer Departments or Divisions"), as defined, may be registered as brokers or dealers under section 15 of the Act (15 U.S.C. 78o) upon complying with a specified registration procedure in the rule, thus providing an alternative to registration by persons having Broker-Dealer Departments or Divisions.

Section 15(a) of the Act[4] makes it unlawful for any broker or dealer (with certain exceptions) to use the jurisdictional means to effect any transaction in, or to induce or attempt to induce the purchase or sale of, certain securities (including municipal securities) unless such broker or dealer is registered with the Commission. Section 15(b)(2)(B) of the Act (15 U.S.C. 78o(b)(2)(B)), as amended by the Securities Acts Amendments of 1975 (the "1975 Amendments"), provides that a person who, on the date of enactment of the 1975 Amendments (June 4, 1975), was a broker or dealer "solely by reason of acting as a municipal securities dealer or municipal securities broker" through a "separately identifiable department or division," may register that department or division (instead of being required to register itself) with the Commission in accordance with such rules as the Commission may prescribe.[5]

The wording in section 15(b)(2)(B), to the effect that registration of Broker-Dealer Departments or Divisions is to be allowed "in accordance with such terms and conditions as the Commission, by rule, prescribes as necessary and appropriate in the public interest and for the protection of investors," clearly contemplated rulemaking action by the Commission in order to make the section available to those for whom it was intended. In considering appropriate terms and conditions to be included in a rule implementing the provisions of section 15(b)(2)(B), the Commission has considered Rule G-1 of the Municipal Securities Rulemaking Board (the "MSRB") establishing, pursuant to the MSRB's authority under section 15B(b)(2)(H) of the Act (15 U.S.C. 78o-4(b)(2)(H)), a definition of a "separately identifiable department or division" of a bank which acts as a municipal securities dealer.[6] While the Commission has not yet taken final action with respect to MSRB Rule G-1, the Commission has concluded preliminarily that the definition of "separately identifiable department or division" contained therein, and the standards set forth therein for application of that definition, may be applied appropriately in the case of Broker-Dealer Departments or Divisions and will ensure that the purposes of the Act with respect to registration of brokers and dealers which are persons having Broker-Dealer Departments or Divisions are ful-

---

[1] 17 CFR 240.15b2B-1.

[2] 15 U.S.C. 78a et seq., as amended by Pub. L. 94-29 (June 4, 1975).

[3] 15 U.S.C. 78b, 78c, 78o, 78q and 78w.

[4] 15 U.S.C. 78o(a). Section 15(a) provides:

(1) It shall be unlawful for any broker or dealer which is either a person other than a natural person or a natural person not associated with a broker or which is a person other than a natural person (other than such a broker or dealer whose business is exclusively intrastate and who does not make use of any facility of a national securities exchange) to make use of the mails or any means or instrumentality of interstate commerce to effect any transactions in, or to induce or attempt to induce the purchase or sale of, any security (other than an exempted security or commercial paper, bankers' acceptances, or commercial bills) unless such broker or dealer is registered in accordance with subsection (b) of this section.

(2) The Commission, by rule or order, as it deems consistent with the public interest and the protection of investors, may conditionally or unconditionally exempt from paragraph (1) of this subsection any broker or dealer or class of brokers or dealers specified in such rule or order.

[5] Section 15(b)(2)(B) provides:

(B) Any person who is a broker or dealer solely by reason of acting as a municipal securities dealer or municipal securities broker, who so acts through a separately identifiable department or division, and who so acted in such a manner on the date of enactment of the Securities Acts Amendments of 1975, may, in accordance with such terms and conditions as the Commission, by rule, prescribes as necessary and appropriate in the public interest and for the protection of investors, register such separately identifiable department or division in accordance with this subsection. If any such department or division is so registered, the department or division and not such person himself shall be the broker or dealer for purposes of this title.

[6] Rule G-1 of the MSRB (formerly Rule 4) was put into effect summarily in accordance with Section 19(b)(3)(B) of the Act, as announced in Securities Exchange Act Release No. 11741 (October 15, 1975), 40 FR 49420 (1975).

V40237D DEC 9 75 XUM

filled. For that reason, the Commission has formulated Rule 15b2B–1 under the Act providing for the registration of Broker-Dealer Departments or Divisions, based in large part on the MSRB's Rule G–1, which includes a requirement that persons having Broker-Dealer Departments or Divisions who utilize the rule supply certain supplemental information to the Commission upon applying for registration in addition to that required by Form BD (§ 249.501).

The Commission hereby adopts Rule 15b2B–1 pursuant to its authority under the Act, and particularly sections 2, 3, 15, 17 and 23 thereof.[1] The Commission finds, in accordance with the Administrative Procedure Act (the "APA") (5 U.S.C. 553(b)(3)(B)), that Rule 15b2B–1 will permit registration of Broker-Dealer Departments or Divisions in a manner contemplated by the Act and will relieve persons having such Broker-Dealer Departments or Divisions from regulatory burdens which were not intended under the Act. Therefore, the Commission finds that notice and public procedure are unnecessary as a prerequisite to adoption of the rule, and that the rule should be adopted, effective immediately, in accordance with the APA (5 U.S.C. 553(d)(3)) in order to provide a process for the registration of Broker-Dealer Departments of Divisions, either prior to December 1, 1975 or thereafter (upon withdrawal of applications for registration under section 15(a) of the Act filed by persons who have Broker-Dealer Departments or Divisions and who wish, instead, to utilize Rule 15b2B–1. The Commission further finds that Rule 15b2B–1 will not impose any burden on competition.

Although the Commission has declared Rule 15b2B–1 effective immediately, the Commission wishes to solicit comment thereon with a view to modifying the rule if such modifications appear necessary or appropriate in the public interest or for the protection of investors. Interested persons are invited, therefore, to submit comments on Rule 15b2B–1 in writing to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, by January 2, 1976. All such comments should refer to File No. S7–606.

(Secs. 2, 3, 15, 17, 23, 48 Stat. 881, 882, 895, 897, 901, as amended by secs. 2, 3, 11, 14, 18, 89 Stat. 97, 97–104, 121–127, 137–141, 155–156 (15 U.S.C. 78b, 78c, 78o, 78q, 78w, as amended by Pub. L. 94–29))

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 28, 1975.

The text of Rule 15b2B–1, as hereby adopted, is as follows:

§ 240.15b2B–1 Application for registration of separately identifiable department or division of a person.

(a) An application for registration pursuant to section 15(b) of the Act of a separately identifiable department or division of a person referred to in section 15(b)(2)(B) of the Act shall be filed with the Commission on Form BD (§ 249.501) in accordance with the instructions contained therein together with the supplemental information required by this section.

(b) Each applicant for registration who is subject to the requirements of paragraph (a) of this section shall file with the application for registration prescribed in such paragraph the statements required in paragraphs (a) through (d) of § 240.15b1–2. The statement of financial condition required in paragraph (a) of § 240.15b1–2 shall be deemed a part of the application for registration.

(c) If the information contained in any application for registration pursuant to paragraph (a. of this section, or in any amendment to such application, is or becomes inaccurate for any reason, applicant shall promptly file an amendment on Form BD correcting such information.

(d) An application for registration of a "separately identifiable department or division of a person referred to in section 15(b)(2)(B) of the Act," as defined in paragraph (e) of this section, filed in accordance with paragraph (a) of this section, shall include, as an attachment, the following supplemental information:

(1) In item 2(a) of Form BD set forth the name and place of business of both the division or department and the person, specifying which is the division or department and which the person.

(2) For the purposes of items 4 and 5(c) of Form BD applicant departments or divisions shall be considered to be other than sole proprietors, partnerships and corporations.

(3) Supply complete information on Schedule E of Form BD to the items which follow. Such information shall be provided in addition to any other information required to be included in such Schedule by the standard instructions to Form BD. If such information, or any amendment thereto, is or becomes inaccurate for any reason, applicant shall promptly file an amendment to Form BD correcting such information.

(i) Identify on Schedule E each geographic, organizational and operational unit of the person of which applicant is a part in which applicant's municipal securities dealer activities are conducted, specifying the name and location of each such unit and the nature of the municipal securities activities conducted in each such unit. Indicate on Schedule E whether any business activities other than municipal securities activities are conducted in any such unit, and describe the nature of such other activities.

(ii) A statement whether the person of which applicant is a part engaged in the business of (A) effecting transactions in any securities other than municipal securities for the account of others, or (B) buying and selling securities other than municipal securities for his own account through a broker or otherwise.

(iii) A statement whether all records relating to applicant's municipal securities activities are maintained separately and apart from all other records of the applicant or of the person of which applicant is a part.

(iv) A statement whether all records relating to applicant's municipal securities activities are separately extractable from applicant's facilities or from the facilities of the person of which applicant is a part. Describe on Schedule E the manner in which all records relating to applicant's municipal securities activities are maintained, including their location, how such records are collected and retrieved, the period of time required to collect or retrieve any such record, the category of employees having authority to collect or retrieve such records, and the name of each person who supervises the maintenance of such records.

(v) A statement whether separate financial records are maintained with respect to applicant's municipal securities activities.

If so, explain on Schedule E the nature of such separate financial records.

(vi) A statement whether the person of which applicant is a part maintains a municipal securities investment portfolio.

(vii) Whether any person controlling, controlled by or under common control with the applicant, including any employee, engages in any activities of the person of which the applicant is a part with respect to municipal securities other than "municipal securities activities": as defined in paragraph (f) of this section. If so, explain fully on Schedule E, setting forth the name of each such person and the nature of each such person's activities with respect to municipal securities other than "municipal securities activities" as defined in paragraph (f) of this section. If any of such other activities with respect to municipal securities are performed by applicant, so specify on Schedule E.

(viii) How many employees of the person of which applicant is a part are engaged in its municipal securities activities, indicating the number of supervisory and managerial personnel separately.

(ix) Whether the person of which applicant is a part acted as a municipal securities dealer or a municipal securities broker by means of a separately identifiable department or division of a person as referred to in section 15(b)(2)(B) of the Act, as such term is defined in paragraph (e) of this section, prior to June 5, 1975.

(e) The term "separately identifiable department or division of a person referred to in section 15(b)(2)(B) of the Act" shall mean, for purposes of this section, that unit of any person who would be a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer, who so acts through a unit which conducts all of the activities of such person relating to the conduct of business as a municipal securities broker or a municipal securities dealer ("municipal securities activities"), as such activities are hereinafter defined, and who so acted in such manner prior to June 5, 1975: *Provided*, That:

(1) Such unit is under the direct supervision of an officer designated by the board of directors of such person as responsible for the day-to-day conduct of such person's municipal securities activities, including the supervision of all such person's employees engaged in the performance of such activities; and

(2) There are separately maintained in or separately extractable from such unit's own facilities, or the facilities of such person, all of the records relating to such person's municipal securities activities, and further provided that such records are so maintained or otherwise accessible as to permit independent examination thereof and enforcement of applicable provisions of the Act, the rules and regulations thereunder and the rules of the Municipal Securities Rulemaking Board.

(f) For purposes of this section, the activities of a person referred to in section 15(b)(2)(B) of the Act which constitute municipal securities activities shall include:

(1) Underwriting, trading and sales of municipal securities (as principal or agent);

(2) Processing and clearance activities with respect to municipal securities;

(3) Research, analysis and the preparation of literature for use in connection with the activities described in paragraph (f)(1) of this section; and

(4) Maintenance of records pertaining to the activities described in paragraphs (f)(1) through (3) of this section.

(g) The fact that directors and senior officers of a person referred to in section 15(b)(2)(B) of the Act may from time to time set broad policy guidelines affecting such person as a whole which are not directly related to the day-to-day conduct of such person's municipal securities activities shall not disqualify the unit hereinbefore described as a separately identifiable department or division of such person or require that such directors or officers be considered as part of such unit.

(h) The fact that the municipal securities activities of a person referred to in section 15(b)(2)(B) of the Act are conducted in more than one geographic, organizational or operational unit of such person shall not preclude a finding that such person has a separately identifiable department or division for purposes of this section: *Provided, however*, That all such units are identifiable and that the requirements of paragraphs (e)(1) and (2) of this section are met with respect to each such unit. All such geographic, organizational or operational units of such person shall be considered in the aggregate as the separately identifiable department or division of such person for purposes of this section.

[Release 34–11876]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Temporary Exemption for Certain Municipal Securities Brokers and Dealers

The Securities and Exchange Commission announced today that it has adopted temporary Rule 23a–1(T) [1], effective December 1, 1975, in accordance with the summary rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 553(b)(3)(B)), and pursuant to the Commission's authority under the Securities Exchange Act of 1934 (the "Act"),[2] particularly sections 2, 3, 10, 15, 15B, 17 and 23 thereof.[3]

In view of the fact that municipal securities professionals will, absent Commission action, become subject to Commission regulation on December 1, 1975, the Commission has determined to adopt temporary Rule 23a–1(T), effective December 1, 1975, pursuant to the summary rulemaking provisions of the Administrative Procedure Act. (5 U.S.C. 551 et seq.) Rule 23a–1(T) suspends, until March 1, 1976, the operation of certain Commission rules, in whole or in part, in order to prevent the application of those rules to the activities of certain municipal securities professionals pending consideration of the amendments proposed to existing Commission rules.[4]

Rule 23a–1(T) will, with one exception, preserve the status quo with respect to municipal securities regulation until March 1, 1976. By that time, the Commission expects to analyze public comments on the proposed rules and to take final action thereon.

The only area in which the Commission has determined that the current regulatory pattern should not continue unchanged until March 1, 1976 is that of confirmations. In order to prevent possible disruption of the activities of municipal securities brokers required to register with the Commission for the first time on December 1, 1975, and in order to solicit comments from interested persons with respect to the appropriateness of continuing the requirement of disclosing "the other side" in a municipal securities brokerage transaction, the Commission believes that a temporary exemption should be provided for municipal securities brokers from the requirement in Rule 15c1–4 [5] that a broker, when acting as broker for a customer or for a customer and some other person disclose either the name of the person from whom the security was purchased or to whom it was sold or the fact that such information will be furnished upon request. However, upon the expiration of the temporary rule on March 1, 1976, municipal securities brokers will be required to comply with all of the provisions of Rule 15c1–4.

The Securities and Exchange Commission hereby adopts temporary Rule 23a–1(T), effective December 1, 1975, pursuant to its authority under the Securities Exchange Act of 1934,[6] and particularly sections 2, 3, 10, 15, 15B, 17 and 23 thereof.[7] The Commission finds, in accordance with the Administrative Procedure Act (5 U.S.C. 553(b)(3)(B)), that temporary Rule 23a–1(T) will relieve municipal securities brokers and dealers from requirements that would otherwise be applied to them in a possibly inappropriate manner, that notice and public procedure are therefore unnecessary as a prerequisite to the adoption of that rule, and that the rule should be adopted, effective on the above date, in accordance with the Administrative Procedure Act (5 U.S.C. 553(d)(3)), in order to permit municipal securities brokers and dealers to comment on the proposed rules discussed supra in an orderly and timely manner and to afford the Commission adequate time to review such comments and the proposed regulatory pattern carefully and completely, consistent with the public interest and the protection of investors, without risking the imposition of complex rules in an unfair way to persons newly subject to the Act. The Commission further finds that temporary Rule 23a–1(T) will not impose any burden on competition.

(Secs. 2, 3, 15, 17, 23, 48 Stat. 881, 882, 895, 897, 901, as amended by secs. 2, 3, 11, 14, 18, 89 Stat. 97, 97–104, 121–127, 137–141, 155–156; sec. 10, 48 Stat. 891; sec. 13, 89 Stat. 131–137 (15 U.S.C. 78b, 78c, 78o, 78q, 78w, as amended by Pub. L. 94–29; (15 U.S.C. 78j; 15 U.S.C. 78o–4), as added by Pub. L. 94–29))

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 26, 1975.

The text of temporary Rule 23a–1(T), as hereby adopted, is as follows:

[1] 17 CFR 240.23a–1(T).

[2] 15 U.S.C. 78a et seq., as amended by Pub. L. 94–29 (June 4, 1975).

[3] 15 U.S.C. 78b, 78c, 78j, 78o, 78o–4, 78q and 78w.

[4] In a separate document published in the Rules section of this FEDERAL REGISTER, the Commission has published for comment proposed amendments to §§ 240.10b–3, 240.10b–16, 240.15b1–3, 240.10b8–1, 240.15b8–2, 240.15b9–1, 240.15b9–2, 240.15c1–1, 240.15c1–3, 240.15c1–4, 240.15c1–5, 240.15c1–6, 240.15c1–7, 240.15c1–8, 240.15c2–4, 240.15c2–5, 240.15c2–7 and 240.15c2–11; and proposed §§ 240.15b10–12, 240.15Ba2–4, 240.15Ba2–5, 240.15Ba2–6, 240.15Bc3–1 and 240.17a–21. The proposals concern the regulation of municipal securities brokers, municipal securities dealers and transactions in municipal securities, as well as reporting requirements for the Municipal Securities Rulemaking Board.

[5] 17 CFR 240.15c1–4.

[6] 15 U.S.C. 78a et seq., as amended by Pub. L. 94–29 (June 4, 1975).

V 40 237 DEC 9 75 XUM

§ 240.23a–1(T) Temporary exemption for certain municipal securities brokers and municipal securities dealers.

(a) The following sections shall not apply to any person who is required to register as a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer:

Sec.	
240.15b10–1	240.15b10–7
240.15b10–2	240.15b10–8
240.15b10–3	240.15b10–9
240.15b10–4	240.15b10–10
240.15b10–5	240.15b10–11
240.15b10–6	

(b) The following sections shall not apply to any person who is required to register as a broker or dealer solely by reason of acting as a municipal securities broker or municipal securities dealer, or to any other broker or dealer insofar as such broker or dealer acts as a municipal securities broker or municipal securities dealer:

Sec.
240.15b8–1
240.15b8–2

(c) For purposes of the following sections, the term "security" or "securities" shall not include any "municipal security" as defined in section 2(a)(29) of the Act:

Sec.
240.15c2–4
240.15c2–5
240.15c2–7
240.15c2–11

(d) Section 240.15c1–4 shall not apply to any person acting as a municipal securities broker insofar as it requires that a broker, when acting as a broker for a customer or for a customer and some other person, disclose either the name of the person from whom the security was purchased or to whom it was sold for such customer or the fact that such information will be furnished upon the request of such customer.

(e) This section shall expire on March 1, 1976.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER C—CIVIL RIGHTS

PART 230—EXTERNAL PROGRAMS

Equal Employment Opportunity on Federal and Federal-Aid Construction Contracts (Including Supportive Services); Correction

Purpose. The purpose of this document is to correct a citation in the regulations.

In FR Doc. 75–17371 appearing at page 28053 in the FEDERAL REGISTER of July 3, 1975, the words "Title 12, U.S.C." appearing on page 28054 are corrected in the fifth line of § 230.111(e)(2) to read "Title 23, U.S.C."

Issued on: December 1, 1975.

DAVID E. WELLS,
Chief Counsel.

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

PART 207—NAVIGATION REGULATIONS

Calumet-Sag Channel, Illinois

Pursuant to Section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) § 207.425 governing the use, administration and navigation of the Calumet-Sag Channel, Illinois is hereby amended with respect to paragraph (a) and (b)(1) and the revocation of (b)(2) through (b)(21) effective December 9, 1975.

The Blue Island Lock was removed and replaced with the Thomas J. O'Brien Lock which, with the exception of special water level controls, is subject to the regulation specified in § 207.300. Accordingly, since this amendment only reflects changed conditions on the waterway and will serve to avoid confusion on the part of the navigation interests, notice of proposed rulemaking and public procedures thereto are considered unnecessary. Section 207.425 is hereby amended as follows:

§ 207.425 Calumet River, Illinois: Thomas J. O'Brien Lock and Controlling Works and the use, administration and navigation of the lock.

(a) *Controlling Works.* (1) The controlling works shall be so operated that the water level at the downstream end of the lock will be maintained at a level lower than that of Lake Michigan, except in times of excessive storm run-off into the Illinois Waterway, or when the lake level is below minus 2 feet, Chicago City Datum.

(2) The elevation to be maintained at the downstream end of the lock shall at no time be higher than minus 0.5 feet, Chicago City Datum, and at no time lower than minus 2.0 feet, Chicago City Datum, except as noted in paragraph (a)(1) of this section.

(b) *Lock—(1) Operation.* The Thomas J. O'Brien Lock and Dam is part of the Illinois Waterway which is a tributary of the Mississippi River. All rules and regulations defined in § 207.300, Ohio River, Mississippi River above Cairo, Illinois, and their tributaries; use, administration and navigation shall apply.

(2) through (21) [Revoked]

Dated: November 18, 1975.

VICTOR V. VEYSEY,
Assistant Secretary of the Army, Civil Works.

[FR Doc.75–32986 Filed 12–8–75;8:45 am]

Title 37—Patents, Trademarks and Copyrights

CHAPTER I—PATENT AND TRADEMARK OFFICE, DEPARTMENT OF COMMERCE

PART 1—RULES OF PRACTICE IN PATENT CASES

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

Revision of Administrative Fees

On August 21, 1975, notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 36573), regarding the proposal of the Patent and Trademark Office to amend Title 37 of the Code of Federal Regulations by amending §§ 1.21, 1.25, 1.165, and 2.6 dealing with administrative fees. Interested persons were given until October 15, 1975, to submit written comments and suggestions. Full and careful consideration was given to the single written comment received.

Amendment of §§ 1.21 and 2.6 is intended to (1) recover increases in material and labor costs for furnishing assignment information, drafting services and classification information, (2) eliminate established fees for drafting services not currently in demand, and (3) establish a new fee. Drafting services for which established fees are eliminated (§ 1.21 (l) and (m) will be furnished, if requested, at fees based upon actual cost. The new fee is established to recover the cost of servicing deposit accounts. The amendment of §§ 1.25 and 1.165 brings these rules into conformity with the amendment of § 1.21.

In consideration of the comment received, and pursuant to the authority contained in section 6 of the Act of July 1952, as amended (85 Stat. 364, 35 U.S.C. 6), Parts 1 and 2 of Title 37, Code of Federal Regulations, are hereby amended as set forth below.

1. In § 1.21, paragraphs (e), (j), (k), (q) and (u) are revised and paragraphs (l) and (m) are deleted as follows:

§ 1.21 Patent and miscellaneous fees and charges.

* * * * *

(e) For abstracts of title to each patent or application:

For the search, 1 hour or less, and certificate	$5.00
Each additional hour or fraction thereof	2.50
For each brief from the digest of assignments, of 200 words or less	2.00
Each additional 100 words or fraction thereof	.20

* * * * *

(j) For making patent drawings, when facilities are available, the cost for making the same,

Rate per hour	12.00
Minimum charge per sheet	25.00

(k) For correcting patent drawings, the cost of making the correction,

Rate per hour	12.00
Minimum charge	3.00

(l) [Deleted]
(m) [Deleted]

* * * * *

(q) List of U.S Patents:

All patents in a subclass, per sheet (containing 100 patent numbers or less)	1.00
Patents in a subclass, limited by date or patent number, per sheet (containing 50 patent numbers or less)	1.00

* * * * *

(u) Deposit account:

Service charge for each month when the balance at the end of the month is below $40	2.00

* * * * *

2. In § 1.25, paragraph (a) is revised to read as follows:

§ 1.25 Deposit accounts.

(a) For the convenience of attorneys, agents, and the general public in ordering services offered by the Office, copies of records, etc., special deposit accounts may be established in the Patent and Trademark Office. A minimum deposit of $50.00 or more, depending on the activity of the individual account, is required. At the close of each month's business, a statement will be rendered. A remittance must be made promptly upon receipt of the statement to cover the value of items or services charged to the account and thus restore the account to its established normal deposit value. An amount sufficient to cover all services, copies, etc., requested must always be on deposit. A service charge will be assessed for each month that the balance at the end of the month is below $40.00.

* * * * *

3. In § 1.165, paragraph (b) is revised to read as follows:

§ 1.165 Drawings.

* * * * *

(b) The drawing may be in color and when color is a distinguishing characteristic of the new variety, the drawing must be in color. Two copies of color drawings must be submitted. Color drawings may be made either in permanent water color or oil, or in lieu thereof may be photographs made by color photography or properly colored on sensitized paper. Permanently mounted color photographs are acceptable. The paper in any case must correspond in size, weight and quality to the paper required for other drawings. See § 1.84. Nonpermanently mounted copies will be correctly mounted at applicant's expense, § 1.21(v).

4. In § 2.6, paragraphs (a), (d) and (e) are revised and a new paragraph (f) is added to read as follows:

§ 2.6 Trademark fees.

* * * * *

(a) For each printed copy of a registration with data entered of record as of date of mailing, relating to renewal, cancellation, publication under section 12(c), of the 1946 Trademark Act and affidavits or declarations under sections 8 and 15 of such act.

Omitting title	1.70
Showing title	3.70

* * * * *

(d) For making drawings, when facilities are available, the cost of making the same,

Rate per hour	12.00
Minimum charge per sheet	10.00

(e) For correcting drawings, the cost of making the correction:

Rate per hour (including a photoprint of the uncorrected drawing)	12.00
Minimum charge	3.00

(f) For abstracts of title to each registration or application:

For the search, one hour or less, and certificate	5.00
Each additional hour or fraction thereof	2.50
For each brief from the digest of assignments, of 200 words or less	2.00
Each additional 100 words or fraction thereof	.20

Effective date. These revisions shall become effective February 2, 1976.

Dated: December 4, 1975.

C. MARSHALL DANN,
Commissioner of Patents and Trademarks.

DAVID B. CHANG,
Acting Assistant Secretary for Science and Technology.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 467–2]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Compliance Schedules; Correction

On March 28, 1975 (40 FR 14069 and 14070) and July 15, 1975 (40 FR 29712 and 29713) certain amendments to 40 CFR 52.220(c) were promulgated by the Environmental Protection Agency. This is to give notice that the amendments were incorrectly promulgated as § 52.220 (c)(8) whereas they should properly have been promulgated as § 52.220(c)(3). Therefore, amendments published in the FEDERAL REGISTER on the above listed dates as § 52.220(c)(8) are hereby corrected to read § 52.220(c)(3).

Dated December 4, 1975.

ROBERT H. BAUM,
Assistant Administrator for Enforcement.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 75–1297]

PART 0—COMMISSION ORGANIZATION

Authority Delegations to Chief, Cable Television Bureau

In the matter of amendment of Part 0 of the Commission's rules and regulations concerning delegations of authority to the Chief, Cable Television Bureau.

1. In the course of processing applications for certificates of compliance the Commission's staff occasionally discovers cable television systems operating in violation of the Cable Television rules. In those instances where the cable operators have been responsive to our requests for further information and where the violation was inadvertent and assurances are received that no further violations will be made, the Commission has been inclined not to issue orders to show cause but instead to work towards a just resolution considering the interests of all affected parties. In those instances where such a resolution has not been possible the Commission has issued sua sponte orders to show cause directed against the subject cable television systems.

2. Because Commission policies concerning the issuance of show cause orders under these circumstances have become established, more efficient processing would result by the delegation of authority to act on such matters to the Chief, Cable Television Bureau. Accordingly, we are amending § 0.288 to delegate authority to the Chief, Cable Television Bureau to issue sua sponte orders to show cause against cable television systems.

3. Since this amendment relates to Commission organization and procedures, the prior notice provisions of section 4 of the Administrative Procedure Act, 5 U.S.C. 553, do not apply. For the same reason the amendment will be made effective immediately.

Authority for the rule amendment adopted herein is contained in sections 2, 3, 4 (i) and (j), 5 (b) and (d), 301, 303, 307, 308, and 309 of the Communications Act of 1934, as amended.

Accordingly, it is ordered, That effective December 11, 1975, Part 0 of the Commission's rules and regulations is amended as set forth below.

(Secs. 2, 3, 4, 5, 301, 303, 307, 308, 309, 48 Stat., as amended, 1064, 1065, 1066, 1068, 1081,

V40237 DEC 9 75 DUM

1082, 1083, 1084, 1085; 47 U.S.C. 152, 153, 154, 155, 301, 303, 307, 308, 309.)

Adopted: November 25, 1975.

Released: December 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] VINCENT J. MULLINS,
Secretary.

Chapter I of Title 47 of the Code of Federal Regulation is amended as follows:

1. In Part 0—Commission Action, A new paragraph (v) is added to § 0.288, to read as follows:

§ 0.288 **Authority delegated.**

• • • • •

(v) To issue orders to show cause *sua sponte*, unless novel questions of fact, law, or policy which cannot be resolved under outstanding precedents and guidelines are involved.

[FR Doc.75-33081 Filed 12-8-75;8:45 am]

[Docket No. 20583, RM-2431]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations, Eufaula, Okla.

Report and Order; Table of Assignment

1. The Commission has under consideration its notice of proposed rulemaking, adopted August 20, 1975, 40 FR 39530, inviting comments on a proposal to assign television Channel 3 to Eufaula, Oklahoma, for non-commercial educational use. This proceeding was instituted in response to a petition filed by the Oklahoma Educational Television Authority (OETA), licensee of Stations KETA-TV (Channel *13), Oklahoma City, and KOED-TV (Channel *11), Tulsa.

2. In order to assign Channel *3 to Eufaula, it would be necessary to modify the carrier offsets of four existing stations:

Station	Station location	Assignment and offset designation	
		Existing	Modified
KATC	Lafayette, La	3	3+
WLBT	Jackson, Miss	3+	3
KBTX-TV	Bryan, Tex	3+	3
KFDX	Wichita Falls, Tex	3	3+

Consequently, the Notice contained an Order to Show Cause requiring the licensees of the above stations to demonstrate why their individual licenses should not be modified if the Commission found it in the public interest to assign the Eufaula channel as requested. Comments received in response to the Notice were filed by Acadian Television Corporation, licensee of Station KATC(TV), Clay Broadcasting Corporation of Texas, licensee of Station KFDX(TV), and OETA.[1]

3. The OETA comments reaffirm its intention to apply for the use of the channel if assigned and to reimburse the affected licensees for the reasonable expenses involved in changing the carrier offsets.

4. The Clay Broadcasting Corporation comments and those of Acadian Television Corporation indicate the willingness of these licensees to cooperate with OETA in making the offset modifications. Each, however, requests the Commission to attach specific conditions to the proposed assignment if it is made or to the construction permit issued for its use. The desire of these parties is to enforce certain reimbursement provisions in this manner to better insure being able to receive the amounts involved.

5. The Commission is persuaded that the assignment of Channel *3 as requested is warranted and is in the public interest. The proposal meets all applicable spacing and other requirements. The assignment of the requested channel at Eufaula will offer an educational television programming service to over a quarter of a million residents, many of whom are presently unable to receive one. As for requests that specific conditions be associated with the assignment or a construction permit issued for its use, this does not appear necessary. Using guidelines furnished in previous reimbursement cases, the licensees of the four affected stations and the Eufaula permittee should reach an agreement in good faith on what constitutes a reasonable cost settlement and the means of repayment. We expect them to do so.

6. In view of the foregoing and pursuant to authority contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules: *It is ordered*, That effective January 9, 1976, the Television Table of Assignments contained in § 73.606(b) of the Commission's rules and regulations is amended with respect to the following cities to read as follows:

City:	*Channel No.*
Lafayette, La	3+, 10, 15, *24
Jackson, Miss	3, 12+, 16, *29+, 40+
Eufaula, Okla	*3
Bryan, Tex	3, *15—
Wichita Falls, Tex	3+, 6—, 18—, *24

7. *It is further ordered*, That effective January 9, 1976, and pursuant to section 316 of the Communications Act of 1934, as amended, the outstanding license of Communications Improvement, Inc., for Station WLBT(TV), Jackson, Mississippi, is modified to specify operation on Channel 3 in lieu of Channel 3+ subject to the following conditions:

(a) The licensee shall inform the Commission in writing by no later than January 29, 1976, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by March 1, 1976, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station WLBT(TV) on Channel 3 at Jackson, Mississippi.

(c) The licensee may continue to operate on Channel 3 under its outstanding authorization for one year from the effective date of this order, or until 60 days after the grant of a construction permit on Channel 3 at Eufaula, Oklahoma, whichever is later, or effect the change sooner should it so desire. Ten days prior to commencing operation on Channel 3, the licensee shall submit the same measurement data normally required in an application for a TV broadcast station license.

(d) The licensee shall not commence operation on Channel 3 until the Commission specifically authorizes it to do so.

8. *It is further ordered*, That effective January 9, 1976, and pursuant to section 316 of the Communications Act of 1934, as amended, the outstanding license of Communications Improvement, Inc., for Station WLBT(TV), Jackson, Mississippi, is modified to specify operation on Channel 3 in lieu of Channel 3+ subject to the following conditions:

(a) The licensee shall inform the Commission in writing by no later than January 29, 1976, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by March 1, 1976, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station KATC(TV) on Channel 3+ at Lafayette, Louisiana.

(c) The licensee may continue to operate on Channel 3 under its outstanding authorization for one year from the effective date of this order, or until 60 days after the grant of a construction permit on Channel 3 at Eufaula, Oklahoma, whichever is later, or effect the change sooner should it so desire. Ten days prior to commencing operation on Channel 3+, the licensee shall submit the same measurement data normally required in an application for a TV broadcast station license.

(d) The licensee shall not commence operation on Channel 3+ until the Commission specifically authorizes it to do so.

9. *It is further ordered*, That effective January 9, 1976, and pursuant to section 316 of the Communications Act of 1934, as amended, the outstanding license of Brazos Broadcasting Company, for Station KBTX-TV, Bryan, Texas, is modified to specify operation on Channel 3 in lieu of Channel 3+ subject to the following conditions:

(a) The licensee shall inform the Commission in writing by no later than January 29, 1976, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by March 1, 1976, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station KBTX-TV on Channel 3 at Bryan, Texas.

(c) The licensee may continue to operate on Channel 3+ under its outstanding authorization for one year from the effective date of this order, or until 60 days after the grant of a construction permit on Channel 3 at Eufaula, Oklahoma, whichever is later, or effect the change sooner should it so desire. Ten days prior to commencing operation on Channel 3, the licensee shall submit the same measurement data normally required in an application for a TV broadcast station license.

(d) The licensee shall not commence operation on Channel 3+ until the Commission specifically authorizes it to do so.

10. *It is further ordered*, That effective January 9, 1976, and pursuant to section 316 of the Communications Act of 1934, as amended, the outstanding license of Clay Broadcasting Corporation of Texas, for Station KFDX(TV), Wichita Falls, Texas, is modified to specify operation on Channel 3+ in lieu of Channel 3 subject to the following conditions:

(a) The licensee shall inform the Commission in writing by no later than January 29, 1976, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by March 1, 1976, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station KFDX(TV) on Channel 3+ at Wichita Falls, Texas.

(c) The licensee may continue to operate on Channel 3 under its outstanding authorization for one year from the effective date of this order, or until 60 days after the grant of a construction permit on Channel 3 at Eufaula, Oklahoma, whichever is later, or effect the change sooner should it so desire. Ten days prior to commencing operation on Channel 3, the licensee shall submit the same measurement data normally required in an application for a TV broadcast station license.

(d) The licensee shall not commence operation on Channel 3+ until the Commission specifically authorizes it to do so.

11. *It is further ordered*, That the Secretary of the Commission is directed to send a copy of this Report and Order by certified mail, return receipt requested, to Acadian Television Corporation, Brazos Broadcasting Co., Communications Improvement, Inc., and Clay Broadcasting Corporation of Texas.

12. *It is further ordered*, That this proceeding is terminated.

Adopted: November 26, 1975.

Released: December 3, 1975.

(Secs. 4, 5, 303, 307, 48 Stat., as amended, 1066, 1068, 1082, 1083; (47 U.S.C. 154, 155, 303, 307))

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Docket No. 20423]

PART 76—CABLE TELEVISION SERVICES

Postponement of Divestiture Requirement and Cross-Ownership Rules

In the matter of amendment of Part 76, Subpart J, of the Commission's rules and regulations relative to Cable Television Systems; and Postponement of divestiture requirement of § 76.501 relative to prohibited cross-ownership in existence on or before July 1, 1970, Docket No. 20423.

1. In paragraph 22 of the Second Report and Order in Docket 20423, FCC 75-1066, 55 FCC 2d 540 (1975), released September 29, 1975, the Commission directed that all pending requests for waiver of the cross-ownership rules would be dismissed as moot unless supplemented to demonstrate their continued relevance within 30 days of publication of the Second Report and Order, supra, in the FEDERAL REGISTER. By Errata, released October 22, 1975, the Commission established the deadline for such supplementation as November 28, 1975.[1]

2. On September 22, 1975, a Petition for Review of the said Second Report and Order was filed in the United States Court of Appeals for the District of Columbia Circuit. National Citizens Committee for Broadcasting v. FCC and United States of America, Case No. 75-1933. Additionally, several parties have petitioned the Commission to reconsider its action in Docket 20423.

3. Eastern Oklahoma Television Co., Inc.; North Platte Television, Inc. and KWSO-TV Television, Inc. have petitioned the Commission to extend the time in which to supplement their pending requests for waiver of the newly-revised cross-ownership rules until 60 days after completion of judicial review thereof. Eastern Oklahoma, North Platte and KWSO-TV are among some nine parties which will be required by the revised provisions of § 76.501 of the rules to divest ownership interests in order to comply with the cross-ownership provisions.[2]

4. In view of the potentially substantial impact the divestiture requirement may entail and the pendency of several petitions for reconsideration of the requirement, the Commission believes an extension of time for filing supplements to pending requests for waiver is appropriate for all those parties subject to divestiture under the new rule.[3] We do not believe, however, that the lengthy extension requested by petitioners is necessary.

Accordingly, it is ordered, That the date for filing supplements to pending petitions for waiver of § 76.501 of the rules is extended until sixty (60) days after final Commission action on pending petitions for reconsideration of the Second Report and Order in Docket 20423, FCC 75-1066, 55 FCC 2d 540 (1975), for all such parties who are subject to divestiture of ownership interests pursuant to the newly-adopted cross-ownership rules.

This action is taken by the Chief, Cable Television Bureau, pursuant to authority delegated by § 0.288(a) of the Commission's rules.

Adopted: November 28, 1975.

Released: December 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JEROLD L. JACOBS,
Acting Chief, Cable Television Bureau.

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 39; Amdt. 10-1]

PART 10—MAINTENANCE OF ACCESS TO RECORDS PERTAINING TO INDIVIDUALS

Appendix I—Exemptions

In the October 24, 1975, issue of the FEDERAL REGISTER (40 FR 49837), the Department of Transportation published a notice of proposed rulemaking which identified systems of records that the Department proposed to exempt from certain provisions of the Privacy Act, in accordance with sections 3 (j) and (k) of the Act (Pub. L. 93-579); 5 U.S.C. 522a (j) and (k). The Department's regulations are published at Part 10 of Title 49, Code of Federal Regulations. No com-

---

[1] Commissioner Washburn absent.

[1] Communications Improvement, Inc., licensee of Station WLBT(TV), and Brazos Broadcasting Company, licensee of Station KBTX-TV failed to comment in response to the Order to Show Cause. The Notice indicated that such failure to respond would be deemed consent by these parties to the modifications proposed in the Notice.

[1] See 40 FR 50276, October 29, 1975.

[2] At present, the following parties will be required to divest ownership interests by August 10, 1977:
a. KATS, Inc.
b. Eastern Oklahoma Television Co., Inc.
c. Glendive Broadcasting Co.
d. Capital City TV, Inc.
e. KWSO-TV Television, Inc.
f. Meyer Broadcasting Co.
g. North Platte Television, Inc.
h. California-Oregon Broadcasting, Inc.
i. United Broadcasting Co., Inc.

[3] While the listing in footnote 1 above is presumably complete, the present order encompasses all parties, listed or not, who are in fact subject to divestiture under the new rule. It is contemplated that the petitions for waiver of those parties not subject to divestiture and which have not been supplemented following the adoption of revisions to § 76.501 in this proceeding will be dismissed as moot.

V40237 DEC 9 75 XUM

ments on the proposal were received. One correction is made in the exemptions as proposed on October 24, 1975. As published, the first system exempted in Subsection D of Section II, Appendix I, read "Investigations Records System." This should have read "Personnel Security Record System." In addition, the exemption for the Personnel Security Record System published in Subsection B of Section II, Appendix I on October 2, 1975, (40 FR 45729) is deleted and subsequent paragraphs are renumbered accordingly.

Accordingly, with these changes, the proposed amendment is adopted as set forth below.

Effective date. This amendment is effective December 9, 1975.

Issued in Washington, D.C., on November 26, 1975.

WILLIAM T. COLEMAN,
Secretary of Transportation.

Paragraph (a) of § 10.61, *General exemptions*, is amended to read as follows:

§ 10.61 General exemptions.

(a) The Assistant Secretary for Administration, with regard to the Investigations Division, the Federal Aviation Administration, with regard to the police functions of the National Capital Airport Police, the U.S. Coast Guard, with regard to the Intelligence and Security Division, and the Federal Railroad Administration, with regard to the Alaska Railroad Special Agents, may exempt from any part of the Act and this part, except subsections (b), (c) (1) and (2), (e) (4) (A) through (f), (e) (6), (7), (9), (10) and (11), and (i) of the Act, and implementing §§ 10.33, 10.23 (a) and (b), 10.21(d) (1) through (6), 10.81, 10.83, and 10.85, any system of records, or portion thereof, which it maintains which consists wholly of:

(1) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status;

(2) Information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or

(3) Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

* * * * *

In Appendix I, *Exemptions*, is amended as follows:

(1) Section I, *General Exemptions*, is amended by adding a paragraph (c) and revising the last sentence, to read as follows:

I. *General exemptions.* * * *

c. Intelligence and Security Investigative Case Systems (DOT/CG 611), maintained by the Intelligence and Security Division, U.S. Coast Guard, at headquarters and district offices.

The purpose of these exemptions is to prevent the compromise or impairment of criminal investigations conducted by the Office of Investigations and Security, OST, the Airport Police Branches, and the Investigations and Security Division, USCG.

2. In section II, *Specific exemptions:*

a. Subsection A is amended to read as follows:

II. *Specific exemptions.* A. The following systems of records are exempt from subsection (c) (3) (Accounting of Certain Disclosures), (d) (Access to Records), (e) (4) (G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) of 5 USC 552a, to the extent that they contain investigatory material compiled for law enforcement purposes, in accordance with 5 USC 552a(k) (2):

1. Investigative Record System maintained by the Federal Aviation Administration at FAA Regional and Center Air Transportation Security Divisions, the Investigations and Security Division, Aeronautical Center; and Office of Investigations and Security, FAA Headquarters, Washington, D.C.

2. FHWA Investigations Case File System, maintained by the Office of Program Review and Investigations, Federal Highway Administration.

3. FHWA Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases, maintained by the Bureau of Motor Carrier Safety, Federal Highway Administration.

4. Recreational Boating and Law Enforcement Cases (DOT/CG 505), maintained by the Office of Boating Safety, U.S. Coast Guard.

5. Port Safety Reporting System—Individual Violation Histories (DOT/CG 561), maintained by the Office of Marine Environment and Systems, U.S. Coast Guard.

6. Marine Pollution Case Files (DOT/CG 583), maintained by the U.S. Coast Guard.

7. Merchant Vessel Casualty Reporting System (DOT/CG 590), maintained by the Office of Merchant Marine Safety, U.S. Coast Guard.

8. U.S. Merchant Seaman's Records (DOT/CG 589), maintained by the Office of Merchant Marine Safety, U.S. Coast Guard.

9. Intelligence and Security Investigative Case Systems (DOT/CG 611), maintained by the Office of Operations, U.S. Coast Guard.

10. Port Security Case Systems (DOT/CG 612), maintained by the Office of Operations, U.S. Coast Guard.

11. DOT/NHTSA Investigations of Alleged Misconduct or Conflict of Interest, maintained by the Associate Administrator for Administration, National Highway Traffic Safety Administration.

The purpose of these exemptions is to protect investigatory materials compiled for law enforcement purposes. Disclosure of such material would hamper law enforcement by prematurely disclosing the knowledge of illegal activity and the evidentiary basis for possible enforcement actions.

b. Subsection B is amended by deleting paragraph 1, renumbering paragraph 2 as paragraph 1, redesignating paragraphs 3 and 4 as 2 and 3 respectively, and by adding an undesignated paragraph at the end and revising the last sentence, to read as follows:

2. Administrative Action and Legal Enforcement System (DOT/FAA), maintained by the Chief Counsel, Federal Aviation Administration.

3. Investigations Record System, maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary.

The purpose of these exemptions is to prevent the compromise or impairment of law enforcement investigations by alerting individuals that they are the subject of investigation, and to prevent the disclosure of the identity of sources of information promised confidentiality, in accordance with 5 U.S.C. 552a(k)(2).

c. New subsections D, E, and F are added, to read as follows:

D. Those portions of the following systems of records consisting of investigatory material compiled for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, or access to classified information or used to determine potential for promotion in the armed services, are exempt from sections (c) (3) (Accounting of Certain Disclosures), (d) (Access to Records), (e) (4) (G), (H) and (I) (Agency Requirements), and (f) (Agency Rules) of 5 USC 552a to the extent that disclosure of such material would reveal the identity of a source who provided information to the Government under an express or, prior to September 27, 1975, an implied promise of confidentiality (5 USC 552a(k) (5) and (7)):

1. Personnel Security Record Systems, maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary.

2. Intelligence and Security Investigative Case System (DOT/CG 611), maintained by the Office of Operations, U.S. Coast Guard.

3. Officer Selection and Appointment System (DOT/CG 625), maintained by the Office of Personnel, U.S. Coast Guard.

4. Official Officer Service Records (DOT/CG 626), maintained by the Office of Personnel, U.S. Coast Guard.

5. Enlisted Recruiting Selection Record System maintained by the Office of Personnel, U.S. Coast Guard.

6. Officer, Enlisted, and Recruiting Selection Test Files (DOT/CG 628), maintained by the Office of Personnel, U.S. Coast Guard.

7. Enlisted Personel Record System, (DOT/CG 629), maintained by the Office of Personnel, U.S. Coast Guard.

8. Coast Guard Personnel Security Program (DOT/CG 633), maintained by the Office of Personnel, U.S. Coast Guard.

9. Official Coast Guard Reserve Service Record System (DOT/CG 676), maintained by the Office of Reserve, U.S. Coast Guard.

10. Investigative Record System, maintained by the Federal Aviation Administration at FAA Regional and Center Air Transportation Security Divisions; the Investigations and Security Division, Aeronautical Center; and Office of Investigations and Security, Headquarters, Washington, D.C.

The purpose of these exemptions is to prevent disclosure of the identities of sources who provide information to the government concerning the suitability, eligibility or qualifications of individuals for Federal civilian employment, contracts, access to classified information, or appointment or promotion in the armed services, and who are expressly or, prior to September 27, 1975, impliedly promised confidentiality (5 U.S.C. 552a(k) (5) and (7)).

E. Those portions of the following systems of records consisting of testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal Service are exempt from subsections (c) (3) (Accounting of Certain Disclosures), (d) (Access to Records), (e) (4) (G), (H) and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552a:

1. Officer, Enlisted and Recruiting Selection Test Files (DOT/CG 628), maintained by the Office of Personnel, U.S. Coast Guard.

2. Official Coast Guard Reserve Service Record System (DOT/CG 676), maintained by the Office of Reserve, U.S. Coast Guard.

The purpose of these exemptions is to preserve the value of these records as impartial measurement standards for appointment and promotion within the Federal service.

F. Those portions of the following systems of records which consist of information properly classified in the interest of national defense or foreign policy in accordance with 5 U.S.C. 552(b)(1) are exempt from sections (c)(3) (Accounting of Certain Disclosures), (d) (Access to Records), (e)(4) (G), (H) and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552:

1. Investigations Records System maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary.

2. Personnel Security Records System, maintained by the Office of Investigations and Security, Office of the Secretary.

The purpose of these exemptions is to prevent the disclosure of material authorized to be kept secret in the interest of national defense or foreign policy, in accordance with 5 U.S.C. 552(b)(1) and 552a(k)(1).

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Arapaho National Wildlife Refuge, Colorado

The following special regulation is issued and is effective on December 9, 1975.

§ 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

COLORADO

ARAPAHO NATIONAL WILDLIFE REFUGE

Sport fishing on the Arapaho National Wildlife Refuge, Colorado, is permitted from January 1 through May 31 and August 1 through December 31, 1976, inclusive, on the areas designated by signs as open to fishing. These open areas are delineated on maps available at refuge headquarters, Walden, Colorado 80480, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 2215, Salt Lake City, Utah 84111. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1976.

Dated: December 2, 1975.

V. CARROL DONNER,
Refuge Manager, Arapaho National Wildlife Refuge, Walden, Colorado.

[FR Doc.75-32984 Filed 12-8-75;8:45 am]

PART 33—SPORT FISHING

Pathfinder National Wildlife Refuge, Wyoming

The following special regulation is issued and is effective on December 9, 1975.

§ 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

WYOMING

PATHFINDER NATIONAL WILDLIFE REFUGE

Sport fishing on all areas of the Pathfinder National Wildlife Refuge, Wyoming, is permitted from January 1 through December 31, 1976, inclusive. These areas, comprising 16,807 acres, are delineated on maps available at refuge headquarters, Walden, Colorado 80480, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 2215, Salt Lake City, Utah 84111. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1976.

Dated: December 2, 1975.

V. CARROL DONNER,
Refuge Manager, Pathfinder National Wildlife Refuge, Walden, Colorado.

[FR Doc.75-32983 Filed 12-8-75;8:45 am]

PART 33—SPORT FISHING

Sand Lake National Wildlife Refuge, South Dakota

The following special regulation is issued and is effective on December 9, 1975.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

SOUTH DAKOTA

SAND LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Sand Lake National Wildlife Refuge, South Dakota is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 150 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions;

(1) The open season for sport fishing on the refuge extends from January 1 through December 31, 1976, inclusive.

(2) The use of boats is not permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1976.

WILLIAM C. BAIR,
Refuge Manager, Sand Lake National Wildlife Refuge, Columbia, South Dakota 57433.

DECEMBER 1, 1975.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

INCOME TAX

Change in Corporate Tax Rates and Increase in Corporate Surtax Exemption

Correction

In FR Doc. 75-31823 appearing at page 54582 in the issue of Tuesday, November 25, 1975, make the following changes:

1. On page 54582, column two, in the second line of the authority citation in § 1.11, after "(69 Stat. 114);" insert "sec. 2, Tax Rate Extension Act 1956 (70 Stat. 66);" and in the tenth line of the same authority citation change the word "Aate" to "Rate".

2. On page 54583, column one, in the table in § 1.21-1(n) *Example* (7) the heading should read:

1974 TENTATIVE TAX

and the fourth entry should be corrected to read:

Additional tax on $4,167	
6 percent of $4,167	250

3. On page 54583, column two, in the table in § 1.21-1(n) *Example* (7) the tenth line from the top of the page which now reads:

22 percent of $95,000	20,000

should be corrected to read:

22 percent of $95,000	20,900

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Part 2600]

ALASKA NATIVE CLAIMS

Proposed Clarifications of Procedure for Miscellaneous Selections

The Bureau of Land Management is considering amending the miscellaneous selections subpart of the regulations covering Alaska Native selections to clarify the procedures under which miscellaneous selections will be made by Alaska Natives. These amendments have been discussed with the Alaska Native community and other inetrested groups both in Washington and Alaska prior to their publication here as proposed rulemaking. This proposed rulemaking is issued pursuant to the authority granted the Secretary of the Interior to issue and publish such regulations as may be necessary to carry out the provisions of the Alaska Native Claims Settlement Act (85 Stat. 688), as granted in section 25 of that Act.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

In accordance with Department's policy of public participation in rulemaking, interested parties may submit written comments, suggestions, or objections with respect to the proposed rules to the Director (210), Bureau of Land Management, Department of the Interior, Washington, D.C., on or before January 9, 1976.

Copies of comments, suggestions, or objections made pursuant to this notice will be available for public inspection at the foregoing address during regular working hours (7:45 a.m.—4:15 p.m.).

It is therefore proposed to revise 43 CFR Part 2600 in the manner set forth below.

1. Section 2650.4–7 is amended as follows: A new sentence is added at the end of paragraph (c)(1) and paragraph (d) is amended to read as follows:

§ 2650.4–7 Public easements.

* * * * * * *

(c)(1) * * * However, the Secretary shall not terminate a public easement reserved along the marine coastline solely because of the absence of public use.

* * * * * * *

(d) The State and the Federal-State Land Use Planning Commission shall be afforded 30 days after notice by the Secretary to make recommendations with respect to the inclusion of public easements in any conveyance.

2. Section 2650.7 is amended by adding a new paragraph (d) to read as follows:

§ 2650.7 Selection limitations.

* * * * * * *

(d) For all land selections made under the Act, the decision of the Bureau of Land Management proposing to convey shall be served on all parties of record who claim to have a property interest in land affected by such determination, the appropriate regional corporation, and any Federal agency of record. Notice of the decision shall also be published in the Federal Register once and in one or more newspapers of general circulation once a week for 4 consecutive weeks by the Department.

3. The table of sections for Subpart 2653 is amended by redesignating § 2653.9 as § 2653.11 and adding new §§ 2653.9 and 2653.10 as follows:

Subpart 2653—Miscellaneous Selections

Sec.
2653.9 Regional selections.
2653.10 Excess selections.
2653.11 Conveyance reservations.

4. Section 2653.0–3(c) is amended by deleting the word "and".

5. Section 2653.0–3 is amended by adding new paragraphs (e) and (f) as follows:

§ 2653.0–3 Authority.

* * * * * * *

(e) Title to the regional corporations for lands selected, if any remain, pursuant to section 14(h)(8) of the Act; and

(f) Title to the subsurface estate to the regional corporations of lands conveyed under paragraphs (b) and (d) of this section and to those lands conveyed under paragraph (c) of this section which are not located in a National Wildlife Refuge.

6. Section 2653.0–5 (b) is amended by adding the following sentences at the end thereof as follows:

§ 2653.0–5 Definitions.

* * * * * * *

(b) * * * However, subsistence activity will not disqualify a historical place from consideration if qualifying primary historical or cultural values can be shown to be associated with the place. A historical place may consist of the structural remains of past activity or distinctive natural features associated with historical events, persons or sustained activities; it will include, however, only the acreage which is essential for the preservation of primary historic features.

* * * * * * *

7. Section 2653.3 is revised to read as follows:

§ 2653.3 Lands available for selection.

(a) Selection may be made for existing cemetery sites or historical places, Native groups, corporations formed by the Natives residing in Sitka, Kenai, Juneau, and Kodiak, and for primary places of residence, from any unappropriated and unreserved lands which the Secretary may withdraw for these purposes: *Provided*, That National Wildlife Refugee System lands and National Forest lands may be made available as provided by section 14(h)(7) of the Act and the regulations in this subpart. Selections for these purposes may also be made from any unappropriated and unreserved lands which the Secretary may withdraw from lands formerly withdrawn and not selected under section 16 of the Act and after December 18, 1975, from lands formerly withdrawn under section 11(a)(1) or 11(a)(3) and not selected under sections 12 or 19 of the Act.

(b) After July 1, 1976, selection of the lands allocated pursuant to § 2653.1(b), shall be made from any lands previously withdrawn under sections 11 or 16 of the act which are not otherwise appropriated. If the public lands withdrawn within the region pursuant to sections 11 or 16 of the act, and not otherwise appropriated, are insufficient for the selection of the full entitlement of the regional corporations pursuant to § 2653.1(b), then three times the amount of the entitlement which cannot be satisfied from lands previously withdrawn pursuant to sections 11 or 16 of the act will be withdrawn pursuant to section 14(h) of the act.

(c) A withdrawal made pursuant to section 17(d)(1) of the Act which is not part of the Secretary's recommendation to Congress of December 18, 1973, on the four national systems shall not preclude a withdrawal pursuant to section 14(h) of the Act.

8. Section 2653.4 is revised to read as follows:

§ 2653.4 Termination of selection period.

Except as provided in § 2653.10, applications for selections under this subpart will be rejected after all allocated lands, as provided in § 2653.1, have been exhausted, or if the application is received after the following dates, whichever occurs first:

(a) As to primary place of residence—December 18, 1973.

(b) As to all recipients described in sections 14(h)(1), (2), and (3) of the act—July 1, 1976.

(c) As to all recipients under section 14(h)(8) of the act and § 2653.1(b)—December 18, 1977.

9. Section 2653.5 is revised to read:

§ 2653.5 Cemetery sites and historical places.

(a) The appropriate regional corporation may apply to the Secretary for the conveyance of existing cemetery sites or historical places pursuant to section 14(h) of the act. The Secretary may give favorable consideration to these applications: *Provided*, That the Secretary determines that the criteria in these regulations are met: *And provided further*, That the regional corporation agrees to accept a covenant in the conveyance that these cemetery sites or historical places will be maintained and preserved solely as cemetery sites or historical places by the regional corporation, in accordance with the provisions for conveyance reservations in § 2653.11.

(b) A historical place may be granted in a National Wildlife Refuge or National Forest unless, in the judgment of the Secretary, the events can be commemorated by the conveyance of lands outside the refuge or forest or if the qualities of the site from which it derives its particular value and significance as a historical place can be found in an alternative site outside the refuge or forest, or if the Secretary determines that the conveyance could have a substantial detrimental effect on (1) a fish or wildlife population, (2) its habitat, (3) the management of such population or habitat, or (4) access by a fish or wildlife population to a critical part of its habitat.

(c) Although the existence of a cemetery site or historical place and a proper application for its conveyance create no valid existing right, they operate to segregate the land from all other forms of appropriation under the public land laws. Conveyances of lands reserved for the National Wildlife Refuge System made pursuant to this subpart are subject to the provisions of section 22(g) of the Act and section 2650.4–6 as though they were conveyances to a village corporation.

(d) For purposes of evaluating and determining the eligibility of properties as historical places, the quality of significance in Native history or culture shall be considered to be present in places that possess integrity of location, design, setting, materials, workmanship, feeling and association, and:

(1) That are associated with events that have made a significant contribution to the history of Alaskan Indians, Eskimos or Aleuts, or

(2) That are associated with the lives of persons significant in the past of Alaskan Indians, Eskimos or Aleuts, or

(3) That possess outstanding and demonstrably enduring symbolic value in the traditions and cultural beliefs and practices of Alaskan Indians, Eskimos or Aleuts, or

(4) That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or

(5) That have yielded, or are demonstrably likely to yield information important in prehistory or history.

(e) Criteria considerations: Ordinarily, cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible as a historical place unless they fall within one of the following categories:

(1) A religious property deriving primary significance from architectural or artistic distinction or historical importance;

(2) A building or structure removed from its original location but which is the surviving structure most importantly associated with a historic person or event;

(3) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his productive life;

(4) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events;

(5) A reconstructed building when accurately executed in a suitable environment and preserved in a dignified manner as part of a restoration master plan and when no other building or structure with the same association has survived;

(6) A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or

(7) A property achieving significance within the past 50 years if it is of exceptional importance.

(f) Applications by a regional corporation under section 14(h)(1) of the Act for conveyance of existing cemetery sites or historical places within its boundaries shall be filed with the proper office of the Bureau of Land Management in accordance with § 2650.2(a) of this chapter. The regional corporation shall include as an attachment to its application for a historical place a statement describing the events that took place and the qualities of the site from which it derives its particular value and significance as a historical place. In making the application, the regional corporation should identify accurately and with sufficient specificity the size and location of the site for which the application is made as an existing cemetery site or historical place to enable the Bureau of Land Management to segregate the proper lands. The land shall be described in accordance with § 2650.2(e) of this chapter.

(g) Upon receipt of an application for an existing cemetery site or historical place, the Bureau of Land Management shall segregate from all other appropriation under the public land laws the land which it determines, in its discretion, adequately encompasses the site described in the application but is not less than three times the site identified in the application if the land is available.

(h) Notice of filing of such application specifying the regional corporation, the size and location of the segregated lands encompassing the site for which application has been made, the date of filing, and the date by which any protest of the application must be filed shall be published once in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Department. The Bureau of Land Management shall then forward the application to the Director, Juneau Area Office, Bureau of Indian Affairs, for investigation and report and supply a copy to the National Park Service. When an application pertains to lands within a National Wildlife Refuge or National Forest, the Bureau of Land Management shall also forward informational copies of the application and the size and location of segregated lands to the agency or agencies involved.

(i) If, during its investigation, the Bureau of Indian Affairs finds that the location of the site as described in the application is in error, it shall notify the applicant of such error. The applicant shall have 30 days from receipt of such notice to file with the Bureau of Land Management an amendment to its

V40237 DEC 9 75 XUM

application with respect to the location of the site. Upon acceptance of such amendment the Bureau of Land Management shall reprocess the application, including segregation of lands and publication of notice.

(j) The Bureau of Indian Affairs shall identify on a map and mark on the ground, including individual gravesites or other important items, the location and size of the site or place with sufficient clarity to enable the Bureau of Land Management to locate on the ground said site or place. The Bureau of Indian Affairs, after consultation with the National Park Service and, in the case of refuges and forests, the agency or agencies involved, shall certify as to the existence of the site or place and that it meets the criteria in this subpart.

(1) *Cemetery Sites.* The Bureau of Indian Affairs shall certify specifically that the site is the burial place of one or more Natives. The Bureau of Indian Affairs shall determine whether the cemetery site is in active or inactive use, and if active, it shall estimate the degree of use by Native groups and villages in the area which it shall identify.

(2) *Historical Places.* The Bureau of Indian Affairs shall describe the events that took place and qualities of the site which give it particular value and significance as a historical place.

(k) The Bureau of Indian Affairs shall submit its report and certification along with the written comments and recommendations of the National Park Service and any other Federal agency, to the Bureau of Land Management. If the site meets the requirements set forth in this section and if the land is available, the Bureau of Land Management shall issue a decision to convey. However, in cases of significant differences between the report and certification of the Bureau of Indian Affairs and the comments and recommendations of other Federal agencies, the State Director, Bureau of Land Management shall submit the record, including a land status report, to the Secretary for resolution of any conflicts. If the land is available for that purpose, the Secretary shall make his determination to convey or not to convey the site to the applicant.

(l) The decision of the Bureau of Land Management shall be served on the applicant and all interested parties of record in accordance with the provisions of 43 CFR Part 4, Subpart J. The decison of the Bureau of Land Management shall become final unless appealed to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J. Any agency adversely affected by the certification of BIA or the decision of the Bureau of Land Management may appeal the matter to the Alaska Native Claims Appeals Board. After a decision to convey an existing cemetery site or historical place has become final, the Bureau of Land Management shall adjust the segregation of the lands to conform with said conveyance.

(m) For inactive cemeteries, the boundaries of such cemetery sites shall include an area encompassing all actual gravesites including a reasonable buffer zone of not more than 66 feet. For active cemeteries, the boundaries of such sites shall include an area of actual use and reasonable future expansion of not more than 10 acres, but the BLM in its discretion may include more than 10 acres upon a determination that special circumstances warrant it. For historical places, the boundaries shall include an area encompassing the actual site with a reasonable buffer zone of not more than 330 feet.

(n) The regulations in this subpart shall take precedence over any other regulations, wherever found, with regard to the certification and conveyance of cemetery sites and historical places under this Act.

10. Section 2653.6 is revised to read:

§ 2653.6 Native groups.

(a) *Eligibility.* (1) The head or any authorized representative of a Native group incorporated pursuant to section 14(h)(2) of the Act may file on behalf of the group an application for a determination of its eligibility under said section of the Act. Such application shall be filed in duplicate with the appropriate officer, Bureau of Land Management, prior to February 18, 1976, in accordance with § 2650.2(a) of this chapter. Upon serialization of the application, the Bureau of Land Management office will forward a copy of such application to the Director, Juneau Area Office, Bureau of Indian Affairs, who shall investigate and report the findings of fact required to be made herein to the Bureau of Land Management with a certification thereof. A copy of an application by a group located within a National Wildlife Refuge or a National Forest will be furnished to the appropriate agency administering the area.

(2) Each application must identify the section, township, and range in which the Native group is located, and must be accompanied by a list of the names of the Native members of the group, a listing of permanent improvements and periods of use of the locality by members, a conformed copy of the group's article of incorporation, and the regional corporation's concurrence and recommendation under § 2653.2(b).

(3) Notice of the filing of such application specifying the date of such filing, the identity and location of the Native group, and the date by which any protest of the application must be filed shall be prepared by the Bureau of Land Management and shall be published once in the FEDERAL REGISTER and in one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Department. Any protest to the application shall be filed with the Bureau of Land Management office in which the application has been filed within the time specified in the notice. The Bureau of Land Management will immediately furnish the Bureau of Indian Affairs with a copy of any protest received.

(4) The Bureau of Indian Affairs shall investigate and determine whether each member of a Native group formed pursuant to section 14(h)(2) of the Act is enrolled pursuant to section 5 of the Act. The Bureau of Indian Affairs shall determine whether the members of the Native group actually reside in and are enrolled to the locality specified in its application: *Provided*, That children who are members of the group enrolled thereto and who are temporarily residing elsewhere for purposes of education may be included in such determination. The Bureau of Indian Affairs shall specify the number and names of Natives who actually reside in and are enrolled to the locality and it shall further determine whether the members of the Native group constitute the majority of the residents of the locality where the group resides. The Bureau of Indian Affairs shall determine and identify the exterior boundaries of the Native group's locality and the location of all those permanently affixed structures of the Native group used as dwelling houses.

(5) The Native group shall have had on December 18, 1971, an identifiable physical location. The members of the group must have used the group locality as a place where they actually live in permanently affixed structures used as dwelling houses at least one full season per year and have done so each year since December 18, 1971. The group must be distinguishable from nearby communities and it shall not be considered an eligible Native group if it exists within a larger community context.

(6) The Bureau of Indian Affairs shall issue its decision, containing its findings of fact required to be made herein and its determination of the eligibility of the Native group, except it shall issue a decision of ineligibility when it is notified by the Bureau of Land Management that the land is unavailable for selection by such Native group. It shall send a copy thereof by certified mail to the Bureau of Land Management, the Native group, its regional corporation and any party of record.

(7) Appeals concerning the eligibility of a Native group may be made to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J.

(b) *Selections.* (1) Native group selections shall not exceed the amount recommended by the regional corporation or 320 acres for each Native member of a group, or 7,680 acres for each Native group, whichever is less. Any acreage selected in excess of that number shall be identified as alternate selections and shall be numerically ordered to indicate selection preference. Native groups will not receive land benefits unless the land which is occupied by their permanently affixed structures used as dwelling houses, or in the case where such land is privately owned (not State or Federally owned), the land which is contiguous to and immediately surrounds the land occupied by their permanently affixed structures used as dwelling houses is available pursuant to section 14(h) of the Act. Public lands which may be available for this purpose are set forth in § 2653.3 (a) and (c). Conveyances of lands reserved for the National Wildlife Refuge System made pursuant to this part are subject to the provisions of section 22(g) of the Act and § 2650.4–6 of this chapter as though they were conveyances to a village corporation.

(2) Upon receipt of the applications of a Native group for a determination of its eligibility under section 14(h)(2) of the Act, the Bureau of Land Management shall segregate the land encompassed within the group locality, up to three times the expected entitlement, from land available for that purpose pursuant to § 2653.6(b)(1). However, segregation of land for Native groups whose dwelling structures are located outside but adjacent to a National Wildlife Refuge or National Forest shall not include such reserved land, unless the Native group's dwelling structures are located on land excepted from the Kodiak National Wildlife Refuge pursuant to Public Land Order No. 1634 (F.R. Doc. 58–3696, filed May 16, 1958).

(3) An examiner for the Bureau of Indian Affairs shall visit the locality of the group to determine its physical location. The examiner shall recommend to the Bureau of Land Management the manner in which the segregation should be modified to encompass the residences of as many members as possible while allowing for inclusion of the land determined by the Bureau of Indian Affairs examiner to be most intensively used by members of the Native group. The recommended segregation must be contiguous and as compact as possible. The Bureau of Land Management may segregate the lands accordingly provided such lands are otherwise available in accordance with §§ 2653.6(b)(1) and 2653.6(b)(2). If the Bureau of Land Management finds the lands are unavailable for selection by a Native group, it shall notify the Bureau of Indian Affairs.

(4) Selections shall be made from lands segregated for that purpose and shall be filed prior to July 1, 1976. Selections shall be contiguous and taking into account the situation and potential uses of the lands involved, the total area selected shall be reasonably compact except where separated by lands which are unavailable for selection. The total area selected will not be considered to be reasonably compact if (i) it excludes other lands available for selection within its exterior boundaries; or (ii) an isolated tract of public land of less than 640 acres remains after selection. The lands selected shall be in whole sections where they are available unless the exhaustion of the acreage which the group may be entitled to select does not permit the selection of a whole section and shall include all available lands in less than whole sections. Lands selected shall conform as nearly as practicable to the United States land survey system.

(5) A Native group whose eligibility has not been finally determined may file its land selections as if it were determined to be eligible. The Bureau of Land Management shall release from segregation the lands not selected and shall continue segregation of the selected lands until the lands are conveyed or the group is finally determined to be ineligible. However, in the case of a group determined to be ineligible by the Alaska Native Claims Appeals Board, the segregation shall be continued for a period of 60 days from the date of such decision.

(6) Where any conflict in land selection occurs between any eligible Native groups, the Bureau of Land Management shall request the appropriate regional corporation to recommend the manner in which such conflict should be resolved.

(7) The Bureau of Land Management shall issue a decision on the selection of a Native group determined to be eligible and shall serve a copy of such decision by certified mail on the Native group, its regional corporation and any party of record.

(8) Appeals from the Bureau of Land Managemcnt decision on the selection by a Native group under this section shall be made to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J.

11. Section 2653.7 is amended by adding a new paragraph (c) to read as follows:

§ 2653.7 Sitka-Kenai-Juneau-Kodiak selections.

* * * * * *

(c) Appeals may be made under section 14(h)(3) of the Act only with respect to the Bureau of Land Management's decisions with respect to conveyance of land for that purpose. Appeals shall be made to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J.

12. Section 2653.8 is amended by adding a new § 2653.8–3 as follows:

§ 2653.8 Primary place of residence.

* * * * *

§ 2653.8–3 Appeals.

Appeals from decisions made by the Bureau of Land Management on applications filed pursuant to section 14(h)(5) of the Act shall be made to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J.

§ 2653.9 [Redesignated]

13. Section 2653.9 is redesignated as § 2653.11.

14. Section 2653.11(b) is revised to read as follows:

§ 2653.11 Conveyance reservations.

* * * * *

(b) In addition to the reservations provided in paragraph (a) of this section, conveyance for cemetery sites or historical places will contain a covenant running with the land providing that (1) the regional corporation shall not authorize mining or mineral activity of any type; nor shall it authorize any use which is incompatible with or is in derogation of the values of the area as a cemetery site or historical place (standards for determining uses which are incompatible with or in derogation of the values of the area are found in relevant portions of 36 CFR 800.9 (1974)); and (2) that the United States reserves the right to seek enforcement of the covenant in an action in equity. The covenant placed in this subsection may be released by the Secretary, in his discretion, upon application of the regional corporation grantee showing that extraordinary circumstances of a nature to warrant the release, have arisen subsequent to the conveyance.

* * * * * *

15. A new § 2653.9 is inserted in lieu of the redesignated § 2653.9 to read as follows:

§ 2653.9 Regional selections.

(a) Applications by a regional corporation for selection of land within its boundaries under section 14(h)(8) of the Act shall be filed with the proper office of the Bureau of Land Management in accordance with § 2650.2(a).

(b) A regional corporation may select a total area in excess of its entitlement to ensure that it will obtain its entitlement in the event of any conflicts. Any acreage in excess of its entitlement shall be identified as alternate selections and shall be numerically ordered on a section by section basis to indicate selection preference.

(c) Selections need not be contiguous but must be made along section lines in reasonably compact tracts of at least 5,760 acres, not including any unavailable land contained therein. The exterior boundaries of such tracts shall be in linear segments of not less than two miles in length, except where adjoining unavailable lands or where shorter segments are necessary to follow section lines where township lines are offset along standard parallels caused by the convergence of the meridians. However, selected tracts may contain less than 5,760 acres where there is good oause shown for such selection, taking into consideration good land management planning and principles for the potentially remaining public lands, and which would not leave unduly fragmented tracts of such public lands. Each tract selected shall not be considered to be reasonably compact if (1) it excludes other lands for selection within its exterior boundaries, or (2) an isolated tract of public land of less than 1,280 acres remains after selection of the total entitlement. Regional corporations shall not be precluded from selecting less than 5,760 acres where the entire tract available for selection constitutes less than 5,760 acres. Selection shall conform as nearly as practicable to the United States land survey system.

(d) Notice of the filing of such selections, including the date by which any protest of the selection should be filed, shall be published once in the FEDERAL

V 40 237 DEC 9 75 XUM

REGISTER and one or more newspapers of general circulation in Alaska once a week for three consecutive weeks by the Department. Any protest to the application should be filed in the Bureau of Land Management office in which such selections were filed within the time specified in the notice.

(e) Appeals from decisions made by the Bureau of Land Management with respect to such selections shall be made to the Alaska Native Claims Appeals Board in accordance with 43 CFR Part 4, Subpart J. A decision of the Bureau of Land Management shall become final 30 days from the date of the decisions in the absence of any appeal therefrom.

A new § 2653.10 is added to read as follows:

§ 2653.10 Excess selections.

Where land selections by a regional corporation, Native group, any of the four named cities, or a Native pursuant to section 14(h)(1), (2), (3), or (5) exceed the land entitlement, the Bureau of Land Management may request such corporation to indicate its preference among lands selected.

ROYSTON C. HUGHES,
Assistant Secretary of the Interior.

DECEMBER 4, 1975.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 999]

IMPORTED INSHELL WALNUTS

Proposed Quality Requirements

Notice is hereby given that the Department is proposing to amend the regulation governing imports of walnuts (7 CFR 999.100; 40 FR 29262) to revise the quality requirements for imported inshell walnuts, and to make a minor editorial change. This regulation is effective pursuant to section 8e (7 U.S.C. 608e-1) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "act".

Section 8e of the act requires the Secretary of Agriculture to issue, after reasonable notice, quality restrictions on imported walnuts, which are the same as, or comparable to, those imposed upon domestic walnuts under a Federal marketing order (7 CFR Part 984). The quality requirements for imported inshell walnuts under the import regulation are U.S. No. 2. These were the requirements imposed upon the domestic walnuts under the Federal marketing order until they were modified effective November 30, 1975.

U.S. No. 2, as prescribed in the United States Standards for Walnuts (Juglans regia) in the Shell (29 FR 12865; 35 FR 10840), allows a total tolerance of 20 percent, by count, for internal grade defects, but not more than 10 percent of the walnuts may be damaged by mold or insects or seriously damaged by other means, of which not more than 5 percent may be damaged by insects. No part of any tolerance is allowed for walnuts containing live insects. Examples of internal grade defects are mold, shriveling, rancidity, decay, dark discoloration, present or evidence of insects inside the shell, and uncured kernels which are wet and rubbery, not firm and crisp.

The November 30, 1975, modification in the domestic requirements reduced the total tolerance for internal grade defects to a maximum of 15 percent, and the tolerance included within the total tolerance for damage by mold or insects or serious damage by other means to a maximum of 8 percent. The tolerance of 5 percent for damage by insects and the prohibition on live insects were not changed. Therefore, it is proposed to revise the present quality requirements on imported inshell walnuts so that they are the same as the modified requirements imposed upon domestic walnuts under the Federal marketing order.

It is also proposed to add the paragraph heading "Reconditioning prior to importation" at the beginning of paragraph (d). It was omitted in the August 15, 1975, amendment of the regulation (40 FR 29263).

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than December 31, 1975. All written submissions made pursuant to this notice should be in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is to revise § 999.100(b)(1) and to insert a heading at the beginning of paragraph (d) of that section. As so revised, paragraphs (b)(1) and (d) read as follows:

§ 999.100 Regulation governing imports of walnuts.

* * * * *

(b) * * *

(1) All inshell walnuts shall be of a quality equal to or better than the requirements for U.S. No. 2 and "baby" size as prescribed in the United States Standards for Walnuts (Juglans regia) in the Shell (§§ 51.2945-51.2966) of this title, except that not more than a total of 15 percent, by count, of the walnuts may be damaged by internal grade defects including not more than 8 percent which are damaged by mold or insects or seriously damaged by other means, of which not more than 5 percent may be damaged by insects, but no part of any tolerance shall be allowed for walnuts containing live insects; or

* * * * *

(d) *Reconditioning prior to importation.* Nothing contained in this section shall be deemed to preclude reconditioning walnuts prior to importation, in order that such walnuts may be made eligible to meet the grade and size regulations prescribed in paragraph (b) of this section.

* * * * *

Dated: December 4, 1975.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 75-GL-67]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Phillipsburg, Ohio.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018. All communications received on or before January 8, 1976 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018.

An instrument approach procedure has been developed for the Myers Airport, Phillipsburg, Ohio.

Controlled airspace is required to protect the procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is added:

PHILLIPSBURG, OHIO

That airspace extending upward from 700 feet above the surface within a 6.5 mile radius of the Myers Airport (latitude 39°54'-40" N., longitude 84°24'00" W.); excluding that portion which overlies the Dayton, Ohio and Troy, Ohio transition areas.

This amendment is proposed under the authority of Section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of Section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Illinois, on November 19, 1975.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

[FR Doc.75-33000 Filed 12-8-75;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 75-WA-22]

FEDERAL AIRWAY SEGMENT

Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would realign the south alternate of V-4 between Seattle, Wash., and Yakima, Wash.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Northwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108. All communications received on or before January 8, 1976 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independent Avenue SW., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would realign the south alternate of V-4 between Seattle, Wash., and Yakima, Wash., via INT Seattle 163°T (141°M) and McChord, Wash., 099°T (077°M) radials and INT McChord 099°T (077°M) and Yakima 305°T (284°M) radials.

The 084°T (062°M) radial of the Olympia, Wash., VORTAC, which is part of the south alternate of V-4 between Seattle and Yakima, has become unusuable.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on December 2, 1975.

EDWARD J. MALO,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.75-33001 Filed 12-8-75;8:45 am]

Federal Highway Administration

[49 CFR Part 393]

[Docket No. MC-53; Notice No. 75-25]

AUTOMATIC DEVICE FOR REDUCING FRONT-WHEEL BRAKING EFFORT ON ALL COMMERCIAL VEHICLES

Proposed Rulemaking

● Purpose. The purpose of this document is to allow public comment on a proposed rule change which would permit use of automatic front brake limiting devices on vehicles equipped with brake systems which do not utilize compressed air. ●

An amendment to § 393.48 of the Federal Motor Carrier Safety Regulations (49 CFR 393.48) is being considered which would allow the operation in interstate or foreign commerce of a motor vehicle having brake systems that do not utilize compressed air to have automatic devices to reduce front-wheel braking effort under certain limitations. Several portions of this section are being rewritten to provide more clarity.

This proposal stems from a petition filed by Wagner Electric Corporation (Wagner), a manufacturer of commercial motor vehicle brake systems. Wagner refers to the most recent revision of § 393.48 (Notice 74-12, 39 FR 26906 July 24, 1974), which permitted the use of automatic devices to reduce front-wheel braking effort under certain circumstances on vehicles with brake systems utilizing compressed air in any manner.

Wagner maintains that metering valves are available for hydraulic brake systems which reduce pressure to the front brakes until certain conditions of loading are met. These valves, according to Wagner, should reduce front-wheel lockup and skid in low decleration stops on low friction surfaces. Also, Wagner contends that wear on the front brakes should be reduced because of the decreased workload during normal stopping.

In correspondence with the Bureau of Motor Carrier Safety, Wagner has asked that we consider revision of 49 CFR 393.48 to clarify the prohibition against front-wheel braking force reduction.

It is concluded that the petition contains adequate justification for rulemaking, and that all interested persons should be given the opportunity to comment on a change in § 393.48 similar to that suggested by the petitioner. Accordingly, it is proposed that § 393.48 (b) (1), (2) and (c) of the Federal Motor Carrier Safety Regulations (Subchapter B in Chapter III of Title 49, CFR) be revised to read as follows:

§ 393.48 Brakes to be operative.

* * * * *

(b) *Devices to reduce or remove front-wheel braking effort.* * * *

(1) *Manually-operated devices.* A manually operated device to reduce or remove the front-wheel braking effort must not be—

(i) Installed in a bus, truck, or truck tractor manufactured on or after March 1, 1975; or

(ii) Used in the reduced mode except when the vehicle is operating under adverse road conditions such as wet, snowy, or icy roads.

(2) *Automatic devices.* An automatic device to reduce the front-wheel braking effort must not—

(i) Be operable by the driver except upon application of the control that activates the braking system; and

(ii) Reduce the braking force when the pressure that transmits brake control application forces exceeds—

(*a*) The vehicle's air compressor cut-in pressure; or

(*b*) 85 percent of the maximum system pressure in the case of vehicles not utilizing compressed air.

(c) *Towed vehicle.* Paragraph (a) of this section does not apply to—

(1) A disabled vehicle being towed; or

(2) A vehicle being towed in a driveaway-towaway operation which is exempt from the general rule of § 393.42 under paragraph (b) of that section.

Interested persons are invited to submit written data, views, or arguments pertaining to this proposal.

All comments submitted should refer to the docket number and notice number appearing at the top of this document. They should be submitted in three copies to the Bureau of Motor Carrier Safety, Federal Highway Administration, U.S. Department of Transportation, Washington, D.C. 20590. All comments received before the close of business on March 12, 1976, will be considered before further action is taken. Comments will be available for examination in public docket room of the Bureau of Motor Carrier Safety, Room 3401, 400 Seventh Street SW., both before and after the closing date for comments.

This notice of proposed rulemaking is issued under the authority of section 204 of the Interstate Commerce Act, as amended (49 U.S.C. 304), section 6 of the Department of Transportation Act (49 U.S.C. 1655), and the delegations of authority by the Secretary of Transportation and the Federal Highway Administration at 49 CFR 1.48 and 389.4, respectively.

Issued on November 17, 1975.

ROBERT A. KAYE,
Director, Bureau of Motor Carrier Safety.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20637; FCC 75-1286]

[47 CFR Parts 89, 91]

INTRA-URBAN PASSENGER MOTOR CARRIERS

Clarification of Frequency Loading Criteria

In the matter of amendment of Parts 89 and 91 of the rules to clarify the fre-

V 40 237 DEC 9 75 XUM

quency loading criteria for intra-urban passenger motor carriers in the 470–512 MHz band, Docket No. 20637.

1. In the Fourth Report and Order in Docket 18261, released November 20, 1973, (43 FCC 2d 949), we, inter alia, increased the loading standard for the intra-urban passenger carriers to 150 mobiles units per frequency pair in the 470–512 MHz band. Our intention was to apply this loading standard to all passenger motor carriers, but we inadvertently amended only the rules which govern the Motor Carrier Radio Service. However, transit systems operated by governmental entities may also be licensed in the Local Government Radio Service, if they are operated by governmental entities, or in the Business Radio Service if they are commercial enterprises.

2. The loading criteria in these other services are much lower (70 and 90 mobiles per frequency pair, respectively). There is obviously no difference in the operation of radio by carriers whether licensed in the Motor Carrier, Local Government or in the Business Radio Services. However, because we have not incorporated the 150 loading requirement into the rules governing the latter two services, uncertainty (because of the obvious conflict) exists.

3. Accordingly, it is necessary that we amend our rules to conform with our original intention, remove uncertainty and establish single uniform frequency loading criteria for intra-urban passenger motor carriers in the 470–512 MHz band. We are, therefore proposing amendments to §§ 89.123 and 91.114 to conform these rules to § 93.114.

4. The proposed rule amendments are issued under sections 4(i) and 303(r) of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before February 11, 1976, and reply comments on or before March

11, 1976. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commisison may also take into account other relevant informtion before it, in addition to the specific comments invited by this notice.

5. In accordance with the provisions of § 1.419 of the Commission's rules, an original and eleven copies of all statements, briefs, or comments filed shall be furnished the Commisison. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Adopted: November 25, 1975.

Released: December 2, 1975.

FEDERAL COMMUNICATIONS COMMISSION,[1]
VINCENT J. MULLINS,
Secretary.

Parts 89 and 91 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

1. In § 89.123, Note 2 following paragraph (c) is amended to read as follows:

§ 89.123 Frequencies in the band 470.512 MHz.

* * * * * * *

(c) * * *

2. The channel loading is 50 units, except that for channels primarily used in connection with the operation of buses, street cars, and other intra-urban masstransit (passenger carrying) vehicles, the channel loading is 150 units. A unit is defined as one vehicular mobile unit or two hand carried transmitter-receivers. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency. Channel capacity may be reached either by the requirements of a single licensee or by several users sharing a channel. Until a channel is loaded to capacity it will be available for assignment to other users in the same area. A frequency pair may be reassigned at distances 40 miles (20 miles for Channel 15, Chicago; Channel 20, Philadelphia and Channel 17, Washington) or more from the location of base stations authorized on that pair without reference to loading at the point of original installation. Following authorization, the licensee shall notify the Commission either during or at the close of the 8 month period of the number of units in operation.

2. In § 91.114, Note 2 following paragraph (f) is amended to read as follows:

§ 91.114 Frequencies in the band 470–512 MHz.

* * * * * * *

(f) * * *

2. The channel loading is 90 units, except that for channels primarily used in connection with the operation of buses, street cars, and other intra-urban mass transit (passenger carrying) vehicles, the channel loading is 150 units. A unit is defined as one vehicular mobile unit or three hand carried transmitter-receivers. Loading standards will be applied in terms of the number of units actually in use or to be placed in use within 8 months following authorization. A licensee will be required to show that an assigned frequency pair is at full capacity before it may be assigned a second or additional frequency. Channel capacity may be reached either by the requirements of a single licensee or by several users sharing a channel. Until a channel is loaded to capacity it will be available for assignment to other users in the same area. A frequency pair may be reassigned at distances 40 miles (20 miles for Channel 15, Chicago; Channel 20, Philadelphia and Channel 17, Washington) or more from the location of base stations authorized on that pair without reference to loading at the point of original installation. Following authorization, the licensee shall notify the Commission either during or at the close of the 8 month period of the number of units in operation.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DELAWARE RIVER BASIN COMMISSION

COMPREHENSIVE PLAN

Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, December 17, 1975, commencing at 2 p.m. The hearing will be held in Room 1600 of the Municipal Services Bldg., 15th and Kennedy Blvd., Philadelphia. The subjects of the hearing will be as follows:

A. *Current expenses budget.* A proposed current expense budget for fiscal year 1977 in the total amount of $1,647,800 and a capital budget for the same period in the total amount of $27,000. Appropriations to balance the current expense budget are proposed as follows: Delaware, $120,080; New Jersey, $335,830; New York, $295,830; Pennsylvania, $365,830; United States, $198,030. The balance of funds required are anticipated from a federal water quality grant, appropriation from the revenue stabilization fund, sale of publications and other miscellaneous receipts. The capital budget is for the purpose of reimbursing the Federal Government for the costs of water supply storage at the Beltzville and Blue Marsh reservoir projects. Appropriations to balance the capital budget are proposed for Pennsylvania ($25,000) and New Jersey ($2,000).

B. *Annual water resources program.* Section 13.2 of the Delaware River Basin Compact requires the Commission to annually adopt a Water Resources Program showing the facilities and programs scheduled for implementation during the coming six-year period, and the agencies under whose sponsorship they will be carried out. Based upon the Comprehensive Plan, the Water Resources Program estimates the quantity and quality of water needs throughout the basin and the programs required to satisfy these needs during the forecast period.

The 12th annual Water Resources Program is now under consideration by the Commission. Copies of the draft program may be examined at the Commission offices. A limited number of copies are available for distribution upon request.

C. Applications for approval of the projects listed below. The Commission will consider these applications as proposed amendments to the Comprehensive Plan pursuant to Article 11 of the Compact, and/or as project approvals pursuant to Section 3.8 of the Compact.

1. *Artesian Water Co. (D–74–195 CP).* A well water supply project to augment public water supplies in the company's service area adjacent to the City of Wilmington, Del. Designated as Hockessin Well No. 4, the new facility is expected to yield about one million gallons per day.

2. *Superior Tube Co. (D–74–199).* A cooling water discharge at the company's manufacturing facilities in Lower Providence Township, Montgomery County, Pa. Cooling water ponds and recirculation are utilized. An overflow of approximately 240,000 gallons per day will discharge to Perkiomen Creek.

Documents relating to the items on this hearing notice may be examined at the Commission's offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing.

W. BRINTON WHITALL,
Secretary.

DECEMBER 3, 1975.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM 27095]

NEW MEXICO

Application

NOVEMBER 25, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Southern Union Gas Company has applied for one 4 inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 31 N., R. 12 W.
Sec. 10, NE¼NE¼;
Sec. 15, lots 6 and 7.

This pipeline will convey natural gas across .332 of a mile of national resource land in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, 3550 Pan American Freeway, NE, Albuquerque, NM 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.75-32991 Filed 12-8-75;8:45 am]

[Wyoming 53169]

WYOMING

Application

DECEMBER 1, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Northwest Pipeline Corporation has applied for a natural gas pipeline right-of-way across the following lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 28 N., R. 113 W.,
Sec. 5;
Sec. 6;
Sec. 7.

The pipeline will convey natural gas from a well in sec. 5 to an existing gathering system in sec. 7, T. 28 N., R. 113 W., Sublette County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1869, Rock Spring, Wyoming 82901.

GLENNA M. LANE,
Acting Chief, Branch of Lands and Minerals Operations.

QUALIFIED JOINT BIDDERS

Notice to Bidders

1. On November 25, 1975, the FEDERAL REGISTER (Vol. 40, No. 228, at page 54594) published as a convenience to the public a list of companies which had filed Statements of Production, in accordance with 43 CFR 3302.3–2, *Joint Bidding Requirements*, which claimed average daily worldwide production of less than 1.6 million barrels of crude oil, natural gas and liquified petroleum products during the production period of January 1, 1975, through June 30, 1975. These statements qualified those companies to bid jointly at Outer Continental Shelf oil and gas lease sales during the bidding period of November 1, 1975, through April 30, 1975.

2. Since that date of publication, other companies have filed such statements. Because of the short time between the end of the filing period and the next sale, their names will appear in a supplemental list available for examination after December 8, 1975, in the Pacific Outer Continental Shelf Office, 7663 Federal Building, 300 North Los Angeles Street, Los Angeles, California 90012, and in the Office of the Director, Bureau of Land Management (722), Department of the Interior, 18th and C Streets, N.W., Washington, D.C. 20240.

Dated: December 4, 1975.

GEORGE L. TURCOTT,
Associate Director, Bureau of Land Management.

Fish and Wildlife Service
GENE W. WOOD
Endangered Species Permit; Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93–205).

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Federals only use)
☐ IMPORT OR EXPORT LICENSE [X] PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
Our research program seeks to identify forest stand characteristics which affect red-cockaded woodpecker (Dendrocopus borealis) productivity. This work is to be carried out by annually examining nest cavities, banding nestlings during the breeding season; mist netting, banding, and patagium flagging adults during the non-breeding season.

3. APPLICANT. (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested)
Gene W. Wood, Ph.D,
Forest Wildlife Ecologist
Baruch Forest Science Institute
P.O. Box 596, Georgetown, S. C.29440
Phone: 803-546-4402

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:

☒ MR. ☐ MRS. ☐ MISS ☐ MS.	HEIGHT 5'9"	WEIGHT 165
DATE OF BIRTH 10-23-40	COLOR HAIR Blonde	COLOR EYES Blue
PHONE NUMBER WHERE EMPLOYED 803-546-4402	SOCIAL SECURITY NUMBER 227-52-9356	

OCCUPATION: University Professor

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT:
Clemson University
Clemson, South Carolina 29631

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
Hobcaw Barony
Georgetown County
South Carolina 29440

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☐ NO
(If yes, list license or permit number)
Bird Banding & Salvage Permit 20227

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(If yes, list jurisdictions and type of documents)
(See attached memorandum from South Carolina Wildlife & Marine Resources Department)

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF

10. DESIRED EFFECTIVE DATE: Oct. 1, 1975

11. DURATION NEEDED: 3 years

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12(a)) MUST BE ATTACHED, IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.
(see attached)

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS, AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (In ink): Gene W. Wood — DATE: July 26, 1975

Gene W. Wood

JULY 16, 1975.

U.S. FISH AND WILDLIFE SERVICE,
Post Office Box 290,
Nashville, Tenn. 37202.

GENTLEMEN: Enclosed you will find an application for a permit to carry on studies of the red-cockaded woodpecked (*Dendrocopus borealis*). This work would involve nest examination, banding of nestlings and banding and patagium flagging of adult birds. The reasons for wanting to do this research and the procedures to be used can be found in the permit application attachments.

If this application is not complete or there are points which need clarification I will be happy to do whatever is necessary as soon as you inform me of the problem.

Respectfully,

GENE W. WOOD, Ph.D.,
Forest Wildlife Ecologist.

BANDING AND PATAGIUM FLAGGING OF RED-COCKADED WOODPECKERS (DENDROCOPUS BOREALIS)

CURRENT RESEARCH PROGRAM

The attachment entitled: "Prospectus for a study of the habitat requirements of the red-cockaded woodpecker (Dendrocopus borealis)" describes the scope of our current research program on this species and the extent of our present cooperative agreement with the U.S. Forest Service. We expect to expand this cooperative effort in the near future.

JUSTIFICATION

Although the red-cockaded woodpecker is listed as a rare and endangered spices, as well as it should be in some geographical areas, its population level in coastal South Carolina is quite high. The bird and its distinctively marked roost trees are common sites to woods workers in this portion of the species range. It is so abundant that a major conflict between timber and wildlife interests has already arisen and is intensifying. The multiple-use land manager is caught in the middle. On one hand he seeks not to disturb the bird or its habitat in hopes of maximizing its productivity and probability of survival. On the other, he realizes the need of the local, state and even national economy for southern pine timber. He ponders the question of, outside of actually cutting roost trees, what is habitat disturbance? For instance, everyone seems to agree that the colony stand should be left intact with no cutting but colony stands are widely varied in vegetative composition and structure. Are more birds fledged in some colonies than others? If this is true, how is fledgling number related to stand characteristics and clan size? Should the colony stand vegetation be manipulated in some instances to enhance red-cockaded productivity?

Beyond the colony stand consideration are the characteristics of the support stand. This stand is visualized as the area needed in addition to the colony stand for foraging purposes. The most recent guess at what this stand should be like is that it needs to be at least 40 acres in size and adjacent to the colony stand. Almost no information exists on what the bird might perceive as a support stand, or what its important characteristics might be, or if we should be manipulating the vegetation in support standards. It may well be that beyond the minimum need of roost trees the characteristics of the support stand that may affect productivity are more important than those of the colony stand.

The U.S. Forest Service has recently completed its second set of cutting guidelines for red-cockaded woodpecker areas. This guideline is the result of an enthusiastic and sincere attempt to arrive at a method of harvesting timber on the national forests and still protect and propagate the red-cockaded woodpeckers that live there. It is based on what hard data there is in existence and the ideas of researchers who have worked with the red-cockaded. However, it is still open to controversy due to the lack of substantial amounts of information concerning the effects of silvicultural practices on the productivity of this bird. We are in desperate need to accelerate the rate of accumulation of this data. This can only be accomplished through measurements of the population dynamics and movement patterns of the birds in concert with measurements of their habitats. Heretofore, researchers have tended to primarily deal with one or the other. In order to obtain the answers that we need today, the animal-plant relationship must be quantified. With respect to bird measurements this means identifying colonies in widely varying habitats, examining nests, banding nestlings for distribution and survival rate information and banding and color marking adults for home range and specific stand use data.

What is the value of doing this type of work in coastal South Carolina? First, the woodpacker-timber conflict is at least as intense here as anywhere else in the South. Second, due to the abundance of the species in this region, we can capture and handle birds without threatening local populations through accidental mortalities or stress. Third, the forests of the South Carolina Low Country are noted for spatial diversity which presents the opportunity to study the bird under a wide range of habitat conditions. And fourth, the particular area in which we expect to carry out this work has lands in close proximity to one another that are under management schemes ranging from sanctuaries to national forest to industrial forest.

THE STUDY AREA

The general area of study covers the species range of the red-cockaded woodpecker in South Carolina. This would involve the Coastal Plain and Lower Piedmont physiographic regions. I am requesting permission to examine nest cavities and count and band nestlings throughout this region.

All of the bird movement studies, which will entail mist netting, banding and patagium flagging, will take place on Hobcaw Barony. The Barony is a 17,500 acre plantation owned by The Belle W. Baruch Foundation and is located along U.S. Route 17 about two miles east of Georgetown, S.C. About 7500 acres of the plantation are in forest vegetation. The remaining area is composed of freshwater and saltwater marshes. The area is dedicated to education and research in forestry, wildlife science and marine biology. The property is protected by a 1974 act of the South Carolina legislature which declared it a "Wild Bird And Game Refuge." Public access is prohibited except by special tour.

Like most of coastal South Carolina, the Barony has an abundance of red-cockaded woodpeckers. Our present population estimate is between 100 and 150 birds distributed over 25 colony stands. The Barony is being managed to maintain a number of old growth loblolly and longleaf pine stands which will insure the availability of potential cavity trees for the future. We have the opportunity here to study the red-cockaded in a wide range of colony and support stand conditions and to investigate the influence of various silvicultural practices in support stands.

PROCEDURES

NEST CAVITY EXAMINATION

Nest cavity trees will be identified during the breeding season by clan behavior in the colony stand. Once the nest tree is identified it will be climbed using a Swedish ladder and the cavity examined. Examination will be carried out by dropping a flashlight bulb, which is wired to a remote battery down the cavity hole to light the inside. A dental mirror will then be used to examine the inside of the cavity and make egg or nestling counts. Once the nestlings are well feathered and just prior to fledging they will be banded using standard U.S. Fish and Wildlife Service bands. The banding and recapture of these birds over a period of years is crucial to the development of life tables, estimation of time required for development to sexual maturity and general clan dynamics.

BANDING AND PATAGIUM FLAGGING OF ADULTS

Capture and marking of adults will begin in mid-October of each year. By this time, all surviving fledglings will be in fully developed adult plumage and be strong fliers. On two occasions in the past we have accidentally caught red-cockadeds in mist nets set for other birds. While woodpeckers in general tend to severely fight the net this was not true of the behavior of these two birds. At any rate, by netting at a time of the year when the birds are all full grown and not in some stage of molt, I would not anticipate the infliction of serious wounds on the bird due to its struggles in the net.

Netting will involve the placement of hoists with pulley and rope riggings on a cavity tree several days in advance of the actual netting time. During this time the tree will be observed for a period prior to sunset each day to make sure that the bird is not deterred from using the tree for roosting. Once this has been determined, a mist net (1¼ inch mesh) will be raised on the rigging into position in front of the hole entrance about one hour before dawn on the netting day. When the bird leaves the roost he will fly into the net and be captured. The net will then be lowered on the rigging and the bird removed and banded.

Following banding, birds will receive patagium flags. A vinyl flag two inches long and one-quarter inch wide will be attached to the patagium of each wing (Figure 1). The flags will be colored and a given color code will be assigned a specific clan. Birds of one clan will then be distinguishable from those of another on sight but will not be individually recognizable except by band number in the event of recapture. Following this procedure the bird will be released. After marking birds in this manner and making observations of them for several years, we should be able to get good ideas on the size of the home range of a clan as well as how new clans and colonies are formed.

ANTICIPATED RESULTS

Within three to four years we should have excellent estimates of productivity rates, movement patterns, home range, types of preferred habitat, and the influence of various habitat characteristics on productivity. With this type of information in hand we should have a good idea of how the bird perceives his habitat and be able to make recommendations on silvicultural practices in red-cockaded woodpecker habitat accordingly.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before January 8, 1976.

Dated: December 2, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

12. Attachments:
Four geese, Hawaiian (Nene) Eranta-sandvicensis.
Two males and two females, ages six months; born in captivity on Long Island, N.Y. and Oregon.
One pair from Winston Guest; Berry Hill Road; Oyster Bay, N.Y. 11771.
One pair from Ernest Weaver; Salem, Oregon.
I have raised swans for fourteen years and Honkers for ten. This past year, I raised fourteen Canadian Honkers from one pair—Black Necked Swans in incubator—nine Red Breasted Geese from one female, all in incubators. My mortality from time of hatch to adulthood is practically zero. I have never had Nene Geese.
I am willing to participate in cooperative breeding program and to maintain or contribute data to stud book.
At present, I am writing an article on determining cause of death in birds. The article will be published in the Gazette. If one of my birds dies, I have an autopsy performed by a vet who specializes in birds and the tissues examined and cultured at a pathological laboratory. These birds will be shipped air express and picked up day of shipment.
7. Contract Agreement: Winston Guest's birds were purchased at Am Game Bird Breeder's meeting in Reno, Nevada. Verbal agreement with Mr. Weaver to trade Red Breasted Geese for Nene Geese.
8. I am an experienced bird breeder and propagator, interested in propagation of wild life. Propagation will be done with proper sanitation, housing, and feeding.
I do not believe in over crowding. I have no plans to dispose of the birds. The property is surrounded by an eight foot fence with two electric wires.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before January 8, 1976, will be considered.

Dated: December 2, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

UPLAND COTTON

Determination of "Shortfall" for 1975–76 Marketing Year

Pursuant to section 407 of the Agricultural Act of 1949, as amended (79 Stat. 1197, as amended; 7 U.S.C. 1421 et seq.). The Secretary of Agriculture has determined that the "shortfall" for upland cotton in the 1975–76 marketing year is 1,406,000 bales. Section 407 provides, in part, that the Commodity Credit Corporation shall sell or make available for unrestricted use at current market prices in each marketing year a quantity of upland cotton equal to the amount by which the production of upland cotton is less than the estimated requirements for domestic use and for export for such marketing year.

The 1975–76 "shortfall" is the amount by which the domestic use and export requirements for upland cotton in the 1975–76 marketing year will exceed the 1975 production of such cotton. The requirements for domestic use and export during the 1975–76 marketing year are currently estimated to be about 10,400,000 bales (480 pounds net weight). The Crop Production Report issued by the Statistical Reporting Service on October 10, 1975, indicates that 1975 production of upland cotton will total about 8,994,000 bales (480 pounds net weight). On the basis of these estimates, the 1975–76 shortfall for upland cotton is 1,406,000 bales.

CCC-owned stocks of upland cotton as of November 7, 1975 totaled only 107 bales, and only very minor quantities will be acquired from the 1974 crop. Thus, an amount of upland cotton equal to the shortfall cannot be sold or made available by CCC during the 1975–76 marketing year. However, CCC's remaining stocks of upland cotton will be made available for sale against the 1975–76 shortfall.

Signed at Washington, D.C., on December 2, 1975.

E. J. PERSON,
Acting Executive Vice President, Commodity Credit Corporation.

Packers and Stockyards Administration

[P. & S. Docket No. 5192]

GILES LOWERY STOCKYARDS, INC.

Order Extending Period of Suspension of Modifications of Rates and Charges

On October 31, 1975, an order was issued instituting the following proceeding under Title III of the Packers and Stockyards Act, 1921, as amended, 42 Stat. 159, as amended, (7 U.S.C. 181 et seq.):

In re: Giles Lowery Stockyards, Inc., d/b/a Lufkin Livestock Exchange, Lufkin, Texas.

Such order, among other things, suspended and deferred the operation and use by the respondent of modifications of its current schedule of rates and charges to become effective November 3, 1975, for a period of thirty days beyond the time such modifications would otherwise go into effect.

Notice is hereby given that, since the hearing in this proceeding could not be concluded within such period of suspension, an order has been issued in the above proceeding suspending and deferring the operation and use of such modifications of the current schedule of rates and charges for a further period of thirty days beyond the date when such modifications would have otherwise become effective.

Done at Washington, D.C., December 2, 1975.

MARVIN L. MCLAIN,
Administrator, Packers and Stockyards Administration.

Rural Electrification Administration

BIG RIVERS ELECTRIC CORP., HENDERSON, KENTUCKY

Proposed Loan Guarantee

Under the authority of Pub. L. 93–32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20–22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $168,000,000 to Big Rivers Electric Corporation, of Henderson, Kentucky. These loan funds will be used to finance a project consisting of a 200,000 kW generating unit and related facilities.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information on the proposed project, including the engineering and economic feasibility studies and the proposed schedule for the advances to the borrower of the guaranteed loan funds from Mr. B. Scott Reed, Acting Manager, Big Rivers Electric Corporation, P.O. Box 24, Henderson, Kentucky 42420.

In order to be considered, proposals must be submitted on or before January 8, 1976, to Mr. Reed. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as Big Rivers and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration. Copies of REA Bulletin 20–22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 3d day of December 1975.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

Soil Conservation Service

BAYOU GROSSE TETE WATERSHED PROJECT, LOUISIANA

Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a draft environmental impact statement for the Bayou Grosse Tete Watershed Project, Pointe Coupee Parish, Louisiana, USDA–SCS–EIS–WS–(ADM)–76–2–(D)–LA.

The environmental impact statement concerns a plan for watershed protection, flood prevention, and drainage. The planned works of improvements include conservation land treatment, supplemented by channel work and water control structures. The channel work will involve clearing and debris removal on 10 miles of existing channels, 3 miles of new channel construction, and 102 miles of enlargement by excavation to provide improved water management in a flatland watershed that is 52 percent agricultural cropland and grassland. Of the 115 miles of work proposed on existing streams or channel, 107 miles will involve those with only ephemeral flow, and 4 miles with intermittent flow. The balance of 4 miles involves either existing ponded or flowing water or completely new channels where none existed before.

A limited supply of copies is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, 3737 Government Street, Alexandria, Louisiana 71301.

Copies of the draft environmental impact statement have been sent for comment to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge of or special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to Alton Mangum, State Conservationist, Soil Conservation Service, 3737 Government Street, Alexandria, Louisiana 71301.

Comments must be received on or before January 29, 1976, in order to be considered in the preparation of the final environmental impact statement.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: December 2, 1975.

JOSEPH W. HAAS,
Deputy Administrator for Water Resources Soil Conservation Service.

LONG BRANCH WATERSHED PROJECT, NEBRASKA

Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a draft environmental impact statement for the Long Branch Watershed Project, Richardson, Nemaha, Pawnee, and Johnson Counties, Nebraska, USDA–SCS–EIS–WS–(ADM)–75–2–(D)–NE.

The environmental impact statement concerns a plan for watershed protection, flood prevention, including grade stabilization, and recreation. The planned works of improvement include conservation land treatment, twelve floodwater retention structures, twelve grade stabilization structures, and one recreational development. The recreational development will provide 25,200 visitor-days of recreation annually.

A limited supply of copies is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, 134 South 12th Street, Lincoln, Nebraska 68508.

Copies of the draft environmental impact statement have been sent for comment to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge of or special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to W. J. Parker, State Conservationist, Soil Conservation Service, 134 South 12th Street, Lincoln, Nebraska 68508.

Comments must be received on or before February 1, 1976, in order to be considered in the preparation of the final environmental impact statement.

PRAIRIE CREEK (VIGO) WATERSHED PROJECT, INDIANA

Availability of Final Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a final environmental impact statement (EIS) for the remaining works on Prairie Creek Watershed Project, Vigo County, Indiana, USDA–SCS–EIS–WS–(ADM)–75–4(F)–IN.

The EIS concerns a plan for watershed protection, flood prevention, and drain-

V40I237 DEC 9 75 XUM

age. The planned remaining works of improvement include conservation land treatment, supplemented by channel work. The channel work will involve trash and debris block removal on 1.5 miles of existing channel, 0.5 mile of new channel construction, and 3.5 miles of enlargement by excavation to provide improved water management in a watershed that is 89 percent agricultural cropland and grassland. Of the 5.5 miles of work proposed on existing channel, 2.5 miles will involve perennial flow, 2.5 miles intermittent flow, and 0.5 mile of new channel where none existed before.

The final EIS has been filed with the Council on Environmental Quality.

A limited supply is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, Atkinson Square-West, 5610 Crawfordsville Road, Suite 2200, Indianapolis, Indiana 46224.

Criteria, Procedures and Responsibilities

Correction

In FR Doc. 75-32634, appearing at page 56705 in the issue for Thursday, December 4, 1975, the headings should be changed by adding the information in brackets as set forth above.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

CAREER EDUCATION PROGRAM

Closing Date for Receipt of Applications for Fiscal Year 1976

Notice is hereby given that pursuant to the authority contained in section 402 and section 406(f)(1) of the Education Amendments of 1974, Pub. L. 93-380 (20 U.S.C. 1851-53 and 1865(f)(1)) applications are being accepted from State and local educational agencies, institutions of higher education, and other public and private agencies, organizations, associations, institutions, and individuals for grants and assistance contracts to support projects to demonstrate the most effective methods and techniques in career education and to develop exemplary career education models (including models in which handicapped children receive appropriate career education either by participation in regular or modified programs with nonhandicapped children or where necessary in specially designed programs for handicapped children whose handicaps are of such severity that they cannot benefit from regular or modified programs). Notice is also hereby given that pursuant to the authority contained in section 402 and section 406(f)(2) of Pub. L. 93-380 (20 U.S.C. 1851-53 and 1865(f)(2)) applications are being accepted from State educational agencies for grants and assistance contracts to support projects for developing State plans for the implementation of career education programs in the local educational agencies of the States.

Applications must be received by the U.S. Office of Education Application Control Center on or before February 23, 1976.

A. *Applications sent my mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Grants and Procurement Management Division, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.554. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than February 18, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. *Application routing.* All applicants must furnish an information copy of their proposal to the State educational agency of the State within which the applicant is located. This information copy must be submitted to the State Coordinator of Career Education, as designated by the Chief State School Officer, concurrently with the submission of the application to the U.S. Office of Education. The application submitted to the U.S. Office of Education must contain a statement that this has been accomplished. State educational agencies wishing to submit advice and comment on any application originating within their State may do so by forwarding such advice and comment to the Office of Career Education, U.S. Office of Education, Room 3100, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. 20202.

D. *Program information and forms.* (1) Applications must be prepared and submitted in accordance with instructions and forms which may be obtained from the Office of Career Education, U.S. Office of Education, Room 3100, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. 20202.

(2) It is anticipated that grants and assistance contracts will be awarded in each of the categories specified in 45 CFR 160d.5, with the total awards in each category being approximately as follows: (a) Incremental improvements in K-12 career education programs—$2,985,000, (b) demonstrations in such settings as the senior high school, the community college, adult and community education agencies, and institutions of higher education—$600,000, (c) demonstrations for such special segments of the population as handicapped, gifted and talented, minority and low income youth, and to reduce sex stereotyping in career choices—$800,000, (d) demonstrations of the training and retraining of persons for conducting career education programs—$650,000, and (e) communication of career education philosophy, methods, program activities, and evaluation results to career education practitioners and to the general public—$630,000.

(3) It is anticipated that grants and assistance contracts will be awarded for the State plan projects specified in 45 CFR 160d.13, with the total awards for this category being approximately $2,000,000.

(4) In addition to the grants and assistance contracts awarded pursuant to this notice, it is anticipated that approximately $2,470,000 worth of procurement contracts in career education will be awarded during Fiscal Year 1976. Requests for proposals for these procurement contracts will be published in the Commerce Business Daily at a later date.

E. *Applicable regulations.* The regulations applicable to the Career Education Program are:

(1) The Office of Education's General Provisions Regulations, which were published in the FEDERAL REGISTER on November 6, 1973, as amended (45 CFR Parts 100, 100a and appendices).

(2) The regulations for the Special Projects Act, of which notice of proposed rulemmaking was published in the FEDERAL REGISTER on June 26, 1975 (45 CFR Part 160, especially Part III in the Appendix thereof).

(3) The regulations for the Career Education Program, of which notice of proposed rulemaking was published in the FEDERAL REGISTER on December 1, 1975 (45 CFR Part 160d).

(20 U.S.C. 1851-1853 and 1865)

(Catalog of Federal Domestic Assistance Number 13.554; Career Education Program)

Dated: December 4, 1975.

T. H. BELL,
U.S. Commissioner of Education.

EARLY EDUCATION FOR HANDICAPPED CHILDREN

Extension of Closing Date for Receipt of Applications

Notice is hereby given that pursuant to the authority contained in section 623 of the Education of the Handicapped Act (20 U.S.C. 1423), the U.S. Commissioner of Education has extended the November 3, 1975 closing date for receipt of applications for new early education outreach projects. This date was previously published in the FEDERAL REGISTER on August 13, 1975 at 40 FR 34021. The new closing date is January 16, 1976.

There was a misunderstanding on the part of applicants that the first year on an outreach project (the first year after the completion of a three-year early childhood education project) was considered to be a new project. Those applicants intended to file applications under the date set for continuation applications. However, the first year of an outreach project is a new award. Therefore, a new closing date of January 16, 1976 has been established for receipt of applications for new early education outreach projects.

Applications must be received by the U.S. Office of Education Application Control Center on or before the aforementioned date.

A. *Applications sent by mail.* An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, Grants and Procurement Management Division, 400 Maryland Avenue, SW., Washington, D.C. 20202, Attention: 13.444B outreach. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail not later than January 12, 1976, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. In establishing the date of receipt, the Commissioner will reply on the time-date stamp of such mail rooms or other documentary eviednce of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

B. *Hand delivered applications.* An application to be hand delivered must be delivered to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, SW., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted by the Application Control Center after 4:00 p.m. Washington, D.C. time on the closing date.

C. *Program information and forms.* Information and applications may be obtained from the Early Education for Handicapped Children Program, Program Development Branch, Bureau of Education for the Handicapped, U.S. Office of Education, 400 Maryland Avenue, SW., Washington, D.C. 20202.

D. *Application regulations.* The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Part 100a) and the program regulations (45 CFR Part 121d) published in the FEDERAL REGISTER on February 20, 1975 at 40 FR 7416.

(20 U.S.C. 1423)

(Catalog of Federal Domestic Assistance, No. 13.444B, Early Education for Handicapped Children Outreach)

Dated: December 4, 1975.

T. H. BELL,
U.S. Commissioner of Education.

Food and Drug Administration

[Docket No. 75N-0230; DESI 1786]

CERTAIN COMBINATION DRUGS CONTAINING ORGANIC NITRATES

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications; Amendment

In a notice of opportunity for hearing (DESI 1786; Docket No. FDC-D-643 (now Docket No. 75N-0230); NDA 4-353 etc.) published in the FEDERAL REGISTER of August 29, 1973 (38 FR 23349), the Commissioner of Food and Drugs proposed to issue an order under the provisions of section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the new drug applications described below. The basis of the proposed order was that the drugs lacked substantial evidence of effectiveness for their labeled indications. The products are used in the treatment of angina pectoris attacks. Although the products are combination drugs, the notice did not specifically refer to the policy for fixed-combination prescription drugs for humans, 21 CFR 300.50. The notice of August 29, 1973, is now being amended in that regard.

NDA No.	Drug	NDA Holder
8-798	Metamine with Butabarbital Tablets containing trolnitrate phosphate and butabarbital.	Pfizer Laboratories Division, Pfizer, Inc., 235 East 42d St., New York, N.Y. 10017.
11-420	Metamine with Butabarbital Sustained Tablets containing trolnitrate phosphate and butabarbital.	Do.
12-740	Duotrate 45 with Phenobarbital Plateau Caps containing pentaerythritol tetranitrate and phenobarbital.	Marion Laboratories, Inc., 10236 Bunker Ridge Rd., Kansas City, Mo. 64137.
12-538	Pentaerythritol tetranitrate and phenobarbital (sustained release capsules).	USV Pharmaceuticals Corp., 1 Scarsdale Rd., Tuckahoe, N.Y. 10707. (Former holder of the NDA was Nysco Laboratories, Inc., 34-24 Vernon Blvd., Long Island City, N.Y. 11106.)
12-226	Peritrate with Phenobarbital SA Tablets containing pentaerythritol tetranitrate and phenobarbital.	Warner Chilcott Laboratories, Division Warner Lambert Pharmaceutical Co., 201 Tabor Rd., Morris Plains, N.J. 07950.
8-852	Those parts of NDA 8-852 pertaining to Pencard with Phenobarbital and Pencard No. 2 with Phenobarbital Tablets containing pentaerythritol tetranitrate and phenobarbital; and Pencard-A Capsules containing pentaerythritol tetranitrate and theophylline.	Cole Pharmacal Co., Inc., 3721 Laclede Ave., St. Louis, Mo. 63106.
10-972	Pentraline Tablets containing pentaerythritol tetranitrate, sodium butabarbital, and reserpine.	McNeil Laboratories Inc., Camp Hill Rd., Fort Washington, Pa. 19034.
4-353	Nitrantol with Phenobarbital Tablets containing mannitol hexanitrate and phenobarbital.	Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 110 East Amity Rd., Cincinnati, Ohio 45215.
2-779	Maxitrate with Phenobarbital Tablets containing mannitol hexanitrate and phenobarbital.	Pennwalt Prescription Products Division, Pennwalt Corp., 755 Jefferson Rd., Rochester, N.Y. 14623.
12-093	That part of NDA 12-093 pertaining to Isordil with Phenobarbital Tablets containing isosorbide dinitrate and phenobarbital.	Ives Laboratories, Inc., 685 3d Ave., New York, N.Y. 10017.

The initial DESI notice concerning these combination products was published in the FEDERAL REGISTER of February 25, 1972 (37 FR 4001). That notice included not only these drugs but also certain single-entity organic nitrate products, both the standard and controlled release dosage forms, which were all classified as possibly effective for their labeled indications. Since no data were submitted concerning the combination products, the aforesaid notice of opportunity for hearing of August 29, 1973 issued. The standard dosage forms for the single-entity products referenced in the initial notice of February 25, 1972, were subsequently placed on the list of drug products which may remain on the market pending completion of additional studies to determine effectiveness (37 FR 26623, December 14, 1972; 38 FR 18477, July 11, 1973). The controlled release dosage forms of the single-entity products included in the initial notice will be the subject of a future FEDERAL REGISTER announcement and are not affected by nor included within this amended notice, which applies only to the combination drugs named in the opportunity for hearing published August 29, 1973, and listed above.

Since all of the above drug products are combinations and since the notice of opportunity for hearing of August 29, 1973 did not specifically refer to the policy for fixed-combination prescription

V40237 DEC 9 75 XUM

drugs for humans (21 CFR 300.50), the Director of the Bureau of Drugs concludes that the notice should be amended as set forth below to make it clear that any request for hearing must provide evidence of effectiveness derived from adequate and well-controlled studies meeting the requirements of both 21 CFR 314.111, which sets forth the essential elements of adequate and well-controlled studies, and 21 CFR 300.50, which sets forth the criteria for fixed-combination prescription drugs. New submissions should be made in the formats and with the analyses required by 21 CFR 314.200 with respect to such drugs.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a) (5) and 21 CFR 300.50, demonstrating the effectiveness of these fixed combination drug products.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6 It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or disrtibutes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before January 8, 1976, a written notice of appearance and request for hearing; and (2) on or before February 9, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: November 25, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[FR Doc.75-32978 Filed 12-8-75;8:45 am]

[Docket No. 75N-0236; DESI 9418]

CERTAIN DRUGS CONTAINING PENTAERYTHRITOL TETRANITRATE IN COMBINATION WITH MEPROBAMATE OR HYDROXYZINE HYDROCHLORIDE

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications; Amendment

In a notice of opportunity for hearing (DESI 9418; Docket No. FDC-D-602 (now Docket No. 75N-0236); NDA 9-418 etc.) published in the FEDERAL REGISTER of March 6, 1973 (38 FR 6090), the Commissioner of Food and Drugs proposed to issue an order under the provisions of section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of certain products that are combination organic nitrates. The basis of the proposed order was that the drugs lacked substantial evidence of effectiveness for their labeled indications. The products are used in the treatment of angina pectoris attacks. Requests for a hearing were filed for the drug products described below. The holders of the new drug applications for the other drug products in the notice did not avail themselves of the opportunity for a hearing, and approval of their new drug applications was withdrawn in a notice published in the FEDERAL REGISTER of September 25, 1973 (38 FR 2675). Although the products are combination drugs, the notice of March 6, 1973, did not specifically refer to the policy for fixed-combination prescription drugs for humans, 21 CFR 300.50. The notice of March 6, 1973, is now being amended in that regard with respect to the new drug applications named below.

NDA 10-998; Cartrax 10 and Cartrax 20 Tablets, containing pentaerythritol tetranitrate and hydroxyzine hydrochloride, J. B. Roerig Division, Pfizer Pharmaceuticals, 235 E. 42d St., New York, NY 10017.

NDA 11-423; Equanitrate 10 and Equanitrate 20 Tablets, containing pentaerythritol tetranitrate and meprobamate, Wyeth Laboratories, Inc., Division of American Home Products Corp., P.O. Box 8299, Philadelphia, PA 19101.

NDA 11-502; Miltrate Tablets, containing pentaerythritol tetranitrate and meprobamate, Wallace Pharmaceuticals, Division of Carter-Wallace, Inc., Half Acre Rd., Cranbury, NJ 08512.

Since all of the above drug products are combinations, and since the notice of opportunity for hearing of March 6, 1973, did not specifically refer to the policy for fixed-combination prescription drugs for humans (21 CFR 300.50), the Director of the Bureau of Drugs concludes that the notice should be amended as set forth below to make it clear that any request for hearing must provide evidence of effectiveness derived from adequate and well-controlled studies meeting the requirements of both 21 CFR 314.111, which sets forth the essential elements of adequate and well-controlled studies, and 21 CFR 300.50, which sets forth the criteria for fixed-combination prescription drugs. New submissions should be made in the formats and with the analyses required by 21 CFR 314.200 with respect to such drugs.

Inasmuch as no interested person other than the applicants named in this notice filed a written appearance concerning these or identical, related, or similar products in response to the March 6, 1973 notice, and since their failure to file an appearance constitutes an election by such persons not to avail themselves of an opportunity for a hearing, 21 CFR 314.200, the opportunity provided by this notice is applicable only to the holders of the above new drug applications specifically named above.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) and 21 CFR 300.50, demonstrating the effectiveness of these fixed-combination drug products.

Therefore, notice is given to the holders of the new drug applications listed above that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 335(e)), withdrawing approval of the new drug applications and all amendments and supplements thereto on the ground that new information before him with respect to the drug products evaluated together with the evidence available to him at the time of approval of the applications, shows there is a lack of substantial evidence that each of the drug products will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the grounds for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it, e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicants are hereby given an opportunity to submit additional data to show why approval of the new drug applications should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug products named above.

If any applicant elects to avail himself of the opportunity to submit additional data, he shall file on or before February 9, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. The procedures and requirements governing this notice of opportunity for hearing, submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

Any additional submissions may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. At the end of the 60-day period, the submissions will be evaluated. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact that precludes the withdrawal of approval of the applications, or if the data are not submitted in the required format or with the required analyses, the Commissioner will enter summary judgment against the applicant(s), making findings and conclusions and denying a hearing.

All submissions pursuant to this notice should be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday, from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: November 25, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

[FR Doc.75-32977 Filed 12-8-75;8:45 am]

[Docket No. 75N-0203; DESI 8076]

TETRACAINE HYDROCHLORIDE AND BENZOCAINE TOPICAL SOLUTION

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

A notice (DESI 8076) was published in the FEDERAL REGISTER of October 15, 1970 (35 FR 16194), in which the Food and Drug Administration announced its conclusion that the drug product described below is less-than-effective (probably effective for production of anesthesia of accessible mucous membranes, primarily in the practice of dentistry). Further data were submitted but were determined not to provide substantial evidence of effectiveness. This notice announces that conclusion and proposes to withdraw approval of the product. Persons wishing to request a hearing must do so on or before January 8, 1976.

NDA 8-076; Neotopanol Solution containing tetracaine hydrochloride and benzocaine; Cook-Waite Laboratories, Inc., Division of Sterling Drug, Inc., 90 Park Ave., New York, NY 10016.

Neotopanol is a combination drug product containing 2 percent tetracaine hydrochloride, a long-acting topical anesthetic and 15 percent benzocaine, a rapidly acting topical anesthetic. The intent and claim of the combination is production of anesthesia of the oral mucosa with the rapid onset of benzocaine and the prolonged duration of tetracaine hydrochloride. Both components are effective topical anesthetic agents. In order to meet the requirements of the Food and Drug Administration policy on combination drugs (21 CFR 300.50), it must be shown that each of the ingredients contributes to the claimed effect of the combination. In the present case, it must be shown that the combination provides more rapid action than the slower acting component with at least comparable duration of action and more prolonged anesthesia than the short-duration component with at least comparable speed of onset; in other words, that the combination is superior to either component with regard to either speed of onset or duration of action. It must also be shown that the dosage of each component is such that the combination is safe and effective for a significant patient population requiring such concurrent therapy.

Subsequent to the notice of October 15, 1970, Cook-Waite Laboratories submitted two studies to demonstrate the effectiveness of the product. These studies, by Dr. David Mitchell and Dr. Frank Shovlin, were conducted using essentially identical protocols, each study employ-

V40237 DEC 9 75 XUM

ing 16 subjects in a double-blind, four-treatment, four-period crossover design. The drugs used were Neotopanol solution; placebo, consisting of the vehicle carbitol; tetracaine hydrochloride 2 percent in carbitol; and benzocaine 15 percent in carbitol. The studies measured the onset and duration of anesthesia after each preparation was applied to the tongue. Despite their similar design, the two studies give very different results; these are summarized in the table that follows.

Median time of onset and duration of Anesthetic effect in minutes

	Mitchell study		Shovlin study	
	Onset	Duration	Onset	Duration
Tetracaine	2.0	9.38	2.58	5.25
Benzocaine	2.5	6.0	.63	5.95
Neotopanol	2.0	9.0	.38	16.6

It is clear that in the Mitchell study tetracaine has as rapid an onset and as prolonged a duration of action as Neotopanol; thus there is no contribution made by the addition of the benzocaine, and the requirements of 21 CFR 300.50 are not fulfilled.

With respect to the Shovlin study, Neotopanol appears to have the rapid rate of onset of benzocaine (significantly faster than tetracaine) and a more prolonged action than benzocaine. The results of the study, however, indicate a serious methodological problem the nature of which cannot be ascertained from available data. The duration of action of tetracaine was found to be no longer than benzocaine, contradicting the Mitchell study and in contrast with the assumptions underlying the Neotopanol combination, in which tetracaine is included because of its prolonged action. On the other hand, the duration of action of Neotopanol is far greater than the duration of tetracaine (even though the tetracaine is supposedly entirely responsible for such prolonged action) and far greater than the duration for Neotopanol found in the Mitchell study. Although it remains a possibility that benzocaine and tetracaine are somehow synergistic in their effect on duration of anesthesia, this is less likely than that some of the duration figures are in error. The patients receiving placebo reported evidence of effectiveness to a larger degree than one would anticipate in a study of this type. When a larger than expected placebo effect is seen in a study, one may suspect a methodology problem.

The FDA has no explanation for the differences between the two studies or the internal inconsistencies of the Shovlin study. While the Shovlin study provides some evidence that Neotopanol has a more rapid onset of anesthesia than tetracaine and provides a more prolonged duration of action than benzocaine, the results of a single study cannot in any case be considered substantial evidence, particularly since these results are contradicted in every respect by a second study using a virtually identical protocol.

By letter of August 12, 1974, Cook-Waite Laboratories was informed that the FDA considered that the data submitted do not provide substantial evidence of effectiveness. The company was requested to submit additional information about either their combination drug or the single components which would aid in clarifying the claims with regard to the time of onset of action and duration of action and a protocol for additional clinical studies. No such information has been submitted.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of adequate and well-controlled clinical investigations, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) and 21 CFR 300.50 that provide substantial evidence of the effectiveness of the drug.

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505 (e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufacturers or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before January 8, 1976, a written notice of appearance and request for hearing, and (2) on or before February 9, 1976, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 2.121).

Dated: November 25, 1975.

J. RICHARD CROUT,
Director, Bureau of Drugs.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

EXECUTED MEMORANDA OF AGREEMENT

Pursuant to section 800.6(a) of the Advisory Council's "Procedures for the Protection of Historic and Cultural Properties" (36 CFR Part 800), notice is hereby given that the following Memoranda of Agreement were executed during the months of June, July, August, September, October and November 1975:

"Wayne Apgar Farmhouse," Greene County, Ohio, affected by the development of an industrial park by the City of Xenia, assisted by the Department of Commerce, Economic Development Administration (6/10/75);

"Lukens-Plummer House and Moses McKay House," Warren County, Ohio, affected by construction of the Caesar Creek Lake Project by the Department of the Army, Corps of Engineers (6/10/75);

"Beauvoir," Biloxi, Mississippi, affected by construction of a convention center assisted by the Department of Commerce, Economic Development Administration (6/10/75);

"Site Number One and other archeological sites," Sacramento County, California, affected by a bank protection project on the Sacramento River undertaken by the Department of the Army, Corps of Engineers (6/10/75);

"Fort Mason," San Francisco, California, affected by conversion of the San Francisco Fire Department High Pressure Pumping Station Number 2, located within Fort Mason, from steam to diesel power, an undertaking requiring a permit from the Department of the Interior, National Park Service (6/20/75);

"Bodega Bay Archeological District," Sonoma County, California, affected by the construction of sewage transmission and treatment facilities by the Bodega Bay Public Utilities District, assisted by the Environmental Protection Agency (6/20/75);

"Mauna Kea Adz Quarry Complex," Hawaii, Hawaii, affected by archeological research to be conducted by the Bernice P. Bishop Museum and funded by the National Science Foundation (6/20/75);

"St. Peter's Church", St. Francis, Wisconsin, affected by the Knights of Columbus "Pride in America" Heritage Project which proposed moving the church to an outdoor ethnic museum. The Knights of Columbus project is funded by the American Revolution Bicentennial Administration (6/20/75);

"Fort Adams State Park", Newport, Rhode Island, affected by selective demolition to be funded as part of a restoration project by the Department of the Interior, National Park Service, Office of Arch. and Hist. Pres. (7/2/75);

"Old DeKalb County Courthouse", Decatur, Georgia, affected by construction of the Metropolitan Atlanta Rapid Transit System, assisted by the Department of Transportation, Urban Mass Transportation Administration (7/4/75);

"Zebree Homestead Site", Mississippi County, Arkansas, affected by construction of Ditch 81 Extension (Item 2), an undertaking of the Department of the Army, Corps of Engineers (7/4/75);

"Chesapeake and Ohio Canal", Hancock, Maryland, affected by construction of a subtransmission line across the canal, a project by the Potomac Edison Company requiring a permit from the Department of the Interior, National Park Service (7/7/75);

"William Allen White Cabins", Estes Park vicinity, Larimer County, Colorado, affected by the removal and reconstruction of the front porch of the William Allen White studio by the Department of the Interior, National Park Service (7/7/75);

"Lapakahi Complex archeological district", Lapakahi State Historical Park, County of Hawaii, Hawaii, affected by a State of Hawaii project involving vegetative clearing, ruin stabilization, facilities planning and interpretive planning, funded by the Department of Commerce, Economic Development Administration (7/9/75);

"City of Refuge National Historical Park", Honaunau, Kona, Hawaii, affected by adoption of a Master Plan by the Department of the Interior, National Park Service (7/9/75);

"Charleston Historic District", Charleston, South Carolina, affected by the construction of the James Island Expressway and Bridge, funded in part by the Department of Transportation, Federal Highway Administration (7/9/75);

"Colonial National Historic Park", Yorktown, Virginia, affected by use of 8.66 acres of parkland for improvement and realignment of Route 238 by the Virginia Department of Highways, requiring a special use permit from the Department of the Interior, National Park Service (7/11/75);

"Coffey Archeological Site" (14 PO 1), Pottawatomie County, Kansas, affected by limited recovery of archeological data to protect the values of the site from being destroyed by erosion and inundation, to be undertaken by the Department of the Army, Corps of Engineers and the Department of the Interior, National Park Service, Office of Interagency Archeological Services (7/11/75);

"Oak Park Frank Lloyd Wright Prairie School of Architecture Historic District", Oak Park, Illinois, affected by the acquisition and restoration of the Frank Lloyd Wright Home and Studio by the Village of Oak Park, using funds from the Department of Housing and Urban Development (7/11/75);

"J. Wesley Brooks House", Greenwood County, South Carolina, affected by a railroad-highway demonstration project funded by the Department of Transportation, Federal Highway Administration (7/11/75);

"Federal Land Office Building", Steubenville, Ohio, affected by West Virginia Department of Highways proposal to construct Project 305-22-0.00 (Ohio River Bridge and Relocated U.S. 22) and requiring a permit from the Department of Transportation, U.S. Coast Guard (7/11/75);

"Mooresville Historic District and Belle Mina", Limestone County, Alabama and the "Twickingham Historic District" and the "Southern Railway System" Depot in Huntsville, Madison County, Alabama, affected by a highway project funded in part by the Department of Transportation, Federal Highway Administration (7/14/75);

"Haskell Institute National Historic Landmark", Lawrence, Kansas, affected by implementation of a master plan for the development of the Haskell Indian Junior College, a project of the Department of the Interior, Bureau of Indian Affairs (7/14/75);

"Madeline Island Site" (site 7302), Madeline Island, Ashland County, Wisconsin, affected by construction of a sewage collection and treatment system by the Madeline Sanitary District with assistance from the Department of Agriculture, Farmers Home Administration (7/21/75);

"Hudson-Meng Bison Kill Site", vicinity of Crawford, Sioux County, Nebraska, affected by archeological excavation requiring a permit from the Department of Agriculture, Forest Service (7/21/75);

"Earnest Witte Site" (41AU36), Austin County, Texas, affected by construction of the Allens Creek Nuclear Generating Station by the Houston Lighting and Power Company, a project requiring a license from the Nuclear Regulatory Commission (8/1/75);

"Lehigh Valley Railroad Station", Ithaca, New York, affected by construction of improvements to Routes 13 and 96, a project funded by the Department of Transportation, Federal Highway Administration (8/6/75);

"Morristown National Historic Park," Morristown, New Jersey, affected by proposed construction of the Tempe-Wick Re-routing Visitor Center/Parking Facility, a project of the Department of Interior, National Park Service (8/8/75);

"Bellows Field Archeological Area," Oahu, Hawaii, affected by installation of picnic facilities at Bellows Air Force Station, an undertaking of the Department of Defense, United States Air Force (8/12/75);

"Independence National Historical Park (Christ Church unit)," Philadelphia, Pennsylvania, affected by a proposed project of restoration and structural repair to be assisted by the Department of the Interior, National Park Service (8/17/75);

"Luth Mound, the Hicks' House and other properties," Vermillion County, Indiana, affected by the proposed upgrading of a portion of S.R. 63, funded in part by the Department of Transportation, Federal Highway Administration (8/17/75);

"Portsmouth Public Library," Portsmouth, New Hampshire, affected by a restoration and adaptation project funded in part by the Department of the Interior, National Park Service, Office of Archeology and Historic Preservation (8/17/75);

"Kaw Indian Agency," Kay County, Oklahoma, affected by construction of the Kaw Dam and Reservoir, Arkansas River, Oklahoma, a project of the Department of the Army, Corps of Engineers (8/17/75);

"Dingee Houses, Cox Houses, the Sims House, and the Old Town Hall," Wilmington, Delaware, affected by proposed changes to the Civic Center Urban Renewal Project in Wilmington, Delaware, an undertaking funded by the Department of Housing and Urban Development (8/21/75);

V40237D DEC 9 75 XUM

"Great Seal State Park Archeological District," Ross County, Ohio, affected by the procurement of borrow material for the Chillicothe Local Protection Project, an undertaking of the Department of the Army, Corps of Engineers (8/21/75);
"Front Street-Parade Hill-Lower Warren Street Historic District," Hudson, New York, affected by Urban Renewal Project No. NY R-244, an undertaking assisted by the Department of Housing and Urban Development (8/21/75);
"Inglenook Winery," Rutherford, California, affected by use of the Inglenook barrel aging cellar, requiring a license from the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms (8/25/75);
"Pabst Site," DeWitt County, Illinois, affected by construction of the Clinton Power Station, Clinton, Illinois, a project requiring a license from the Nuclear Regulatory Commission (8/25/75);
"Kipahula Historic District," Haleakala National Park, Maui County, Hawaii, affected by implementation of a visitor safety program for the Seven Pools Area, an undertaking of the Department of the Interior, National Park Service (8/25/75);
"Enderle Site, Jenkins Site, Anderson Site," Erie County, Ohio, affected by construction of highway ER1-2-18.38, a project assisted by the Department of Transportation, Federal Highway Administration (9/2/75);
"Lind Coulee Archeological Site," Warden vicinity, Grant County, Washington, to be excavated in order to preserve the information contained therein from adverse effects caused by the ongoing operation of the Columbia Basin Project, an undertaking of the Department of the Interior, Bureau of Reclamation (9/2/75);
"Archeological Site," vicinity of Columbus Lock and Dam, Lowndes County, Mississippi, affected by construction of the Columbus Lock and Dam, an undertaking of the Department of the Army, Corps of Engineers (9/5/75);
"Inman Park Historic District," Atlanta, Georgia, affected by construction of the Atlanta Metropolitan Rapid Transit System, assisted by the Department of Transportation, Urban Mass Transportation Administration (9/15/75);
"Water Street Historic District and Heisey House," Lock Haven, Pennsylvania, affected by construction of a flood control protection project by the Department of the Army, Corps of Engineers (9/19/75);
"Core Site" (site no. 05-09-54-30), Modoc County, California, affected by a proposed land exchange undertaken by the Department of Agriculture, Forest Service (9/19/75);
"John & Landon Carter House," Elizabethton, Tennessee, affected by a restoration project funded by the Department of the Interior, National Park Service, Office of Archeology and Historic Preservation (9/25/75);
"Marshall Powder Mill Site," Marshall, Harrison County, Texas, affected by construction of Highway Loop 390, a project assisted by the Department of Transportation, Federal Highway Administration (9/26/75);
"Pennsylvania Avenue National Historic Site," Washington, D.C., affected by construction of Project FF-16 of the Metro F Route, assisted by the Department of Transportation, Urban Mass Transportation Admin. (9/26/75);
"Illinois and Michigan Canal," Grundy County, Illinois, affected by the construction of three transmission lines by the Commonwealth Edison Company, a project requiring a permit from the Department of the Army, Corps of Engineers (9/28/75);
"Nott Late Archaic Archeological Site and Albany Glasshouse District", Albany County, New York, affected by construction of sewage transmission and treatment facilities, by the Town of Guilderland, a project assisted by the Environmental Protection Agency (9/28/75);
"Hampton National Historic Site" (The Orangery), Baltimore County, Maryland, affected by restoration of The Orangery, an undertaking by the Department of the Interior, National Park Service (9/29/75);
"Historic properties", Syracuse, New York, affected by implementation of the Community Development Block Grant Program in that city, a project assisted by the Department of Housing and Urban Development (9/29/75);
"Mesa Verde National Park", Colorado, affected by a proposal to Congress to designate 8,100 acres within the park as a Wilderness Area, an undertaking of the Department of the Interior, National Park Service (9/29/75);
"Illinois and Michigan Canal", Will County, Illinois, affected by construction of the Duplicate Locks Project, Department of the Army, Corps of Engineers, (10/5/75);
"Veterans Administration Center", Bay Pines, Florida, affected by construction of a new clinical support structure by the Veterans Administration (10/5/75);
"Fred M. Vinson Birthplace", Louisa, Kentucky, affected by construction of a bridge and approaches between Louisa, Kentucky, and Fort Gay, West Virginia, a project assisted by the Department of Transportation, Federal Highway Administration (10/14/75);
"Sand Point Site", Baraga County, Michigan, affected by proposed improvement and expansion of a campground and recreational area by the Keeweeneaw Bay Indian Community, assisted by the Department of Commerce, Economic Development Administration (10/14/75);
"Society Hill Historic District and Mikveh Israel Cemetery", Philadelphia, Pennsylvania, affected by the Washington Square West Urban Renewal Project, assisted by the Department of Housing and Urban Development (10/14/75);
"Hildebrand Ranch", Chatfield Dam, Jefferson County, Colorado, affected by maintenance, stabilization and preservation measures instituted by the Department of the Army, Corps of Engineers (10/22/75);
"Timberline Lodge", Mt. Hood National Forest, Oregon, affected by construction of a day lodge and granting of a permit for construction of an overnight lodge and ancillary facilities, an undertaking of the Department of Argiculture, Forest Service (10/28/75);
"Ninth Street Elementary School", Charleroi, Pennsylvania, affected by construction of a high rise apartment building for the elderly to be built by the Borough of Charleroi as part of its Community Development Block Grant Program, assisted by the Department of Housing and Urban Development (10/28/75);
"Lower China Crossing Site and 10 other archeological sites", vicinity of the Hidden Dam-Hensley Lake Project, Fresno River, California, affected by construction of the above project, an undertaking of the Department of the Army, Corps of Engineers (10/28/75);
"Old Village Historic District", Grand Canyon, Arizona, affected by Grand Canyon Village Development Concept Plan, an undertaking of the Department of the Interior, National Park Service (11/10/75);
"Ute Mountain Ute Mancos Canyon Historic District", and many other historic and archeological properties, vicinity of Dolores River in Southwestern Colorado, affected by a study of the Delores River for inclusion in the National Wild and Scenic Rivers System of the United States, an undertaking of the Department of the Interior, Bureau of Outdoor Recreation, and the Department if Agriculture, Forest Service (11/10/75);
"Shawnee Lookout Archeological District", Hamilton County, Ohio and "Cochran and Shaw Farms" Butler County, Ohio, affected by issuance of a permit for a transmission line crossing Great Miami River, an undertaking of the Department of the Army, Corps of Engineers. (11/10/75);
"Tucker-Carriage House", Raleigh, North Carolina, affected by construction of a highrise elderly housing complex assisted by the Department of Housing and Urban Development (11/10/75);
"Gillis House", Harrison County, Mississippi, affected by constructions of Interstate Route 110, a project funded by the Department of Transportation, Federal Highway Administration (11/10/75);
"Old El Paso County Jail and Alamo Plaza Hotel", Colorado Springs, Colorado, affected by the Alamo Plaza Urban Renewal Project, as undertaking of the Department of Housing and Urban Development (11/24/75);
"Laguna Plata Archeological District", Lea County, New Mexico, affected by installation of a 16" diameter pipeline by the Mississippi Chemical Corporation, an undertaking requiring a permit from the Department of the Interior, Bureau of Land Management (11/25/75);
"Shiloh National Military Park (Shiloh Indian Mounds)," Hardin County, Tennessee, affected by archeological investigations conducted by the Department of the Interior, National Park Service (11/25/75);
"Brinegar Cabin and Shed," Allegheny County, North Carolina, affected by a maintenance and preservation project of the Department of the Interior, National Park Service (11/25/75).

These Memoranda were executed in accordance with § 800.5 of the Advisory Council's Procedures, in fulfillment of Federal Agency responsibilities to afford the Advisory Council on Historic Preservation an opportunity to comment on Federal, federally assisted, and federally licensed undertakings which have an effect upon properties included in or eligible for inclusion in the National Register of Historic Places. These agency responsibilities derive from section 106 of the National Historic Preservation Act of 1966 (80 Stat. 915, 16 U.S.C. 470(f)), and sections 1(3) and 2(b) of Executive Order 11593, "Protection and Enhancement of the Cultural Environment," (16 U.S.C. 470, 36 FR 8921). The Memoranda are available for inspection at the Advisory Council offices, Suites 430 and 1030, 1522 K Street, NW., Washington, D.C. 20005. Further information is available from the Director, Office of Review and Compliance, Advisory Council on Historic Preservation, at the above address.

Dated: December 4, 1975.

CIVIL AERONAUTICS BOARD

Order 75-12-15]

AIR TRAFFIC CONFERENCE OF AMERICA

[Docket No. 28572; Agreement C.A.B. 12688;

Order Regarding Confidentiality in AFC Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of December 1975.

By Order 75-6-49, dated June 10, 1975, the Board approved the Bylaws of the Air Traffic Conference of America. During the course of that proceeding, issues were raised concerning (1) the legality and usefulness of ATC Resolution 5.95 (Agreement C.A.B. 12688, the so-called Confidentiality Resolution),[1] and whether the Board should require ATC to publish either the voting positions of individual members at Conference and committee meetings or a "tally" of such votes (i.e. number of votes for or against a particular item).

Specifically, it was argued to the Board that ATC Resolution 5.95 and ATC's related practice of prohibiting disclosure of voting positions of individual members promote secrecy in ATC proceedings; that such secrecy causes confusion and misunderstanding between members and nonmembers; and that ATC's secretive practices are unjustified and contrary to the public interest. ATC's interpretation of the resolution was also challenged. For example, certain parties alleged that the resolution as presently written and approved by the Board does not prohibit ATC members from disclosing their own voting positions to third parties, notwithstanding ATC's practice of interpreting the rule so as to bar such disclosures. On the other hand, ATC stated that the resolution and related confidential treatment of voting positions permits the conference members to function without undue pressures from third parties and protects the rights of individual ATC members; that the disclosure of individual-member positions and votes are unnecessary to the legitimate interests of third parties; that without complete confidentiality, the ATC members would be subject to economic reprisals from nonmembers; and that ATC has correctly interpreted the resolution.

The issues were not resolved by the Board's opinion since they were outside the scope of that investigation.[2] However, in reaching that decision, we determined that these questions warranted the Board's consideration and would be handled in ancillary proceedings at a later date.[4] In addition, the Board noted that a record has been developed on the merits of these matters in the Bylaws Investigation "so that no further hearings appear to be presently necessary in connection with our reconsideration thereof." We are still of that opinion and intend to consider relevant and material evidence contained in the record of Docket 23542 which is offered in support of comments to be filed herein.

Consistent with that opinion, we are issuing the instant order requesting comments on ATC Resolution 5.95 and the related issue of ATC's confidential treatment of individual voting positions. The basic issues to be resolved are:

1. Whether ATC Resolution 5.95 (Agreement C.A.B. 12688) is adverse to the public interest, and, if so, whether it should be disapproved, or approved subject to conditions.[5] Included in this issue is a subsidiary question relating to whether ATC Resolution 5.95 as presently written and approved by the Board prohibits an ATC member representative from disclosing to third parties the position he has taken or intends to take or the vote that member has cast or intends to cast at a conference and committee meetings.[6]

2. Whether the Board should require ATC to make public, either in the minutes of its meetings or otherwise (a) the voting positions of individual members at conference and committee meetings, or (b) a "tally" of such voting positions.

All interested persons will be given 30 days from the date of adoption of this order to submit comments to the matters discussed herein. Rebuttal comments will be due 15 days thereafter. However, only those persons who submit initial comments herein will be permitted to reply. We expect such persons to direct their comments to the specific issues set forth herein and to support such comments with detailed reasoning. Vague, general, or unsupported comments will be given little weight. Although we intend to consider the record developed in Docket 23542 interested persons are requested to bring to the Board's attention any matters which have a bearing on the issues herein, whether or not such matters were discussed in the ATC Bylaws Investigation. The Board emphasizes that any reference to Docket 23542 must specifically identify transcript pages or other evidence therein used in support of positions advanced in this proceeding.

Accordingly, it is ordered, That: 1. Comments regarding ATC Resolution 5.95 and Other Practices Relating to the Confidentiality of ATC Meetings shall be filed in Docket 28572;

2. Such comments shall address: (a) Whether ATC Resolution 5.95 is adverse to the public interest, and, if so, whether it should be disapproved, or approved subject to conditions:

(1) Whether the resolution bars an ATC member from disclosing to third parties the position which he has taken or intends to take or the vote that the member has cast or intends to cast; and

(2) If the rule does bar self-disclosure, should the Board condition the rule so as to allow an ATC member to disclose its position to third parties;

(b) Whether the Board should require ATC to make public, either in the minutes of its meetings or otherwise (a) the voting positions of individual members at conference and committee meetings, or (b) a "tally" of such voting positions;

3. All interested persons will be given 30 days from the date of adoption of this order to submit comments regarding the matters set forth in 2 above. Rebuttal comments will be due 15 days thereafter. However, only those persons who submit initial comments herein will be permitted to reply; and

4. This order shall be served upon all parties in Docket 23542.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.75-33112 Filed 12-8-75;8:45 am]

---

[1] The Confidentiality Resolution as previously approved by Order E-21942, reads:
"1. Members of the Air Traffic Conference shall observe the greatest possible discretion in disclosing information about discussions which take place in any Conference, Committee or Subcommittee meeting. In no circumstances shall Members divulge to parties outside the Air Traffic Conference the attitudes or positions taken at such meetings by any member's representative which might prove either embarrassing or detrimental to Members of the Conference.
2. This resolution shall not be construed to prohibit a Member from Divluging such information if this is permitted by a Conference resolution, or if a Member is to testify in court of law or other legal or governmental proceedings or hearings."

[2] When we instituted our investigation of the ATC Bylaws (Order 71-6-127, June 24, 1971), we stated: "We do not intend in this proceeding to reexamine our approval of any prior resolution adopted by ATC and approved by the Board, since the status of such resolutions under section 412 has already been examined and determined. To the extent the outcome of the Investigation affects any extant resolution, we shall consider such matters subsequent to the conclusion of the Investigation."

[3] Although these matters were not in issue in that proceeding, Judge Whitehouse found by way of dicta (1) that the confidentiality rule should be reevaluated by the Board with an eye toward disapproval and (2) that ATC should be required to expand and improve the quality of its minutes including the publication of individual-member positions of votes. However, as noted in the Board's opinion (*supra*) our examination of these matters will not be with the predisposition toward disapproval.

[4] The Board's opinion also left for future resolution the issues of ATC exclusionary practices, procedural fairness accorded travel agents and the role of concurring airlines in ATC's SATO program. These matters will be resolved separately.

[5] Section 412(b) of the Federal Aviation Act states in significant part that:
"The Board shall by order disapprove any such contract or agreement, whether or not previously approved by it, that it finds to be adverse to the public interest, or in violation of this Act, and shall by order approve any such contract or agreement, or any modification or cancellation thereof, that it does not find to be adverse to the public interest, or in violation of this Act * * *."

[6] Compare for example, ATC Resolution 5.95 to IATA Resolution 035 ("Unethical Disclosure of Information").

[Docket No. 28443]

SERVICE TO HAZLETON CASE

Postponement of Prehearing Conference

Notice is hereby given that the prehearing conference in the above-entitled matter, now assigned to be held on December 12, 1975, (40 FR 52433), is postponed to January 12, 1976, at 10:00 a.m. (local time), Room 1003, Hearing Room B, Universal North Building, 1875 Connecticut Avenue, NW., Washington, D.C.

Dated at Washington, D.C., December 3, 1975.

[SEAL] GREER M. MURPHY,
Administrative Law Judge.

[FR Doc.75-33111 Filed 12-8-75;8:45 am]

COMMODITY FUTURES TRADING COMMISSION

ADVISORY COMMITTEE ON DEFINITION AND REGULATION OF MARKET INSTRUMENTS

Change in Meeting Place

Notice is hereby given of changes in the location of the meetings for the Subcommittees of the Commodity Futures Trading Commission Advisory Committee on Definition and Regulation of Market Instruments.

The Cash Market Subcommittee will meet on December 11, 1975, at 10:00 a.m. at the Statler Hilton Hotel, 16th and K Streets NW., Washington, D.C., in the Senate Room, rather than at 1120 Connecticut Avenue NW., Washington, D.C. in Room 925, as previously stated in the FEDERAL REGISTER of November 26, 1975 (40 F.R. 54855).

The Commodity Options Subcommittee will meet on December 15, 1975, at the Statler Hilton Hotel, 16th and K Streets NW., Washington, D.C., in the California Room, rather than at 1120 Connecticut Avenue NW., Washington, D.C. in Room 925, as previously stated in the FEDERAL REGISTER of November 28, 1975 (40 F.R. 55376).

The Futures, Forward and Leverage Contracts Subcommittee will meet on December 16, 1975, at the Statler Hilton Hotel, 16th and K Streets NW., Washington, D.C., in the California Room, rather than at 1120 Connecticut Avenue NW., Washington, D.C. in Room 925, as previously stated in the FEDERAL REGISTER of December 1, 1975 (40 F.R. 55666).

Dated: December 5, 1975.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[FR Doc.75-33250 Filed 12-8-75;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 20633, 20634; FCC 75-1274]

LINCOLN TELEVISION, INC. (KTSF-TV) AND LEON A. CROSBY (KEMO-TV)

Subscription Television Authority

In re applications of Lincoln Television, Inc. (KTSF-TV), San Francisco, California, Docket No. 20633, File No. BSTV-7; and Leon A. Crosby (KEMO-TV), San Francisco, California, Docket No. 20634, File No. BSTV-11; for subscription television authority.

1. The Commission has before it for consideration the applications of Lincoln Television, Inc. (BSTV-7) and Leon A. Crosby (BSTV-11) for subscription television (STV) authorizations in San Francisco, California.[1] Lincoln Television, Inc. (Lincoln), is the permittee of KTSF-TV, an unbuilt television broadcast station on channel 26, while Leon A. Crosby (Crosby) is the licensee of KEMO-TV, channel 20. Section 73.642 (a) of the Commission's rules provides, inter alia, that "[o]nly one such authorization will be granted in any community." Therefore, because only one of the above applications for San Francisco may be granted, it follows that the applications are mutually exclusive under the Ashbacker[2] doctrine and must be designated for comparative hearing in a consolidated proceeding to determine which proposal, if granted, would better serve the public interest, convenience and necessity.

2. Both applicants are legally, technically and otherwise qualified to undertake the proposed subscription television operations. See Fifth Report and Order on Subscription Television, Docket No. 11279, 19 FCC 2d 559, 17 RR 2d 1509 (1969). Thus, the only purpose of the hearing will be the comparative consideration of the respective proposals. Inasmuch as this is the first time mutually exclusive STV applications have been designated for hearing, we believe some general guidelines should be set forth to govern the comparison.[3] We do not assume that the matters discussed below will be relevant to every comparative STV proceeding, or even to this proceeding. However, these matters, generally, are sufficiently relevant to a proper comparison that evidence should be permitted without the necessity of petitioning to enlarge issues under § 1.229 of the rules. Rather, a party may adduce evidence concerning any of the areas discussed below under the comparative issue by making an offer of proof to the Administrative Law Judge which demonstrates that the evidence to be adduced will be meaningful and likely to result in the award of a preference.

3. *Programming.* In this area, proposals required of STV applicants are markedly less specific than those required in connection with other broadcast applications. Compare Fifth Report and Order, supra at paragraphs 25–26, with Primer on Ascertainment of Community Problems by Broadcast Applicants, 27 FCC 2d 650, 21 RR 2d 1507 (1971). However, applicants for STV authority are directed to make a survey to ascertain the "sports and entertainment needs and interests of the community." Fifth Report and Order, supra at paragraph 26, and describe in their application the "percentage of STV broadcast time per year" to be devoted to specific types of STV programming, "e.g., feature films, sports, opera, ballet, theater, instructional," etc. Id. Accordingly, any proposal which clearly more closely approximates the programming preferences revealed by the applicant's survey should be preferred. Cf. Policy Statement on Comparative Broadcast Hearings, supra at 397.

4. *Cost.* Another factor which may be material to a decision on the comparative merits of the respective applications is the cost of the service to subscribers. Clearly critical to the successful development of subscription television is the creation of a substantial demand for the service within a relatively short period of time. As indicated above, an important factor may be the ability of the STV operator to provide programming which reflects the STV needs and interests of the community. Also important to the creation of demand, however, is cost to the consumer, including deposits and installation charges, monthly rental payments, and per-program charges. If, all other things being equal, see Alabama Microwave, Inc., 39 FCC 2d 660, 667 (Rev. Bd. 1972), the charges proposed by one applicant are sufficiently lower to induce significant additional consumer demand, a preference should be awarded to that applicant.

5. *Ability to construct.* A further comparative consideration is the ability of the applicant to promptly initiate the new service. Our rules presently provide for an eight-month period to complete installation of the STV equipment and commence operation, once an authorization is issued. 47 CFR 73.642(c). Routinely, however, this limitation has been waived to provide for eighteen months for construction. Unfortunately, experience has so far indicated that more time is required. Despite the issuance of four-over-the-air subscription television authorizations, the earliest on July 26, 1972, to Blonder-Tongue Broadcasting Corporation[4] for WBTB-TV, Newark, New Jersey, to the Commission's knowledge, no company is yet actively engaged in manufacturing the necessary encoding and decoding equipment. Whether this circumstance is a reflection of economic conditions or the less-than-best efforts of the holders of the authorizations is not clear. However, it is clear that the public interest is not served by an inactive authorization where another applicant would be prepared to proceed with construction and commence operation with an adequate service at a significantly earlier date. The weight of the preference for earlier institution of service might vary directly with the time between anticipated completion dates. For the time being, no authorization should be awarded where the applicant is unable to demonstrate, not to a certainty, but to at least a probability, the ability to commence operation within eighteen months. Also, in line with the discussion in paragraph 4, above, a preference should be considered where an applicant is able to demonstrate the ability to extend serivce to a significantly greater number of subscribers during the period prior to commencement of operation and the first year of operation.[5]

6. *STV systems.* The Fourth Report and Order on Subscription Television, 15 FCC 2d 466 (1968) specifically contemplates as a matter for comparative consideration the respective technical merits of the proposed STV systems. Id., at 535. However, this matter must be treated differently from the matters discussed above. The system approval application of Blonder-Tongue Laboratories was submitted under a cloak of confidentiality conferred by former § 73.644 (a)(10),[6] and Systems Development Corporation (SDC)[7] requested and was granted confidential treatment of the contents of its application pursuant to § 0.459. Similar statements may be made concerning other system approval applications. The Commission has recently ruled that the contents of these and other STV system approval applications must be made available for public inspection pursuant to the Freedom of Information Act, 5 U.S.C. 552, with the exception of those portions of the applications which concern the encoding and decoding of the STV signal. Blonder-Tongue Laboratories, 34 RR 2d 828 (1975). Enforcement of this decision is now the subject of two civil actions, Case Nos. 75-1269 and 75-1312, in the United States District Court for the District of Columbia. While this limited release of information would facilitate the technical comparison of the systems, it obviously will not, by itself, permit a thorough comparison of all pertinent characteristics of the systems. We believe that this is an important area of the overall comparison. Therefore, we will hereby provide that parties in an STV comparative proceeding may seek to adduce evidence to explore the relative technical merits of each system, in the manner outlined in paragraph 2, above. However, a party seeking to adduce such evidence will be required to obtain from the developer of its system a waiver of every confidential aspect of its system approval application file, for the purpose of developing the hearing record. This does not mean that every part of the file will thus be made available for public inspection. As to those matters which the Commission has determined should not be made public, see Blonder-Tongue Laboratories, supra, the presiding officer is hereby directed to make appropriate orders to prevent the disclosure of such information in other proceedings.[8] A responding party may, of course, elect to not participate in a technical comparisor and thereby preserve the confidential nature of the file. However, by so doing it, naturally, foregoes the possibility of receiving a preference under the issue, and may thereby be placed at a comparative disadvantage. We are aware that approved systems may differ in a multitude of respects. Not every difference should be the subject of comparative consideration. We have, after all, provided for the approval of more than one system for subscription television (Fourth Report and Order, supra, at 535). To keep the comparison manageable and relevant, those characteristics which are of concern should be only those which clearly affect the quality of transmission or reception, continuity of service, convenience to subscribers, and the security of the scrambling/unscrambling system against unauthorized access to the scrambled signal.

7. As we stated in the Policy Statement on Comparative Broadcast Hearings, supra, the above guidelines are "not intended to preclude the full examination of any relevant and substantial factor." 1 FCC 2d, at 399. But additional matters will be considered only on a demonstration to the Administrative Law Judge of (1) their relevance to Commission licensing policies, and (2) the probability that meaningful evidence will be produced, and (3) that the evidence is likely to result in the awarding of a preference.

8. In view of the above: *It is hereby ordered,* That the above-captioned applications of Lincoln Television, Inc., and Leon A. Crosby, for subscription television authorization, are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, on the following issues:

(1) To determine, on a comparative basis, which of the above-captioned applications, if granted, would better serve the public interest, convenience and necessity, and

(2) To determine, in the light of evidence adduced on the above issue, which application should be granted.

9. *It is further ordered,* That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within 20 days of the mailing of this order file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this order.

10. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and manner prescribed in such rule, and shall advise the Com-

[1] The Commission has also received a pleading from the Community Coalition for Media Change (CCMC), "requesting an extention (sic) of time to file opposition" to the Crosby application. CCMC alleged that it had been unable to meet with Kingsley Murphy, the proposed STV franchisee. Nothing further in this matter has been received from CCMC. Inasmuch as STV applications are not subject to § 1.580(i) of the rules, there is no deadline for filing oppositions, hence no need for an extension, and hence no need for the Commission to deal with CCMC's request.

[2] Ashbacker Radio Corp. v. FCC, 326 U.S. 327, 66 S. Ct. 148, 90 L. Ed. 108 (1946).

[3] While guidelines have been established for comparative broadcast proceedings by the Policy Statement on Comparative Broadcast Hearings, 1 FCC 2d 393, 5 RR 2d 1901 (1965), not all the factors enumerated therein are relevant to the evaluation of STV proposals. For example, integration of ownership and management will not be significant, in view of the fact that each applicant is already a licensee or permittee of the Commission and also that the Commission has approved a variety of means of structuring the programming, encoding, promoting and collection functions of an STV operator. Fourth Report and Order on Subscription Television, Docket No. 11279, 15 FCC 2d 466, 541–42 (1968). Similarly, efficient use of the frequency is not a significant matter. On the other hand, diversification of control of the mass media may well be significant, and the area of comparison may be extended to a separate franchisee or STV operator, if that is the organizational structure proposed by the applicant. For example, in comparative cases, the Commission has traditionally considered ownership of theaters as a comparative factor, although the importance attached to theater ownership has varied. Compare, e.g., WJR, The Goodwill Station, 9 RR 227 (1954), with Columbia Amusement Co., 12 RR 509 (1956) and La Fiesta Broadcasting Company, 6 FCC 2d 65, 9 RR 295 (Rev. Bd. 1966). As we expect that a significant percentage of STV programming will consist of first-run movies, we can conceive of situations where theater ownership by an individual with an interest in an STV application could have anti-competitive potential inconsistent with the public interest. There are, moreover, other situations which, it appears, the Commission has not previously considered, such as ownership of an interest in a local professional sports team, which, because of the anticipated sports component of STV programming, should be examined for purposes of comparison. See Community Telecasters of Cleveland, Inc., 43 FCC 2d 540 (1973). The fact that it is the licensee who is ultimately responsible for the selection of STV programming does not preclude consideration of the holdings of a separate STV operator or franchisee, if it bears upon the Commission's policy of avoiding situations where the absence of diverse ownership presents an inherent possibility of reduced competition. Cf. Alabama Microwave, Inc., et al., 23 FCC 2d 792 (1970). See, generally In the Matter of Amendment of §§ 73.35, 73.240 and 73.636 of the rules, 2 RR 2d 1588, 1591 (1964).

[4] Blonder-Tongue Broadcasting Corporation and Blonder-Tongue Laboratories, Inc. (developer and franchisor of the BTVision STV system, proposed by Crosby's application) are commonly-owned corporations.

[5] While not intending to define or limit what we would consider "significant," we would say, for example, that an applicant who proposed to extend service to 20,000 homes in the first year of operation (and demonstrated the capacity to fulfill such an undertaking) should be preferred over an applicant proposing to service 10,000 homes. Comparison over longer periods of time is less likely to be helpful, because the accuracy of the predictions is likely to be reduced by a compounding of uncertainties in estimating first year extensions of service and a greater vulnerability to external factors beyond the control or foresight of the applicant.

[6] Former § 73.644(a)(10) provided: "Files containing information about subscription television systems submitted by applicants for approval of these technical systems pursuant to the rules in this part will not be open to the public." This section of the rules was deleted effective March 25, 1974.

[7] SDC is the developer of the encoding/decoding system proposed for use by Lincoln's application.

[8] For example, see American Telephone and Telegraph Co. (Docket No. 20288) FCC 75M-446, released March 11, 1975. See also, George T. Hernreich, 52 FCC 2d 261, 265 (1975).

[Docket No. 19743]

RADIO BROADCAST STATIONS AND MUSICAL FORMAT SERVICE COMPANIES

Subscription Agreements; Correction

In the matter of inquiry into subscription agreements between radio broadcast stations and musical format service companies, Docket No. 19743.

1. The Report and Policy Statement, Mimeo No. 37875, adopted in the above docket November 4, 1975, referred to the Commission's former rule § 1.613(c) which required the filing of time-brokerage contracts. That rule was changed by paragraph 5(g) of our re-regulation *Order*, 37 FR 23723, adopted November 1, 1972. Now F.C.C. § 1.613(d) states that time brokrage contracts do not have to be filed with the Commission and need only be kept in the station's files.

2. Therefore, the above Report and Policy Statement[1] is corrected by (a) changing the second sentence of paragraph 12 as follows:

"Because of the lessening of licensee control involved in time brokerage cases, a requirement for the filing of time brokerage agreements was adopted in 1945, along with other filing requirements, formerly § 1.613(c) of the Commission's rules."

(b) Adding to the end of paragraph 12:

"The requirement for filing time brokerage agreements was removed by our reregulation Order, 37 FR 23727, adopted November 1, 1972, to reduce administrative and licensee burdens. Section 1.613 (d) of the Commission's rules now requires that time brokerage contracts be kept only in the station's public files."

(c) And changing the first sentence of paragraph 15 as follows:

"Concerning the filing of written agreements, we require network contracts to be filed with the Commission and time brokerage contracts to be kept in the station's files."

Released: November 21, 1975.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meeting Cancellation

To comply with certain requirements of the Federal Advisory Committee Act (Pub. L. 92-463), it is necessary to prepare meeting notices at least 20 days in advance of the proposed meeting. Subsequently, unexpected circumstances may make it necessary to cancel proposed meetings. Accordingly, the following Radio Technical Commission for Marine Services meeting previously announced in the FEDERAL REGISTER is cancelled.

Special Committee No. 66, Receiver Standards for the Maritime Mobile Service. Wednesday, December 17, 1975.

FEDERAL MARITIME COMMISSION

FAR EAST CONFERENCE, ET AL.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before December 19, 1975. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

FAR EAST CONFERENCE, PACIFIC WESTBOUND CONFERENCE, TRANS-PACIFIC FREIGHT CONFERENCE OF JAPAN/KOREA AND JAPAN/KOREA-ATLANTIC & GULF FREIGHT CONFERENCE

Notice of agreement filed by:

Edward D. Ransom, Esq., Lillick, McHose, Wheat, Adams & Charles, 311 California Street, San Francisco, California 94104.

Agreement No. 10110-3 is an application on behalf of the member lines of the Far East Conference, Pacific Westbound Conference, Trans-Pacific Freight Conference of Japan/Korea and the Japan/Korea-Atlantic & Gulf Freight Conference to extend the terms and conditions of the presently approved agreement through March 31, 1976. The terms and conditions of the arrangement remain unchanged and provide that the conference lines may cooperate and coordinate actions for the voluntary disposition of interrelated matters concerning the conferences at issue in Docket Nos. 73-28 and 73-29, involving alleged rate disparities in the trades between Japan and the Pacific Coast, and the Atlantic and Gulf Coasts, respectively, of the United States.

By order of the Federal Maritime Commission.

Dated: December 4, 1975.

FRANCIS C. HURNEY,
Secretary.

[Independent Ocean Freight Forwarder License No. 1509]

FORWARDING SYSTEMS, INC.

Revocation

On November 26, 1975, Forwarding Systems, Inc., Pier 26, San Francisco, California 94105 voluntarily surrendered its Independent Ocean Freight Forwarder License No. 1509 for revocation effective December 25, 1975.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in manual of Orders, Commission Order No. 201.1 (revised) Section 5.01 (b) (dated 6/30/75);

It is ordered, That Independent Ocean Freight Forwarder License No. 1509 issued to Forwarding Systems, Inc. be and is hereby revoked effective December 25, 1975, without prejudice to reapply for a license in the future.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Forwarding Systems, Inc.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

[Docket No. 75-57]

MATSON NAVIGATION CO.

Proposed Rate Increases in the United States Pacific Coast/Hawaii Domestic Offshore Trade; Order of Investigation and Suspension

Matson Navigation Company (Matson) has filed with this Commission revisions of several of its tariffs.[1] These revisions will result in rate increases on 356 of the 386 commodity items for which Matson publishes rates in the U.S. Pacific Coast/Hawaii trade. These increases vary from commodity to commodity. On a certain few tariff items the rates are unchanged, while the percentage increases on other items range as high as 15 percent. The overall effect of the proposed increases will be to increase Matson's gross revenues by 5.4 percent. The bulk of the revisions are to become effective on December 8, 1975. The remainder are scheduled to become effective on January 2, 1976.

Two formal protests and eleven informal letters of protest were timely received from shippers, the State of Hawaii, Hawaiian cattle and poultry interests, and members of the Hawaiian Congressional delegation. All protests request either suspension, investigation, or denial of all or specific parts of Matson's proposed increases. The subject matter of the protests includes the following considerations:

1. The proposed increases will expand what is alleged to be an already unreasonable rate differential between Matson cargoes moving from northern and southern ports on the Pacific Coast of the United States;

2. The proposed 15 percent increase on westbound animal feed will severely hamper the ability of Hawaiian producers of beef, poultry, and other livestock and related products to compete in the Hawaiian market and is unreasonably discriminatory in violation of section 16, First of the Shipping Act, 1916;

3. The proposed increases on numerous specific tariff items are structured so as to be unreasonably discriminatory and/or create undue preferences in violation of section 16, First of the Shipping Act, 1916, and

4. Matson's practice of moving certain cargoes overland from the Los Angeles area to Oakland for loading on Roll-on/Roll-off vessels is being conducted without a tariff on file for this service and is being provided in a manner whch unlawfully discriminates between shippers.

The proposed revisions have been structured by Matson in a fashion which imposes the highest percentage increases on commodities which yield relatively low revenues. The largest percentage rate increase (15 percent) has been applied to animal feed, a commodity for which the current rate yields the lowest revenue of all Matson rates. Matson has stated that the purpose of the variable percentage increases is to restore what it considers to be a more proper relationship between high and low rated commodities. The Commission expects such a relationship to be established and maintained through the application of rational rate-making considerations and considers this investigation a forum in which Matson should justify the variable percentage increases on commodities and the relationships which result from the application of these rates.

The Commission notes that among the 30 tariff items which escaped the imposition of increased rates are the following Eastbound commodities: [2]

1. Bulk sugar and bulk molasses;
2. Pineapple;
3. Foodstuffs;
4. Lead;
5. Prefabricated houses, and
6. Hydrofoils.

Bulk sugar and molasses move for the account of both Matson's parent company, Alexander & Baldwin, and for that of the California & Hawaiian Sugar Company, a refining and marketing cooperative in which Alexander & Baldwin holds a substantial interest. These commodities are carried at rates established by freighting agreements which are currently being filed with the Commission as tariffs. The effect of these rates on Matson's financial results is one of the subjects being pursued in Docket No. 73-22, Matson Navigation Co.—Proposed Changes in Rates Between U.S. Pacific Coast and Hawaii, et al. In the case of pineapple rates, Matson has alleged as justification its decision to keep the rates constant as a means of enabling Hawaiian pineapple growers to compete with foreign pineapple producers in United States mainland markets. As was the case in consolidated Dockets Nos. 73-22, et al., it will be necessary to examine the relationship of revenues received from the carriage of eastbound cargoes to Matson's revenue requirements for the entire U.S. Pacific Coast/Hawaii trade.

Matson contends that the subject increases will yield a 10.58 percent rate of return for the projected year. Data submitted by Matson to the Commision do not permit determination of the exact effect of the proposed increases on Matson's financial results for the projected year. Such a determination shall be made in the course of this investigation.

Upon consideration of the above matters, the Commission is of the opinion that Matson's proposed tariff revisions listed in Appendix A should be made the subject of public investigation and hearing to determine whether they are unjust, unreasonable or otherwise unlawful under section 18(a) of the Shipping Act. 1916 and/or Section 4 of the Intercoastal Shipping Act. 1933. The Commission is of the further opinion that the proposed revisions should be suspended under the authority granted the Commission by Section 3 of the Intercoastal Shipping Act, 1933, and good cause appearing:

Therefore, it is ordered, That pursuant to sections 18(a) and 22 of the Shipping Act, 1916, and Sections 3 and 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted into the lawfulness of the tariff matter listed in Appendix A for the purpose of making such findings as the facts and circumstances warrant. In the event the tariff matter is further changed, amended, or reissued, such changes are hereby ordered to be included in this investigation;

It is further ordered, That pursuant to section 16, First and 18 of the Shipping Act, 1916, and Section 4 of the Intercoastal Shipping Act, 1933, a determination be made as to whether Matson's proposed increases on animal feed are likely to result in an undue or unreasonable prejudice or disadvantage against the local Hawaiian egg, poultry and cattle industry or an undue or unreasonable preference or advantage to shippers of eggs, poultry and cattle originating within the continental United States.

It is further ordered, That pursuant to Section 3 of the Intercoastal Shipping Act, 1933, the tariff matter set forth in Appendix B is hereby suspended and the use thereof deferred to and including April 7, 1976, unless otherwise ordered by the Commission;

It is further ordered, That pursuant to Section 3 of the Intercoastal Shipping Act, 1933, the tariff matter set forth in Appendix C is hereby suspended and the use thereof deferred to and including May 1, 1976, unless otherwise ordered by the Commission;

It is further ordered, That there shall be filed immediately by Matson consecutively numbered supplements to the aforesaid tariffs, which supplements shall bear no effective date, shall reproduce this order in its entirety and shall state that the aforesaid matter is suspended and may not be used until April 8, 1976 (Appendix B) or May 2, 1976 (Appendix C), and that the suspended matter may not be changed until this proceeding has been disposed of or until the period of suspension has expired, and that the rates, fares, charges, classifications, rules, regulations, or practices theretofore in effect and which were to be changed by the suspended publication, or part or parts thereof, shall remain in effect during the period of suspension, unless otherwise ordered by the Commission;

It is further ordered, That, as part of this investigation a determination shall be made as to whether Matson's proposed increases in rates are unreasonable under section 18(a) of the Shipping Act, 1916, and Section 4 of the Intercoastal Shipping Act, 1933;

It is further ordered, That copies of this Order shall be filed with the appropriate tariff schedules in the Bureau of Compliance of the Federal Maritime Commission;

It is further ordered, That Matson Navigation Company be named as respondent in this proceeding;

It is further ordered, That the following persons be named as complainants in accordance with the Commission's Rules of Practice and Procedure;

State of Hawaii, Kimberly-Clark Corporation, Hunt-Wesson Foods, Inc.

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of this Commission's Office of Administrative Law Judges and that the hearing(s) be held at a date and place to be determined by the Presiding Administrative Law Judge;

[1] See Appendix A attached hereto.

[2] Rates on prefabricated houses and hydrofoils are also unchanged for westbound movements of those items.

V 40 237 DEC 9 75 XUM

mined by the Presiding Administrative Law Judge, but in any event, the hearing shall commence no later than March 3, 1976.

It is further ordered, That, (1) a copy of this order be served upon each respondent and complainant herein and upon this Commission's Bureau of Hearing Counsel, and published in the FEDERAL REGISTER, and (II) the respondent, complainants and Hearing Counsel be duly served with notice of time and place of hearing(s);

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene therein, should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 5(1) of the Commission's Rules of Practice and Procedure (46 CFR 502.72) with a copy to all parties to this proceeding.

By the Commission.

FEDERAL POWER COMMISSION

[Docket No. RI76–50]

AMAREX, INC. [OPERATOR], ET AL.

Application, Petition for Special Relief, and Petition for Declaratory Order

DECEMBER 1, 1975.

Take notice that on October 29, 1975, Amarex, Inc. (Operator), *et al.* (Amarex), 200 North Harvey, Suite 200, Oklahoma City, Oklahoma 73102, filed in Docket No. RI76–50 an application for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act for the sale of natural gas to Colorado Interstate Gas Company (CIG) from the Mills Ranch Field, Wheeler County, Texas. In addition, Amarex has also filed a petition for special relief from the nationwide rate, as adjusted for small producers by Opinion No. 742, for the subject sale pursuant to Section 2.56a(g)(2) of the Commission's Statements of General Policy and Interpretations. Amarex states that the rate set forth in its gas purchase agreement with CIG, 80 cents per Mcf, is so low as to adversely affect the public interest, and accordingly, Amarex requests the Commission to determine a higher rate that is not so low as to adversely affect the public interest. Amarex has submitted data to show that such a rate should be in the range of $2.00 per Mcf.

Amarex has also filed a petition for a declaratory order pursuant to Section 1.7 of the Commission's Rules of Practice and Procedure. Amarex states that Mississippi River Transmission Corporation (MRT) may claim some right to purchase gas produced by Amarex from the subject acreage, and requests that the Commission order MRT to show the nature and extent of its claim, if any, or to state that it will not claim a right to purchase gas produced by Amarex. Amarex further requests that the Commission issue an order declaring MRT's entitlement, if any, to purchase the subject gas.

Any person desiring to be heard or to make any protest with reference to said petition should on or before December 11, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

[Docket No. RP76–11]

BACA GAS GATHERING SYSTEM, INC.

Further Extension of Procedural Dates

DECEMBER 1, 1975.

On November 25, 1975, Baca Gas Gathering System, Inc. filed a motion to extend the procedural dates fixed by order issued October 10, 1975, as most recently modified by notice issued November 14, 1975, in the above-designated proceeding.

Upon consideration, notice is hereby given that the procedural dates in the above proceeding are modified as follows:

Service of Company Testimony, January 19, 1976.
Service of Staff and Intervenor Testimony, February 16, 1976.
Service of Company Rebuttal, March 1, 1976.
Hearing, March 22, 1976 (10:00 a.m., e.s.t.).

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75–33050 Filed 12–8–75;8:45 am]

[Docket No. RM76–8]

POLICY CONCERNING ENFORCEMENT OF DELIVERABILITY AND RENDITION OF NATURAL GAS SERVICES UNDER CERTIFICATED ARRANGEMENTS

Order Granting Reconsideration for Purposes of Further Consideration

NOVEMBER 28, 1975.

On October 14, 1975, the Commission issued its Order No. 539 which adopted Section 2.83 of the Commission's General Policy and Interpretations, setting forth a statement of policy with respect to the enforcement of deliverability obligations and the rendition of natural gas service under rate schedules certificated by this Commission.

Applications for rehearing and/or reconsideration of Order No. 539 have been filed by Phillips Petroleum Company (Phillips) on November 10, 1975, Shell Oil Company, et al. (Shell) on November 12, 1975, Sohio Petroleum Company (Sohio), Continental Oil Company (Continental), Natural Gas Pipeline Company of America and Napeco, Inc. (Natural), Tenneco Oil Company, et al. (Tenneco), Interstate Natural Gas Association of America (INGAA), Mobil Oil Corporation (Mobil), and Texaco Inc. (Texaco) on November 13, 1975, and by Entex, Inc. (Entex) on November 14, 1975. The Tenneco, et al. group also filed on November 13, 1975 a petition to stay the effectiveness of Order No. 539 "until such time as the issues raised in that Order have been fully considered and resolved." A similar request for a stay has been filed by Mobil together with its petition for rehearing and reconsideration.

Two of the Tenneco *et al.* group, Tenneco Oil Company in Docket Nos. CI75–719, CI75–746 and CI75–747, and Tenneco Exploration, Ltd., in Docket Nos. CI75–718 and CI75–748, have requested a stay of Order No. 539 because of their reluctance to commence deliveries in those dockets under validly issued and accepted temporary certificates because of the assertion that Order No. 539 imposes an unlawful "warranty" delivery obligation. This question has been raised by some other parties seeking reconsideration and it will be disposed of, after due deliberation, in the Commission's final order on reconsideration in Docket No. RM76–8, along with the remaining issues posed by petitioners.

Section 19(a) of the Natural Gas Act provides that any person "aggrieved by an order" of the Commission "may apply for rehearing within thirty days after the issuance of that order" and that such a petition, if not acted upon "within thirty days after it is filed, * * * may be deemed to have been denied."

Despite petitioners' charcaterization of their applications as petitions for rehearing, we note that Order No. 539 was a statement of policy and, therefore, that applications for rehearing do not lie. Nevertheless, we intend to consider the matters raised by petitioners, and to provide us with adequate time to fully consider the issues presented, we will grant reconsideration of Order No. 539 solely for the purpose of further consideration. This action does not constitute a grant or denial of any or all of the petitions on their merits in whole or in part.[1] All motions for stay filed in this proceeding will be dealt with at such time as the Commission issues its final order on reconsideration.

The Commission orders: (A) The petitions for reconsideration of Order No. 539 filed by Phillips, Shell, Sohio, Continental, Natural, Tenneco, INGAA, Mobil, Texaco, and Entex are granted for the sole purpose of further reconsideration of Order No. 539.

(B) Motions for stay of the effectiveness of Order No. 539 filed by Tenneco *et al.* and Mobil will be acted upon in the Commission's final order on reconsideration.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket Nos. RP73–86, RP73–85, RP75–105 and RP75–106; (Consolidated Taxes)]

COLUMBIA GAS TRANSMISSION CORP. ET AL.

Order Approving Settlement Agreement and Establishing Procedural Dates for Deferred Issue

DECEMBER 1, 1975.

On September 23, 1975, Columbia Gas Transmission Corporation and Columbia Gulf Transmission Company (Columbia) submitted to Presiding Administrative Law Judge Michel Levant a proposed Stipulation and Agreement (Agreement) and requested that said Agreement be certified to the Commission, along with the record in this proceeding, for its consideration. On September 25, 1975, Judge Levant certified the Agreement and the record to the Commission. On October 9, 1975, the certification of the proposed Agreement was noticed with comments thereon due on or before October 24, 1975.

These proceedings were commenced by the filing on February 28, 1973, of certain tariff sheets by Columbia which, inter alia, provided for an increase in charges to Columbia's jurisdictional customer of approximately $58 million. The sheets were accepted for filing to become effective on September 14, 1973, subject to refund.

The original settlement of these proceedings was accepted with conditions by the Commission's Opinion No. 734, issued June 12, 1975. Thereafter, on July 10, 1975, Columbia advised the Commission of its withdrawal from the settlement. By order issued August 1, 1975, the Commission accepted Columbia's withdrawal and remanded this case for hearing directing all parties to consider all issues raised in these proceedings including, inter alia, whether Federal Income Taxes, which were computed in the old settlement at the statutory rate, should be computed using a consolidated effective tax rate.

On August 12, 1975, the parties, including the Commission Staff, began a series of informal conferences which resulted in the proposed agreement. The proposed revised settlement reflects the actual cost of service[1] for Columbia for the twelve month period ended October 31, 1974, and the actual sales volumes for that period. The locked-in period from September 14, 1973, through October 31, 1974, is the period during which Columbia Transmission's rates in Docket No. RP73–86 were in effect. In accordance with Opinion No. 734, the revised settlement cost of service reflects an overall rate of return of 8.91% with an 11.84% return on common equity. Similarly, depreciation expense has been calculated on the basis of the depreciation accrual rates approved by Opinion No. 734. In all other respects, the Commission's findings in Opinion No: 734 were followed in developing the proposed revised settlement cost of service.

The revised agreement would result in refunds to the wholesale customers of Columbia of $24,332,922 for the period from September 14, 1973 through October 31, 1974, including interest at 7% per annum as applied to the period from September 14, 1973 to the date such refund amount is credited against customer billings.

The proposed agreement further provides that "the issue of consolidated tax savings shall be a matter for separate consideration in the current rate proceedings of Columbia Gas and Columbia Gulf in Docket Nos. RP75–105 and RP75–106." The parties also agree that the issue of conjunctive billing is reserved for hearing in Docket No. RP74–82, in accordance with Article III–B of the settlement of that proceeding now pending before the Commission.

On October 24, 1975, Columbia and the Commission Staff filed their respective comments in support of the proposed revised settlement. With respect to the parties' agreement to defer consideration of the issue of consolidated tax savings for resolution in Docket Nos. RP75–105 and RP75–106, Columbia supports the deferral in that it will "permit a final disposition of the instant protracted rate proceedings, the resolution of which is long overdue", thereby reducing the level of Columbia's contingent earnings. In addition, Columbia believes that a locked-in case "does not provide a forum as suitable for the consideration of the consolidated tax savings question" as the rate proceedings in Docket Nos. RP75–105 and RP75–106 do, in that those proceedings involve rates of future applicability. Finally, Columbia notes that the interest expense for the Federal income tax calculation used in the settlement cost of service was higher than that carried on Columbia's books during the subject period, resulting in a reduced tax allowance for Columbia.

[1] *Area Rate Proceeding, et al. (Southern Louisiana Area*, 40 FPC 1091 (1968)).

[1] Set forth in Appendix A.

V40237 DEC 9 75 D XUM

Staff's comments similarly support deferral of the consideration of the issue of consolidated tax savings arising from Staff's belief "that the public interest at this time would be better served by an expeditious resolution of these long pending proceedings which would speed the payment of refunds to Columbia's customers." Moreover, Staff observes that raising the consolidated tax savings issue in these proceedings might delay Commission action on a pending settlement of Columbia's next succeeding rate case in Docket Nos. RP74–81 and RP74–82, which was certified to the Commission on August 21, 1975. Staff, as well as Columbia, requests that the Commission approve the proposed revised settlement agreement without modification.

Our review of the proposed settlement, the comments of Staff and Columbia, and the related record indicates that it is a reasonable and appropriate resolution of the issues in this proceeding in the public interest and that, accordingly, it should be adopted, as hereinafter ordered. In addition, we shall establish separate procedural dates in the proceeding in Docket Nos. RP75–105 and RP75–106 for the service of evidence and for hearing on the reserved issue of consolidated tax savings.

The Commission finds: The settlement of these proceedings on the basis of the stipulation and agreement certified on September 25, 1975, is reasonable and proper and in the public interest in carrying out the provisions of the Natural Gas Act and should be approved.

The Commission orders: (A) The proposed revised settlement of these proceedings as certified to the Commission on September 25, 1975, is incorporated by reference and made a part hereof and is approved and adopted.

(B) Within 30 days after the date this order is issued, Columbia will make refunds to its jurisdictional customers in accordance with the settlement agreement.

(C) Pursuant to authority of the Natural Gas Act, particularly Sections 4 and 5 thereof, and the Commission's Rules and Regulations, a public hearing for the purpose of cross-examination of the evidence on the issue of consolidated tax savings in Docket Nos. RP75–105 and RP75–106 shall be held on April 13, 1976, at 10:00 A.M., in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C, 20426.

(D) On or before January 6, 1976, Columbia shall serve its prepared testimony and exhibits in Docket Nos. RP75–105 and RP75–106 on the consolidated tax issue. Staff shall serve its prepared testimony and exhibits in Docket Nos. RP75–105 and RP75–106 on the consolidated tax issue or before March 2, 1976. Any intervenor evidence on the consolidated tax issue in Docket Nos. RP75–105 and RP75–106 shall be filed on or before March 16, 1976. Any rebuttal by Columbia on the same issue in those dockets shall be served on or before March 30, 1976.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose, (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

APPENDIX A

SCHEDULE 1.—*Columbia Gas Transmission Corp.*

[FPC Docket No. RP73–86, Settlement cost of service in thousands of dollars]

Line No.			Total
1	1	Gas operating expenses:

[Docket No. ES76–19]

IDAHO POWER CO.

Order Authorizing the Issuance of Short-Term Unsecured Promissory Notes

NOVEMBER 28, 1975.

Idaho Power Company (Applicant), on October 14, 1975, filed an application, pursuant to Section 204 of the Federal Power Act, seeking authorization to issue short-term unsecured promissory notes to commercial banks and to commercial paper dealers in an aggregate amount not to exceed $122,500,000 outstanding at any one time, with a final maturity date of not later than December 31, 1977.

Applicant is incorporated under the laws of the State of Maine, with its principal business office at Boise, Idaho and is qualified to do business in the States of Idaho, Oregon, Nevada and Wyoming. Applicant is engaged in the generation, transmission, distribution and sale of electrical energy in the above-mentioned States.

The net proceeds will be used to finance the Applicants' construction expenditures which, for the period from August 1, 1975 to December 31, 1976, are estimated at approximately $116,077,000.

Of the $122,500,000 borrowing, $75 million will be made pursuant to the line of credit with three major banks, at the prime rate plus a commitment fee of ½ of 1%. $13,100,000 will be borrowed from a group of banks in Idaho and Oregon. The Idaho banks will loan money at the prime rate and the Oregon banks will loan money at 110% of the prime rate plus a commitment fee of approximately ½ of 1%. Notes issued to commercial banks shall mature not more than twelve months from the date of issue. The balance will be issued and sold by applicant to one or more commercial paper dealers. Each note issued as commercial paper would be dated the date of issuance, have a maturity of not more than 270 days from the date thereof and be discounted at the rate prevailing at the time of issuance for commercial paper of comparable quality and maturity.

Written notice of the application has been given to the Idaho Public Utilities Commission, the Nevada Public Service Commission, the Oregon Public Utilities Commission, the Wyoming Public Service Commission and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on November 3, 1975 (40 FR 51093), stating that any person desiring to be heard or to make any protest with reference to the application, shall file petitions or protests on or before November 14, 1975, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

The Commission finds: (1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued November 7, 1957, *Idaho Power Company, Docket No. E–6781, (18 FPC 603).*

(2) The proposed issuance of short-term promissory notes, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of promissory notes, all as described above, will be in excess of 5% of the par value of the other securities of the Applicant and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State under the laws of which the issue here involved is regulated by a state Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of promissory notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act, by reason of paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities or hereinafter authorized, will be for a lawful object within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performances of service by Applicant or a public utility, and which will not impair its ability to perform that service and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is reasonable.

The Commission orders: (A) The proposed issuance of promissory notes in the aggregate principal amount of $122,500,000 outstanding at any one time, upon the terms and conditions and for the purposes set forth in the application, all as described above, is hereby authorized subject to the provisions of this order.

(B) This authorization is expressly conditioned that notes issued to commercial banks will have maturities of not more than one year from the date of issuance and notices issued in the form of commercial paper will have maturities of not more than nine months from the date of issue. In any event, all notes are to bear final maturities of on or before December 31, 1977.

(C) This authorization is expressly conditioned that all notes issued in the form of commercial paper not exceed 25% of the applicants gross operating revenues during the preceding twelve months of operation.

(D) This authorization is expressly conditioned that the aggregate principal amount of all notes not exceed $122,500,000 outstanding at any one time.

(E) The foregoing authorization is without prejudice to the authority of their Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any matter whatsoever now pending or which may come before this Commission.

(F) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

By the Commission.

[FR Doc.75–33043 Filed 12–8–75;8:45 am]

[Docket No. ES76–27]

LOUISVILLE GAS AND ELECTRIC CO.

Application

DECEMBER 1, 1975.

Take notice that on November 7, 1975, Louisville Gas and Electric Company (Applicant) of Louisville, Kentucky, filed an application pursuant to Section 204 of the Federal Power Act seeking an order authorizing the issuance of unsecured Promissory Notes to commercial banks, to trust companies, and to commercial paper dealers in amounts not exceeding in the aggregate $70,000,000 outstanding at any one time.

The Promissory Notes to be issued by the Applicant to commercial banks will be issued on various days during the two year period ending December 31, 1977, but no Note will mature more than twelve months after date of issue or renewal. The interest rate of such Notes will be at the prime loan interest rate of the banks in effect from time to time.

The Promissory Notes to be issued as master notes to commercial banks and trust companies will be issued on various days during the period ending December 31, 1977, but no Note will mature more than nine months after date of issue. The interest rate on master notes will be dependent upon the money market conditions prevailing during the life of the Note.

The Promissory Notes issued to commercial paper dealers will be issued on various days during the period ending December 31, 1977, but no Note will mature more than nine months after date of issue nor will any Note be extended or renewed. The interest rate on such Notes will be dependent upon the term of the Notes and the money market conditions at the time of issuance.

According to the application, the aggregate amount of commercial paper to be outstanding at any one time will not exceed the sum of (1) the dollar amount of Applicant's receivables arising out of the sale of electric and gas service, (2) the dollar amount of Applicant's inventory of fuel and gas stored underground, and (3) the dollar amount of depreciation and amortization charges on plant and equipment for the preceding year.

The proceeds from the issuance of the Notes will be added to the general funds of the Applicant which general funds will be used, among other things, to finance in part the Applicant's 1976–1977 construction program. Applicant estimates that construction expenditures for the years ending December 31, 1976 and 1977 will total about $95,000,000 and $113,000,000, respectively.

Any person desiring to be heard or to make any protest with reference to said application should, on or before December 12, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 1.8 or 1.10). The application is on file and available for public inspection.

[Docket No. ER76-266]

NEW ENGLAND POWER CO.

Unit Sales Contracts

DECEMBER 1, 1975.

Take notice that New England Power Service Company, on behalf of New England Power Company (NEPCO) on November 19, 1975, tendered for filing proposed Unit Contracts.

According to NEPCO, the Contracts provide for the sale by NEPCO, from its Internal Combustion Units, to Central Maine Power Company (Central Maine) and Montaup Electric Company (Montaup) of equal shares of 126,050 KW of capacity and related energy from March 1, 1975 to April 30, 1975.

NEPCO states that the sales revenues are fully compensatory for energy and transmission costs, but they have accepted less than full cost for this capacity, which is surplus to its needs.

NEPCO further states that these sales are of substantial benefit to all parties, and requests waiver of the Commission's Regulations to allow these agreements to become effective in accordance with their terms.

Copies of the filing were served upon Central Maine and Montaup.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP75-89]

NORTHERN NATURAL GAS CO.

Tariff Sheet Correction

DECEMBER 1, 1975.

Take notice that on November 19, 1975, Northern Natural Gas Company (Northern) tendered for filing a corrected tariff sheet for its November 14, 1975, submittal, reflecting that First Substitute Seventh Revised Sheet No. 1c is to be contained in Original Volume No. 2 of Northern's FPC Gas Tariff.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 10, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-33039 Filed 12-8-75;8:45 am]

[Docket Nos. CP75-294, CP75-296]

NORTHWEST PIPELINE CORP. AND MOUNTAIN FUEL SUPPLY CO.

Order Denying Motion To Omit the Intermediate Decision and Prescribing Expedited Procedure

DECEMBER 2, 1975.

Northwest Pipeline Corporation and Mountain Fuel Supply Company on November 12, 1975, filed a motion with the Commission for the issuance of an order omitting the intermediate decision procedure, or, in the alternative, establishing expedited procedures for the submission of briefs to the Commission in the above proceedings. On November 19, 1975, the Staff filed an answer contending that this proceeding is reasonably complex, that it involves considerable dispute regarding evidentiary facts, and that the intermediate procedure should not be omitted.

In these proceedings Northwest seeks a certificate of public convenience and necessity for authority to sell to, transport for and exchange natural gas with Mountain Fuel. The authorization would permit Mountain Fuel to make a new supply of natural gas contracted for by Northwest in the Barrel Springs area, Carbon County, Wyoming, available to Northwest's transmission system. On October 6, 1975, the Commission denied a motion by Northwest for expedited procedural dates and waiver of the intermediate decision procedure because the hearing had not been completed and the procedural posture did not permit expedition of the hearing date.

In their present motion Northwest and Mountain Fuel contend that if a final decision in these proceedings is not issued prior to April 10, 1976, Northwest may lose the Barrel Springs gas supply because the gas purchase contracts expire on that date, and it is questionable whether the producers will extend them. Further, the movants say, approval of the Colorado Interstate Gas Company and Western Transmission Company alternative proposal would cause additional delays which would delay development of the entire Barrel Springs area.

In our opinion this proceeding involves a number of factual issues on which we should have the opinion of an Administrative Law Judge, who is familiar with the record. We take particular note that the pleadings indicate that there is an alternative project. We are also of the opinion that there exists sufficient time for the Judge to issue an initial decision,

for receipt of briefs on exceptions and opposing exceptions, and for opportunity for consideration by the Commission before April 10, 1976, when the producer contracts allegedly expire. We shall, however, shorten the time for filing briefs before the Commission as requested by the movants.

The Commission finds: Good cause has not been shown for waiving the intermediate decision procedure, but has been shown for an expedited briefing schedule before the Commission.

The Commission orders: (A) The request by Northwest and Mountain Fuel to omit the intermediate decision is denied.

(B) After issuance of the initial decision briefs on exception shall be filed within 20 days and briefs opposing exceptions within 10 days thereafter.

(C) The Administrative Law Judge shall issue his initial decision expeditiously so that sufficient time will be left for consideration of the initial decision, briefs on exceptions and briefs opposing exceptions and issuance of a Commission decision before April 10, 1976.

By the Commission.

[Docket No. ES76-26]

OKLAHOMA GAS AND ELECTRIC CO.

Application

DECEMBER 1, 1975.

Take notice that on November 7, 1975, Oklahoma Gas and Electric Company (Applicant) filed an application pursuant to Section 204 of the Federal Power Act seeking an order authorizing the issuance of unsecured Promissory Notes to commercial banks and to commercial paper dealers in amounts not exceeding in the aggregate $100,000,000 outstanding at any one time.

The Promissory Notes to be issued by the Applicant to commercial banks will be issued on various days during the period ending December 31, 1977, but no Note will mature more than twelve months after date of issue or renewal. The interest rate of such Notes will be at the prime loan interest rate of the banks in effect from time to time.

The Promissory Notes issued to commercial paper dealers will be issued on various days during the period ending December 31, 1977, but no Note will mature more than nine months after date of issue nor will any Note be extended or renewed. The interest rate on such Notes will be dependent upon the term of the Notes and the money market conditions at the time of issuance.

According to the application, the aggregate amount of commercial paper to be outstanding at any one time will not exceed the sum of (1) the dollar amount of Applicant's receivables arising out of the sale of electric service and (2) the dollar amount of depreciation and amortization charges on plant and equipment for the preceding year.

The proceeds from the issuance of the Notes will be added to the general funds of the Applicant, which general funds will be used, among other things, to finance in part the Applicant's 1976 and 1977 construction program. Applicant estimates that construction expenditures for the year ending December 31, 1976 will total about $175,000,000 and for the year ending December 31, 1977 will total about $172,000,000.

Any person desiring to be heard or to make any protest with reference to said application should, on or before December 12, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 1.8 or 1.10). The application is on file and available for public inspection.

[Docket No. ER76-243]

OTTER TAIL POWER CO.

Filing Amendment to Service Agreement

DECEMBER 1, 1975.

Take notice that on November 12, 1975, Otter Tail Power Company (Otter Tail) tendered for filing Amendment No. 12, dated June 10, 1975, to the Electric Service Agreement between Otter Tail and Minnkota Power Cooperative, Inc. Otter Tail states that this Amendment No. 12 is filed as a supplement to Rate Schedule FPC No. 126 and expands the existing Electric Service Agreement by providing for additional facilities and points of interconnection which will provide service to new loads and improve service to existing loads of both parties. Otter Tail requests this Amendment No. 12 be permitted to become effective 30 days after the filing date of November 12, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 8, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. G-17350, G-17351, CP69-346, CP69-347 and CP75-340]

PACIFIC GAS TRANSMISSION CO. AND NORTHWEST PIPELINE CORP.

Petitions To Amend

NOVEMBER 28, 1975.

Take notice that on November 17, 1975, Pacific Gas Transmission Company (PGT), 245 Market Street, San Francisco, California 94105, filed a petition to amend the orders of the Commission issued in Docket Nos. G-17350 and G-17351 on August 5, 1960 (24 FPC 134), in Docket Nos. CP69-346 and CP69-347 on March 13, 1970 (43 FPC 418), and in all four of the above dockets on October 31, 1974, pursuant to Section 7(c) of the Natural Gas Act by continuing the authorization granted in the October 31, 1974, amending order, which permitted PGT to transport on a best efforts basis additional volumes of natural gas imported from Canada to alleviate the shortage on the system of Northwest Pipeline Corporation (Northwest). Take further notice that on November 17, 1975, Northwest, P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP75-340 a related petition to amend the order issued July 28, 1975, in that docket pursuant to Section 3 of the Natural Gas Act to permit the continued importation of additional volumes of natural gas through October 31, 1976, at Kingsgate, British Columbia. These proposals are more fully set forth in the petitions which are on file with the Commission and open to public inspection.

By order issued September 21, 1973 (50 FPC 825), Northwest, as successor to the interest of El Paso Natural Gas Company, was authorized, inter alia, to import from Canada up to 151,731 Mcf (all volumes at 14.73 psia) of gas on peak days and 51 million Mcf of gas annually at Kingsgate. The volumes of gas so imported are purchased from Westcoast Transmission Company Limited (Westcoast) at two delivery points, Sumas, Washington, and Kingsgate. Orders issued December 28, 1973, and October 31, 1974, amended the order issued September 21, 1973, in Docket No. CP73-332 so as to authorize Northwest to import at Kingsgate additional gas purchased from Westcoast in volumes up to 125,000 Mcf on peak days and up to 30,000 Mcf on an average day basis, through the period October 31, 1975. The additional volumes of gas are made available to Westcoast for resale to Northwest by Alberta and Southern Gas Company Limited (A&S) on a best-efforts basis. The order of October 31, 1974, also authorized PGT to transport on a best-efforts basis the increased volumes of gas, in excess of previously authorized peak-day volumes of 151,731 Mcf, from Kingsgate to the interconnection of PGT's and Northwest's systems at Spokane, Washington, and Stanfield, Oregon, for delivery to Northwest.

Northwest proposes to continue importing additional volumes purchased

V40237 DEC 9 75 XUM

from Westcoast and made available by A&S on a best-efforts basis, as previously authorized, for a term commencing with the grant of the requested authorization through October 31, 1976. Northwest proposes to pay Westcoast $1.60 for each Mcf of gas imported, which is the rate prescribed by Order in Council of the Dominion of Canada for all gas, except Pan Alberta gas, exported on or after November 1, 1975, pursuant to Westcoast's Export License GL–41. Northwest states that the volumes of gas which may result from the requested authorization will, on a day-to-day basis, directly assist in offsetting the shortfall in deliveries by Westcoast at Sumas that is anticipated by Northwest.

PGT requests authorization to continue the transportation arrangement for Northwest from November 1, 1975, to October 31, 1976, under terms substantially identical with the previously authorized best-efforts transportation arrangement with Northwest. PGT states that it is obligated to accept volumes, in excess of 151,731 Mcf per day, for transportation and delivery only when in its discretion it has sufficient pipeline capacity. Such capacity will be available, PGT asserts, when there are mechanical difficulties in PGT's pipeline system south of the Stanfield tap such that delivery capability in that portion of the pipeline system must be reduced. PGT explains that an outage of one or more compressor units south of Stanfield due to mechanical problems will cause the delivery capability to be restricted, but that the pipeline upstream of the defective unit will still have the capability of delivering maximum daily volumes.

An off-line delivery upstream of the restricted section of the pipeline made possible by equipment outages has been termed by PGT a "best efforts" delivery. PGT states that from operating records of its system it has calculated the amount of time various outages can be expected to occur and has estimated best efforts deliveries from November 1, 1975, through October 31, 1976:

Delivery volume (MMcf/day):	Number of days at this volume
0	193
1 to 30	41
31 to 60	51
61 to 90	27
91 to 120	53

PGT's petition states that deliveries under the transportation arrangement proposed in the instant petition will not decrease, beyond those decreased volumes caused by equipment outages, the quantities of natural gas delivered by PGT at other delivery points to Northwest or the quantities of natural gas delivered by PGT to Pacific Gas and Electric Company, PGT's customer. Northwest and PGT state that they have agreed that Northwest will pay PGT for the additional volumes transported in accordance with the cost of service and cost allocation procedures contained in Rate Schedule T–1 of PGT's FPC Gas Tariff, Original Volume No. 1.

Any person desiring to be heard or to make any protest with reference to said petitions to amend should on or before December 18, 1975, file in the respective proceeding with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP74–41 PGA76–1, DCA76–1]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Changes in FPC Gas Tariff

DECEMBER 1, 1975.

Take notice that Texas Eastern Transmission Corporation on November 17, 1975, tendered for filing proposed changes in its FPC Gas Tariff, Fourth Revised Volume No. 1, the following sheets:

Revised Fifteenth Revised Sheet No. 14.
Revised Fifteenth Revised Sheet No. 14A.
Revised Fifteenth Revised Sheet No. 14B.
Revised Fifteenth Revised Sheet No. 14C.
Revised Fifteenth Revised Sheet No. 14D.
Fifteenth Revised Sheet No. 14.
Fifteenth Revised Sheet No. 14A.
Fifteenth Revised Sheet No. 14B.
Fifteenth Revised Sheet No. 14C.
Fifteenth Revised Sheet No. 14D.

These sheets are being issued pursuant to Texas Eastern's Demand Charge Adjustment Commodity Surcharge provision and Purchased Gas Cost Adjustment provision contained in Section 12.4 and Section 23, respectively, of the General Terms and Conditions of its FPC Gas Tariff, Fourth Revised Volume No. 1. The rate change proposed by Texas Eastern reflects changes in the Demand Charge Adjustment Commodity Surcharge, rates charged by Texas Eastern's producer and pipeline suppliers and an adjustment to Texas Eastern's rates to clear the balance of the Gas Cost Adjustment Account.

Texas Eastern requests that the Commission accept the Revised Fifteenth Revised series of tariff sheets to be effective January 1, 1976. However, should the Commission suspend the effectiveness of these sheets one day, Texas Eastern requests that the Commission accept the Fifteenth Revised series of tariff sheets to be effective January 1, 1976.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75–33060 Filed 12–8–75;8:45 am]

[Docket No. RP73–3, RP74–48 and RP75–3; PGA No. 76–1(a)]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Filing of Revised Tariff Sheets in Purported Compliance With Commission Order

DECEMBER 1, 1975.

Take notice that on November 14, 1975, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing revised tariff sheets to First Revised Volume No. 1 of its FPC Gas Tariff to be effective November 1, 1975,[1] and November 2, 1975.[2] Transco states that this filing is made pursuant to the Commission's October 31, 1975, order in the above captioned dockets.

The instant filing does not include a form of notice for the FEDERAL REGISTER, as required by Section 154.28 of the Commission's Regulations Under the Natural Gas Act.

Transco states that the instant filing contains (1) revised tariff sheets to be effective November 2, 1975, reflecting elimination of all costs related to advance payment tracking filings made pursuant to the settlement agreement which was pending in Docket Nos. RP74–48 and RP75–3; and (2) revised tariff sheets to be effective November 1, 1975, which, in addition to eliminating the advance payments costs, also eliminate purchased gas costs in excess of the guidelines set forth in the aforementioned October 31, 1975, order herein. The filing also contains a list of names and addresses of each producer from whom Transco's purchases exceed said guidelines.

Transco states that this filing was served upon all jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition

[1] The tariff sheets proposed to be effective as of November 1, 1975, are designated Revised Fifteenth Revised Sheet No. 5 and Revised Eleventh Sheet No. 6.

[2] The tariff sheets proposed to be effective as of November 2, 1975, are designated Second Revised Fifteenth Revised Sheet No. 5 and Second Revised Eleventh Revised Sheet No. 6.

to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 10, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. CP76–78, CP76–112]

TRUNKLINE GAS CO. AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Findings and Order After Statutory Hearing Issuing Certificates of Public Convenience and Necessity

DECEMBER 2, 1975.

On September 8, 1975, Trunkline Gas Company (Trunkline) filed in Docket No. CP76–78 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Transcontinental Gas Pipe Line Corporation (Transco) and Consolidated Gas Supply Corporation (Consolidated) from offshore to onshore Louisiana, all as more fully set forth in the application.

Specifically, Trunkline requests, in Docket No. CP76–78, pursuant to transportation agreements with Transco and Consolidated executed May 19, 1975, and August 11, 1975, respectively, authorization to transport up to 14,900 Mcf of gas per day (11,200 Mcf for Transco; 3,700 Mcf for Consolidated) from an existing interconnection between its pipeline and a gathering pipeline of Transco and Consolidated on a platform of Placid Oil Company in South Timbalier Block 179, offshore Louisiana, to a point of delivery to Transco for Transco's account and for the account of Consolidated downstream of Mobil Oil Corporation's Cow Island Processing Plant, Vermilion Parish, Louisiana. The agreements are for a term of ten years from the date all required authorizations are received and accepted, and Transco and Consolidated have the option to reduce the transportation volumes at three-year intervals.

Trunkline's transportation charge for the service to be performed for Transco and Consolidated consists of a monthly demand charge of $3.31 per Mcf for the 11,200 Mcf demand level of Transco and the 3,700 Mcf contract demand level of Consolidated. The rate is subject to increase or decrease by an amount equal to 10.88 cents per Mcf that Trunkline transports in excess of the contract demand requirement or fails or is unable to take on any given day.

On October 2, 1975, Transco filed in Docket No. CP76–112 an application, as supplemented October 16, 1975, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the creation of an additional delivery point between itself and Consolidated, all as more fully set forth in the application.

Specifically, Transco, pursuant to an amendment dated September 5, 1975, seeks authorization to operate the aforementioned Cow Island Plant tailgate connection as a point of receipt under a September 12, 1972,[1] transportation agreement with Consolidated in order to receive Consolidated's volumes transported to such point by Trunkline. The existing agreement provides for Transco to transport on a firm basis 71,548 Mcf of gas per day for Consolidated from various locations in Louisiana to an interconnection in Clinton County, Pennsylvania. Consolidated is obligated to pay a demand charge regardless of whether this quantity is available to be transported. The addition of the proposed point of receipt at Cow Island will assist Consolidated by making additional volumes available to utilize the firm capacity committed to it. The 3,700 Mcf per day to be transported by Transco for Consolidated will fall within the 71,548 Mcf daily transportation demand previously authorized.

Transco's transportation charge to Consolidated consists of a three-part rate, a monthly demand charge of $2.12 per Mcf based on a firm daily contract demand of 71,548 Mcf, a commodity charge of 33.9 cents per Mcf for all firm volumes up to the daily contract demand, and an interruptible commodity charge of 22.0 cents per Mcf for all volumes transported in excess of the daily contract demand. Since Consolidated presently has reserved surplus firm capacity for which it pays the demand charge, that portion of the total rate will be unaffected by the subject volumes.

The volumes involved herein will be used to augment existing market requirements, which, especially in regard to Transco, are presently being heavily curtailed.

On November 20, 1975, temporary certificates were issued in the instant dockets, conditioned upon Trunkline's and Transco's compliance with the applicable Commission regulations under the Natural Gas Act.

After due notice of the application in Docket No. CP76–78 by publication in the FEDERAL REGISTER on September 30, 1975 (40 FR 44890), and in Docket No. CP76–112 by publication in the FEDERAL REGISTER on October 28, 1975, (40 FR 50153), no petitions to intervene, notices of intervention, or protests to the granting of the applications have been filed.

At a hearing held on November 25, 1975, the Commission on its own motion received and made part of the record in these proceedings all evidence including the applications and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record.

The Commission finds: (1) Applicants, Trunkline Gas Company and Transcontinental Gas Pipe Line Corporation, both corporations organized and existing under the laws of the State of Delaware, having their principal places of business in Houston, Texas, are each a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its orders of November 4, 1950, in Docket No. G–882 (9 FPC 721) and November 18, 1948, in Docket No. G–1143, respectively.

(2) Applicants are able and willing properly to do the acts and perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(3) The proposed transportation (Docket No. CP76–78) and operation of an additional delivery point (Docket No. CP76–112), as more fully described in the applications in these proceedings, are to be made in interstate commerce, subject to the jurisdiction of the Commission, and the transportation and opera-

[1] The transportation service was authorized by order issued August 23, 1972 (48 FPC 380), and is rendered pursuant to Rate Schedule X–56 to Transco's FPC Gas Tariff, Original Volume No. 2.

V40237 DEC 9 75 XUM

tion thereof by Trunkline and Transco, respectively, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The proposed transportation and operation of said delivery point are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

The Commission orders: (A) Upon the terms and conditions of this order a certificate of public convenience and necessity is issued in Docket No. CP76–78 authorizing Trunkline to transport natural gas in interstate commerce in order to implement the gas transportation agreements executed by Trunkline with Transco and Consolidated on May 19, 1975, and August 11, 1975, respectively, from offshore to onshore Louisiana, as hereinabove described and as more fully set forth in the application in Docket No. CP76–78.

(B) Upon the terms and conditions of this order a certificate of public convenience and necessity is issued to Transco in Docket No. CP76–112, authorizing the operation of an additional delivery point between itself and Consolidated, as hereinabove described and as more fully set forth in the application in Docket No. CP76–112.

(C) The certificates issued in paragraphs (A) and (B) and the rights granted thereunder are conditioned upon Trunkline's and Transco's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the terms and conditions set forth in Part 154 and Section 157.20 (c) (3), and (e) of such Regulations.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. RP75–109]

UNITED GAS PIPE LINE CO.

Filing of Revised Tariff Sheet

NOVEMBER 28, 1975.

Take notice that on November 14, 1975, United Gas Pipe Line Company (United) filed with the Federal Power Commission (Commission) as a part of its FPC Gas Tariff, First Revised Volume No. 1, Twenty-Seventh Revised Sheet No. 4.

Twenty-Seventh Revised Sheet No. 4 is being filed to replace Twenty-Sixth Revised Sheet No. 4 filed with the Commission on May 30, 1975 in Docket No. RP75–109, and Substitute Twenty-Fifth Revised Sheet No. 4 filed with the Commission on July 14, 1975 in Docket No. RP72–133, PGA–3, which became effective on July 2, 1975.

Twenty-Seventh Revised Sheet No. 4 reflects the currently effective purchased gas cost of 46.08¢ and a negative surcharge of .20¢ reflected in United's May 16, 1975 PGA filing, as amended July 14, 1975, effective July 2, 1975.

United States that a copy of the revised tariff sheet is being mailed to its jurisdictional customers, interested state commissions and parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72–133 PGA76–1]

UNITED GAS PIPE LINE CO.

Filing of Revised Tariff Sheet

NOVEMBER 28, 1975.

Take notice that on November 14, 1975, United Gas Pipe Line Company (United) tendered for filing Twenty-Eighth Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1. United states that the tariff sheet and supporting information are being filed 45 days before the effective date of January 1, 1976, pursuant to Section 19 of United's tariff, and is in compliance with the provisions of Order Nos. 452, 452–A and 452–B.

United states that copies of the revised tariff sheet and supporting data are being mailed to United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

UTAH POWER & LIGHT CO.

Filing

DECEMBER 1, 1975.

Take notice that on November 13, 1975, Utah Power and Light Company (Utah Power) tendered for filing three proposed fuel adjustment clauses in accordance with Order No. 517 issued by the Commission on November 13, 1974, in Docket No. R–479. The Fuel Clauses are designated "RS–1 Fuel Clause", "RS–2 Fuel Clause", and "RS–3 Fuel Clause."

Utah Power states that following approval of the clauses, it anticipates incorporating them into its tariffs.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 11, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER76–272]

UTAH POWER & LIGHT CO.

Filing of Interconnection Agreement

DECEMBER 1, 1975.

Take notice that on November 21, 1975, Utah Power & Light Company (UP&L) tendered for filing an Interconnection Agreement between UP&L and Tucson Gas & Electric Company dated November 4, 1975. UP&L's filing included two Service Schedules, deseribed by UP&L as follows:

SERVICE SCHEDULE A–1—EMERGENCY ASSISTANCE

Provides that "• • • either party will, upon request of the other party, supply as emergency assistance such power and energy as the requesting party may need to protect or restore services to its Customers, subject to the availability of such power and energy • • •" The basis for settlement shall reflect a charge equal to one-half of the sum of (a) cost to the supplying party and (b) cost avoided by the receiving party in reducing its generation level (provided that such cost avoided shall be the highest cost energy that normally would have been available to it from its own units).

SERVICE SCHEDULE B–1—SURPLUS ENERGY SALE

The purpose of this Service Schedule is "• • • to provide for sale of surplus energy between the Parties and to establish terms and conditions for such sale." Each party is to be the sole judge as to the conditions under which it is economical and practicable for it to deliver surplus energy. Settlement shall reflect a change equal to one-half of the sum of (a) cost to the supplying party and (b) cost avoided by the receiving party in reducing its generation level. An alternative method of settlement is provided under which either party may elect to establish an account to be maintained by the Parties in which 120% of the fuel costs incurred by the supplying party will be recorded. The receiving party shall have the option of returning the energy or paying in cash the amount recorded in the account.

UP&L requests the Commission to waive its 30-day notice period and permit the Interchange Agreement to become effective on November 4, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER76–279]

WISCONSIN POWER AND LIGHT CO.

Filing Wholesale Power Agreement

DECEMBER 1, 1975.

Take notice that on November 24, 1975, Wisconsin Power and Light Company (WPL) tendered for filing a Wholesale Power Contract dated November 10, 1975, between the Village of Waunakee and Wisconsin Power and Light Company. WPL states that this contract will supersede an existing contract for wholesale electric service dated April 8, 1969.

WPL requests a proposed effective date of December 15, 1975.

WPL states that a copy of the Wholesale Power Contract and the filing have been sent to the Village of Waunakee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Paragraph 1.8 and Paragraph 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 10, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Order Setting Prehearing Conference and Formal Hearing Dates, Establishing Procedures and Granting Interventions

DECEMBER 2, 1975.

On June 10, 1975, Northern Natural Gas Company (Northern) filed in Docket No. CP75–361 an application, as supplemented August 11 and October 1, 1975, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Northern to sell natural gas on a contract demand basis to its Peoples Natural Gas Division (Peoples) for resale and distribution in certain communities in the State of Kansas in lieu of providing Peoples with a full requirements service for such resale and distribution.

Northern has rendered service to the communities of Copeland, Elkhart, Fowler, Garden City, Hugoton, Meade, Moscow, Plains, Rolla, Santana, and Sublette, Kansas, and to various rural customers (Argus Communities) through its Peoples Division on a full-requirements basis since it acquired the distribution properties of Argus Natural Gas Company, Inc. Northern has submitted to the Commission in Docket No. RP74–102 a settlement proposal, which the Commission by order issued June 17, 1975, modified and accepted. This settlement, among other things, provides for the establishment of contract demand volumes for the Argus communities and makes such sales subject to the terms of Paragraph 9 of the General Terms and Conditions of Volume 1 of Northern's FPC Gas Tariff. In order that Northern may render service to its Peoples Division for distribution and resale in the Argus area to comply with the provisions of the settlement proposal in Docket No. RP74–102, Northern herein requests authority to effectuate contract demand service to Peoples for the Argus communities and environs.

The proposed contract demands for the Argus communities are as follows:

Community:	Contract Demand (Mcf/day)
Copeland	324
Elkhart	1,678
Fowler	514
Garden City	13,754
Wheatland Electric Corp	1,000
Hugoton	2,370
Meade	1,781
Moscow	271
Plains	710
Rolla	378
Santana	808
Sublette	1,048
Rural Tap Sales:	
Gathering Lines	1,500
Argus Mainline	450
Other Mainline	2,500
Jetmore	605
Rural tap customers	200
Total	29,895

We note that Northern has an application pending in Docket No. CP75–333 for authorization to attach certain right-of-way customers in the vicinity of the Argus system. To the extent that any such future customers have been included in the entitlements in the subject application, such entitlements should not become effective until appropriate authorization is granted in Docket No. CP75–333.

After due notice by publication in the FEDERAL REGISTER on July 7, 1975 (40 FR 285520), a timely petition to intervene was filed by Terra Chemicals International, Inc., on July 22, 1975. Late petitions to intervene were filed by Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin), on July 31, 1975, by Iowa Power

V40237 DEC 9 75 XUM

and Light Company on July 24, 1975, as amended on August 27, 1975; by Iowa Electric Light and Power Company on August 18, 1975; and by Southwest Kansas Cooperative (Southwest) on October 28, 1975. Southwest requests that this matter be set for hearing date since it fears that granting of this application may reduce deliveries of gas to it.

The Commission finds: (1) The participation of the late petitioners to intervene in this docket would not delay these proceedings nor unduly inconvenience any other party.

(2) The intervention of the above-named petitioners in this proceeding may be in the public interest.

(3) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the issues in this proceeding be scheduled for hearing preceded by a prehearing conference in accordance with the procedures set forth below.

The Commission orders: (A) The above-named petitioners are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission; *Provided, however,* That the participation of such interveners shall be limited to matters affecting asserted rights and interests as specifically set forth in said petitions for leave to intervene; and, *Provided, further,* That the admission of said interveners shall not be construed as recognition by the Commission that they might be aggrieved by any order or orders of the Commission entered in this proceeding.

(B) A prehearing conference to establish those areas of disagreement, if such exist, among parties and to reconcile opposing views, if possible, shall be held on December 18, 1975, at 10:00 a.m. (EST) in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(C) Pursuant to the authority of the Natural Gas Act, particularly Sections 7 and 15 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act, a public hearing shall be held on January 9, 1976, at 10:00 a.m. (EST) in a hearing room of the Federal Power Commission, 825 North Capitol Street, N. E. Washington, D.C. 20426, concerning the issue of the effect of the granting of this application on future gas deliveries to existing customers of Northern.

(D) On or before January 2, 1976, Northern and any supporting party shall file with the Commission and serve upon all parties, including Commission Staff, their testimony and exhibits in support of their positions.

(E) An Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control this proceeding in accordance with the policies expressed in the Commission's Rules of Practice and Procedure and the purposes expressed in this order.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[Docket No. E-9379]

NIAGARA MOHAWK POWER CORP.

Conference

DECEMBER 3, 1975.

Take notice that on Friday, December 12, 1975, Commission Staff is convening an informal conference for the purpose of discussing the issues in the above-referenced docket with a view toward settling this proceeding. The conference will be held in Room 8402 of the Federal Power Commission offices, 825 North Capitol Street NE., Washington, D.C. 20426, at 11:00 a.m.

All parties in attendance will be expected to come fully prepared to discuss all issues involved in this proceeding, both procedural and substantive, and to make commitments with respect to such issues and any offers of settlement or stipulations discussed at the conference.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in this proceeding. A petition to intervene filed pursuant to § 1.8 of the Commission's rules of practice and procedure is required for that purpose.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33189 Filed 12-8-75;8:45 am]

[Docket No. ER76-285]

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE

Proposed Tariff Change

DECEMBER 3, 1975.

Take notice that Public Service Company of New Hampshire (PSCNH) on November 21, 1975, tendered for filing amendments to its contracts for resale service which purport to bring its fuel clause into compliance with Commission Order No. 517. PSCNH states that the affected customers and the FPC rate schedule designations of their contracts are as follows:

Concord Electric Co	FPC No. 24.
Town of Ashland, N.H.	FPC No. 28.
The New Hampton (New Hampshire) village precinct.	FPC No. 29.
Exeter & Hampton Electric Co.	FPC No. 35.
New Hampshire Electric Cooperative, Inc.	FPC Nos. 50 and 71.
Town of Wolfeboro, N.H.	FPC No. 72.

PSCNH requests that the fuel clause and attendant increase be allowed to become effective on December 1, 1975.

PSCNH asserts that the changes would bring its fuel clause into full compliance with Commission Regulations. The base cost of fuel is revised to reflect fuel costs for the 12 months ending September 30, 1975 and the basic energy charge is revised to roll in the increases in base fuel costs. The new fuel clause eliminates the two month lag in recovery of fuel costs. PSCNH also proposes a temporary surcharge to recover unbilled fuel costs resulting from the switch from two month lagging to current month billing of fuel costs.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 11, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33188 Filed 12-8-75;8:45 am]

FEDERAL RESERVE SYSTEM

BANK HOLDING COMPANIES

Review of Grandfather Privileges

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather pirvileges") with respect to the nonbanking activities of a company that, by virtue of the 1970 Amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date). However, section 4(a)(2) of the Act requires the Board of Governors of the Federal Reserve System to determine whether such grandfather privileges should be terminated with respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970.

In exercising its authority under section 4(a)(2), the Board by order after opportunity for hearing, may terminate the authority granted by said section if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices.

An examination of the grandfather privileges of the companies listed below is in process in order to determine whether continuation of such grandfather privileges, if any, is consistent with the purposes of the Act. A Board determination not to terminate grandfather privileges would not preclude the Board from making a determination at a later date than grandfathered activities must be terminated.

Bank holding company	*Activities engaged in on, and continuously since, June 30, 1968* [1]
Valley Financial Services, Inc., Elkhart, Ind. (subsidiary bank is Valley Bank and Trust Company, Mishawaka, Ind.).	Sales finance and installment lending. Underwriting (as reinsurer) credit life insurance on loans by credit-granting subsidiaries. Distribution of plumbing supplies.
General Educational Fund, Inc., Burlington, Vt. (subsidiary is The Merchants Bank, Burlington, Vt.).	Trust activities
Colorado Funding Company, Denver, Colo. (subsidiary bank is The Colorado State Bank of Denver, Denver, Colo.).	Processing and distribution of wholesale produce. Sale of credit life and credit accident and health insurance in connection with loans by subsidiary banks.

[1] The listed companies may also be engaged in additional activities permissible under other provisions of the Bank Holding Company Act. In addition, authority to engage in some of the activities listed may be contained in other provisions of the Bank Holding Company Act, and such activities would not be subject to divestiture under Section 4(a)(2) of the Act.

To aid the Board in making its determinations with respect to the aforementioned bank holding companies, interested persons are hereby afforded an opportunity to submit relevant data, views and arguments relating to the continuation of grandfather privileges, if any, of the above-mentioned companies. Any such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than December 26, 1975. Such material will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's rules regarding availability of information.

Board of Governors of the Federal Reserve System, December 2, 1975.

[SEAL] GRIFFITH L. GARWOOD, *Assistant Secretary of the Board.*

[FR Doc.75-33078 Filed 12-8-75;8:45 am]

VALPARAISO ENTERPRISES, INC.

Order Approving Formation of Bank Holding Company and Engaging in Insurance Agency Activities

Valparaiso Enterprises, Inc., West Point, Nebraska ("Applicant"), has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)), to become a bank holding company through the acquisition of 99.4 per cent of the voting shares of Oak Creek Valley Bank, Valparaiso, Nebraska ("Bank"). Applicant has also applied, pursuant to section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for approval to acquire Valparaiso Insurance Agency, Valparaiso, Nebraska ("Agency"), and to thereby act as a general insurance agent or broker in Valparaiso, a community with a population of less than 5,000 persons. The operation by a bank holding company of a general insurance agency in a community with a population not exceeding 5,000 persons is an activity that the Board of Governors has previously determined to be closely related to banking (12 CFR 225.4(a)(9)(iii)(a)).

Notice of the applications, affording an opportunity for interested persons to submit comments and views, has been given in accordance with sections 3 and 4 of the Act (40 FR 44197). Time for filing comments and views has expired, and the applications and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)), and the considerations specified in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant is a recently organized corporation formed for the purposes of becoming a bank holding company through the acquisition of Bank and of operating a general insurance agency. Upon acquisition of Bank (deposits of $5.8 million), Applicant would control the 225th largest bank in Nebraska, holding 0.1 per cent of total deposits in commercial banks in the State.[1] Bank is the fourth largest of eleven banks competing in Saunders County (which approximates the relevant banking market), and controls 10.7 per cent of commercial bank deposits in the market. Acquisition of Bank would result in no immediate change in banking services available in the relevant market.

[1] All banking data are as of December 31, 1974.

The purpose of the transaction is to facilitate the transfer of the ownership interests from individuals to a corporation owned by one of the same individuals. A principal of Applicant also has an ownership interest in Packers Management Company, a one-bank holding company in Omaha, Nebraska. The subsidiary bank of this holding company is located in a separate banking market. Consummation of the proposal would eliminate neither existing or potential competition, nor would it increase the concentration of banking resources or have an adverse effect on other banks in the relevant market.

The financial and managerial resources and future prospects of Applicant, which are dependent on those of Bank and Agency, are considered generally satisfactory and consistent with approval. The debt to be incurred by Applicant appears to be serviceable from the income to be derived from Bank and Agency without having an adverse effect on the financial condition of either Applicant or Bank. Therefore, considerations relating to banking factors are regarded as being consistent with approval.

Consummation of the transaction would effect no changes in the banking services offered by Bank, and considerations relating to the convenience and needs of the community to be served are consistent with approval. It has been determined that consummation of the proposal to form a bank holding company would be consistent with the public interest and the application should be approved.

In connection with the application to become a bank holding company, Applicant also proposes to acquire the general insurance business of Agency, which has been operated as a partnership owned by Bank's retiring stockholder and E.G.F., Inc., a registered holding company wholly owned by Applicant's principal shareholder. Agency will continue to provide a convenient source of insurance services to residents of the Valparaiso area, a result that is in the public interest. There is no evidence in the record indicating that consummation of the proposal and operation of Agency would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest.

Based on the foregoing and other considerations reflected in the record, it has been determined that the considerations affecting the competitive factors under section 3(c) of the Act and the balance of the public interest factors set forth in section 4(c)(8) both favor approval of Applicant's proposals.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order; and neither the acquisition of Bank, nor the acquisition of Agency should be made later than three months after the effective date of this order, unless such period

V40237 DEC 9 75 XUM

is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the conditions set forth in § 225.4 of Regulation Y and to the authority of the Board of Governors to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modifications or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Secretary of the Board, acting pursuant to delegated authority from the Board of Governors, effective December 1, 1975.

[SEAL] THEODORE E. ALLISON,
Secretary of the Board.

INTERIM COMPLIANCE PANEL (COAL MINE HEALTH AND SAFETY)

LANE HOLLOW COAL CO. AND M & M COAL COMPANY, INC.

Applications for Renewal Permits Electric Face Equipment Standard; Opportunity for Public Hearing

Applications for Renewal Permits for Noncompliance with the Electric Face Equipment Standard prescribed by the Federal Coal Mine Health and Safety Act of 1969 have been received for items of equipment in underground coal mines as follows:

(1) ICP Docket No. 4201-000, Lane Hollow Coal Company, Mine No. 21, Mine ID No. 44 02258 0, Maxie, Virginia, ICP Permit No. 4201-002-R-2 (Mescher HD12 Rubber Tired Tractor, Ser. No. 240), ICP Permit No. 4201-003-R-2 (Mescher HD12 Rubber Tired Tractor, Ser. No. 288).

(2) ICP Docket No. 4358-000, M & M Coal Company, Inc., Mine No. 15B Portal, Mine ID No. 44 01691 0, Pound, Virginia, ICP Permit No. 4358-001-R-2 (Epling Spinner Loading Machine, I. D. No. 6), ICP Permit No. 4358-002-R-2 (Royal 4 Cutting Machine, Ser. No. 201), ICP Permit No. 4358-003-R-2 (Kersey 464 Rubber Tired Mine Tractor, Ser. No. 6106).

In accordance with the provisions of § 504.7(b) of Title 30, Code of Federal Regulations, notice is hereby given that requests for public hearing as to an application for a renewal permit may be filed within 15 days after publication of this notice. Requests for public hearing must be filed in accordance with 30 CFR Part 505 (35 FR 11296, July 15, 1970), as amended, copies of which may be obtained from the Panel upon request.

A copy of each application is available for inspection and requests for public hearing may be filed in the office of the Correspondence Control Officer, Interim Compliance Panel, Room 800, 1730 K Street, N.W., Washington, D. C. 20006.

C. DONALD NAGLE,
Vice Chairman,
Interim Compliance Panel.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued two guides in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.84, Revision 4, "Code Case Acceptability—ASME Section III Design and Fabrication," and Regulatory Guide 1.85, Revision 4, "Code Case Acceptability—ASME Section III Materials," list those Code Cases that are generally acceptable to the NRC staff for implementation in the licensing of light-water-cooled nuclear power plants. The revisions of these two guides update the listings of Code Cases and reflect comments received from the public and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

SECURITIES AND EXCHANGE COMMISSION

[812-3799]

AMERICAN MUTUAL FUND, INC. ET AL.

Filing of Application for an Order Exempting Applicants

Notice is hereby given that American Mutual Fund, Inc. ("AMF"), an open-end diversified investment company registered under the Investment Company Act of 1940 ("Act"), American Funds Distributors, Inc. ("AFD"), 611 West Sixth Street, Los Angeles, California 90017, the principal underwriter of AMF, National Municipal Trust, First Insured Discount Series and Subsequent Series ("NMT"), a unit investment trust registered under the Act, and Thomson & McKinnon Auchincloss Kohlmeyer Inc. ("T&MAK"), c/o Thomson & McKinnon Auchincloss, Kohlmeyer Inc., Two Broadway, New York, New York 10004, the sponsor and principal underwriter of NMT (collectively "Applicants"), have filed an application on April 18, 1975, and amendments thereto on June 30, July 22, September 5, and November 17, 1975, pursuant to section 6(c) of the Act, exempting Applicants and certain proposed transactions from the provisions of section 22(d) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Shares of AMF are continuously offered for sale with a minimum purchase requirement of $250. The public offering price of AMF shares includes a sales load of 8½ percent of the public offering price for sales of less than $15,000, with lower sales charges for larger transactions. Of the 8½ percent sales load, 7 percent represents the dealer discount, and 1½ percent represents the underwriting commission. AMF's investment objectives are to seek current income, capital growth, and stability. On May 31, 1975, AMF had total net assets of approximately $310 million.

NMT was formed for the purpose of obtaining tax-exempt income through investment in interest-bearing state, municipal and public authority bonds which are selling at deep market discounts. The public offering price of NMT units includes a sales load of 4½ percent for purchases of less than 100 units, and a sales charge of 4 percent for purchases of 100 units or more.

T&MAK proposes to offer units of NMT in combination with shares of AMF ("combined units"). Each combined unit consists of (i) one unit of an undivided interest in NMT which represents $1,000 principal amount of underlying tax-exempt municipal bonds, and (ii) a number of shares of AMF which can be purchased at the net asset value thereof after deducting the offering price of one NMT unit at the date of purchase plus an underwriting discount from $1,000. The underwriting discount, which will be charged in lieu of separate sales charges on each of the underlying securities of a combined unit, will be fixed by negotiation among AMF, AFD, and T&MAK at or before the effective date of NMT's registration statement, and will in no event exceed 4.8 percent, or $48 per $1,000 of investment. If the NMT units and AMF shares contained in a combined unit were sold separately, it is estimated that the aggregate sales charges would range between 5.2 percent and 5.6 percent, depending on the amount of the market discount on the bonds.

The underwriting discount on the combined units will be reduced in the following circumstances: (i) If 100 or more combined units are purchased by an investor, the underwriting discount applicable to NMT units will be 4.0 percent, rather than 4.5 percent, and this reduction will be in the form of cash; (ii) if $25,000 or more is invested in AMF shares through a large purchase of combined units, then the underwriting discount attributable to AMF will be based on rates currently stated in AMF's prospectus; and (iii) purchasers of combined units who are otherwise entitled to purchase AMF shares at a sales load of less than 6 percent by reason of the Concurrent Purchase Privilege, the Right of Accumulation, or the Statement of Intention as described in AMF's current prospectus, will pay such a reduced sales load on AMF shares. In cases of (ii) and (iii), above, the application of these reductions will result in the purchaser receiving additional AMF shares. Purchasers of combined units who are already entitled to receive such reduced sales charges on AMF shares will not receive any further reduction in the underwriting discount because such shares are purchased in combination with NMT units. Applicants anticipate that the minimum required purchase by any investor will be three combined units. Both NMT units and AMF shares will be separately transferable and redeemable immediately after the purchase of a combined unit.

T&MAK will purchase from AFD the appropriate number of AMF shares pursuant to an underwriting agreement among itself, AMF and AFD. The underwriter's purchase price will equal the net asset value of the AMF shares plus .2 percent thereof, which additional amount will be retained by AFD.

Section 22(d) of the Act, in pertinent part, provides that no registered investment company shall sell any redeemable security issued by it except to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person except a dealer, a principal underwriter or the issuer, except at a current public offering price described in the prospectus.

Applicants request an order of exemption from the provisions of section 22(d) of the Act for the following:

1. To permit the sale of AMF shares as part of the combination offering at a sales load lower than that stated in AMF's current prospectus;

2. To permit the sale of combined units at a lower underwriting discount when (a) a purchaser acquires 100 or more NMT units than when he acquires less than 100 NMT units, and (b) a purchaser acquires $25,000 or more of AMF shares than when he acquires less than that amount; and

3. To permit the investment of monthly income from NMT units purchased as part of the combination offering in additional AMF shares without a sales charge.

In support of its request to permit the sale of AMF shares as part of the combination offering at a sales charge lower than that stated in AMF's current prospectus, Applicants state that the combination offering will permit the distribution of an increased number of AMF shares without any cost to AMF other than that normally associated with the issuance of new shares, and will insure that AFD is adequately compensated for the responsibility that AFD bears under its principal underwriting agreement with AMF. Applicants state that T&MAK will assume substantially all of the underwriting responsibility and bear the bulk of the expense in connection with the intensive marketing effort needed to make the underwriting successful. Such efforts by T&MAK, Applicants state, will relieve AFD of a substantial amount of the responsibilities and work normally incurred by AFD in the sale of a substantial number of AMF shares. Applicants further state that the combination offering will result in lower retailing costs since T&MAK will not have to duplicate fully the necessary solicitation and financial counseling required in selling both securities separately. In this connection, Applicants assert that the components of the combined units complement each other in a way that makes each more readily understandable by the customer, thus facilitating the presentation by the registered representative. Applicants also state that they will not make the proposed combination offering if the bond discount is substantially less than $200, thus assuring that there will be some cost savings for investors when they acquire AMF shares pursuant to the combination offering. In addition, Applicants cite portions of the discussion and recommendations set forth at pp. 97-101 of the Report of the Commission's Division of Investment Management Regulation entitled "Mutual Fund Distribution and section 22(d) of the Investment Company Act of 1940," dated August, 1974.

In support of its request to permit the sale of combined units at a lower underwriting discount when a large number of combined units are purchased, Applicants state that the reduced retail costs in selling the combined units in large quantities justify the lower underwriting discount. These reductions, Applicants state, will result in cash savings to investors in the event 100 or more NMT units are purchased, and additional AMF shares in the event $25,000 or more of AMF shares are purchased, as part of the combination offering.

In support of its request to permit the investment of income from NMT units purchased pursuant to the combination offering in additional AMF shares without any sales charge, Applicants state that this would permit a purchaser of a combined unit to keep his investment intact for a longer period of time, since it would be impractical to permit reinvestment in NMT units; this is due to the

V40237 DEC 9 75 XUM

fact that it requires a large purchase to obtain one NMT unit. Applicants assert that such an arrangement will not result in any increase in fees paid to NMT's trustee, United States Trust Company of New York, or in any additional cost to AMF other than that normally associated with the issuance of additional shares.

Section 6(c) of the Act authorizes the Commission to exempt any person, security or transaction, or class of persons, securities and transactions, from any provisions fo the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than December 26, 1975, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, and the reason for such request, and the issues, if any, of fact or law proposed to be controverted or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the addresses stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-33024 Filed 12-8-75;8:45 am]

[SR–Amex–75–4]

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

On October 28, 1975, the American Stock Exchange, Inc. ("Amex"), 86 Trinity Place, New York, New York 10006, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s) (b) as amended by Pub. L. No. 94–29, section 16 (June 4, 1975) (the "Act"), and rule 19b–4 thereunder, copies of a proposed rule change. The proposed rule change would designate any registered trader electing to engage in Exchange options transactions as a specialist on the Exchange for all purposes under the Act and the rules and regulations thereunder with respect to options transactions initiated and effected by him on the floor in his capacity as a registered trader.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission release (Securities Exchange Act Release No. 11813 (November 7, 1975)) and by publication in the FEDERAL REGISTER (40 FR 52894 (November 13, 1975)).

The stated immediate purpose of the proposed rule change (new commentary to Amex Rule 958) is to permit registered traders to obtain the same treatment under Regulation T and U of the Federal Reserve Board presently afforded to specialists in financing their options positions. Amex registered traders' market-making responsibility in options, when they are present in the crowd or when they are requested by a specialist, floor official or a floor broker to provide quotations, is comparable with that of Amex registered specialists. According to the Exchange, as a result of such designation it is anticipated that Amex options market will become deeper and more liquid to the direct benefit of all investors.

The Commission is directed under section 19(b)(2) of the Act to approve a proposed rule change if it finds it to be consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. The Commission finds that the proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to national securities exchanges including the requirements of section 6 and the rules and regulations thereunder.

For the foregoing reasons, and because the change clarifies the legal status of these floor members, the Commission finds good cause for approving the proposed rule change prior to the thirtieth day after publication of notice of filing thereof.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75–33017 Filed 12–8–75;8:45 am]

[Release No. 34–11869; File No. SR–Amex–75–13]

AMERICAN STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on November 24, 1975, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The American Stock Exchange, Inc. (the "Amex") proposes to increase the fee charged to a company for transferring from unlisted to listed trading status from $1,000 to $4,500.

The proposed change will necessitate a revision to the "American Stock Exchange Company Guide" as set forth below.

The rule presently reads as follows:

SECTION 113 *Transfer from Unlisted to Listed Trading.* The Exchange will consider applications for the listing of securities at present admitted to unlisted trading privileges (see sections 1211–1212) on the Exchange when the applicant meets approximately one-half of the prescribed standards for original listing. In lieu of the customary listing fee, a fee of $1,000 is payable to effect such transfer.

The rule as proposed to be revised reads as follows:

SECTION 113 *Transfer from unlisted to listed trading.* The Exchange will consider applications for the listing of securities at present admitted to unlisted trading privileges (see sections 1211–1212) on the Exchange when the applicant meets approximately one-half of the prescribed standards for original listing. In lieu of the customary original listing fee, a fee of $4,500 is payable to effect such transfer.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose for increasing the transfer fee to $4,500 in the case of a company which applies for the transfer of its securities from unlisted to fully listed status is to bring the total fee more closely in line with the expenses incurred in processing the listing application, while at the same time continuing to maintain an incentive for the transfer by keeping the charge substantially below the customary original listing fee.

Over the last two years, the Board of Governors has approved two revisions in the Amex's schedule of fees for original and supplemental listing of shares. In addition to adopting a revised fee schedule based upon the number of shares to be originally listed, the Board in 1973 established for the first time, a one-time charge of $2,500 for the original listing of common stock and in September, 1974 increased this charge to $3,500. In approving these changes, the Board did not increase the fee to be charged to companies transferring from unlisted to listed trading status.

The current charge of $1,000 for transferring from unlisted to listed trading status was instituted by the Amex in 1965 in lieu of the customary original listing fee. Its purpose was to provide companies whose shares were traded on the Amex on an unlisted basis with an incentive to transfer to a fully listed status by setting a fee which closely approximated the costs incurred by the Amex in processing such applications. As is the case in most other areas, these costs have increased significantly over the past ten years. In this connection, it is important to note that many of the processing expenditures (e.g., salaries of listing representatives, reproduction of documents, telephone, review of listing applications by the Amex's consulting accountants and independent legal counsel, etc.) are identical to those expenses which arise in reviewing an original listing application where the average listing fee is approximately $20,000.

The Amex believes that it should continue to provide an incentive for companies granted unlisted trading privileges to transfer to fully listed status. Adoption of the proposed increase in the transfer fee would not, in the opinion of the Amex, detract from the incentive which is intended to be provided to companies whose securities are traded on an unlisted basis to transfer to fully listed status. Further, the increase of fees applicable to such transfer will enable the Amex to offset the rising costs incident to the handling of such applications.

The proposed rule change is based upon the provisions of section 6(b)(4) of the Securities Exchange Act of 1934, as amended, which require a national securities exchange to allocate dues, fees and other charges on an equitable basis. Although the proposed transfer fee will still be substantially below the original listing fee customarily charged, the Amex believes that encouraging transfers from unlisted to listed status justifies this disparity in the fee schedule. In this connection, it should be noted that listing of companies presently admitted to unlisted trading privileges on the Amex is in the public interest, since it will enable the Amex to require more comprehensive disclosure of corporate and financial information to public investors.

No comments were solicited or received from members, participants or others on the proposed rule change.

The Amex has determined that the proposed increase in the transfer fee will not impose a burden on competition.

On or before January 13, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before January 8, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 26, 1975.

[SR–BSE–75–1]

BOSTON STOCK EXCHANGE, INC.

Order Approving the Proposal To Establish a Maximum Fine of One Thousand Dollars ($1,000) for Acts Inconsistent With Good Order and Decorum on Exchange Floor

On September 15, 1975 the Boston Stock Exchange, Inc. ("BSE") 53 State Street, Boston, Massachusetts 02109, filed a proposed rule change with the Commission, pursuant to Rule 19b–4 under the Securities Exchange Act of 1934 15 U.S.C. 78s(b)(1) (the "Act") as amended by Pub. L. No. 94–29, Sec. 16 (June 4, 1975). The proposed rule, as originally filed, eliminated the existing maximum of fifty dollars ($50.00) for fines without establishing another maximum amount.

Notice of the proposed rule change together with the terms of substance of the proposal was given by publication of a Commission Release (Securities Exchange Act Release No. 11717, October 8, 1975) and by publication in the FEDERAL REGISTER (40 FR 48737, October 17, 1975). Public comments were invited until the thirtieth day after publication in the FEDERAL REGISTER.

On November 10, 1975 the Boston Stock Exchange amended the earlier published proposal by adding a provision for a maximum fine of one thousand dollars ($1,000.00). Since the amendment mitigated the severity of the earlier proposal and was not a change in substance, it was not published in the FEDERAL REGISTER for public comment.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6 of the Act.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that effective November 21, 1975 the BSE rule change referenced above be, and therefore is, approved.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 21, 1975.

[FR Doc.75–33018 Filed 12–8–75;8:45 am]

[SR–BSE–75–2]

BOSTON STOCK EXCHANGE

Order Approving Proposed Rule Change

The Boston Stock Exchange ("BSE"), 53 State Street, Boston, Massachusetts 02109, submitted on September 17, 1975 a proposed rule change under Rule 19b–4 to conform the anti-manipulative rules of the BSE with those of other participants in the consolidated transaction reporting system.

Publication of the submission was made in the FEDERAL REGISTER on October 3, 1975 (40 FR 45880)[1] and interested persons were invited to submit written data, views and arguments concerning the submission by November 3, 1975. No comments have been received concerning the BSE's rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to national securities exchanges, and in particular the requirements of section 6 of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[SR–CSE–75–2]

CINCINNATI STOCK EXCHANGE

Order Approving Proposed Rule Change

The Cincinnati Stock Exchange ("CSE"), 205 Dixie Terminal Building, Cincinnati, Ohio 45202, submitted on September 22, 1975 a proposed rule change under Rule 19b–4 to conform the anti-manipulative rules of the CSE with those of other participants in the consolidated transaction reporting system.[1]

Publication of the submission was made in the FEDERAL REGISTER on October 3, 1975 (40 FR 45881)[2] and interested persons were invited to submit written data, views and arguments concerning the submission by November 3, 1975. No comments have been received concerning the CSE's rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to national securities exchanges, and in particular the requirements of section 6

[1] See also Securities Exchange Act Release No. 11683 (September 25, 1975).

[2] An amendment to the CSE's filing, stating that the proposed rule changes were approved by the CSE's Board of Trustees on September 30, 1975, was submitted on October 3, 1975.

[3] See also Securities Exchange Act Release No. 11682 (September 25, 1975).

V40237 DEC 9 75 XUM

of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[70-5667]

CONSOLIDATED NATURAL GAS CO. ET AL.

Post-Effective Amendment Regarding Acquisition of Common Stock of Subsidiary Company and Open Account Advances to Subsidiary Companies

Notice is hereby given that Consolidated Natural Gas Company ("Consolidated"), 30 Rockefeller Plaza, New York, New York 10020, a registered holding company, and certain of its subsidiary companies, CNG Producing Company ("CNG Producing"), Consolidated Gas Supply Corporation, Consolidated System LNG Company ("LNG Company"), The East Ohio Gas Company, The Peoples Natural Gas Company, The River Gas Company, and West Ohio Gas Company ("West Ohio"), have filed with this Commission a post-effective amendment to the application-declaration in this proceeding pursuant to sections 6(a), 7, 9(a), 10, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 promulgated thereunder regarding the following proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

By order in this proceeding dated June 5, 1975 (HCAR No. 19028), the Commission authorized a number of transactions in connection with the Consolidated system's financing program for 1975. Certain changes therein are proposed as follows.

In said order of June 5, 1975, Consolidated was authorized to make open account advances to West Ohio for working capital of up to $600,000. It is now proposed that Consolidated make additional open account advances of up to $500,000 to West Ohio for the same purpose, bringing the total amount to $1,100,000. Such advances may be made, repaid, and remade as requested by West Ohio from time to time, to and including May 31, 1976, upon letter agreement stating that such open account advances will be repaid on or before a date not more than one year from the date of the first advance to West Ohio, with interest at substantially the same effective rate as the related commercial paper or bank borrowings by Consolidated.

The Commission also authorized LNG Company to sell 182,000 shares of its common stock, $100 par value, at par, aggregating $18,200,000, and Consolidated to acquire such shares during 1975. It is stated that it now appears that LNG Company will not require all of such financing during 1975 but will require part of it during the early months of 1976. Therefore, it is requested that this authorization be extended from December 31, 1975, to and including May 31, 1976. It is further proposed that, in order to finance additional capital expenditures of LNG Company, Consolidated make open account advances to LNG Company for construction in amounts aggregating not more than $15,000,000 as called for from time to time by LNG Company through May 31, 1976, such open account advances to beat interest at the prime commercial rate of interest at The Chase Manhattan Bank, N.A., in effect from time to time.

Consolidated also proposes to make open account advances of up to $10,000,000 to CNG Producing to finance exploration and development of Gulf offshore leases and leases in the Province of Alberta, Canada. Such advances shall be made as called for from time to time by CNG Producing through May 31, 1976, and bear interest at the prime commercial rate of interest at The Chase Manhattan Bank, N.A., in effect from time to time.

In all other respects the transactions heretofore authorized remain unchanged. The expenses to be incurred in connection with the proposals are estimated not to exceed $750. No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than December 29, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[70-5415]

MIDDLE SOUTH UTILITIES, INC. ET AL.

Post-Effective Amendment Regarding Issuance and Sale of Notes by Fuel Supply Subsidiary to Operating Subsidiaries

In the matter of Middle South Utilities, Inc., System Fuels, Inc., 225 Baronne

Street, New Orleans, Louisiana 70112, Arkansas Power & Light Company, First National Building, Little Rock, Arkansas 72203; Louisiana Power & Light Company, 142 Delaronde Street, New Orleans, Louisiana 70174; Mississippi Power & Light Company P.O. Box 1640, Jackson, Mississippi 39205; New Orleans Public Service Inc., P.O. Box 60340, New Orleans, Louisiana 70160; (70-5415).

Notice is hereby given that System Fuels, Inc. ("SFI"), a jointly-owned nonutility, fuel-supply subsidiary company of Arkansas Power & Light Company, Louisiana Power & Light Company, Mississippi Power & Light Company, and New Orleans Public Service Inc. (collectively referred to as "Operating Companies"), each an elctiric utility subsidiary company of Middle South Utilities, Inc., a registered holding company, and the above-named companies have filed with this Commission a post-effective amendment to the application-declaration in this proceeding pursuant to sections 6(a), 7, 9(a), and 10 of the Public Utility Holding Company Act of 1935 ("Act") regarding the following proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

By order in this proceeding dated December 17, 1973 (HCAR No. 18221), the Commission, among other things, authorized SFI to issue and sell its notes to the Operating Companies pursuant to a loan agreement dated January 1, 1974, with the Operating Companies, whereby SFI would borrow from time to time through December 31, 1975, and only to the extent that outside sources of financing were not available, an aggregate amount not to exceed $90,000,000 outstanding at any one time. This amount was exclusive of $30,000,000 previously authorized to be borrowed by SFI from the Operating Companies (HCAR No. 17400 (December 17, 1971)). SFI has borrowed $18,000,000 of the $90,000,000 available under the 1974 loan agreement.

SFI now intends to amend the 1974 loan agreement and requests Commission authorization to borrow and reborrow from the Operating Companies (in addition to the $30,000,000 authorized in 1971) from time to time through December 31, 1976, an aggregate amount not to exceed $130,000,000 outstanding at any one time. Other than the date of expiration and the amount of borrowing thereunder, the terms of the 1974 loan agreement would remain unchanged. Each of the Operating Companies will provide, for each loan under the agreement, an amount in such proportion as its kwh sales for the preceding calendar year bear to the total kwh sales of the Operating Companies for that year, computed in both case by including sales to rural electric cooperatives and municipalities but excluding sales to other public utilities.

The proceeds derived from borrowings from the Operating Companies under the 1974 loan agreement, as to be amended, and proceeds from external financing will be used to fund SFI's 1976 Program which will require estimated additional expenditures by SFI of $27,000,000, of which $12,000,000 is for fuel procurement, $9,000,000 is for fuel storage and handling, and $6,000,000 is for fuel transportation.

No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interestesd person may, not later than December 22, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[70-5531]

NATIONAL FUEL GAS CO. AND NATIONAL FUEL GAS DISTRIBUTION CORP.

Proposed Issue and Sale of Commercial Paper and/or Notes to a Bank by Holding Company and Loan of Proceeds to Subsidiary

Notice is hereby given that National Fuel Gas Company ("National"), 30 Rockefeller Plaza, New York, New York 10020, a registered holding company, and National Fuel Gas Distribution Corporation ("Distribution Corporation"), 10 Lafayette Square, Buffalo, New York 14203, its gas utility subsidiary, have filed a post-effective amendment to their previously amended application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7(a), 9(a), 10(a) and 12(b) of the Act and Rules 43, 45 and 50(a)(5) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the post-effective amendment, which is summarized below, for a complete description of the proposed transaction.

National proposes, from time to time through December 31, 1976, to issue and sell commercial paper and/or notes to a bank in the aggregate principal amount at any one time outstanding of not more than $17,000,000. Such commercial paper will be sold by National directly to A. G. Becker & Co., Incorporated ("Becker"), a dealer in commercial paper, in denominations of not less than $100,000 with varying maturities not to exceed 270 days and which will not be prepayable prior to maturity. No commission will be payable in connection with the issuance and sale of the commercial paper; however, Becker will reoffer and sell the commercial paper at a discount rate of ⅛ of 1 percent per annum less than the prevailing discount rate to the company. Becker, in reoffering the commercial paper, will limit the reoffer and sale to not more than 200 buyers of commercial paper identified and designed in a list (nonpublic) prepared in advance. It is anticipated that the commercial paper will be held by the buyers to maturity; however, Becker may, if desired, repurchase the commercial paper and reoffer it to others on said list of buyers.

It is stated that when the effective interest cost for commercial paper exceeds the cost of equivalent borrowings from The Chase Manhattan Bank, N.A. ("Chase") on the date of issue, National will resort to bank loans. The proposed unsecured, short-term notes to Chase will each be dated as of the date of issue, will mature not later than nine months from the date thereof, will be prepayable at any time, in whole or in part without penalty or premium, and will bear interest at the prime rate of Chase in effect from time to time. National has informally agreed with Chase to maintain average balances of 20 percent of the average loans outstanding. National asserts, however, that the average balances maintained for normal operating needs are substantially in excess of this amount. If an average balance of 20 percent were assumed to be a "compensating balance", the effective cost of money, based on a 7¼ percent prime rate, would be 9.1 percent per annum. There will be no commitment fee nor any closing or related costs in connection with the company's bank borrowings. National states tentatively that it proposes to repay its commercial paper and/or short-term notes to Chase through moneys received from Distribution Corporation as a result of the operation of gas adjustment clauses, the issuance and sale of internal short-term unsecured notes or long-term debt and/or equity securities and operations.

V40237 DEC 9 75 XUM

National intends to use the proceeds from the sale of its commercial paper and/or short-term notes to acquire for cash $17,000,000 principal amount of short-term unsecured notes proposed to be issued by Distribution Corporation. Each such note will be dated the same date and bear the same interest rate as the related commercial paper and/or short-term note of National. Each such note will mature within nine months from its date of issue, with interest payable quarterly until the principal amount is paid in full. Distribution Corporation will have the option, after payment of all notes of prior maturity held by National, to prepay any note at any time or from time to time, in whole or in part without premium. Distribution Corporation proposes to use $10,000,000 of the proceeds from the above loans to finance the purchase of synthetic natural gas and the balance to finance a portion of its 1976 construction program.

National requests exception from the competitive bidding requirements of Rule 50 for the proposed issue and sale of its commercial paper pursuant to paragraph (a)(5) thereof and also requests authority to file certificates under Rule 24 with respect to the proposed short-term borrowings and/or commercial paper transactions on a quarterly basis.

It is stated that no special and separable fees, commissions or expenses will be incurred in connection with the proposed transaction. It is further stated that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than December 26, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the post-effective amendment, as filed or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-33019 Filed 12-8-75;8:45 am]

[SR-NYSE-75-2]

NEW YORK STOCK EXCHANGE, INC.

Order Approving Amendment to Rules of Depository Trust Company

In September, 1975, the New York Stock Exchange, Inc. (the "NYSE"), 55 Water Street, New York, New York 10041, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed change in the by-laws of the NYSE's wholly-owned subsidiary, The Depository Trust Company ("DTC"). The by-law, as amended, would increase the number of directors on DTC's board from fourteen to fifteen.

Notice of the filing was published in the SEC Docket (Release No. 11676/September 24, 1975); the complete submission and a request for public comments were published in the FEDERAL REGISTER on September 30, 1975 (40 FR 44906). The period for public comment expired on October 21, 1975, and no comments were received.

The Division of Market Regulation finds that the proposed change in the rules of DTC described above is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NYSE.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the rule change referenced above be, and the same hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[SR-PSE-75-4]

PACIFIC STOCK EXCHANGE, INC.

Order Approving Rule Change for Establishment of a Satellite Facility in Seattle, Washington

On October 7, 1975, the Pacific Stock Exchange, Incorporated ("PSE"), 618 South Spring Street, Los Angeles, California 90014, submitted a proposed rule change under Rule 19b-4 under the Securities Exchange Act of 1934, 15 U.S.C. 78(s) (the "Act"). The rule change was designed to enable the Pacific Securities Depository Trust Company ("PSDTC"), a wholly-owned subsidiary of PSE, to establish a satellite facility in Seattle, Washington. In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, the rule change was published in the FEDERAL REGISTER (40 FR 48740, October 17, 1975), and the public was invited to submit comments until November 7, 1975. Notice of the filing and an invitation for comments also appeared in the SEC Docket on October 14, 1975. (Securities Exchange Act Release No. 11724). No letters of comment were received.

As described in Securities Exchange Act Release No. 34-11724, the PSE submission consists of a plan to establish a satellite facility for local brokers and banks for processing at the San Francisco and Los Angeles offices of PSDTC and the Pacific Clearing Corporation ("PCC"). In connection with the submission, PSE requested that the Commission continue its finding of October 22, 1974, pursuant to paragraphs (g) of Rules 8c-1 and 15c2-1 under the Act, that the agreements, provisions and safeguards established by PSDTC are adequate for the protection of investors.

The Commission has reviewed the PSE submission and finds that the agreements, provisions and safeguards established by PSDTC are adequate for the protection of investors. The Commission finds also that the rule change is consistent with the provisions of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the rule change referenced above be, and hereby is, approved.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-33011 Filed 12-8-75;8:45 am]

[SR-PSE-75-3]

PACIFIC STOCK EXCHANGE, INC.

Order Approving Rule Change for Implementation of Interfaces Between Pacific Securities Depository Trust Company and Depository Trust Company and Midwest Securities Trust Company

The Pacific Stock Exchange, Incorporated ("PSE"), 618 South Spring Street, Los Angeles, California 90014, submitted on October 3, 1975, a proposed rule change under Rule 19b-4 under the Securities Exchange Act of 1934, 15 U.S.C. 78(s) (the "Act") with respect to the implementation of interfaces between Pacific Securities Depository Trust Company ("PSDTC") and Depository Trust Company ("DTC") and Midwest Securities Trust Company ("MSTC"). In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, the rule change was published in the FEDERAL REGISTER (40 FR 48740, October 17, 1975) and the public was invited to submit comments until November 7, 1975. Notice of the filing and an invitation for comments also appeared in the SEC Docket on October 9, 1975. (Securities Exchange Act Release No. 11715) No letters of comment were received.

As described in Securities Exchange Act Release No. 11715, the PSE submission consists of interface agreements for the interfaces between PSDTC and DTC and MSTC. The PSE requested with respect to the interface agreements, that the Commission continue its finding, as set forth in its letter of October 22, 1974,

pursuant to Paragraph (g) of Rules 8c-1 and 15c2-1 under the Securities Exchange Act of 1934, that the agreements, provisions and safeguards established by PSDTC are adequate for the protection of investors.

The Commission has reviewed the PSE submission and finds that the agreements, provisions and safeguards established by PSDTC are adequate for the notification of investors. The Commission finds also that the rule change is consistent with the provisions of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the rule change referenced above be, and hereby is, approved.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.75-33012 Filed 12-8-75;8:45 am]

[SR-PBWSE-75-1]

PBW STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change Relative to Fidelity Bonding Requirements for Members

On September 22, 1975, the PBW Stock Exchange, Inc. ("PBW"), 17th Street and Stock Exchange Place, Philadelphia, Pennsylvania 19103, submitted proposed changes to Rule 705 of the Rules of its Board of Governors, under Rule 19b-4 pursuant to section 19(b) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s), as amended, Pub. L. No. 74-29 (June 4, 1975) (the "Act"). The rule changes were designed to impose higher fidelity bonding requirements in certain respects on member firms and organizations. In accordance with section 19(b) of the Act and Rule 19b-4 thereunder, the proposed rule change was published in the FEDERAL REGISTER (40 FR 45881, October 3, 1975), and the public was invited to submit comments until November 3, 1975. Notice of the filing and an invitation for comments also appeared in the SEC Docket on October 7, 1975 (Securities Exchange Act Release No. 11681).

As described in the item published in the FEDERAL REGISTER, the purpose of the proposed rule change is to impose higher fidelity bonding requirements on members in order to provide increased safeguards with respect to the financial responsibility and related practices of its members consistent with the standards set forth in new Rule 15b10-11 under the Act (the "SECO Bonding Rule" or "Rule 15b10-11") which establishes fidelity bonding requirements for registered brokers and dealers which are not members of a registered national securities association (SECO) brokers and dealers). Members in good standing of the PBW, among other exchanges, by the terms of paragraph (a) of the SECO Bonding Rule, are exempt from the latter rule inasmuch as they are already subject to fidelity bonding requirements of the PBW which are comparable to those promulgated by the Commission.

The Commission believes that the subject revisions to the PBW Bonding Rule are necessary and appropriate in the public interest and for the protection of investors. Accordingly, it finds that the proposed rule change is consistent with the provisions of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the rule changes referenced above be, and hereby are, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority No. 30—Revision 15; Amdt. 6]

PROCUREMENT ASSISTANCE PROGRAM

Delegation of Authority To Conduct Program Activities in Field Offices

Delegation of Authority No. 30, Revision 15 (40 FR 11657, as corrected 14134), as amended (40 FR 20691; 26317; 40217 as corrected 41862; 49159; and 52676) is hereby further amended to delegate to certain field officials authorities to effectively carry out the Section 8(a) contracting program in field offices. This amendment also withholds authority from district directors in Region X in size determinations for government procurement and sales.

Delegation of Authority No. 30, Revision 15, now reads as follows:

* * * * *

PART VI—PROCUREMENT ASSISTANCE PROGRAM (PA)

* * * * *

Section B—Section 8(a) Contracting Authority (SBAct). 1. To enter into contracts such as, but not limited to, supplies, services, construction, and concessions on behalf of the Small Business Administration with the U.S. Government and any department, agency, or officer thereof having procurement powers, obligating the Small Business Administration, and agreeing to the terms and conditions of such contracts up to the following amounts:

a. Regional Director, Unlimited.
b. Assistant Regional Director for PA, Unlimited.
c. Contract Specialist, Region X R/O, $250,000.
d. District Director, Washington D/O, Unlimited.
e. District Directors, All Region VI D/O's, New York D/O, Newark D/O, and Chicago D/O, $350,000.
f. District Directors, Region IX and Anchorage D/O, $500,000.
g. Assistant District Director for PA, San Francisco and Los Angeles D/O's, $100,000.
h. Assistant District Director for PA, New York D/O and Newark D/O, $350,000.
i. Contract Specialist, Anchorage D/O, $250,000.
j. Branch Manager, El Paso, Texas, $350,000.

2. To arrange for the performance of such contracts as stated in paragraph 1 above by negotiating or otherwise letting subcontracts to small business concerns or others. Further, to arrange for such management services as deemed necessary to enable the Small Business Administration to perform such contracts based upon the availability of funds, contracts not to exceed the following amounts:

a. Regional Director, Unlimited.
b. Assistant Regional Director for PA, Unlimited.
c. Contract Specialist, Region X R/O, $250,000.
d. District Director, Washington D/O, Unlimited.
e. District Directors, All Region VI D/O's, New York D/O, Newark D/O and Chicago D/O, $350,000.
f. District Directors, Region IX and Anchorage D/O, $500,000.
g. Assistant District Director for PA, San Francisco and Los Angeles D/O's, $100,000.
h. Assistant District Director for PA, New York D/O and Newark D/O, $350,000.
i. Contract Specialist, Anchorage D/O, $250,000.
j. Branch Manager, El Paso, Texas, B/O, $350,000.

3. To certify to any officer of the Government having procurement powers that the Small Business Administration is competent to perform any specific Government procurement contract to be let by any such officer, such contract not to exceed the following amount:

a. Regional Director, Unlimited.
b. Assistant Regional Director for PA, Unlimited.
c. Chief, Business Development, Region III R/O, Unlimited.
d. Contract Specialist, Region X, $250,000.
e. District Director, Washington D/O, Unlimited.
f. District Directors, all Region VI D/O's, New York D/O, Newark D/O and Chicago D/O, $350,000.
g. District Directors, Region X D/O's and Anchorage D/O, $500,000.
h. Assistant District Director for PA, Region IX, $500,000.
i. Assistant District Director for PA, New York D/O and Newark D/O, $350,000.
j. Contract Specialist, Anchorage D/O, $250,000.
k. Branch Manager, El Paso, Texas, B/O, $350,000.

* * * * *

PART IX—ELIGIBILITY AND SIZE DETERMINATIONS

* * * * *

Section B—Size Determinations

* * * * *

2. *Size Determinations for Government Procurement and Sales.* In accordance with Small Business Administration Small Business Size Standard Regulations, to make size determinations for government procurement and sales activities.

a. Regional Director
b. Assistant Regional Director for PA
c. District Directors, EXCEPT Region X

Effective date: December 1, 1975.

DANIEL T. KINGSLEY,
Associate Administrator for Operations.

VETERANS ADMINISTRATION

COOPERATIVE STUDIES EVALUATION COMMITTEE

Meeting

The Veterans Administration gives notice pursuant to Public Law 92-463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 USC 4101, will be held in the Veterans Administration Hospital, 1201 NW 16th Street, Miami, Florida, on February 9 and 10, 1976. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, the scientific validity and the propriety of technical details, including involvement of human subjects. The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program on its findings.

The meeting will be open to the public up to the seating capacity of the room from 8 to 8:30 a.m., February 9, to discuss the general status of the program. The limited accommodations necessitate that those who plan to attend contact Dr. James A. Hagans, Coordinator of the Committee, Veterans Administration Central Office, Washington, DC (202-389-3702) prior to January 15.

The meeting will be closed from 8:30 a.m. to 5 p.m. on February 9 and all day on February 10 for consideration of specific proposals in accordance with provisions set forth in Section 10(d) of Public Law 92-463 and Sections 552(b)(2) and 552(b)(6) of Title 5, U.S. Code. During this portion of the meeting, discussion and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are study subjects, the disclosure of which would constitute an invasion of personal privacy.

Dated: December 3, 1975

DEPARTMENT OF LABOR

Office of the Secretary

[TA-W-353]

ALLEGHENY LUDLUM STEEL CORP.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On November 21, 1975, the Department of Labor received a petition filed under section 221(a) of the Trade Act of 1974 ("the Act") by the United Steelworkers of America on behalf of the workers and former workers of Allegheny Ludlum Steel Corporation, Dunkirk, New York, a division of Allegheny Ludlum Industries, Pittsburgh, Pennsylvania (TA-W-353).

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with specialty steel bars, specialty steel wire, cold drawn shapes, hexagons, flats and rounds produced by Allegheny Ludlum Steel Corporation or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing: *Provided*, Such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 19, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave. NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 21st day of November 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-33089 Filed 12-8-75;8:45 am]

[TA-W-62]

CONTROL DATA CORP., CASPER, WYOMING

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, on August 25, 1975 the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to certain workers and former workers of the Casper, Wyoming plant of the Control Data Corporation, Computer Memory Manufacturing Division, St. Louis Park, Minnesota (TA-W-62).

The Notice of Certification was published in the FEDERAL REGISTER (40 FR 40219) on September 2, 1975. At the request of the petitioners a further investigation was instituted by the Acting Director of the Office of Trade Adjustment Assistance. The evidence developed in the further investigation indicated that certain workers employed in the production and repair of memory stacks who became totally or partially separated because such production and repair activity was transferred to Korea and subsequently imported into the United States became totally or partially separated prior to March 2, 1975. Since the intent of the certification is to cover all such adversely affected workers, the certification issued by the Department on August 25, 1975 is hereby revised to include such additional workers not previously covered.

The revised certification is hereby made as follows:

All hourly, piecework, and salaried workers employed at the Casper, Wyoming plant of the Computer Memory Manufacturing Division, Control Data Corporation who became totally or partially separated from employment on or after January 3, 1975 and before July 30, 1975, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of November 1975.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for Trade and Adjustment Policy.

[FR Doc.75-32966 Filed 12-8-75;8:45 am]

[TA-W-342]

DARTMOUTH CLOTHING CO.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On November 21, 1975, the Department of Labor received a petition filed under section 221(a) of the Trade Act of 1974 ("the Act") by the Amalgamated Clothing Workers of America on behalf of the workers and former workers of Dartmouth Clothing Company, New Bedford, Massachusetts, a division of Cliftex Corporation, New Bedford, Massachusetts (TA-W-342).

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with men's sportcoats, suits, and leisure suits produced by Dartmouth Clothing Company or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing. *Provided*, Such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than Decembr 19, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 21st day of November 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-33090 Filed 12-8-75;8:45 am]

[TA-W-170]

DEVON APPAREL, INC., PHILADELPHIA, PENNSYLVANIA

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-170: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 19, 1975 in response to a worker petition received on September 19, 1975 which was filed by the International Ladies' Garment Workers' Union (AFL-CIO) on behalf of workers and former workers producing ladies' coordinated sportswear at Devon Apparel, Incorporated, Philadelphia, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 44639-44640) on September 29, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Devon Apparel, Incorporated, its customers, the U.S. Department of Commerce, U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers increased 13 percent from 1973 to 1974 and decreased 11 percent in the first three quarters of 1975 compared to the like period in 1974. Average weekly hours declined five percent from 1973 to 1974 and nine percent in the first nine months of 1975 compared to the same period in 1974.

Sales or production, or both, have decreased absolutely. In-house production, that is the number of ladies coordinated sportswear outfits produced at Devon's Philadelphia facilities, increased five percent from 1973 to 1974 and five percent in January-August 1975 compared to the same period in 1974.

Increased imports contributed importantly. Specific production and import information on ladies coordinated sportswear made from knitted synthetic material was not available. Industry analysts stated that to the best of their knowledge there were no imports of ladies, high fashion sportswear coordinates. Company officials and customers indicated that sales of Devon's coordinated sportswear outfits were not hurt by import competition.

The evidence developed in the Department's investigation indicated that total company production was done partly at Devon's Philadelphia facilities and partly by outside contractors. Due to the dampening effect of the general economic recession on company sales, Devon began in mid-1974 to reduce the volume of its outside contract work in order to maintain in-house production. During the first quarter of 1975 in-house production reached its highest level since the first quarter of 1973. Employment at Devon's Philadelphia facilities was directly related to in-house production. Even though in-house production was rising, employment in 1975 remained low mainly because of labor saving measures instituted at the Philadelphia facilities during the business recession of 1974.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies coordinated sportswear produced at Devon Apparel, Incorporated, Philadelphia, Pennsylvania, did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C., this 26th day of November 1975.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for Trade and Adjustment Policy.

[TA-W-154, TA-W-201]

LEDA SHOE COMPANY AND DELVIN SHOE CO., DOLGEVILLE, NEW YORK AND NEW YORK, NEW YORK

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-154 and TA-W-201; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigations were initiated on September 18, 1975 and September 29, 1975 in response to worker petitions filed on those respective dates by workers of Leda Shoe Company, Dolgeville, New York, and by the United Shoe Workers of America on behalf of workers at Delvin Shoe Company, New York, New York, both divisions of Genesco, Incorporated, Nashville, Tennessee. Both companies were engaged in the production of high fashion women's shoes.

The notices of investigation were published in the FEDERAL REGISTER on September 26, 1975 (40 FR 44368) and on October 15, 1975 (40 FR 48415). No public hearing was requested and none was held.

The information upon which the determinations were made was obtained principally from officials of Delvin Shoe Company, Genesco, Inc., its customers, the U.S. Department of Commerce, the

V40237 DEC 9 75 D XUM

U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers at the Leda Shoe Company declined 25 percent in the first quarter of 1975 compared to 1974. Average weekly hours declined 22 percent in the first quarter of 1975 compared to 1974. The plant closed in March 1975.

The average number of production workers at the Delvin Shoe Company declined 34 percent in the first three quarters of 1975 compared to 1974. The plant closed in October 1975.

Sales or production, or both, have decreased absolutely. Production at the Leda Shoe Company's, Dolgeville, New York plant declined 51 percent in the first quarter of 1975 compared to the first quarter of 1974. Sales declined 17 percent in the first two months of 1975 compared to the first two months of 1974.

Production at the Delvin Shoe Company's, New York, New York plant declined 37 percent in the first eight months of 1975 compared to the first eight months of 1974. Sales declined 38 percent in the first three quarters of 1975 compared to the first three quarters of 1974.

Increased imports contributed importantly. Imports of articles like or directly competitive with those produced at Leda Shoe Company and Delvin Shoe Company increased from 73 million pairs in 1970 to 87 million pairs in 1973. Imports increased from 41.8 million pairs in the first six months of 1974 to 44.8 million pairs in the first six months of 1975. The ratios of imports to domestic consumption and production increased from 40 percent and 67 percent, respectively in the first six months of 1974 to 47 percent and 90 percent in the first six months of 1975.

The Delvin and Leda Shoe Companies began to experience sales declines starting in the fourth quarter of 1974 as imports of women's non-rubber footwear with leather uppers expanded their share of U.S. production and consumption. This made the continued operation of two plants producing both Evins and Delman shoes no longer economical. Although sales declines were greater at the Delvin Shoe Company than at Leda Shoes, Genesco officials decided that a consolidation would involve the closure of Leda Shoes and the maintenance of the Delvin Shoe plant because of the latter's greater productive capacity and more skilled labor. In March 1975 the Leda Shoe Company was closed and its production transferred to the Delvin Shoe Company in an attempt to maintain economical production levels. Separations associated with the closure began in January 1975. At the same time an agreement was worked out with union officials in New York City to keep production costs to a minimum in order to offer a retail price more competitive with imports. However, sales in the first three quarters of 1975 remained consistently below levels in comparable quarters of 1974 and in October, 1975 Genesco officials decided to close the Delvin Shoe Company also. Separations associated with the closure were carried out by stage in the production process and began in July, 1975.

Customers indicated that imported shoes have represented an increasing share of their purchases in recent years. Imported shoes of quality equal to if not better than those produced by Delvin and Leda could be sold for considerably less money.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with high fashion women's shoes produced at the Leda Shoe Company and Delvin Shoe Company contributed importantly to the total or partial separation of the workers of those plants. In accordance with the provisions of the Act, I make the following certification:

All hourly, piecework, and salaried workers engaged in employment related to the production of high fashion women's shoes at the Dolgeville, New York plant of the Leda Shoe Company who became totally or partially separated from employment on or after January 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All hourly, piecework, and salaried workers engaged in employment related to the production of high fashion women's shoes at the New York, New York plant of the Delvin Shoe Company who became totally or partially separated from employment on or after July 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of November 1975.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for Trade and Adjustment Policy.

[FR Doc.75-33092 Filed 12-8-75;8:45 am]

[TA-W-349]

LISH ENTERPRISE, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On November 21, 1975, the Department of Labor received a petition filed under section 221(a) of the Trade Act of 1974 ("the Act") by the Massachusetts Joint Board of Millinery Workers Union on behalf of the workers and former workers of Lish Enterprise, Incorporated, West Upton, Massachusetts (TA-W-349).

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with millinery (fake fur hats) produced by Lish Enterprise, Incorporated or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing: *Provided*, Such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 19, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3d St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 21st day of November 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-33093 Filed 12-8-75;8:45 am]

[TA-W-164]

M&M KNITTING MILLS, INC., PHILADELPHIA, PENNSYLVANIA

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-164; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 19, 1975 in response to a worker petition received on that date which was filed by the International Ladies' Garment Workers' Union (AFL-CIO) on behalf of workers and former workers producing ladies' swimsuits at M&M Knitting Mills, Inc., Philadelphia, Pennsylvania. It was determined during the course of the investigation that the firm also produced knit dresses until December 1974.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 44640) on September 29, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of M&M Knitting Mills Inc., its customers, the U.S. International Trade Commission, U.S. Department of Commerce, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separations, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. Employment of production workers at M&M Knitting Mills declined 20 percent between 1973 and 1974 and declined 29 percent in the first nine months of 1975 compared to the first nine months of 1974. Average weekly hours for production workers declined 13 percent in the first nine months of 1975 compared to the first nine months of 1974.

Sales or production, or both, have decreased absolutely. Sales of knit dresses by M&M Knitting Mills declined 49 percent in 1974 from 1973. Dress production was terminated by the firm in December 1974. Sales of swimwear increased 21 percent in 1974 from 1973 and then declined 72 percent in the first eight months of 1975 compared to the first eight months of 1974.

Increased imports contributed importantly. Imports of knit dresses like or directly competitive with those produced by M&M Knitting Mills declined both absolutely and relative to domestic production and consumption in each year since 1971. Imports declined from 15.8 million units comprising 15.6 percent of domestic consumption in 1971 to 8.5 million units comprising 7.3 percent of domestic consumption in 1974. Imports continued to decline absolutely in the first nine months of 1975 compared to the same period in 1974. Imports of knit swimsuits, which were not separately identifiable prior to 1974, increased from 4.4 million units in the first nine months of 1974 to 4.6 million units in the first nine months of 1975.

The evidence developed in the Department's investigation of M&M Knitting Mills reveals that significant separations of workers at the firm in 1974 and January 1975 were due to the decline and ultimate termination of production of knit dresses. Production of swimwear and related employment were increasing in late 1974 during which time production of knit dresses and related employment were declining. Following the cessation of dress operations and a subsequent adjustment to production of new swimwear lines, employment at M&M increased three percent in the third quarter of 1975 over the previous quarter's levels.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with knit dresses and swimwear produced by M&M Knitting Mills, Inc., Philadelphia, Pennsylvania did not contribute importantly to the total or partial separation of the workers at such firm.

Signed at Washington, D.C., this 25th day of November 1975.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for Trade and Adjustment Policy.

[FR Doc.75-33094 Filed 12-8-75;8:45 am]

[TA-W-173, 339]

OMC-LINCOLN

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-173 and TA-W-339; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 23, 1975 in response to a worker petition received on September 22, 1975 which was filed by workers formerly producing golf cars at the Lincoln, Nebraska plant and the West Palm Beach, Florida and Addison, Illinois distribution centers of OMC—Lincoln, a division of Outboard Marine Corporation, Waukeegan, Illinois. Notice of the investigation was published in the FEDERAL REGISTER on October 2, 1975 (40 FR 45485).

A second investigation was initiated on November 18, 1975 in response to a worker petition received on November 18, 1975 which was filed by the Allied Industrial Workers on behalf of workers formerly producing golf cars at the Lincoln, Nebraska and Charlotte, North Carolina distribution centers of OMC—Lincoln.

The information upon which the determination was made was obtained principally from officials of OMC—Lincoln, its customers, the U.S. Department of Commerce, U.S. Department of Treasury, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. All data were recorded in fiscal year periods beginning in October of the previous year.

The average number of production workers at the Lincoln plant declined 28.1 percent from fiscal 1974 to fiscal 1975. Beginning with the third quarter of fiscal 1974 (April to June), production employment declined in six consecutive quarters when compared to the previous quarter.

Average employment of salaried workers at the Lincoln plant declined 10.6 percent in the second half of fiscal 1975 compared to the second half of fiscal 1974.

Average employment of distribution center employees declined 12.5 percent in the second half of fiscal 1975 compared to the second half of fiscal 1974. Employment was terminated at the Addison, West Palm Beach and Charlotte centers in August, September, and October 1975, respectively. Employment at the Lincoln

V 40 N 237 DEC 9 75 XUM

center will be terminated in November 1975.

Average weekly hours declined 2.6 percent from fiscal 1974 to fiscal 1975.

Sales or production, or both, have decreased absolutely. All data were recorded in fiscal year periods beginning in October of the previous year.

Sales of golf cars declined 24.8 percent from fiscal 1974 to fiscal 1975. In the second half of fiscal 1975, sales declined 13.5 percent compared to the second half of fiscal 1974. Production of golf cars declined 37.7 percent from fiscal 1974 to fiscal 1975. In the second half of fiscal 1975, production declined 35.0 percent compared to the second half of fiscal 1974. All production of golf cars will be terminated in November 1975.

Increased imports contributed importantly. Imports of golf cars like or directly competitive with those produced at OMC—Lincoln increased from 2.8 thousand units in 1972 to 6.9 thousand units in 1974.

The ratios of imports to domestic consumption and sales increased from 5.5 percent and 5.7 percent, respectively in 1972 to 12.0 percent and 13.2 percent in 1974. The I/C and I/S ratios increased from 9.5 percent and 10.2 percent respectively in the first six months of 1974 to 17.2 percent and 20.0 percent in the first six months of 1975.

In recent years, Cushman golf cars represented approximately 66 percent of OMC—Lincoln's total production. Declining sales and production of golf cars have been a pronounced trend from 1973 to the present. Sales and production of OMC—Lincoln's other products (3 and 4 wheel industrial/commercial vehicles and turf maintenance vehicles) declined in fiscal 1975 from fiscal 1974 as a result of general economic conditions, after peaking in fiscal 1974. Customers of Cushman golf cars reduced purchases as a result of import competition. Declining demand for Cushman golf cars led to production cutbacks, and in turn, separations of employees at the plant and distribution centers. All production of golf cars will be terminated in November 1975.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with golf cars produced at OMC—Lincoln contributed importantly to the total or partial separation of the workers of the plant and distribution centers. In accordance with the provisions of the Act, I make the following certification:

All hourly, piecework, and salaried workers engaged in employment related to the production of golf cars at the Lincoln plant of OMC—Lincoln who became totally or partially separated from employment on or after October 27, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

All hourly and salaried workers engaged in employment related to the production of golf cars at the Addison, West Palm Beach, Charlotte, and Lincoln distribution centers of OMC—Lincoln who became totally or partially separated from employment on or after August 1, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of November 1975.

HERBERT N. BLACKMAN,
Assiciate Deputy Under Secretary for Trade and Adjustment Policy.

[FR Doc.75-33095 Filed 12-8-75;8:45 am]

[TA-W-344]

QUALITY COAT COMPANY, INC.

Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On November 21, 1975, the Department of Labor received a petition filed under section 221(a) of the Trade Act of 1974 ("the Act") by the Amalgamated Clothing Workers of America on behalf of the workers and former workers of Quality Coat Company, Incorporated, New York, New York (TA-W-344).

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with ladies' coats and raincoats produced by Quality Coat Company, Incorporated or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing: *Provided*, Such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 19, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 21st day of November 1975.

MARVIN M. FOOKS,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.75-33096 Filed 12-8-75;8:45 am]

[TA-W-140]

WAGNER ELECTRIC CORP., ST. LOUIS, MISSOURI

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-140: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 12, 1975 in response to a worker petition received on September 12, 1975 which was filed by the International Union of Electrical Workers, Local 1104 on behalf of workers formerly producing electrical motors, transformers and automotive brake products at the St. Louis plants of the Wagner Electric Corporation, St. Louis, Missouri.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 43289) on September 19, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Wagner Electric Corporation, its customers, the National Electrical Manufacturers Association, the U.S Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the groun eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. The average number of production workers in the hermetic motors division fell 41 percent from 1973 to 1974 and 74 percent in the first nine months of 1975 from the first nine months of 1974. Production employment in the distribution transformer division dropped 7 percent from 1973 to 1974 and 62 percent in the first nine months of 1975 from the first nine months of 1974. Employment in the power transformers division dropped one percent from 1973 to 1974 and then increased 3 percent in the first nine months of 1975 over the first nine months of 1974.

Average number of production workers in the automotive products division fell one percent from 1973 to 1974 and 11 percent in the first nine months of 1975 from the first nine months of 1974. Average number of production workers in the miscellaneous division declined 4 percent from 1973 to 1974 and five percent in the first nine months of 1975 from the first nine months of 1974.

Hours worked data was available only for the period October 1974 to October 1975. None of the divisions experienced any significant declines in average weekly hours worked during that one year period.

Sales or production, or both have decreased absolutely. Sales of hermetic motors declined eleven percent from 1973 to 1974 and 59 percent in the first two quarters of 1975 from the first two quarters of 1974. Production of hermetic motors declined seven percent from 1973 to 1974 and 53 percent in the first two quarters of 1975 from the first two quarters of 1974.

Sales of distribution transformers fell 4 percent from 1973 to 1974 and 61 percent in the first three quarters of 1975 from the first three quarters of 1974. Production of distribution transformers dropped 3 percent from 1973 to 1974 and 64 percent in the first nine months of 1975 from the first nine months of 1974.

Sales of power transformers increased 10 percent from 1973 to 1974 and 26 percent in the first nine months of 1975 from the first nine months of 1974. Production followed unit sales exactly.

Sales of automotive brake products, when adjusted by an index of price change, fell three percent from 1973 to 1974 and eleven percent in the first nine months of 1975 from the first nine months of 1974. Value of production of automotive brake products rose 24 percent from 1973 to 1974 and 13 percent in the first nine months of 1975 from the first nine months of 1974.

Increased imports contributed importantly. Imports of distribution transformers like or directly competitive with those produced at the Lackland Road St. Louis plant constituted less than two percent of domestic production and consumption in each year from 1970 to 1974 and in the first seven months of 1975.

Evidence developed by the Department of Labor during the course of the investigation reveals that the decline in sales and production of distribution transformers experienced by Wagner Electric Corporation can be attributed to declining demand caused by a drop in residential housing starts. Utility companies who purchase both distribution and power transformers, and were faced with rising costs due to the energy crisis, decided to liquidate inventories rather than maintain levels of purchases from Wagner.

Imports of hermetic motors like or directly competitive with those produced at the Plymouth Avenue St. Louis plant of the Wagner Electric Corporation constituted less than three percent of domestic consumption and production in each year from 1970 to 1974 and in the first seven months of 1975. Customers accounting for nearly 100 percent of the sales by Wagner of hermetic motors did not switch to imports. Sales of hermetic motors have declined because of the recession during which sales of household refrigeration appliances, the prime market for hermetic motors, were depressed. Wagner sold the product line to Tecumseh Products, Tecumseh, Michigan in June 1975.

Imports of automotive brake products like or directly competitive with those produced at the Plymouth Avenue St. Louis plant and the Berkeley plant increased in value from 46 million dollars in 1970 to 118 million dollars in 1974. The ratios of imports to domestic consumption (I/C) and production (I/P) rose from 10.0 percent and 8.6 percent in 1970 to 15.3 percent and 13.2 percent in 1974. In the first seven months of 1975, the I/C and I/P ratios rose to 17.0 percent and 14.0 percent respectively from 14.6 percent and 13.3 percent respectively in the first seven months of 1974.

However, customers of Wagner accounting for 60 percent of Wagner's sales of automotive brake products in 1974 and 1975 do not purchase imports. Declining sales of automotive brake products at Wagner can be attributed to a severely depressed motor vehicle industry. Automobile production dropped 25 percent from 1973 to 1974. Additionally, U.S. bus and truck production dropped sharply in 1975 from 1974 levels.

Conclusion. After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with hermetic motors, transformers and automotive brake products produced at the St. Louis plants of the Wagner Electric Corporation, St. Louis, Missouri did not contribute importantly to the total or partial separations of the workers at such plants.

Signed at Washington, D.C., this 26th day of November 1975.

HERBERT N. BLACKMAN,
Associate Deputy Under Secretary for Trade and Adjustment Policy.

INTERSTATE COMMERCE COMMISSION

[AB 46 (Sub-No. 8)]

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD CO.

Abandonment of Line

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing; That no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. §§ 4321, *et seq.*; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Van Buren County, Iowa, on or before December 18, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this finding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection, and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to interested persons.

Dated at Washington, D.C., this 25th day of November, 1975.

By the Commission, Commissioner Brown.

[SEAL] ROBERT L. OSWALD,
Secretary.

[AB 46 (Sub-No. 8)]

CHICAGO, ROCK ISLAND AND PACIFIC RAILROAD COMPANY ABANDONMENT BETWEEN MT. ZION AND KEOSAUQUA, IN VAN BUREN COUNTY, IOWA.

The Interstate Commerce Commission hereby gives notice that by order dated November 25, 1975, it has been determined that the proposed abandonment of the Chicago, Rock Island and Pacific Railroad Company line extending 4.5 miles between Mt. Zion and Keosauqua in Van Buren County, Iowa, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that the diversion of traffic from this low density line to motor transportation should not cause any substantial alterations in air and water quality, and transportation safety in the area. In addition, rail service will continue to be available over the applicant's line at Mt. Zion, some five miles north of Keosauqua.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-7966.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C., 20423, on or before January 2, 1976.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an en-

V40237 DEC 9 75 XUM

vironmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.75-33098 Filed 12-8-75;8:45 am]

[Notice No. 926]

ASSIGNMENT OF HEARINGS

DECEMBER 4, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 133916 Sub 3, O'nan Transportation Company, now being assigned February 2, 1976, (1 week), at Frankfort, Ky.; in a hearing room to be later designated.

MC 130324, American Travel, Inc., now being assigned January 29, 1976 (2 days) at Montpelier, Vermont; in a hearing room to be designated later.

MC 130325; Paul M. Keith, dba Mountain Paradise Tours, now being assigned February 3, 1976, (3 days), at Butte, Mont.; in a hearing room to be later designated.

MC-F-12521, Ryder Truck Lines, Inc.—Purchase—Transamerican Freight Lines, Inc., now assigned January 6, 1976, at Washington, D.C., is postponed indefinitely.

MC 129600 Sub 21, Polar Transport, Inc., now being assigned February 3, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 30844 Sub 533, Kroblin Refrigerated Express, Inc.; MC 116763 Sub 300, Carl Subler Trucking, Inc. and 123405 Sub 40, Food Transport, Inc., now being assigned February 4, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 135185 Sub 25, Columbine Carriers, Inc., now being assigned February 11, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 126091 Sub 3, K. J. Fraley and E. W. Schilling, d/b/a Fraley and Schilling, now being assigned February 12, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 1380 Sub 19, Colonial Motor Freight Line, Inc., now being assigned February 2, 1976, (2 weeks) at Columbia, S.C., in a hearing room to be later designated.

MC 113528 Sub 24, Mercury Freight Lines, Inc., now being assigned February 2, 1976, at Baton Rouge, La. (2 weeks); in a hearing room to be later designated.

MC 128543 Sub 10, Cresco Lines, Inc., now assigned December 8, 1975, at Chicago, Ill., is postponed to February 10, 1976, (2 days), at Chicago, Ill. in a hearing room to be later designated.

MC 10761 (Sub-Nos. 240, 246, 247, 249, 253, 254, 256, 257, 259 and 260), Transamerican Freight Lines, Inc., now being assigned January 27, 1976 (4 days) at Chicago, Illinois; in a hearing room to be designated later.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.75-33099 Filed 12-8-75;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

DECEMBER 4, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before December 24, 1975.

FSA No. 43088—*Joint Rail-Water Container Rates—American Export Lines, Inc.* Filed by American Export Lines, Inc., (No. 3), for itself and interested rail carriers. Rates on general commodities, from ports and terminals in the United Kingdom and Continental Europe, to railroad terminals at U.S. Pacific Coast ports.

Grounds for relief—Water competition.

Tariff—American Export Lines, Inc., United Kingdom-Continental Europe Pacific Coast joint container freight tariff I.C.C. No. 3, F.M.C. No. 170. Rates are published to become effective on January 2, 1976.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

PART II:

FEDERAL ENERGY ADMINISTRATION

NATIONAL UTILITY RESIDUAL FUEL OIL ALLOCATION

■

Supplier Percentage Notice for December 1975

V 40 237 DEC 9 75 XUM

FEDERAL ENERGY ADMINISTRATION

NATIONAL UTILITY RESIDUAL FUEL OIL ALLOCATION

Supplier Percentage Notice for December 1975

Pursuant to the provisions of 10 CFR 211.163(b)(2), 211.165 and 211.166(d)(2), the Federal Energy Administration (FEA) hereby provides notice of the volumes of residual fuel oil allocated to each utility and the percentage of such volumes required to be supplied by each supplier for delivery in December 1975. This information is set forth in the Appendix to this notice. Adjustments of certain supplier base period percentages have been made at the request of affected utilities and suppliers, pursuant to the criteria of 10 CFR 205.25 and are reflected in the Appendix.

The utility allocations were determined after review of the relative availability of supplies of residual fuel oil for allocation to both utility and non-utility uses. In calculating the allocation level for each utility the FEA considered all of the factors enumerated in 10 CFR 211.163(b)(2) and also the following other factors:

1. The data contained in the Federal Power Commission (FPC) Form 23B submitted by utilities;

2. Natural gas curtailments;

3. FEA's prediction that the supply level of residual fuel oil is expected to generally equate to the total demand.

The amounts shown in the Appendix are the quantities of residual fuel oil that suppliers are obligated to make available for December, 1975 in the event FEA's allocation authority is extended to include the entire month. FEA will publish a notice providing guidance for allocation through December 15 if the Emergency Petroleum Allocation Act is not extended beyond December 15, 1975. Some utilities will not receive any allocation for this month for various reasons including the fact that these utilities burn other fuels primarily and use residual fuel oil only for standby purposes.

The Appendix provides the names of the suppliers obligated to supply each utility and each supplier's percentage and volume of each month's allocation to a utility. The first column of the Appendix lists each utility with its suppliers.

The second column sets forth the recommended FEA burn level. The third and fourth columns provide each supplier's respective percentage and volume share of a utility's allocated volume of residual fuel oil. The fifth column provides the total volume of residual fuel oil for each utility from all suppliers. Following the name of certain suppliers, an additional supplier is shown in parentheses. The supplier in parentheses is presumed, on the basis of the best information available, to be the supplier of the utility's supplier. This information is provided for the convenience of such suppliers and the FEA requests that any additions or corrections in this regard be forwarded to FEA Electrical Utilities Reports, Code 47, Washington, D.C. 20461.

It is contemplated that corrections or adjustments to delivery levels for certain utilities may be required during the month of December to avoid undue hardship. FEA will consider special circumstances such as unexpected outages which cause fuel consumption to exceed FEA burn levels in any month. Such corrections or adjustments shall be made pursuant to Subparts B and C of 10 CFR Part 205.

FEA expects the utilities to consume supplies at or below FEA burn levels, which are based on the utilities' proposed burn levels.

The utility residual fuel oil allocation program is based in part on the data derived from utilities' filings of EPC Form 23B. Thus, the timely submission of FPC Form 23B will be a necessary prerequisite to receiving future allocations if the Mandatory Petroleum Allocation Program is extended beyond its December 15, 1975, expiration date.

Reports should be addressed to FEA Electrical Utilities Reports, Code 47, Washington, D.C. 20461.

Issued in Washington, D.C., December 4, 1975.

MICHAEL F. BUTLER,
General Counsel.

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of Public Laws

NOTE: No acts approved by the President were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 49—Transportation

CHAPTER I—MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

[Docket No. HM–102; Amdt. No. 174–19]

PART 174—CARRIERS BY RAIL FREIGHT

Placarding of Tank Cars Containing Combustible Liquids

On January 24, 1974, the Hazardous Materials Regulations Board (the Board) published Amendment 174–19 (39 FR 2768) setting forth in Part 174 of the Department's Hazardous Materials Regulations certain new requirements pertaining to the placarding of tank cars and portable tanks (when transported by rail freight) containing combustible liquids. In response to petitions for reconsideration, Amendment No. 173–78A was published (40 FR 22263) on May 22, 1975, containing revisions to regulations published on January 24, 1974. In addition, this latter amendment and a subsequent publication on June 12, 1975 (40 FR 25024), extended the effective date of the new regulations, including those pertaining to the placarding of tank cars and portable tanks containing combustible liquids, to January 1, 1976. In each case, although immediate voluntary compliance was authorized with respect to other matters covered by the new regulations it was not authorized relative to the placarding of tank cars containing combustible liquids.

One portion of these new regulations which has generated concern is the requirement to placard tank cars containing combustible liquids with "Dangerous" placards. There are a number of operating requirements in Part 174 pertaining to tank cars placarded "Dangerous" that are not intended to apply to tank cars containing combustible liquids. Until a distinctive "Dangerous" placard for combustible liquids is prescribed, implementation of this requirement could cause confusion. In consideration of the fact that an unnecessary burden could be imposed if the placarding requirements pertaining to combustible liquids transported by railroad become effective on January 1, 1976, and that action to establish distinctive "Dangerous" placards for tank cars containing combustible liquids will be taken by the Bureau in amendments to be published under Dockets HM–103 and HM–112, the Bureau believes that the compliance date of Amendment No. 174–19 should be deferred.

In consideration of the foregoing, the effective date for compliance with §§ 174.541 and 174.584 under Amendment No. 174–19 as they pertain to the documentation and placarding of cars containing combustible liquids is changed from January 1, 1976, to January 1, 1977. Use of "Dangerous" placards on cars containing materials classed combustible is not authorized until January 1, 1977, or such earlier date as the Bureau may designate in connection with regulations to be issued under Dockets HM–103 and HM–112.

(18 U.S.C. 831–835, 49 CFR 1.53(e)–(h).)

Issued in Washington, D.C., on December 4, 1975.

JAMES T. CURTIS, JR.,
Director,
Materials Transportation Bureau.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1221–A]

PART 1033—CAR SERVICE

Railroad Operating Regulations for Freight Car Movement

DECEMBER 5, 1975.

At a session of the Intertsate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 3rd day of December, 1975.

Upon further consideration of Service Order No. 1221 (40 F.R. 50537), and good cause appearing therefor:

It is ordered, That: Section 1033.1221 *Railroad Operating Regulations for Freight Car Movement* be, and it is hereby, vacated and set aside.

§ 1033.1221 [Reserved]

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4) and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4) and 17(2).)

It is further ordered, That this order shall become effective at 11:59 p.m., December 5, 1975; that copies of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

The FEDERAL REGISTER of December 1, 1975 (40 FR 55655) sets forth as an Appendix to Part 271, the "Maximum Monthly Allowable Standards and Basis of Coupon Issuance" for the Food Stamp Program for the 48 States and District of Columbia, to be effective January 1, 1976. Such Appendix is hereby designated as "Appendix A."

Part 271 is further amended by adding the following Appendices B–F containing the "Maximum Monthly Allowable Standards and Basis of Coupon Issuance" for the Food Stamp Program for Alaska, Hawaii, Puerto Rico, the Virgin Islands, and Guam to be effective January 1, 1976.

Dated: December 4, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc 75-33101 Filed 12-9-75;8:45 am]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

Part 271 is amended by adding an appendix as follows:

APPENDIX B

[FSP No. 1976–2.1, Amdt. 72]

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance—Alaska.

Notice FSP No. 1975–2.2, which was issued pursuant to a part of Subchapter C—Food Stamp Program, under Title 7, Chapter II, Code of Federal Regulations, is superseded, effective January 1, 1976, by this Notice FSP No. 1976–2.1.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics.

Prior to the amendment to the Act, requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year, i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Alaska in August 1975.

Households in which all members are included in the federally-aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Alaska, shall be as follows:

Household Size:	*Maximum Allowable Monthly Income standards—Alaska*
1	[1] $254
2	413
3	587
4	747
5	887
6	1,067
7	1,173
8	1,347
Each additional member	+167

[1] USDA poverty guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to section 7 (a) and (b) of the Food Stamp Act, as amended, (7 U.S.C. 2016, Public Law 91–671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in Alaska are as follows:

Monthly coupon allotments and purchase requirements—Alaska

Monthly net income	For a household of— 1 person	2 persons	3 persons	4 persons	5 persons	6 persons	7 persons	8 persons
	The monthly coupon allotment is— $68	$124	$176	$224	$266	$326	$352	$404
	And the monthly purchase requirement is—

$1,290 to $1,319.99				356	357	358	359	360
$1,320 to $1,349.99				356	357	358	359	360

For issuance to households of more than eight persons use the following formula:

A. *Value of the Total Allotment*—For each person in excess of eight, add $50 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement*—1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,229.99 or less per month.

2. For households with monthly income of $1,230 or more, use the following formula: For each $30 worth or monthly income (or portion thereof) over $1,229.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,229.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $28 for each person over eight to the maximum purchase requirement shown for an eight person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their total coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotments up to the next higher whole dollar amount and shall not change the purchase requirements for such allotments.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date. The provisions of this notice shall become effective on January 1, 1976.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

Part 271 is amended by adding an appendix as follows:

APPENDIX C

[FSP No. 1976–3.1, Amdt. 73]

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance—Hawaii.

Notice FSP No. 1975–3.2 which was issued pursuant to a part of Subchapter C—Food Stamp Program under Title 7, Chapter II, Code of Federal Regulations, is superseded, effective January 1, 1976, by this Notice FSP No. 1976–3.1.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Hawaii in August 1975.

Households in which all members are included in the federally-aided public assistance grant, general assistance grant, or supplemental security income benefit shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance, general assistance, or supplemental security income benefit, in Hawaii, shall be as follows:

Household Size:	*Maximum Allowable Monthly Income Standards—Hawaii*
1	[1] $240
2	400
3	573
4	727
5	860
6	1,033

V40238 DEC 10 75 XUM

For issuance to households of more than eight persons use the following formula:

A. *Value of the Total Allotment*—For each person in excess of eight, add $50 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement*—1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,169.99 or less per month.

2. For households with monthly income of $1,170 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $1,169.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,169.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $46 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their total coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotments up to the next higher whole dollar amount and shall not change the purchase requirements for such allotments.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date. The provisions of this notice shall become effective on January 1, 1976.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

Part 271 is amended by adding an appendix as follows:

APPENDIX D

[FSP No. 1976-4.1, Amdt. 74]

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance—Puerto Rico.

Notice FSP No. 1975-4.2, issued pursuant to a part of Subchapter C—Food Stamp Program, under Title 7, Chapter II, Code of Federal Regulations, is superseded, effective January 1, 1976, by this Notice FSP No. 1976-4.1.

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Puerto Rico.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States, adjusted for the cost of food in Puerto Rico in August 1975.

Households in which all members are included in the federally-aided public assistance or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in Puerto Rico, shall be as follows:

Household Size:	*Maximum Allowable Monthly Income Standards—Puerto Rico*
1	[1] $215

$1,210 to $1,229.99						258	282	324	334

For issuance to households of more than eight persons use the following formula:

A. *Value of the Total Allotment*—For each person in excess of eight, add $38 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement*—1. Use the purchase requirement shown for the eight-person household for households with incomes of $869.99 or less per month.

2. For households with monthly incomes of $870 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $869.99, add $9 to the monthly purchase requirement for an eight-person household with an income of $869.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $34 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotment up to the next higher whole dollar amount and shall not change the purchase requirement for such allotment.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date. The provisions of this notice shall become effective on January 1, 1976.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

Part 271 is amended by adding an appendix as follows:

APPENDIX E

[FSP No. 1976-5.1, Amdt. 75]

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance—Virgin Islands.

Notice FSP No. 1975-5.2 which was issued pursuant to a part of Subchapter C—Food Stamp Program, under Title 7, Chapter II, Code of Federal Regulations, is superseded, effective January 1, 1976, by this Notice FSP No. 1976-5.1.

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in the Virgin Islands.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics. Under this provision, the prices of food did not increase enough for the basic 4-person household to require a change in the allotments for household sizes 1 through 5. Changes in economies of scale resulted in increases for the larger size households.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year; i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. The income standards and coupon allotments set forth below are based on the allotment table adopted for the continental United States adjusted for the cost of food in the Virgin Islands in August 1975.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in the Virgin Islands, shall be as follows:

Household Size:	*Maximum Allowable Monthly Income Standards—Virgin Islands*
1	[1] $215
2	373
3	533
4	680
5	807
6	967

V40238 DEC 10 75 XUM

For issuance to households of more than eight persons use the following formula:

A. *Value of the Total Allotment*—For each person in excess of eight, add $46 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement*—1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,109.99 or less per month.

2. For households with monthly income of $1,110 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $1,109.99, add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,109.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $42 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their total coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotments up to the next higher whole dollar amount and shall not change the purchase requirements for such allotments.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date. The provisions of this notice shall become effective on January 1, 1976.

RICHARD L. FELTNER,
Assistant Secretary.

[FR Doc.75-33105 Filed 12-9-75;8:45 am]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Food Stamp Program

Part 271 is amended by adding an appendix as follows:

APPENDIX F

[FSP No. 1976-6.1, Amdt. 76]

Maximum Monthly Allowable Income Standards and Basis of Coupon Issuance—Guam.

Notice FSP No. 1975-6.2 which was issued pursuant to a part of Subchapter C—Food Stamp Program under Title 7, Chapter II, Code of Federal Regulations, is superseded, effective January 1, 1976, by this Notice FSP No. 1976-6.1.

Section 5(b) of the Food Stamp Act requires the establishment of special standards of eligibility and coupon allotment schedules, not to exceed those in the fifty States, which reflect the average per capita income and cost of obtaining a nutritionally adequate diet in Guam.

Section 7(a) of the Food Stamp Act, as amended, requires that the value of the coupon allotment be adjusted semi-annually by the nearest increment that is a multiple of two to reflect changes in the prices of food published by the Bureau of Labor Statistics.

Prior to the amendment to the Act requiring semi-annual adjustment of the value of the coupon allotment, the adjustments were made at the beginning of each fiscal year, i.e., in July based on the cost of the economy food plan in the preceding December. With the enactment of the semi-annual adjustment, the law specified that the first adjustment be made in January 1974 to reflect changes in food prices through August 1973. Similar procedures have been used for subsequent semi-annual adjustments; i.e., the July adjustment based on the cost of the food plan in the preceding February and the January adjustment based on the cost of the food plan in the preceding August, as required by the Act. Based on prices provided for Guam, the Agricultural Research Service estimated that the allotment table adopted for the continental United States, adjusted for the cost of food in Guam would be higher than in the fifty States. Thus, the income standards (except for the one-person household which is the same as Hawaii) and the coupon allotments set forth for Guam are the same as those which will become effective in Alaska on January 1, 1976.

Households in which all members are included in the federally-aided public assistance grant or general assistance grant shall be determined to be eligible to participate in the program while receiving such grants without regard to the income and resources of the household members.

The maximum allowable income standards for determining eligibility of all other applicant households, including those in which some members are recipients of federally-aided public assistance or general assistance, in Guam, shall be as follows:

Household Size:	*Maximum Allowable Monthly Income Standards—Guam*
1	[1] $240
2	413
3	587
4	747
5	887
6	1,067
7	1,173
8	1,513
Each additional member	+167

[1] USDA poverty guideline.

"Income" as the term is used in the notice is as defined in paragraph (c) of § 271.3 of the Food Stamp Program Regulations.

Pursuant to Section 7 (a) and (b) of the Food Stamp Act, as amended (7 U.S.C. 2016, Public Law 91-671), the face value of the monthly coupon allotment which the State agency is authorized to issue to any household certified as eligible to participate in the Program and the amount charged for the monthly coupon allotment in Guam are as follows:

$930 to $959.99							277	278	279
$960 to $989.99							284	287	288
$990 to $1,019.99							284	296	297
$1,020 to $1,049.99							284	306	306
$1,050 to $1,079.99							284	312	315
$1,080 to $1,109.99								312	324
$1,110 to $1,139.99								312	333
$1,140 to $1,169.99								312	342
$1,170 to $1,199.99								312	351
$1,200 to $1,229.99									360
$1,230 to $1,259.99									360
$1,260 to $1,289.99									360
$1,290 to $1,319.99									360
$1,320 to $1,349.99									360

For issuance to households of more than eight persons use the following formula:

A. *Value of the Total Allotment*—For each person in excess of eight, add $50 to the monthly coupon allotment for an eight-person household.

B. *Purchase Requirement*—1. Use the purchase requirement shown for the eight-person household for households with incomes of $1,229.99 or less per month.

2. For households with monthly income of $1,230 or more, use the following formula:

For each $30 worth of monthly income (or portion thereof) over $1,229.99 add $9 to the monthly purchase requirement shown for the eight-person household with an income of $1,229.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add $46 for each person over eight to the maximum purchase requirement shown for an eight-person household.

The total monthly coupon allotments for some households are not divisible by four. This results in total coupon allotments of uneven dollar amounts for those households which choose to purchase one-fourth or three-fourths of their total coupon allotment. For such households, the State agency shall round the face value of one-fourth or three-fourths of the total coupon allotments up to the next higher whole dollar amount and shall not change the purchase requirements for such allotments.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date. The provisions of this notice shall become effective on January 1, 1976.

(Catalog of Federal Domestic Assistance Program No. 10.551, National Archives Reference Services)

Dated: DECEMBER 4, 1975.

RICHARD L. FELTNER,
Assistant Secretary.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Markup on Retail Sales of Aviation Fuels by Fixed Base Operators To Reflect Non-Product Cost Increases

A. INTRODUCTION

On September 30, 1975, the Federal Energy Administration issued a notice of proposed rulemaking and public hearing (40 FR 45447, October 2, 1975) in which the FEA proposed to review the adequacy of the standard maximum markup allowed in retail sales of aviation fuels by fixed base operators (FBOs) to reflect increased non-product costs. Twenty-three written comments were received in response to the notice of proposed rulemaking and oral presentations were made by five persons at the public hearings held on October 15, 1975. All of these comments and presentations were considered by the FEA, as well as other information available to FEA, in arriving at the amendment adopted today. This amendment affects the price of only about five percent of aviation fuels consumed. The remaining 95 percent—including retail sales by non-FBO marketers in bulk quantities to scheduled and supplemental airlines and to the military—are unaffected by today's amendment.

Under 10 CFR 212.93(a), a retailer of middle distillates, including aviation fuels, is permitted to charge a price which is its weighted average lawful price on May 15, 1973, for the product concerned to the particular class of purchaser, plus an amount which reflects a dollar-for-dollar pass-through of the increased cost of the product since May 15, 1973. In addition, under 10 CFR 212.93 (b)(2), adopted effective April 1, 1974, any retailer of middle distillates (including aviation fuels), was permitted, prior to today's amendment, to add a maximum of one cent per gallon to the price otherwise permitted to be charged in retail sales of those products, to reflect increases in non-product costs (wages, rent, utilities, interest, insurance, etc.). Under the amendment adopted today, the maximum amount permitted to be charged in retail sales of aviation fuels by FBOs to reflect increases in non-product costs under § 212.93(b)(2) has been increased from one cent to four cents per gallon, effective December 1, 1975. With respect to all other sales of middle distillates at the retail level, including sales of aviation fuels by sellers other than FBOs, the maximum markup to reflect non-product cost increases remains unchanged at one cent/gallon.

Parallel provisions of the price regulations applicable to retail sales of middle distillates by refiners through company owned and operated marketing outlets also permitted, prior to today's amendment, subject to the profit margin limitation applicable to refiners, maximum price increases of one cent per gallon at the retail level to reflect increased non-product costs (10 CFR 212.87(c)(4)(iv)). In order to provide the same non-product markup ceiling with respect to sales of aviation fuels by any FBOs which are owned or controlled by refiners, the amendment adopted today increases from one cent to four cents the maximum markup permitted to be charged by refiners in sales of aviation fuels through FBO outlets to reflect increases in non-product costs under § 212.87(c)(4)(iv), effective December 1, 1975. The amendment leaves unchanged the one-cent maximum markup permitted for refiners under § 212.87(c)(4)(iv) with respect to all retail sales of middle distillates other than sales of aviation fuels by FBOs.

B. INCREASE IN STANDARD MAXIMUM MARKUP

In its notice of proposed rulemaking, the FEA indicated that the proposal to review the standard maximum markup in sales of aviation fuels by FBOs was prompted by two main considerations: (1) general industry representations that an increase from one cent per gallon to three or four cents may well be justified, in view of increases in non-product costs over the more than two year period since the May 15, 1973, base date, and (2) awareness that special factors were present which prevented FBOs from reducing non-product costs and cost increases by curtailing services or hours of operation, as other retailers of petroleum products are often able to do.

FEA explained in its notice of proposed rulemaking that FBOs generally operate under contract with municipal or other public aviation authority and typically provide vital airport services such as baggage and cargo handling and aircraft maintenance in addition to selling aviation fuel for use in small private and business aircraft. Under these circumstances, the FBO's facilities are usually required to remain open and services kept available on a 24-hour or other fixed-hour basis. It is normally not possible, as in the case of gasoline service stations, to cut operating costs by curtailment of services or hours of service. Consequently, FBOs have little or no practical means of avoiding non-product cost escalation in the face of the fixed one cent per gallon increment (in effect since April, 1974) which has been the maximum amount permitted to be charged to cover all increases in non-product costs.

In the rulemaking notice, the FEA also explained why it was not proposing at the same time to review the standard markup applicable to sales of aviation fuels by retailers other than FBOs and by wholesalers (i.e., by distributors or jobbers). An estimated 95 percent of all aviation fuel sold at the retail level is sold by refiners or resellers in bulk quantities to commercial airlines (scheduled and supplemental air carriers) and to the Department of Defense. No increase in the maximum margin to reflect non-product cost increases in connection with these sales was proposed by FEA because (1) non-product costs appear to be proportionately much smaller in that industry on a per-gallon base compared with those of FBOs, and (2) the necessity of providing ancillary services and the problem of inability to curtail them are not present. For the same or similar reasons, a review of the standard maximum markup at the wholesale level to cover non-product cost increases relating to sales of aviation fuels was not proposed in connection with the present rulemaking proceedings.

The most comprehensive survey of increases in operating costs of FBOs was commissioned by the National Air Transport Associations, Inc. (NATA), an organization which represents FBOs as well as air taxi/commuter air service organizations and air cargo/mailing operators. The survey was conducted by mail under the supervision of an independent accounting firm and completed in August, 1975. Seven hundred FBOs were asked to participate in the survey, a group of nation-wide geographic composition which included small, medium and large FBOs, multi-airport and single-airport FBOs, and NATA-member and non-member FBOs.

Rsponse from 132 FBOs were received. Where individual FBOs owned or controlled FBO businesses at more than one airport, each separate airport operation was treated as a separate FBO for purposes of the survey. Of the total number of responses, seven were rejected for

V40238 DEC 10 75 XUM

failure to respond satisfactorily to instructions and three were rejected because costs appeared abnormally high. Data received was checked in some instances by telephone and by on-site review of supporting cost documentation.

Fourteen operating cost categories were tabulated, comparing on a per-gallon basis the costs in each category in May, 1973, with those costs in May, 1975. All "joint cost" items were allocated so as to exclude costs which did not relate to the sale of aviation fuels. These cost data were also broken down according to three FBO size categories, with 50 small FBOs (under 500,000 gallons annual sales) reporting total net operating cost increases of 4.11 cents per gallon over the two-year period, 47 medium FBOs (500,000 to 1,500,000 gallons annual sales) reporting total net operating cost increases of 5.25 cents per gallon, and 25 large FBOs (over 1,500,000 gallons annual sales) reporting total net operating cost increases of 4.2 cents per gallon. The weighted average increase in non-product costs of all 122 FBOs reporting was 4.56 cents per gallon for the two-year period ending May, 1975.

Data supplied independently by individual FBOs in response to FEA's request for written comment tend to bear out the results of the NATA survey. For example, an FBO based in Seattle, Washington, provided allocated cost data indicating that its operating costs rose by 4.35 cents/gallon over the two-year period ending March 31, 1975. An East Coast FBO provided allocated cost data which combined operating results of its facilities at Teterboro (N.J.), North Philadelphia, Philadelphia and Wilmington, Del., and the non-product cost increases between May, 1973, and May, 1975, totaled 4.3 cents per gallon. Less well-documented submissions by other FBOs indicated that operating costs have increased from three to six cents per gallon since May, 1973.

Indirect support for the appropriateness of a revised operating cost markup within the range indicated is supplied by the experience of retailers of petroleum products other than aviation fuels. The FEA recently approved a three cent maximum markup for small propane retailers to reflect operating cost increases, which is the same amount currently authorized for gasoline service stations. In view of the special ancillary service required to be performed by FBOs by law or by contract terms, and in view of the consideration, noted above, that FBOs are usually not able to reduce operating costs by curtailing such services or reducing hours of operation, it seems likely that non-product costs have increased at a rate somewhat higher than that experienced by propane and gasoline retailers. In addition, FBO operating costs are believed to be somewhat higher in comparison to other petroleum retailers due to the cost of purchasing and operating the mobile equipment needed to fuel aircraft and to provide aircraft maintenance services. Finally, rental rates have not been frozen for FBOs as they have been for gasoline service stations at the May, 1973, level. The FBO survey indicated an increase of 0.38 cents/gallon in rents plus an increase of 0.31 cents/gallon in flowage fees (a charge imposed on FBOs by the local aviation authority) between May, 1973, and May, 1975.

While it might appear from the results of the FBO survey that an increase in the standard maximum markup from one cent per gallon to 4.5 cents or 4.6 cents per gallon might be justified, there are several considerations which lead FEA to conclude that a conservative approach in approving a new maximum markup is appropriate and that a markup of not more than 4.0 cents per gallon should be authorized at this time.

On October 7, 1975, the FEA issued a regulation amendment which increased the maximum markup on certain sales of propane at the retail level from one cent/gallon to three cents/gallon (40 FR 47755, October 10, 1975). This was the first time the FEA had increased the amount of any markup since the development of standard maximum reseller/retailer markups for various products was completed in March and April, 1974. Accordingly, the FEA took occasion upon the issuance of that amendment to explain the nature and purpose of standard markups in general, making reference to the following important considerations: (1) the statute from which FEA derives its pricing authority requires the agency to balance a number of conflicting objectives and, notably, does not require FEA to allow full pass-through of all non-product cost increases, as it does so require for product cost increases; (2) the use of standardized maximum markups (instead of simply allowing each firm to pass through its own actual operating cost increases, whatever they might be) was dictated largely by practical administrative considerations relating to the fact that there are thousands of small marketers who cannot realistically be expected to calculate net operating cost increases accurately on a per-gallon basis; (3) in view of the foregoing considerations, and in order to assure equitable prices to consumers by minimizing the inflationary impact of price increases to the greatest extent possible, FEA concludes that the level of the maximum markup should be conservatively determined so that the majority of firms affected will have operating cost increases which at least equal that level; (4) the standard maximum markup is therefore used as a guide as well as a ceiling for the majority of firms which have probably incurred operating cost increases at or in excess of the rate prescribed by the standard markup but are unable to calculate actual per-gallon operating cost increases with accuracy; and (5) larger firms, particularly refiners with marketing outlets, which are experienced in calculating net operating cost increases on a cents-per-gallon basis, may only pass through their actual non-product cost increases per gallon up to and including the rate permitted by the standard maximum markup but not in excess thereof. All these general considerations apply to and were taken into account in the determination of the amount of the markup in the present rulemaking proceedings.

FEA notes that, while the FBO survey concluded that operating cost increases of all firms included in the survey reached 4.56 cents/gallon, the increases for small FBOs and for large FBOs, considered independently, were just above four cents/gallon, or 4.11 cents and 4.20 cents/gallon, respectively. Accordingly, consistent with the general considerations noted above, an increase in the standard markup in this case from a maximum of one cent/gallon to four cents/gallon appears justified and appropriate.

The FEA wishes to note in this connection that in its notice of proposed rulemaking the FEA requested comment on the possibility or feasibility of permitting a different standard markup ceiling as between large and small FBOs or on the basis of some other method of subclassification. There was little response to this request and FEA does not have sufficient data at present to justify any approach other than application of a single maximum markup to all FBOs.

FEA believes that a conservative approach to revision of the standard maximum markup is also merited in this case because the number of firms which were able to provide detailed data was relatively small. Of an estimated 3,500 FBOs in the United States, only about five percent participated in the survey or submitted cost data to FEA. While FEA has no reason to doubt that the operatng cost increases of other FBOs have been generally similar to those reported by in the 122-FBO survey, it is possible that firms with larger than average operating cost increases have more incentive to bring those cost increases to the attention of FEA than firms with smaller than average operating cost increases.

FEA received no comment directly opposing an increase in the maximum markup to reflect non-product cost increases of FBOs. Comment received from associations representing customers of FBOs (owners of private and business aircraft who purchase fuel from FBOs, and commercial airlines which depend to some degree on services provided by FBOs) generally indicated concern that (1) FBO business failures due to inability to recoup operating cost increases might have a disruptive effect on air transport and aviation, and (2) any increase in the amount of operating costs permitted to be passed through by FEA should be granted only if justified after careful review.

For all of the foregoing reasons, the FEA has concluded that an increase in the standard markup on retail sales of aviation fuels by FBOs from a maximum of one cent/gallon to a maximum of four cents/gallon is justified and appropriate.

C. Other Issues

1. *Retroactive Application of Increase.* Requests were made during the public hearings to make any increase in the standard maximum markup approved by FEA retroactive to September 1, 1975. This request was premised on the grounds that since operating cost increases under the FBO survey were measured to May, 1975, and that since no basis exists for assuming that operating costs have decreased since that time, it would be justified to make the markup increase effective beginning any month following May, 1975. It was acknowledged by FBO representatives that many FBOs had raised prices on September 1, 1975, immediately after the termination of the Emergency Petroleum Allocation Act of 1973, to levels above the lawful price levels prevailing on August 31, 1975. After Congress extended the Emergency Petroleum Allocation Act of 1973 in late September, 1975, retroactive to September 1, 1975, FBOs which had raised prices realized that revenues derived from price increases above lawful levels would have to be refunded or remitted in the form of sales at prices below ceiling price levels (as explained in Ruling 1975–17, 40 FR 48341, October 15, 1975).

However, to make the effective date of the present amendment retroactive to September 1, 1975, would, under these circumstances, amount to a ratification of any unlawful pricing behavior which occurred during September, 1975, and thereby undermine the position taken by FEA in Ruling 1975–17 as well as provide a benefit to FBOs which has not been made available to other sectors of the petroleum industry. Moreover, eeven if ll Septembr eprice increeases above ceeill price levels were entirely supported by operating cost increases, those price increases were no less premature and contrary to orderly process for approval of regulation amendments permitting recoupment of increased costs. Furthermore, FEA's Office of Exceptions and Appeals is available to review any cases of hardship or inequity resulting from the one cent/gallon maximum markup previously authorized to reflect operating cost increases.

In addition, it has been the general practice of the FEA to make rules effective only prospectively, after all necessary data justifying a price change has been collected and fully evaluated. It has also been the usual practice of FEA in establishing or modifying standard maximum margins to reflect operating cost increases to make the regulation or amendment effective at the beginning of a month rather than in mid-month, to avoid disrupting the monthly billing practices which prevail in many sectors of the petroleum industry. For example, the recent amendment increasing the standard maximum markup applicable to certain retail sales of propane was issued on October 7, effective October 1, 1975. In accordance with this practice, this amendment is made effective December 1, 1975.

2. *Definition of Fixed Base Operators.* In its notice of proposed rulemaking, the FEA requested comment on the following proposed definition of "fixed base operator":

> " 'Fixed base operator' means a firm which maintains an office and other facilities at an airport under contract with a public aviation authority or airport owner for the purpose of engaging in the retail sale of aviation fuels and in one or more of the following general aviation activities: aircraft maintenance, servicing, parking, tie-down, storage and other aircraft services; baggage and cargo handling and other passenger/freight services; operation of flight schools and/or aircraft maintenance schools; maintenance and/or sales of avionics equipment and systems; and rental and/or sales of aircraft."

Pursuant to comment received, FEA has deleted from this definition the words "an office or other" so as not to exclude a firm which, otherwise meeting the definition of FBO, may not maintain a business office at the airport at which its fueling and ancillary service facilities are located. In adidtion, FEA has deleted the words "under contract with a public aviation authority or airport owner" in view of comment stating that FBO activities are sometimes conducted by the public aviation authority itself (or other branch of the state, municipal or local government concerned) or by the owners of certain small airports, in which event the FBO might not be under contract. The words omitted are merely descriptive in any event and are not essential to the definition.

The essential distinction which must be made under this definition is between two types of sellers, both of which are retailers under FEA regulations: (1) FBOs, which sell aviation fuel essentially to non-commercial (private and/or business) aircraft owners and in some cases to small commercial carriers known as commuter and/or air taxi operators, and which provide ancillary services of the kind described in the definition; and (2) sellers of aviation fuels in bulk quantities to scheduled airlines and supplemental (charter) air carriers and the Defense Department. The sellers in the latter category, which account for an estimated 95 percent of all retail sales of aviation fuels, are not believed to have incurred operating cost increases in excess of the presently-authorized one cent per gallon because of their large volume of sales and the fact that they do not perform the ancillary services which characterize the operations of the FBO. The definition of FBO is intended to serve as the regulatory device which excludes non-FBO retailers of aviation fuels from coverage of the increased markup authorized today.

In order to make the foregoing distinction clearer under the definition of "fixed base operator," as abbreviated by the changes indicated above, the FEA has added, after the words, "for the purpose of engaging in the retail sales of aviation fuels," the words, "primarily to purchasers other than (a) scheduled or supplemental air carriers certificated by the Civil Aeronautics Board pursuant to 49 U.S.C. 1371, or (b) the Department of Defense".

In this connection, the FEA reviewed the question whether FBOs occasionally make large-volume sales to supplemental air carriers, in view of comment submitted by the Air Transport Association that "at a few small airports the FBO is the only seller of aviation fuel whether the customer be the owner of a private two-engine propeller plane or a commercial airliner."

Sales of aviation fuels to scheduled and supplemental air carriers are in nearly all cases made under contract with refiners or large-volume distributors, with no FBO involvement. When an FBO does become involved in fueling such carriers, it is usually only to provide "into plane" services—i.e., primarily the pumping of fuel owned by a refiner or branded distributor and not by the FBO. The FBO's compensation in such cases is a pumping fee or a service fee which covers pumping and any other "into plane" services which may be provided.

In rare instances it appears that an FBO may be called upon to sell its own fuel for use in a large commercial airliner or a military aircraft, as when a flight is diverted to another airport due to adverse weather conditions. However, even in these atypical cases it appears to be well-established practice that the purchaser pays only the standard contract rate for such sales, making payment to the refiner or branded distributor which holds the supply contract, while the latter, in turn, replenishes the FBO's stocks and compensates the FBO by payment of the fee for pumping and any ancillary services which may also have been provided. FBO representatives stated they knew of no circumstances under which a scheduled or supplemental air carrier would purchase aviation fuel "at retail"—i.e., at the higher prices charged by FBOs to their regular purchasers.

For the foregoing reasons, the FEA concludes that marketing conditions and practices effectively preclude the application of the increased markup authorized today in sales to which the increased markup is not intended to apply. The FEA has not, therefore, attempted by regulation specifically to exclude use of the increased markup in sales to scheduled or supplemental air carriers or to military users. To define "fixed base operators" in § 212.31 as only those firms which sell aviation fuels *exclusively* to purchasers other than scheduled and supplemental air carriers and the military would be to unfairly bar any use of the increased markup whatsoever by retailers which otherwise meet the definition of "fixed base operator" but which may occasionally make a sale to such purchasers at contract prices under the circumstances described above. Incorporation of a limitation in this respect in the standard markup rule in §§ 212.93 (b) and 212.87(c)(4) would only burden these provisions with undue complexity and unnecessary detail.

In its proposed definition of FBO, the FEA provided, in effect, that any firm which maintained facilities at an airport for the purpose of (1) selling aviation fuel to small purchasers and (2) engaging in one or more listed categories of

V40238 DEC 10 75 XUM

general aviation activities, would qualify as an FBO. The reason for requiring both sales of aviation fuels and performance of general aviation activities to qualify as an FBO is, of course, that the justification for the higher maximum markup authorized to FBOs today rests, in part, on the fact that FBOs do perform essential ancillary services and that FBOs are generally unable to cut operating costs by curtailing them. Included among the categories of general aviation activities were (1) "rental and/or sales of aircraft," (2) "sales of avionics equipment," and (3) "operation of flight schools and/or aircraft maintenance schools."

There three categories, although consisting of recognized FBO activities, are or appear to be largely self-sustaining, revenue-producing categories which are not significantly supported (if at all) by revenues from sales of aviation fuels. A firm which sells aviation fuel at the retail level and which is otherwise engaged in general aviation activities only in one of these three categories would not appear to be incurring operating cost increases of four cents/gallon or more. Therefore, since qualification to use the four cents/gallon maximum markup rests on performance of "one or more" categories of aviation services, and since a firm which performs no aviation services other than fuel sales and the services in one of the three categories in question might nevertheless qualify to use the four cent/gallon maximum markup, the definition of FBO adopted today omits these three categories. The FEA believes that the great majority of FBOs, whether or not they are engaged in any of the activities under these three headings, are engaged in one or more of the remaining service categories which are more closely associated with fuel sales—i.e., aircraft handling/maintenance services, passenger/freight services, and maintenance of avionics equipment and systems.

3. *Ancillary Services.* The FEA requested comment in the notice of proposed rulemaking on whether there has been any change in the level of ancillary services being provided today compared with May, 1973, and whether fees charged for ancillary services could be increased to help defray increased non-product costs.

Comments received indicate that there has been little change in the level of ancillary services provided since most of these are essential services such as aircraft maintenance, cabin grooming, cargo/baggage handling, and certain services relating to the safe operation of aircraft. In areas such as safety and environmental control, service requirements appear to be increasing. While there may have been some degree of reduction in quality of services (other than in the area of safety) in response to reduced margins resulting from the inadequacy of the one cent/gallon markup to reflect operating cost increases, FEA believes that there is little room for avoidance of operating cost increases in this industry through curtailment of services.

Comments received on fees for ancillary services indicate that these fees have been increased as much as possible, to the extent permitted by FBO leases and within the limits of competition in those cases where increases are permissible, to help defray the substantial operating cost increases which have been incurred since May, 1973. Moreover, many services have traditionally been performed without charge or have been required to be performed without charge, it being understood that the price charged for fuel also covers the performance of certain aircraft and passenger services. It would serve no useful purpose to ask FBOs to begin charging fees for some of these services in order to achieve a corresponding reduction in the amont by which aviation fuel prices will be increased to reflecting increased operating costs.

(Emergency Petroleum Allocation Act of 1973, as amended, Pub. L. 93–159, as amended by Pub. L. 93–511, Pub. L. 94–99 and Pub. L. 94–133; Federal Energy Administration Act of 1974, Pub. L. 93–275; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212, Chapter II of Title 10 Code of Federal Regulations, is amended as set forth below, effective December 1, 1975.

Issued in Washington, D.C., December 5, 1975.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

1. Section 212.31 is revised to add, in appropriate alphabetical order, a definition of "fixed base operator" to read as follows:

§ 212.31 Definitions.

* * * * *

"Fixed base operator" means a firm which maintains facilities at an airport for the purpose of (1) engaging in the retail sale of aviation fuels primarily to purchasers other than (a) scheduled or supplemental air carriers certificated by the Civil Aeronautics Board pursuant to 49 U.S.C. 1371 or (b) the Department of Defense; and (2) performing one or more of the following general aviation activities: (a) aircraft maintenance, servicing, parking, tie-down, storage and other aircraft services; (b) baggage and cargo handling and other passenger/freight services; and (c) maintenance of avionics equipment and systems.

* * * * *

2. Section 212. 87 is amended to revise paragraph (c) (4) (iv) to read as follows:

§ 212.87 Increased non-product costs.

* * * * *

(c) * * *
(4) * * *

(iv) Allow an increase in the prices of middle distillates above the prices otherwise permitted to be charged for middle distillates pursuant to the provisions of this part (including the foregoing paragraph (b) (4) (i) of this section) by an amount not in excess of one cent per gallon with respect to retail sales and not in excess of one-quarter cent per gallon with respect to all other sales, except that, with respect to retail sales of aviation fuels by fixed base operators after November 30, 1975, allow an increase in the amount otherwise permitted to be charged for that item pursuant to the provisions of this part by an amount not to exceed four cents per gallon; and

* * * * *

3. Section 212.93 is amended to revise paragraph (b) (2) to read as follows:

§ 212.93 Price rule.

* * * * *

(b) * * *

(2) With respect to middle distillates:

(i) In all retail sales, (A) beginning with April, 1974, a seller may charge one cent per gallon in excess of the amount otherwise permitted to be charged for the item concerned pursuant to the provisions of this section, including paragraph (b) (1) (i) of this section, to reflect non-product increases which the seller incurred after May 15, 1973; and

(B) In sales of aviation fuels by fixed base operators, beginning with December, 1975, a seller may charge three cents per gallon in excess of the amount otherwise permitted to be charged for that item pursuant to the provisions of this section, including paragraph (b) (2) (i) (A) of this section, to reflect non-product cost increases which the seller incurred after May 15, 1973;

(ii) In all sales other than retail sales, (A) a seller that had a total sales volume of covered products in calendar year 1973 of less than 100 million gallons may charge one-half cent per gallon in excess of the amount otherwise permitted to be charged for that item pursuant to the provisions of this section, including paragraph (b) (1) (i) of this section, to reflect non-product cost increases which the seller incurred after May 15, 1973; and

(B) A seller that had a total sales volume of covered products in calendar year 1973 of 100 million gallons or more may charge one-quarter cent per gallon in excess of the amount otherwise permitted to be charged for that item pursuant to the provisions of this section, including paragraph (b) (1) (i) of this section, to reflect non-product cost increases which the seller incurred after May 15, 1973.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 75–1088]

PART 522—ORGANIZATION OF THE BANKS

Creation of the Office of Neighborhood Reinvestment

SUMMARY

DECEMBER 4, 1975.

The following summary of the amendment adopted by this resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to specific provisions of the regulations.

A. *Existing Regulation.* None.

B. *New Regulation.* Authorizes the Banks to create the Office of Neighborhood Reinvestment, and specifies:

1. That the Director and Deputy Director shall be chosen, and their compensation shall be fixed, by the Board;

2. That the duties and functions of the Office shall include the support of the Urban Reinvestment Task Force, assisting the Banks, the Board and financial institutions in urban preservation programs, and conducting evaluations of, and disseminating information regarding, urban preservation programs;

3. That the Office may, subject to certain controls, accept and administer funds from governmental or private sources for the support or furtherance of its programs;

4. That the budget and activities of the Office must be approved by the Board, and that the Office of Finance shall perform certain fiscal operations for the Office; and

5. That funds of the Banks, made available through the "Imprest Fund" of the Office of Finance, may be utilized for certain expenses of the Office.

C. *Reason for the Amendment.* To provide better and more efficient assistance to savings and loan associations in neighborhood reinvestment efforts.

By Resolutions dated January 30, 1974 (unnumbered) and May 1, 1974 (No. 74–367), the Board authorized and approved, among other things, the participation of the Board, the Federal Home Loan Banks and their Office of Finance, in conjunction with the Department of Housing and Urban Development in an effort to foster the development of "Neighborhood Housing Service" and other neighborhood reinvestment and preservation programs through the Urban Reinvestment Task Force. Since that time the programs of the Task Force have met with great success and the Board and HUD have been joined in these efforts by the heads of three other Federal financial regulatory agencies.

Initially, the Task Force effort was viewed as one that would be of perhaps a year or two years in duration. The success and growth of the program has made clear the necessity of placing this program on a more formal organizational basis. This is to be accomplished by having the new Office of Neighborhood Reinvestment, which is to be an Office of the Banks, subsume the entire operation of the Task Force and its staff. The Task Force will, however, remain to provide overall policy guidance in these operations. By virtue of its status as an independent Office within the FHLBank System, the programmatic and budgetary administration of the program will be clarified and streamlined. The result should be better and more efficient services to the Banks, savings and loan associations, and other financial institutions in the development of neighborhood reinvestment efforts. The Office will be required to submit its budget for approval to the Board, as is currently true for the Office of Finance, prior to December 1 of the preceding year, however, for the first year of operation the Office must submit its budget within 30 days of the effective date of this Resolution. Accordingly, the Federal Home Loan Bank Board hereby amends Part 522 by adding thereto § 522.85–§ 522.87, to read as set forth below, effective December 10, 1975:

Since affording notice and public procedure on the above amendments would delay such amendments from becoming effective for a period of time and since it is in the public interest that such amendments become effective without such delay, and since the amendments relate to the Board's organization or procedures, the Board hereby finds that notice and public procedure as to such amendments are contrary to the public interest and unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553 (b); and since publication of such amendments for the period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date of such amendments would in the opinion of the Board likewise be unnecessary for the same reasons, the Board hereby provides that such amendments shall become effective as hereinbefore set forth.

OFFICE OF NEIGHBORHOOD REINVESTMENT

§ 522.85 General.

(a) The Federal Home Loan Banks are hereby authorized to establish an Office of Neighborhood Reinvestment which shall be located in Washington, D.C., and which shall perform the duties and functions set forth in § 522.86.

(b) The Office of Neighborhood Reinvestment shall be headed by a Director, who shall have responsibility for the performance of the functions of such Office. The Director shall be appointed, and his compensation shall be fixed, by the Federal Home Loan Bank Board. There may also be one or more Deputy Directors who shall be appointed and whose compensation shall be fixed in the same manner.

(c) Any function of the Office of Neighborhood Reinvestment now or hereafter exercisable by the Director may also be exercised by a Deputy Director, in accordance with such limitations, if any, as may be prescribed in writing by the Director.

§ 522.86 Functions and duties of Office of Neighborhood Reinvestment.

(a) The Office of Neighborhood Reinvestment shall (1) Provide all necessary staff support services to the Urban Reinvestment Task Force composed of the Chairman of the Federal Home Loan Bank Board, the Secretary of the Department of Housing and Urban Development, and the operating heads, or their representatives, of various other Federal agencies; (2) assist the Board, the Banks, the members of the Federal Home Loan Bank System and other financial institutions in the development of programs and strategies to increase and stabilize urban residential lending; (3) provide assistance in the organization, development, and continued operations of "Neighborhood Housing Service" programs; (4) provide assistance to other public or private urban preservation or improvement programs; (5) conduct evaluations of selected urban preservation or improvement programs; and (6) collect and disseminate information regarding urban preservation or improvement programs.

(b) The Office of Neighborhood Reinvestment may accept and administer such funds from any Federal, State or local government or governmental agency, or any private body, as may be offered in support of the programs of the Office; provided, however, that all such receipts, whether by contract, grant or otherwise, in excess of $50,000 per year from any one source, or for an activity not authorized in the current budget for the Office, shall first be approved by the Board.

(c) The Office of Neighborhood Reinvestment shall perform other duties or functions which are related to those specified in paragraphs (a) and (b), of this section, as may be requested of such Office by a Federal Home Loan Bank or Banks or the Board.

§ 522.87 Budget and expenses.

(a) The Office of Neighborhood Reinvestment shall annually submit a budget for the following calendar year to the Board so as to reach it on or before the first day of December which shall contain proposed allotments for the expenses of maintaining and operating such Office. The budget shall differentiate between receipts and expenditures provided for in § 522.86(b) and those provided for hereunder. After such budget has been approved by the Board, the Director may authorize disbursements thereunder from the funds provided for in § 522.81(b). Following approval by the Board, the Director shall transmit a copy of the budget to each of the Bank Presidents. The Director may, without further authority, make a transfer from an excess allotment, in the budget referred to, to an insufficient allotment. However, transfer to allotments for compensation or rent of office quarters, as well as any proposed changes which would increase the total of the approved budget, shall be submitted for approval in the same manner as the original budget was submitted.

(b) The Office of Finance of the Federal Home Loan Banks is hereby authorized to act as fiscal agent for, and to provide, on a reimbursable basis, all budgetary, accounting and fiscal management services required by the Office of Neighborhood Reinvestment. All receipts and disbursements made by the Office of Finance for such Office shall first be authorized by the Director of such Office of Neighborhood Reinvestment.

(Sec, 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended by P.L. 91–151, sec. 2(b), 83 Stat. 371; sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425b, 1437. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR 1943–48 Comp., p. 1071).

By the Federal Home Loan Bank Board.

[SEAL] J. J. FINN,
Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75–EA–63; Amdt. 39–2452]

PART 39—AIRWORTHINESS DIRECTIVE

Grumman Aircraft

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to amend AD 66–27–6 applicable to Grumman G–164 type aircraft.

Since the promulgation of the airworthiness directive, it has been determined that a similar inspection is required on the left elevator torque tube, since there have been reports of similar cracks.

In view of the foregoing and because the deficiency is one which affects air safety, notice and public procedure hereon are impractical and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by amending AD 66–27–6 as follows:

Amend AD 66–27–6 as follows:

1. Reletter paragraph (e) as paragraph (f).

2. Substitute letter (f) where it appears in paragraphs (a), (b), (c) and (d) for letter (e).

3. Add new paragraph (e) to read as follows:

(e) Within the next 25 hours in service after the effective date of the amendment, unless already accomplished within the last 75 hours in service, visually inspect the left-hand elevator torque tube for cracks where the inboard rib is welded to the torque tube. This inspection must be repeated at intervals of 100 hours until the aircraft is altered in accordance with paragraph (f).

4. Delete part numbers from AD.

This amendment is effective December 16, 1975.

This amendment is made under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 [49 U.S.C. 1354(a), 1421 and 1423], and section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Jamaica, N.Y., on December 2, 1975.

DUANE W. FREER,
Director, Eastern Region.

[FR Doc.75–33174 Filed 12–9–75;8:45 am]

[Airspace Docket No. 75–SO–156]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Burlington, N.C., transition area.

The Burlington transition area is described in § 71.181 (40 FR 441). A new NDB RWY 6 instrument approach procedure, utilizing the Burlington (private) RBN has been developed for the airport. An additional five square miles of controlled airspace is required to provide adequate protection for the approach procedure. Since this amendment is minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., January 29, 1976, as hereinafter set forth.

In § 71.181 (40 FR 441), the Burlington, N.C., transition area is amended as follows:

"• • • of the VORTAC." is deleted and "• • • of the VORTAC; within 3 miles each side of the 218° bearing from Burlington RBN (latitude 36°02'59" N., longitude 79°28'49" W.), extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN; excluding that portion within the Liberty, N.C., transition area." is substituted therefor.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on November 28, 1975.

LONNIE D. PARRISH,
Acting Director, Southern Region.

[FR Doc. 75–33175 Filed 12–9–75; 8:45 a.m.]

[Docket No. 12762; Special Federal Aviation Regulation No. 30]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

PART 123—CERTIFICATION AND OPERATIONS: AIR TRAVEL CLUBS

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS OF SMALL AIRCRAFT

Ground Proximity Warning System

The purpose of the Special Federal Aviation Regulation is to permit airplanes having a maximum passenger capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less to be operated under Parts 121, 123 and 135 of the Federal Aviation Regulations without a ground proximity warning system or a ground proximity warning-glide slope deviation alerting system.

Section 121.360(a) of the Federal Aviation Regulations requires that no person may operate under Part 121 a large turbine-powered airplane unless it is equipped with a ground proximity warning system after December 1, 1975, and a ground proximity warning-glide slope deviation system after June 1, 1976. The requirements of § 121.360 apply to Part 123 and 135 certificate holders by virtue of §§ 123.27(g) and 135.2, respectively.

By Amendment No. 121–125 (40 FR 50707; October 31, 1975), § 121.360 was amended to permit an extension of the compliance date to June 1, 1976, for those certificate holders who show they cannot meet the December 1, 1975, compliance date because of equipment availability problems and delays in their certification programs. Subsequent to the issuance of Amendment 121–125 the FAA determined that additional time was also needed to identify and remedy operational problems in this newly-installed equipment. Accordingly, by Amendment 121–126 issued November 24, 1975, §§ 121.303 and 121.360 were amended to provide a reasonable time period but not later than September 1, 1976, to establish system reliability prior to requiring it to be in an operable condition.

As noted above, § 135.2(a) requires air taxi operators to comply with the certification and operations requirements of Part 121 applicable to supplemental air carriers for operations conducted with large aircraft. At the same time, § 121.9 permits Part 121 certificate holders to comply with the requirements of Part 135 applicable to air taxi operators for operations conducted in small aircraft. A large aircraft is defined in § 1.1 as an aircraft of more than 12,500 pounds maximum certificated takeoff weight and a small aircraft is one of 12,500 pounds or less maximum certificated takeoff weight. The use of this "12,500 pound" aircraft standard for purposes of operations under Parts 121 and 135 has been questioned. Based on a preliminary review of the matter, the FAA believes that requiring an aircraft to be operated under the rules of Part 121 or 135 based on whether its maximum certificated takeoff weight is more or less than 12,500 pounds may no longer be appropriate or necessary in the interest of safety. Accordingly, the FAA has under consideration the development of new standards for operations conducted with large aircraft having a maximum passenger capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less.

It should be noted that the National Air Transportation Association (NATA) submitted a proposal (No. 717) to the First Biennial Operations Review proposing an amendment to § 135.2 to permit operators of aircraft seating up to 30 passengers with up to a 7,500 pound payload capacity to operate under Part 135 but with the addition of certain requirements to Part 135 as set forth in the NATA proposal. A Notice of Availability of the Compilation of Proposals and Invitation to Submit Comments was published in the Federal Register June 4, 1975 (40 FR 24041), and the matter will be discussed at the First Biennial Operations Review Conference, December 1 through 5, 1975, at the Sheraton National Hotel, Arlington, Virginia (40 FR 53299; November 17, 1975).

In view of the foregoing FAA believes that it is not in the public interest to require the installation of ground proximity warning systems in the airplanes specified herein pending the determination of whether or not new standards should be developed for operations conducted with those airplanes. Accordingly, this SFAR is adopted to permit, during this period, airplanes having a maximum passenger capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less to be operated under Parts 121, 123 and 135 of the Federal Aviation Regulations without complying with the requirements for a ground proximity warning system.

In view of the December 1, 1975, compliance date of § 121.360 and since this Special Federal Aviation Regulation extends the effective date of a new requirement and imposes no additional burden on any person, I find that notice and public procedure thereon are impracticable and unnecessary, and that good cause exists for making this SFAR effective on less than 30 days notice. However, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this SFAR Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Office of the Chief Council, Attention: Rules Docket, AGC–24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before February 9, 1976, will be considered by the Administrator and this SFAR may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This Special Federal Aviation Regulation is issued under the authority of sections 313(a), 601, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, the following Special Federal Aviation Regulation is adopted, effective December 4, 1975:

SPECIAL FEDERAL AVIATION REGULATION No. 30

Contrary provisions of Parts 121, 123 and 135 of the Federal Aviation Regulations notwithstanding, airplanes having a maximum passenger capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less may be operated under Parts 121, 123, and 135 of the Federal Aviation Regulations without a ground proximity warning system or a ground proximity warning-glide slope deviation system.

For purposes of this Special Federal Aviation Regulation, the following definitions apply:

1. (a) Except as provided in paragraph (b) of this section, the term "maximum payload capacity" means the maximum certificated takeoff weight of an airplane, less the empty weight, less all pustifiable airplane equipment, and less the operating load (consisting of minimum fuel load, oil, flight crew, steward's supplies, etc.). The allowance for the weight of the crew, oil, and fuel is as follows:

(1) Crew—200 pounds per crew member required under the Federal Aviation Regulations.

(2) Oil—350 pounds.

(3) Fuel—the minimum weight of fuel required by the Federal Aviation Regulations for a flight between domestic points 174 nautical miles apart under VFR weather conditions and not involving extended overwater operations.

(b) In the case of an airplane for which a maximum zero fuel weight is prescribed in FAA technical specifications, maximum payload capacity means the maximum zero fuel weight, less the empty weight, less all justifiable airplane equipment, and less the operating load (consisting of minimum flight crew, steward's supplies, etc., but not including disposable fuel or oil).

2. The term "empty weight" means the weight of the airframe, engines, propellers, and fixed equipment. Empty weight excludes the weight of the crew and payload, but includes the weight of all fixed ballast, unusable fuel supply, undrainable oil, total quantity of engine coolant, and total quantity of hydraulic fluid.

3. The term "maximum zero fuel weight" means the maximum permissible weight of an airplane with no disposable fuel or oil. The zero fuel weight figure may be found in either the airplane type certificate data sheet or the approved airplane flight manual or both.

This Special Federal Aviation Regulation terminates December 31, 1976, unless sooner superseded or rescinded.

Issued in Washington, D.C., on December 4, 1975.

JOHN L. MCLUCAS,
Administrator.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket C–2760]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Allied Stores Corporation t/a The Bon Marche, et al.

Subpart—Advertising falsely or misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.135 Nature of product or service; § 13.170 Qualities or properties of product or service; 13.170–24 Cosmetic or beautifying; 13.170–70 Preventive or protective; 13.170–78 Renewing, restoring; § 13.195 Safety; 13.195–60 Product; § 13.205 Scientific or other relevant facts. Subpart—Corrective actions and/or requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 disclosures; 13.533–45 Maintain records; 13.533–45(a) Advertising substantiation. Subpart—Misrepresenting oneself and goods—Goods: § 13.1685 Nature; § 13.1710 Qualities or properties; § 13.1740 Scientific or other relevant facts. Subpart—Offering unfair, improper and deceptive inducements to purchase or deal: § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Allied Stores Corporation, a corporation, dba The Bon Marche; and C. C. Anderson Stores Company, a corporation.

Consent order requiring a New York City department store chain and its wholly-owned subsidiary in Boise, Idaho, among other things to cease making unsubstantiated effectiveness claims for cosmetic skin care preparations. Respondents are required to have in their possession a written certification from a reliable source that there is a reasonable scientific basis for claims made and a summary of the nature of the reasonable basis.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows: [1]

ORDER

I. *It is ordered*, That respondent Allied Stores Corporation, a corporation, doing business as The Bon Marche or under any name or style successor to The Bon Marche, and C. C. Anderson Stores Company, a corporation (hereinafter "respondents"), their successors and assigns, and respondents' officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device engaged in the advertising, offering for sale, sale or distribution of any cosmetic skin care product, or skin care product which is both a drug and cosmetic product (hereinafter "products"), as "drug" and "cosmetic" are defined in Sections 15(c) and 15(e) of the Federal Trade Commission Act, marketed by respondent C. C. Anderson Stores Company or The Bon Marche Division of Allied Stores, or any successor divisions thereof, in or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase of said products or for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase in or having an effect upon commerce in said products, do forthwith cease and desist from:

Disseminating any affirmative representation in any advertising or other written promotional material, including leaflets or other written promotional material prepared by respondents or others (but excluding labels or labeling as defined in 21 U.S.C. §§ 321(k) and (m)) (hereinafter "advertisement") which represent, directly or indirectly, that:

A. Such products will remove or prevent age wrinkles or age lines on the face, hands or other parts of the body;

[1] Copies of the Complaint, Decision and Order, filed with the original document.

V40238 DEC 10 75 XUM

B. Such products will remove or prevent discolorations, broken capillaries or other disorder of the skin;

C. Unlimited amount of use of such products is safe and beneficial;

D. Such products are drugs (unless such products are registered or labeled as drugs);

E. Such products will retard the aging process in humans;

F. Age is a disease; or

G. Women's faces age 50 percent faster than men's, or at any other differential rate; without having in their possession before the time an advertisement containing such representation is first disseminated to the public by respondents, a written certification from the manufacturer, proprietor or licensee of the brand name, or qualified testing laboratory, that there is a reasonable scientific basis, or reasonable scientific bases, for the making of such representation; *Provided*, That such certification shall include a summary of the nature of the reasonable scientific basis (or bases) for such representation; *Provided further*, That respondents neither know nor have reason to know that such scientific basis does not in fact substantiate such representation.

Provided further, That respondents shall maintain the certification described herein for a period of three years from the date an advertisement containing a representation described herein is first disseminated to the public and shall upon reasonable notice make such certification available to authorized representatives of the Federal Trade Commission at respondents' premises in Seattle, Washington.

II. *It is further ordered*, That respondents shall distribute a copy of this order to each of their affected operating divisions, subdivisions, and subsidiaries and to each of the affected officers, agents, representatives or employees of said respondents who are engaged in the preparation or placement of advertisements or distribution of advertisements prepared by others.

III. *It is further ordered*, That respondents notify the Commission at least thirty days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale, resulting in the emergence of a successor corporation, or any other changes in said respondents which may materially affect compliance obligations arising out of the order.

IV. *It is further ordered*, That respondents shall, within sixty days after service upon them of this order, file with the Commission a written report setting forth in detail the manner and form of their compliance with this order.

The Decision and Order was issued by the Commission Nov. 3, 1975.

CHARLES A. TOBIN,
Secretary.

[Docket C-2761]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Carson Products Company, et al.

Subpart—Advertising falsely or misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.195 Safety; 13.195–60 Product; § 13.205 Scientific or other relevant facts. Subpart—Corrective actions and/or requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 Disclosures; 13.533–45 Maintain records; 13.533–45(k) Records, in general. Subpart—Misrepresenting oneself and goods—Goods: § 13.1740 Scientific or other relevant facts. Subpart—Neglecting, unfairly or deceptively, to make material disclosure: § 13.1890 Safety; § 13.1895 Scientific or other relevant facts. Subpart—Offering unfair, improper and deceptive inducements to purchase or deal: § 13.2063 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45, 52)

In the Matter of Carson Products Company, a corporation; and Parker A. Reische, Jr., individually and as an officer of said corporation.

Consent order requiring a Savannah, Ga., manufacturer of facial depilatory and beard removal products, among other things to cease failing to make material disclosures as to the safety and correct use of its products.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:[1]

ORDER

I. *It is ordered*, That respondents Carson Products Company, a corporation, its successors and assigns, and its officers, and Parker A. Reische, Jr., individually and as an officer of said corporation, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of Magic Shaving Powder, Magic Cream Shave, or any depilatory product, do forthwith cease and desist from:

A. Disseminating or causing to be disseminated by United States mails or by any means in or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which fails to clearly and conspicuously disclose the following statement in boldface capital letters exactly as it appears below, with nothing in contradiction thereof:

CAUTION: THIS PRODUCT MAY CAUSE SKIN IRRITATIONS. DO NOT USE IF SKIN IS TENDER OR SEVERELY IRRITATED. FOLLOW DIRECTIONS CAREFULLY.

B. Disseminating or causing to be disseminated by any means, for the purpose of inducing, or which is likely to induce, directly or indirectly the purchase of any such product in or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, any advertisement which fails to meet the requirement of Part IA of this order.

II. *It is further ordered*, That respondents Carson Products Company, a corporation, its successors and assigns, and its officers, and Parker A. Reische, Jr., individually and as an officer of said corporation, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the offering for sale, sale or distribution of Magic Shaving Powder, Magic Cream Shave, or any depilatory product, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act do forthwith cease and desist from failing to clearly and conspicuously disclose on the outer package box, if such is used, and on the product label:

A. The following statement in boldface capital letters exactly as it appears below with nothing in contradiction thereof:

CAUTION: THIS PRODUCT MAY CAUSE SKIN IRRITATIONS. DO NOT USE IF SKIN IS TENDER OR SEVERELY IRRITATED. FOLLOW DIRECTIONS CAREFULLY.

The above statement shall appear as the first item on the information panel of the product label and package box, if such is used.

B. A statement that use of the product should be discontinued if irritation, burning or allergic reactions occur.

C. Complete directions for use of the product, including but not limited to the following:

1. The product should not be used in conjunction with an alcoholic shaving lotion;

2. The product should not be used if perspiring heavily;

3. One should not wash before using the product;

4. To avoid excessive irritation, the amount of time the product is left on the skin is crucial; and

5. If hairs remain after the first application, do not immediately reuse the product. The product should not be used in any event within 36 hours or longer after shaving with a razor or a depilatory.

III. *It is further ordered*, That respondents forthwith deliver a copy of this order to their present and future officers, directors and operating divisions and that respondents secure from each such person and division a signed statement acknowledging receipt of this order.

IV. *It is further ordered*, That respondents maintain complete business records relative to the manner and form of their continuing compliance with the terms and provisions of this order. Each record shall be retained by respondents for at least three years after such record is made.

V. *It is further ordered*, That the individual respondent promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

VI. *It is further ordered*, That respondent Carson Products Company notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

VII. *It is further ordered*, That respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a written report setting forth in detail the manner and form of their compliance with this order.

The Decision and Order was issued by the Commission Nov. 3, 1975.

CHARLES A. TOBIN,
Secretary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Diesel Truck Drivers Training School, Inc., a corporation, and Robert L. Klabacka, individually and as an officer of said corporation.

Consent order requiring a Sun Prairie, Wis., seller and distributor of courses of instruction in truck driving, among other things to cease misrepresenting business affiliations, earnings, nature of business and opportunities in their services. Respondents are further required to make certain affirmative disclosures to prospective students and to give students a three-day cooling-off period during which they may cancel their contract with full refund of all monies paid.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:[1]

ORDER

It is ordered, That respondents Diesel Truck Drivers Training School, Inc., a corporation, its successors and assigns, and officers and Robert L. Klabacka, individually and as an officer of said corporation, and respondents' officers, agents, franchisees, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of courses of study and instruction in truck driving or in any other subject, trade or vocation, or any other product or service, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

I. 1. Representing, directly or by implication, orally or in writing, that:

A. They are, or represent, or are affiliated with, trucking companies or any industry for which enrollees of any courses offered by respondents are being trained; or misrepresenting, in any manner, the nature of their business.

B. Persons receiving training will, or may, earn any specified amounts, or misrepresenting in any manner the prospective earnings of such persons.

C. They have been requested by trucking companies or any other business or organization to train persons for specific jobs, or misrepresenting, in any manner, respondents' connection or affiliation with any industry or any member thereof.

D. Graduates of any courses will be qualified thereby for employment at jobs for which said graduates were purportedly trained, when additional training or experience is required.

E. There is a substantial demand, or a demand of any size or proportion, for persons completing any of the courses offered by the respondents in the field of truck driving or any other field, or otherwise representing, orally or in writing, that opportunities for employment, or opportunities of any type or number, are available to such persons, except as hereinafter provided in Paragraph 4 of this Order. *Provided, however*, That respondents shall cease and desist making such representations unless the respondents in each and every instance:

(1) Until the passage of a base period to be determined pursuant to Paragraph 4(b) of Part I of this Order, after the establishment of a new school location by respondents in any metropolitan area or county, whichever is larger, where they did not previously operate a school, and after the introduction by respondents of any new course of instruction at any school or location, shall:

(A) Have in good faith conducted a statistically valid survey which establishes the validity of any such representation at all times when the representation is made, and;

(B) Have disclosed in immediate and conspicuous conjunction with any such representation, that: "All representations for potential employment demand or opportunities for graduates of this school (course) are merely estimates. This school (course) has not been in operation long enough to indicate what, if any, actual employment may result upon graduation."

(2) After the passage of a base period to be determined pursuant to Paragraph 4(b) of Part I of this Order, and until two years after the establishment of a new school location by respondents in any metropolitan area or county, whichever is larger, where they did not previously operate a school, and after the introduction by respondents of any new course of instruction at any school or location, shall:

(A) Make any such representations in the form and manner provided in Paragraph 4(b) of Part I of this Order, and

(B) Disclose in immediate and conspicuous conjunction with any such representation, that: "This school (course) has not been in operation long enough to indicate what, if any, actual employment may result upon graduation."

2. Placing ads in "Help-Wanted" columns or representing by any means that employment is being offered when such offer is not a bona fide offer of employment.

3. Failing to disclose, in writing, clearly and conspicuously, prior to the signing of any contract, to any prospective enrollee of any course offered by respondents, the full cost of such course including the fee for any home study lessons and for any residential training.

4. Failing to deliver to each person who shall contract for the purchase of any course of training or instruction, at the

[1] Copies of the Complaint, Decision and Order, filed with the original document.

V 40 238 DEC 10 75 XUM

time such person so contracts, a notice, in a form approved by the Commission, which shall disclose the following information and none other:

(a) The title "IMPORTANT INFORMATION" printed in bold face type across the top of the form.

(b) A paragraph reciting the following affirmative disclosures which shall be based upon information compiled not more than one year prior to the delivery of such notice:

(1) The placement data for graduates determined in the following manner:

Respondents shall, following the graduation of each student graduating during each six-month period, commencing with the six-month period ending on the last day of the month in which this Order is finally accepted by the Commission, undertake to determine the following information with respect to each such graduate: (a) his employment status; (b) the name of his employer and position, if any; and (c) his salary. The disclosure shall indicate the total number of graduates of the course; the number of those who have indicated to Respondents a desire for employment; the number of those desiring employment known by Respondents to be employed; the number of those desiring employment known to be unemployed; and the number of those desiring employment whose employment status is not known.

Separate placement data shall be calculated for each course of instruction offered in each school location or facility during such six-month period;

(2) A list or types of employers as indicated in responses to questionnaires sent pursuant to Subparagraph (1) above or otherwise within the actual knowledge of respondents which have hired the graduates referred to in Subparagraph (1) above in the positions for which such graduates were trained, and the percentage of employed graduates working for each type of employer;

(3) The salary range of the graduates referred to in Subparagraph (1) above. The "salary range" shall be the highest and lowest salary for full time employment indicated in responses to questionnaires sent pursuant to Subparagraph (1) above or otherwise within the actual knowledge of respondents with respect to such graduates.

Provided however, That this Subparagraph (b) shall be inapplicable until the first day of the seventh month following the month in which this order is finally accepted by the Commission.

(c) An explanation of the cancellation procedure provided in this Order, namely that any contract or other agreement may be cancelled for any reason until midnight of the third business day after receipt by the customer, via the U.S. Mails, of this notice.

(d) A detachable form which the person may use as notice of cancellation, which indicates the proper address for accomplishing any such cancellation.

This notice shall be sent by respondents no sooner than the next day after the person shall have contracted for the sale of any course of instruction; respondents, during such period provided for in subparagraph (c) above, shall not initiate contact with such person other than that required by this Paragraph.

Provided, however, That subparagraph (b) above shall be inapplicable to any newly established school that respondents may establish in any metropolitan area or county, whichever is larger, where they did not previously operate a school, or to any course newly introduced by respondents, until such time as the new school or course has been in operation for the base period to be established pursuant to subparagraph (b) above. The following statement shall be included in such notice during such period:

All representations of potential employment or salaries are merely estimates. This school (course) has not been in operation long enough to indicate what, if any, actual employment or salary may result upon graduation from this school (course).

After such time as the new school or course has been in operation for the base period to be established pursuant to subparagraph (b) above, and until two years after the establishment of a new school location in any metropolitan area or county, whichever is larger, where they did not previously operate a school, or the introduction of any new course by respondents, the following statement shall be included in such notice:

This school (course) has not been in operation long enough to indicate what, if any, actual employment or salary may result upon graduation from this school (course).

5. Contracting for any sale of any course of instruction in the form of a sales contract or other agreement which shall become binding prior to midnight of the third business day after the date of receipt by the customer of the form of notice provided for in Paragraph 4 above. Upon cancellation of any said sales contract or other agreement as provided in Paragraph 4(c) above, respondents are obligated to refund within thirty business days to any person exercising the cancellation right, all monies paid or remitted up until the notice of cancellation.

6. Failing to disclose, clearly and conspicuously, in advertisements, in catalogs, brochures and on letterheads that respondents' business is solely and exclusively that of a private school, not affiliated with any members of the trucking industry or of any member of any other industry.

7. Failing to refund within thirty days to purchasers who have cancelled their contracts such monies as may be due and owing according to the terms of such contracts.

II. 1. *It is further ordered*, That: (a) Respondents herein deliver, by registered mail, a copy of this Decision and Order to each of their present and future franchisees, licensees, employees, sales representatives, agents, solicitors, brokers, independent contractors or to any other person who promotes, offers for sale, sells or distributes any course of instruction included within the scope of this Order;

(b) Respondents herein provide each person or entity so described in subparagraph (a) of this Paragraph with a form returnable to the respondents clearly stating his or her intention to be bound by and to conform his or her business practices to the requirements of this Order; retain said statement during the period said person or entity is so engaged; and make said statement available to the Commission's staff for inspection and copying upon request;

(c) Respondents herein inform each person or entity described in subparagraph (a) of this paragraph that the respondents will not use or engage or will terminate the use or engagement of any such party, unless such party agrees to and does file notice with the respondents that he or she will be bound by the provisions contained in this Order;

(d) If such party as described in subparagraph (a) of this paragraph will not agree to file the notice set forth in subparagraph (b) above with the respondents and be bound by the provisions of this Order, the respondents shall not use or engage or continue the use or engagement of such party to promote, offer for sale, sell or distribute any course of instruction included within the scope of this Order;

(e) Respondents herein inform the persons or entities described in subparagraph (a) above that the respondents are obligated by this Order to discontinue dealing with or to terminate the use or engagement of persons or entities who continue on their own the deceptive acts or practices prohibited by this Order;

(f) Respondents herein institute a program of continuing surveillance adequate to reveal whether the business practices of each said person or entity described in subparagraph (a) above conform to the requirements of this Order;

(g) Respondents herein discontinue dealing with or terminate the use or engagement of any person described in subparagraph (a) above, who continues on his or her own any act or practice prohibited by this Order as revealed by the aforesaid program of surveillance.

(h) Respondents herein maintain files containing all inquiries or complaints from any source relating to acts or practices prohibited by this Order, for a period of two years after their receipt, and that such files be made available for examination by a duly authorized agent of the Federal Trade Commission during the regular hours of the respondents' business for inspection and copying.

2. *It is further ordered*, That respondents herein present to each interested applicant or prospective student immediately prior to the commencement of any interview or sales presentation conducted at any location other than respondents' offices during which the purchase of or enrollment in any course of instruction offered by respondents herein is discussed or solicited, a 5" x 7" card containing only the following language:

YOU WILL BE TALKING TO A SALESPERSON

3. *It is further ordered*, That respondent corporation shall forthwith distribute a copy of this Order to each of its operating divisions.

4. *It is further ordered*, That the respondent Diesel Truck Drivers Training School, Inc., shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the respondent which may affect compliance obligations arising out of this Order.

5. *It is further ordered*, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business or employment in which he is engaged as well as a description of his duties and responsibilities.

6. *It is further ordered*, That the respondents herein shall within sixty (60) days after service upon them of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

The Decision and Order was issued by the Commission, Nov. 3, 1975.

CHARLES A. TOBIN,
Secretary.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1512—REQUIREMENTS FOR BICYCLES

Bicycle Safety Regulations

Correction

In FR Doc. 75-30480 appearing at page 52815 of the issue for Thursday, November 13, 1975, in § 1512.5, paragraph (c) (1) in the right column of page 52822 is corrected to read as follows:

§ 1512.5 Requirements for braking system.

• • • • •

(c) *Footbrakes.* • • •

(1) *Stopping distance.* Bicycles equipped with footbrakes (except sidewalk bicycles) shall be tested in accordance with the performance test, § 1512.18 (e) (3), by a rider of at least 68.1 kg (150 lb) weight and shall have a stopping distance of no greater than 4.57 m (15 ft) from an actual test speed of at least 16 km/h (10 mph). If the bicycle has a footbrake only and the equivalent ground speed of the bicycle is in excess of 24 km/h (15 mph) (in its highest gear ratio at a pedal crank rate of 60 revolutions per minute), the stopping distance shall be 4.57 m (15 ft) from an actual test speed of 24 km/h (15 mph) or greater.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Rel. Nos. 33-56471, 34-11864, 35-19261, 39-419, IA-489, IC-9051, FI-39]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Requests Made Under the Freedom of Information Act

The Commission today announced several changes to Subpart D of Part 200 of the Commission's rules, 17 CFR 200.80, dealing with the handling of requests for records under the Freedom of Information Act. These changes, which are effective immediately upon publication in the FEDERAL REGISTER are being made for the following reasons:

1. Paragraphs (d) (5) and (d) (6) (ii) of Section 200.80 are amended to reflect a recent internal reorganization by the Commission and a reassignment of responsibilities for implementing the provisions of both the Freedom of Information Act, 5 U.S.C. § 552, and the Privacy Act of 1974, 5 U.S.C. § 552a, to the newly-created Office of Reports and Information Services.

2. Paragraph (c) (1) of Section 200.80 is amended to reflect the new telephone number of the Los Angeles Regional Office public reference facility.

3. Paragraphs (d) (2) and (d) (6) (i) of Section 200.80 are amended to provide that Freedom of Information Act requests and appeals should be clearly and prominently identified as such by means of a legend, such as "Freedom of Information Act Request" or "Freedom of Information Act Appeal" on both the envelope containing the request and on the top of the first page of the request or appeal itself. The Commission hopes that observance of this rule will facilitate the prompt identification by its staff of Freedom of Information Act requests and appeals and will enable the staff to avoid inadvertent delay which may occur when Freedom of Information Act requests are not clearly identified as such.

These rules are issued under the authority of provisions of the Administrative Procedure Act, 5 U.S.C. §§ 552, 553; Section 19 of the Securities Act of 1933, 15 U.S.C. § 77s; Section 23 of the Securities Exchange Act of 1934, 15 U.S.C. § 78w; Section 20 of the Public Utility Holding Company Act of 1935, 15 U.S.C. § 79t; Section 319 of the Trust Indenture Act of 1939, 15 U.S.C. § 77sss; Section 38 of the Investment Company Act of 1940, 15 U.S.C. § 80a-37; and Section 211 of the Investment Advisers Act of 1940, 15 U.S.C. § 80b-11. These amendments will have no effect on competition and relate only to matters of agency procedure and practice. The Commission therefore deems that further public notice and the rulemaking procedures provided in Section 4 of the Administrative Procedure Act, as amended, 5 U.S.C. Section 553, are unnecessary.

17 CFR 200.80 is, therefore, amended in the manner set forth.

§ 200.80 [Amended]

1. Paragraph (c) (1) of § 200.80 is amended by deleting "(213-688-5879)" and inserting "(213-473-4511)" after the words "Los Angeles, California 90024."

Paragraph (d) (2) is amended by adding the following two sentences: "Each request for information under the Freedom of Information Act should be clearly and prominently identified by means of a legend on the first page, such as 'Freedom of Information Act Request.' In addition, if sent by mail or otherwise submitted in an envelope or other cover, the front of such envelope or cover should be clearly and prominently marked by a legend such as 'Freedom of Information Act Request.'"

Paragraphs (d) (5) and (d) (6) (ii) of § 200.80 are amended by deleting the words "Public Information Officer" wherever they appear and inserting in their place the words "Freedom of Information Act Officer."

Paragraph (d) (6) (i) of § 200.80 as amended by inserting a comma after the words "shall be in writing" and by then inserting the words "shall be clearly and prominently identified on the envelope or other cover and at the top of the first page by a legend such as 'Freedom of Information Act Appeal,' • • • "

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 25, 1975.

[FR Doc.75-33170 Filed 12-9-75;8:45 am]

[Rel. No. 34-11872]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Exemption From Fingerprinting Requirements

The Securities and Exchange Commission today announced the adoption of temporary Rule 17f-2(T) [17 CFR 240.17f-2(T)], effective immediately, providing an exemption from the fingerprinting requirements of section 17(f) (2) of the Securities Exchange Act of 1934 (the "Act") [15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)], for all persons subject to that section, until April 1, 1976.

The Commission finds, in accordance with the Administrative Procedure Act (5 U.S.C. 553(b) (3) (B)), that Rule 17f-2(T) [17 CFR 240.17f-2(T)] provides the Attorney General and those persons affected by the adoption of section 17(f) (2) with an essential transitional period during which appropriate programs may be developed, that notice and public procedure are therefore unnecessary as a prerequisite to the adoption of such rule, and that the rule should be adopted, effective immediately, in accordance with the Administrative Procedure Act (5 U.S.C. 553(d) (3)), in order to prevent technical violations of law and to afford the Commission an opportunity to solicit public comment on the adoption of Pro-

V40238 DEC 10 75 XUM

posed Rule 17f-2 [17 CFR 240.17f-21.[1] The Commission further finds that the adoption of Rule 17f-2(T) imposes no burden on competition not necessary or appropriate in furtherance of the purposes of this Act, and is not inconsistent with the public interest or the protection of investors.

Commission Action: Pursuant to sections 17(a), 17(f)(2), and 23(a) of the Act, the Securities and Exchange Commission adopts temporary Rule 17f-2(T) in Chapter II of Title 17 of the Code of Federal Regulations.

Section 240.17f-2(T) is added as follows:

§ 240.17f-2(T) Exemption from fingerprinting requirements.

Any person who is a partner, director, officer or employee of a member of a national securities exchange, broker, dealer, registered transfer agent, or registered clearing agency, and who is required to be fingerprinted pursuant to section 17(f)(2) of the Securities Exchange Act of 1934 is exempted from the provisions of said section until April 1, 1976.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

Title 18—Conservation of Power, Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. RM 75-5; Order No. 542]

PART 141—STATEMENTS AND REPORTS (SCHEDULES)

Reporting Costs of Environmental Protection Facilities and Activities

DECEMBER 2, 1975.

On August 29, 1974, the Commission issued a Notice of Proposed Rulemaking in this Docket (39 FR 32153, September 5, 1974). This rulemaking proposed to add two new schedules to the FPC Annual Report Form No. 1 for the reporting of capital costs and annual expenses of operating environmental protection facilities and the attendant programs.

Comments were invited from interested parties on or before October 15, 1974. Comments were received from twenty-six respondents. The List of Respondents is designated as Attachment A hereto.

The majority of the respondents supported the proposed rulemaking, however, several of these respondents suggested modifications to the proposal. The suggested modifications proposed were essentially isolated and did not represent a consensus of the respondents.

The most numerous comments received expressed concern over the ability of the utilities to compile the data proposed for all existing environmental protection facilities, regardless of the date of installation and the reporting burden such a requirement would place on them. A number of the respondents were also concerned over the validity of the data reported without the establishment of more rigid standards and guidelines. They suggested that the Commission adopt standards for plant designs, costs and other factors.

As a result of the comments cited above and other comments received, we have amended our original proposals in this docket to incorporate certain of the suggestions received in order to facilitate compliance therewith. These amendments are mentioned below.

We have amended the original proposal to require the reporting of capital cost data on those facilities installed since January 1, 1969. Certain certified pollution control facilities placed in service after this date were eligible for accelerated tax amortization under the Internal Revenue Code and it would be necessary for utilities to maintain records for purposes of showing eligibility of facilities for such rapid tax write off. The Commission also caused certain pollution control data to be compiled since this date for purposes of compliance with FPC Report Form No. 67, Steam-Electric Air and Water Quality Control Data (Order No. 492, 38 F.R. 27606, October 15, 1973). We believe that, in view of the degree of detail available to the respondents since this date, this revision will provide the Commission and the public with reliable data on the majority of the total and all of the latest environmental protection facilities. A secondary benefit of this revision will be the purging of questionable data on historic expenditures on pre-1969 facilities.

Although a number of the respondents suggested that the Commission prescribe more rigid standards for certain designs and plant concepts, we do not believe that it is in the best interest of all the parties involved since each company must meet the various environmental standards required by local communities. We believe that the utilities are capable of determining the appropriate costs to be reported in the proposed schedules, under the broad guidelines proposed, inasmuch as they are intimately familiar with the various local regulations that influence plant design. It might, however, be possible, at some future date, through analysis of the explanations of methods and methodology employed in reporting the data, to develop revised guidelines for certain of the items therein.

Certain comments were received concerning the valuation of replacement power made necessary by the addition of environmental protection equipment or compliance with Federal or local legislation or guidelines. We have amended our original proposal to require that such power be valued at its purchase price when actually purchased and such price is known, otherwise at the system average cost of purchased power. In the case of generated replacement power, this power shall be priced at its cost of production if known, otherwise at the system average cost of production.

It was proposed that cost data on certain nuclear radiation control facilities be collected on schedule page 501. However, the item list was made up of items that are required by the Nuclear Regulatory Commission under authority of the Atomic Energy Act of 1954 and are either necessary in the operation of nuclear facilities or are required for safety purposes. Consequently, we have deleted the proposed item list entitled "Nuclear Radiation Control Facilities" from schedule page 501. Those facilities utilized in connection with nuclear power production that are environmental in nature are provided for elsewhere on schedule page 501 under other captions.

We have adopted, in page 501, the suggestions of certain of the respondents that the requirements therein be amended to require the reporting of expenditures for environmental facilities included in construction work in progress. This additional data enhances the disclosure of the full impact of environmental costs and makes the total data reported more meaningful.

As proposed, the various items in the classifications of expenses to be reported on page 502 are all operating in nature except for item 7. Interest Expense, which is normally a below-the line item. After consideration, we have decided to delete this requirement so that environmental expenses will include the same type costs as are incurred in operating other facilities.

Certain other comments that were of a minor or editorial nature have been incorporated into the schedules in order to clarify the schedules and the instructions thereto.

The Commission finds: (1) The notice and opportunity to participate in this rulemaking with respect to the matters presently before this Commission through submission, in writing, of data, views, comments and suggestions in the manner as described above are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) The amendments to section 141 of Title 18, Chapter I of the Code of Federal Regulations, herein prescribed, are necessary and appropriate for the administration of the Federal Power Act.

(3) That it is necessary and expedient for the Commission and the public to have access to information which will lend insight into the kind and magnitude of costs being incurred for environmental protection facilities and programs and the related expenses.

(4) Since the revisions prescribed herein which were not included in the notice in this proceeding are consistent with the prime purpose of the Proposed Rulemaking, further compliance with the notice provision of 5 U.S.C. 553 is unnecessary.

(5) Good cause exists for making the amendments to the FPC Form No. 1 effective for the reporting year 1975.

The Commission, acting pursuant to the provisions of the Federal Power Act, as amended, particularly Sections 301, 302, 303, 304 and 309 thereof (49 Stat. 854–856, 859; 16 U.S.C. 825, 825a, 825b, 825c, 825h), *orders:*

(A) Paragraph (d) of § 141.1, Part 141, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding two schedules entitled "Environmental Protection Facilities" and "Environmental Protection Expenses," respectively, immediately following "Research and Development Activities." As so amended, the subparagraph reads:

§ 141.1 Form No. 1, Annual report for electric utilities, licensees and others (Class A and Class B).

* * * * *

(d) This annual report contains the following schedules:

* * * * *

Environmental Protection Facilities.
Environmental Protection Expenses.

* * * * *

(B) Effective the reporting year 1975, the FPC Annual Report Form No. 1, Annual Report for Electric Utilities, Licensees and Others (Class A and Class B), is amended by the addition of two new schedules paginated as 501 and 502 and entitled "Environmental Protection Facilities" and "Environmental Protection Expenses," respectively, and by repaginating the schedule entitled "Attestation" from 449 to 503, all as set forth in Attachments B, C and D hereto.[1]

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Docket No. 75P-0290]

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Multiunit and Multicomponent Food Packages; Exemptions From Required Label Statements

Effective December 10, 1975, the Commissioner of Food and Drugs is exempting, under certain specific circumstances, unit containers in a multiunit or multicomponent retail food package, including the wrappers on subdivisions of oleomargarine or margarine contained within packages sold at retail, from the requirements for label declaration of ingredients.

In a notice published in the FEDERAL REGISTER of June 14, 1974 (39 FR 20885), the Commissioner, in response to a petition by the National Association of Margarine Manufacturers, proposed to amend § 1.1c (21 CFR 1.1c) to exempt unit containers in a multiunit or multicomponent retail food package from the requirements for label declaration of ingredients, provided that the outside of the retail package is properly labeled and the unit containers do not constitute separate units for retail sale. The Commissioner also proposed to amend § 3.17(i) (21 CFR 3.17(i)) to conform with § 1.1c so that the wrappers on subdivisions of oleomargarine or margarine contained within packages sold at retail would be exempt from the requirements for label declaration of ingredients, provided the packages sold at retail are properly labeled and the subdivisions do not constitute separate units for retail sale.

Sixteen comments on the proposal were received: Four from consumers, one from a consumer organization, one from a university department of food science, one from a Federal agency, two from State departments of agriculture, four from trade organizations, and three from manufacturers.

The comments from the university department of food science, the two State departments of agriculture, and one of the consumers expressed approval of the regulation as proposed. The remaining comments and the Commissioner's responses are as follows:

1. Two comments stated that the requirement in proposed § 1.1c(a)(14) that unit containers be "securely enclosed" within the retail package is too vague: An alternative phrase, "* * * the unit containers do not constitute separate units for retail sale * * *", was suggested by these comments.

The Commissioner concludes that the language in proposed § 1.1c(a)(14) is sufficiently clear and precise in its meaning and that the suggested substitute language might be confusing. The manufacturer has a duty to package unit containers, labeled in accordance with this exemption, in a manner which will discourage the retail sale of unit containers. To this end, it is essential that unit containers be securely enclosed within the retail package, and accordingly the language of § 1.1c(a)(14), as proposed, has been retained.

2. Three consumer comments opposed the proposal, stating that retail food stores allow customers to remove unit containers from multiunit or multicomponent retail containers. One of these comments was supported by the statement "I have often seen margarine and butter cartons opened and only a quarter or half pound purchased." The consumer organization similarly opposed application of the proposed exemption to "butter and margarine products," stating that these are "often bought by the quarter-pound" (although the consumer organization supported the exemption for "subdivisions of products which are not separate units for retail sale"). However, one trade association submitted data, based on a survey of 1,000 retail food stores, to support its contention that margarine is seldom purchased in individual "sticks" taken from the customary 1-pound packages. A food manufacturer proposed that individual components or units bear an appropriate statement immediately below the product name, such as "not to be sold separately" or "not to be sold as a separate unit," when the ingredient listing does not appear.

The Commissioner advises that manufacturers wishing to utilize this exemption have an obligation to package unit containers in a manner that will discourage separate sale of the units therein and will result in a clear understanding that the unit containers do not constitute separate units for retail sale. Accordingly, the final regulation provides that to qualify for the exemption, component units must be enclosed securely in the retail package (as discussed in paragraph 1 above); in addition, the regulation has been revised to require that such unit containers be labeled with the statement "This Unit Not Labeled For Retail Sale" and that multiunit or multicomponent retail packages containing the unit containers be labeled with the statement "Inner Units Not Labeled For Retail Sale."

[1] See FR Doc. 75-33237 in the Proposed Rules section of this issue under Securities and Exchange Commission.

V40238 DEC 10 75 XUM

The Commissioner advises that this regulation exempts unit containers only when packaged and sold as part of a multiunit or multicomponent retail package. Unit containers removed from the multiunit or multicomponent package are not exempt. Consequently, unit containers which are sold separately or are separately held for retail sale will be deemed to be misbranded within the meaning of section 403 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343). Thus, a manufacturer whose unit containers fail to comply properly with this exemption violates section 301(a) of the act (21 U.S.C. 331(a)) which prohibits "The introduction or delivery for introduction into interstate commerce of any food • • • that is • • • misbranded." Moreover, a retailer who allows the sale of individual unit containers, properly labeled under this exemption, separate from their multiunit or multicomponent food package will be considered in violation of section 301(k) of the act which prohibits "The • • • removal of the whole or any part of the labeling of, or the doing of any other act with respect to, a food, • • • if such act is done while such article is held for sale (whether or not the first sale) after shipment in interstate commerce and results in such article being • • • misbranded."

3. One comment suggested that § 1.1 c(a)(14) be revised "so as to permit the elimination of all labeling information."

The Commissioner advises that it is permissible for a unit container within a multiunit or multicomponent food package to bear no written, printed, or graphic matter, since such a unit container is not a "label" or "labeling" as defined in section 201(k) and (m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(k) and (m)). Hence, there is no need for any "exemption" to authorize use of an interior unit container devoid of all written, printed, or graphic matter. (Wrappers on interior sticks of margarine are an exception. Such wrappers cannot be devoid of all written, printed, or graphic matter because section 407(b)(4) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 347(b)(4)) requires that such wrappers bear the word "oleomargarine" or "margarine." Consequently such wrappers are "labels" within the meaning of section 201(k) of the act and must bear all mandatory labeling under the act, subject to the exemption concerning ingredient declaration provided by the regulation promulgated below or any other applicable regulations.)

4. One comment concerning margarine stated that it "presume[d] the language of proposed 3.17(i), and/or that of proposed 1.1c(a)(14), apply to inner units that are other than wrappers (e.g., tubs for soft margarine)."

The Commissioner advises that the exemption of § 3.17(i) specifically applies only to margarine "wrappers." The Commissioner interprets the term "wrapper" to mean the usual paper or foil wrapper in use at the time section 407(b)(4) was enacted, and not a tub or other similar container. Inner units other than "wrappers" are entitled to the exemption of § 1.1c(a)(14).

Accordingly, an individual inner-unit tub of margarine, not sold individually, may be devoid of any written, printed, or graphic matter since it is not a "wrapper." However, written, printed, or graphic matter on such a tub would be a label within the meaning of section 201(k) of the act, and thus the presence of any written, printed or graphic matter would require the tub to bear all mandatory labeling under the act, subject to the exemption from ingredient labeling promulgated below or any other applicable regulations.

5. One comment suggested that section 407(b)(4) of the act, which requires that the name "oleomargarine" or "margarine" appeal on each unit wrapper in not less than 20-point type, be deleted.

The Commissioner advises that he does not have the authority to alter the provisions of the act. Such legislative authority is vested exclusively in the Congress.

6. One comment suggested that inner-until labeling should be further simplified by permitting the use of a manufacturer's code number in lieu of stating in English the name and place of business.

The Commissioner does not agree with this suggestion. Information in code form on the unit container is likely to be either meaningless or misunderstood by the consumer. The Commissioner concludes that the most informative and appropriate manner of presenting this information is a complete declaration as presently required.

7. One manufacturer stated that "As a safeguard against removal of any of the components from within the retail or outer pack carton, we suggest that the carton (unit seen at point of purchase) be so designed that it would not have a resealable feature in its construction, which would further deter the sale of individual components."

The Commissioner is of the opinion that the provisions of the regulations, which require that the unit containers be "securely enclosed within and not intended to be separated from the retail package" and which furthermore require labeling on the unit containers and on the multiunit or multicomponent retail packages advising that the unit containers are not labeled for retail sale, are sufficient to prevent consumer deception in this matter. The Commissioner does not feel that he would be justified in mandating at this time a single type of construction design for multiunit or multicomponent packages.

8. One comment suggested that the unit containers in a multiunit or multicomponent retail food package be exempt from compliance with the net quantity of contents statement, on the basis that exemption of the net quantity of contents statement would enable the firm to reduce its necessary film labeling inventory and the consumer would benefit in not having to absorb the cost for the extra labeling involved.

The Commissioner advises that this exemption was not a part of the published proposal and, therefore, could not be made part of the final regulation without the opportunity for public comment. Furthermore, the Commissioner concludes that sufficient data have not been submitted to justify publishing such a proposed exemption.

9. One comment suggested that the outer multicomponent carton or package "list the inner components in the mandatory ingredient panel in a separate manner, and specify each component by name, net weight and specific ingredients for each respective component."

The Commissioner concludes that, although labeling in the proposed manner may be of some benefit to the consumer in making value comparisons, insufficient evidence was presented to require it as a mandatory labeling format.

10. One comment stated that proposed § 3.17(d) is "unnecessary and may be cause for confusion" since there is the implication "that unless specific provisions are provided in the regulations for specific products, the addition of nutrients may not make nutrition labeling mandatory." It was suggested that § 3.17 (d) be deleted.

The Commissioner agrees with this comment. The nutrition labeling regulation, 21 CFR 1.17(a), specifically provides that "inclusion of any added vitamin, mineral, or protein in a product" subjects the label to the requirements of that section. Accordingly, § 3.17(d) has been deleted from the final regulation.

11. The petitioner urged that there be "uniformity in margarine inner-unit labeling between the Food and Drug Administration rules and those of the Department of Agriculture" and contended that "the present dual regulatory system does not always produce such uniformity, despite the good intentions of each agency."

The Commissioner advises that the U.S. Department of Agriculture filed a comment in response to the notice of proposed rule making in this matter and that he has accepted the USDA's one suggestion for change in the regulations. Both the U.S. Department of Agriculture and the Food and Drug Administration appear to be in accord on this matter.

The Commissioner has carefully considered the environmental effects of this regulation and, because the action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. Copies of the FDA environmental impact assessment are on file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 403 (g)(2), (i)(2), (k), 407, 701(a), 52 Stat. 1047–1048, 1055, 64 Stat. 20 (21 U.S.C. 343 (g)(2), (i)(2), (k), 347, 371(a))) and under authority delegated to the Commissioner (21 CFR 2.120), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

1. In Part 1 by adding new paragraph (a)(14) to § 1.1c to read as follows:

§ 1.1c Exemptions from required label statements.

• • • • •

(a) • • •

(14) The unit containers in a multiunit or multicomponent retail food package shall be exempt from compliance with the requirements of section 403(g)(2), (i)(2), and (k) of the act with respect to the requirements for label declaration of ingredients when (i) the multiunit or multicomponent retail food package labeling meets all the requirements of this part; (ii) the unit containers are securely enclosed within and not intended to be separated from the retail package under conditions of retail sale; and (iii) each unit container is labeled with the statement "This Unit Not Labeled For Retail Sale" in type size not less than one-sixteenth inch in height, and each multiunit or multicomponent package principal display panel is labeled with the statement "Inner Units Not Labeled For Retail Sale" in type size not smaller than the minimum type size required for the declaration of net quantity of contents by § 1.8b.

• • • • •

2. In Part 3 by deleting and reserving paragraph (d) and by revising paragraph (i) of § 3.17 to read as follows:

§ 3.17 Labeling of oleomargarine or margarine.

• • • • •

(d) [Reserved]

• • • • •

(i) The wrappers on the subdivisions of oleomargarine or margarine contained within the package sold at retail are labels within the meaning of section 201(k) and shall contain all of the label information required by sections 403 and 407 of the Federal Food, Drug, and Cosmetic Act, just as in the case of 1-pound cartons, except that wrappers on the subdivisions contained within the retail package shall be exempt from the requirements for label declaration of ingredients of section 403 (g)(2), (i)(2), and (k) of the act when the subdivisions are securely enclosed within and are not intended to be separated from the retail package under conditions of retail sale, the wrappers on the subdivisions are labeled with the statement "This Unit Not Labeled For Retail Sale" in type size not less than one-sixteenth inch in height, and each multiunit package principal display panel is labeled with the statement "Inner Units Not Labeled for Retail Sale" in type size not smaller than the minimum size required for the declaration of net quantity of contents by § 1.8b of this chapter.

Effective date. This regulation shall become effective December 10, 1975.

(Secs. 403 (g)(2), (i)(2), (k), 407, 701(a), 52 Stat. 1047–1048, 1055, 64 Stat. 20 (21 U.S.C. 343 (g)(2), (i)(2), (k), 347, 371(a)).)

Dated: December 2, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-33156 Filed 12-9-75;8:45 am]

[Docket No. 75P-0272]

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

Exemption From Declaration of Net Quantity of Contents

The Commissioner of Food and Drugs is adding new paragraph (t) to § 1.8b (21 CFR 1.8b) to provide for an exemption from the requirement of an accurate label declaration of the net quantity of contents of packaged food. The paragraph provides that food products whose actual weight, because of unintentional product variation, is less than the declaration of the net quantity of contents appearing on the label may be sold by the manufacturer or processor of the food directly to institutions operated by Federal, State, or local governments (schools, prisons, hospitals, etc.). The regulation becomes effective December 10, 1975.

In the FEDERAL REGISTER of September 18, 1974 (39 FR 33538), the Commissioner issued a proposal to amend § 1.8b by adding a new paragraph (t) to provide such an exemption. Mislabeling may occur, for example, because of equipment malfunctioning or because the packaging process has not been refined enough to eliminate all possibility of quantity variation.

Where it is not feasible to recycle or relabel such food, the exemption granted by this regulation would obviate the need to destroy such food to prevent its unlawful entry into interstate commerce.

Twenty-four comments were received in response to the proposal. Comments came from individual citizens, State and local officials, educational institutions, and industry. Five comments endorsed the proposal as it appeared in the FEDERAL REGISTER; seventeen comments endorsed the proposal but requested various modifications; two comments opposed the proposal.

The comments received and the Commissioner's response are summarized as follows:

1. One comment opposing the proposal stated that institutions are entitled to full information about the products they purchase.

The Commissioner agrees that all persons, including Federal, State and local institutions as specified in the regulation, are entitled to full information about the net quantity of contents of the packaged foods they purchase. He concludes that compliance with the requirements of § 1.8b(t) will ensure that public institutions that wish to purchase products that are inadvertently short-weight will be fully informed of the net quantity of contents; § 1.8b(t) requires a statement signed by the purchaser that he is aware that the product is mislabeled. It also requires that the outside of the product shipping container bear a conspicuous statement of the nature and extent of the mislabeling.

2. Two comments suggested that short-weight merchandise should be donated to charitable institutions so that corporations would not be tempted to weigh the profit against the penalty. It was stated that a lighter penalty would further tip the balance in favor of underweighting.

The Commissioner is of the opinion that donation to charitable institutions of short-weight food products suitable for consumption is a commendable practice, but he notes that any such donation is strictly on the initiative of the manufacturer or processor who owns the product. The Commissioner concludes that, although the exemption provided by § 1.8b(t) may increase profits somewhat by reducing waste, there is no reason to believe that the provisions of § 1.8b(t) will lead to an increased incidence of short-weight food products.

3. Several comments endorsing the proposal cited the food shortage and the rising cost of food as their primary concern.

The Commissioner is aware of the problems of food shortages and rising food costs and believes that § 1.8b(t) will help to alleviate these problems by reducing the amount of food waste that occurs because of the destruction of short-weight food products that are mislabeled due to equipment malfunction or other causes of unavoidable product variation.

4. Several comments suggested that one or more additional types of buyers—such as "thrift stores," "outlet stores," all user institutions, nonprofit institutions, procurement agencies controlled by government institutions, brokers, distributors, and wholesalers—should be included among the persons allowed to purchase the inadvertently mislabeled products.

The Commissioner concludes that the regulation will not be modified to permit the sale of inadvertently mislabeled foods to institutions other than those operated by Federal, State, or local governments. To expand the exemption beyond these institutions would unduly increase the risk that such products might be diverted for sale directly to retail consumers. A government-controlled procurement agency may of course help to arrange purchases by a government institution, as required by this regulation.

5. Two comments suggested that the proposal be amended to require that each package be stamped, overprinted, or otherwise marked to state conspicuously and clearly the true minimum contents of the individual package.

V40238 DEC 10 75 XUM

The Commissioner does not believe that this is necessary since the institutional purchaser is required to sign a statement at the time of sale stating that he is aware that the product is mislabeled regarding the quantity of contents and that any subsequent distribution of the product by him, except for his own institutional use, is unlawful. The retail consumer is protected: If any portion of the merchandise is diverted into retail channels, the food will be deemed to be misbranded and subject to appropriate regulatory action by the Food and Drug Administration.

6. Several comments requested that the exemption be extended to include minor discrepancies that occur unintentionally for reasons other than equipment malfunction.

The Commissioner advises that the regulation is not limited to situations where the mislabeling of net quantity of contents occurs because of equipment malfunction. The regulation also encompasses inaccurate net quantity of contents declarations resulting from "otherwise unintentional product variation." Accordingly, modification of the regulation in this respect is unnecessary.

7. One comment suggested that the exemption should be extended to include all industries bound by Federal labeling requirements for disclosure of weight, volume, or numerical count.

The Commissioner's proposal addressed itself to food labeling requirements, and it would improperly exceed the scope of the proposal for the final regulation to apply to articles other than foods. (And of course, the Commissioner's authority is limited in this proceeding to articles subject to the Federal Food, Drug, and Cosmetic Act.) However, the exemption has been expanded to encompass food label statements concerning volume as well as weight.

8. One comment suggested that the exemption be extended to standardized foods that have inadvertently been packaged below requirements for drained weight or for fill of container.

The Commissioner agrees, and the regulation is amended to incorporate appropriate provisions for this purpose.

9. One comment requested that the proposed disclaimer be reworded to read "actual net contents may be as low as ____% below labeled quantity."

The Commissioner has revised the disclaimer language so that it will be easier for the purchaser to understand.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the FDA environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701, 52 Stat. 1055–1056, as amended by 68 Stat. 55, 70 Stat. 919, 72 Stat. 948, 74 Stat. 398 (21 U.S.C. 371)) and the Fair Packaging and Labeling Act (sec. 5(b), 80 Stat. 1296 (15 U.S.C. 1454(b))) and under authority delegated to the Commissioner (21 CFR 2.120), Part 1 is amended in § 1.8b by adding new paragraph (t), to read as follows:

§ 1.8b Food labeling; declaration of net quantity of contents; when exempt.

* * * * *

(t) Where the declaration of net quantity of contents is in terms of net weight and/or drained weight or volume and does not accurately reflect the actual quantity of the contents or the product falls below the applicable standard of fill of container because of equipment malfunction or otherwise unintentional product variation, and the label conforms in all other respects to the requirements of this chapter (except the requirement that food falling below the applicable standard of fill of container shall bear the general statement of substandard fill specified in § 10.7(b) of this chapter), the mislabeled food product, including any food product that fails to bear the general statement of substandard fill specified in § 10.7(b) of this chapter, may be sold by the manufacturer or processor directly to institutions operated by Federal, State or local governments (schools, prisons, hospitals, etc.): *Provided*, That:

(1) The purchaser shall sign a statement at the time of sale stating that he is aware that the product is mislabeled to include acknowledgement of the nature and extent of the mislabeling, e.g., "Actual net weight may be as low as ____% below labeled quantity") and that any subsequent distribution by him of said product except for his own institutional use is unlawful. This statement shall be kept on file at the principal place of business of the manufacturer or processor for 2 years subequent to the date of shipment of the product and shall be available to the Food and Drug Administration upon request.

(2) The product shall be labeled on the outside of its shipping container with the statement(s):

(i) When the variation concerns net weight and/or drained weight or volume —"Product Mislabeled. Actual net weight (drained weight or volume where appropriate) may be as low as ____% below labeled quantity. This Product Not for Retail Distribution", the blank to be filled in with the maximum percentage variance between the labeled and actual weight or volume of contents of the individual packages in the shipping container, and

(ii) When the variation is in regard to a fill of container standard—"Product Mislabeled. Actual fill may be as low as __% below standard of fill. This Product Not for Retail Distribution."

(3) The statements required by paragraphs (t)(2)(i) and (t)(2)(ii) of this section, which may be consolidated where appropriate, shall appear prominently and conspicuously as compared to other printed matter on the shipping container and in boldface print or type on a clear, contrasting background in order to render them likely to be read and understood by the purchaser under ordinary conditions of purchase.

Effective date. This regulation shall become effective December 10, 1975.

(Sec. 701, 52 Stat. 1055–1056 as amended by 68 Stat. 55, 70 Stat. 919, 72 Stat. 948, 74 Stat. 398 (21 U.S.C. 371); sec. 5(b), 80 Stat. 1296 (15 U.S.C. 1454(b)).)

Dated: December 2, 1975.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.75-33157 Filed 12-9-75;8:45 am]

[Docket No. 75P-0291]

PART 37—FISH

Canned Pacific Salmon; Confirmation of Effective Date of Order Amending Standards of Identity and Fill of Container

In the FEDERAL REGISTER of May 23, 1975 (40 FR 22540), the Commissioner of Food and Drugs amended the standards of identity (21 CFR 37.10) and fill of container (21 CFR 37.12) for canned Pacific salmon to adopt, insofar as practicable, the provisions of the Recommended International Standard for Canned Pacific Salmon.

The amendment provided that any person who would be adversely affected could at any time on or before June 23, 1975, file written objections to, and also request a hearing on, the amended regulation.

Pursuant to the Federal Food, Drug, and Cosmetic Act (sec. 701(e)(2), 70 Stat. 919 (21 U.S.C. 371(e)(2))) and under authority delegated to the Commissioner (21 CFR 2.120), notice is given that no objections were filed to the regulations published May 23, 1975, and that the effective date for full compliance with the regulations was Jul. 22, 1975.

Dated: December 3, 1975.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.75-33158 Filed 12-9-75;8:45 am]

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

Cephapirin Sodium for Intramammary Infusion

The Commissioner of Food and Drugs has evaluated a new animal drug application (97-222V) filed by Bristol Laboratories, Division of Bristol-Myers Co., P.O. Box 657, Syracuse, NY 13201, proposing safe and effective use of cephapirin sodium for intramammary infusion for treating mastitis in lactating cows. The application is approved, effective December 10, 1975.

Based upon an evaluation of the data before him, the Commissioner concludes that a tolerance limitation is required to assure that edible tissues and milk of cattle treated with cephapirin sodium infusion under the approved conditions of use are safe for human use.

The Commissioner is amending Parts 529 and 556 (21 CFR Parts 529, 556) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120) Parts 529 and 556 are amended as follows:

1. In Part 529, by adding new § 529.365 to read as follows:

§ 529.365 Cephapirin sodium for intramammary infusion.

(a) *Specifications.* Each 10-milliliter dose contains 200 milligrams of cephapirin sodium activity in a peanut-oil gel.

(b) *Sponsor.* See No. 000015 in § 510.600(c) of this chapter.

(c) *Related tolerances.* See § 556.115 of this chapter.

(d) *Conditions of use.* (1) The drug is used for the treatment of lactating cows having bovine mastitis caused by susceptible strains of *Streptococcus agalactiae* and *Staphylococcus aureus*.

(2) Administer one dose into each infected quarter immediately after the quarter has been completely milked out. Do not milk out for 12 hours. Repeat once only in 12 hours. If improvement is not noted within 48 hours after treatment, consult your veterinarian.

(3) Milk that has been taken from animals during treatment and for 96 hours (8 milkings) after the last treatment must not be used for food. Treated animals must not be slaughtered for food until 4 days after the last treatment.

2. In Part 556, by adding a new § 556.115 to read as follows:

§ 556.115 Cephapirin.

A tolerance of 0.02 parts per million (ppm) is established for residues of cephapirin in the milk and 0.1 ppm in the uncooked edible tissues of dairy cattle.

Effective date. This regulation shall be effective December 10, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 2, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

PART 546—TETRACYCLINE ANTIBIOTIC DRUGS FOR ANIMAL USE

Chlortetracycline Boluses

The Commissioner of Food and Drugs has evaluated a supplemented new animal drug application (65-047V) filed by Philips Roxane, Inc., 2621 North Belt Highway, St. Joseph, MO 64502, proposing safe and effective use of chlortetracycline boluses for treatment of bacterial enteritis and pneumonia in calves. The supplemental application is approved, effective December 10, 1975.

The Commissioner is amending Part 546 to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness of data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 560 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner (21 CFR 2.120), Part 546 is amended in Subpart A by adding new § 546.110h, to read as follows:

§ 546.110h Chlortetracycline boluses.

(a) *Requirements for certification.* The requirements for certification for chlortetracycline boluses are described under § 546.110d. Each bolus contains 250 milligrams of chlortetracycline hydrochloride. Its moisture content is not more than 6.0 percent.

(b) *Tests and methods of assay.* The tests and methods of assay are described in § 446.110a of this chapter. The moisture content is determined using the method described under § 436.201 of this chapter.

(c) *Conditions of marketing.* It is used in calves.

(1) *Sponsor.* See No. 000010 in § 510.600(c) of this chapter.

(2) *Related tolerances.* See § 556.150 of this chapter.

(3) *Indications for use.* It is used for treatment of bacterial enteritis (scours) caused by *E. coli* and bacterial pneumonia associated with *Pasteurella spp., Klebsiella spp.*, and *Hemophilus spp.*

(4) *Limitations.* Administer 1 bolus (250 milligrams) for each 50 pounds of body weight every 12 hours daily for 3 to 5 days; if no improvement is noted after 3 days of treatment, consult a veterinarian; administer by placing well back on the tongue by hand or with a balling gun, or crushed and dissolved in milk or water for drenching or bucket feeding; do not use for more than 5 days; do not slaughter animals for food within 24 hours of latest treatment.

Effective date. This regulation shall be effective on December 10, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 4, 1975.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Approval of the New Mexico Plan

1. *Background.* Part 1902 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) whereby States may submit for approval, under the requirements of that section, plans to assume responsibility for the development and enforcement of State occupational safety and health standards. New Mexico first submitted a plan under this section to the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) on July 25, 1973 (38 FR 36780). Initial review of the plan revealed numerous serious deficiencies which remained unresolved after discussions and meetings between State and Federal representatives. Therefore, the Assistant Secretary initiated proceedings to reject the plan under section 18(d) of the Act and notice to that effect was published in the FEDERAL REGISTER, enumerating the Assistant Secretary's findings with regard to the provisions of the New Mexico State plan dealing with sanctions and their application, employee rights and obligations, and regulation of hasards along with explanations of why these provisions were considered to be not at least as effective as comparable Federal provisions (39 FR 42726). Before hearing on the proposed rejection, the New Mexico legislature enacted new enabling legislation in its 1975 session substantially similar to the comparable Federal provisions.

The State formally submitted its revised plan, containing the new legislation, to the Assistant Secretary on June 4, 1975; and the Secretary of Labor and the State of New Mexico, by stipulation, dismissed the pending rejection proceeding. On August 21, 1975, a notice was published in the FEDERAL REGISTER (40 FR 36575) concerning the resubmission of the plan to the Assistant Secretary and the fact that the question of approval was in issue before him.

The plan designates the New Mexico Environmental Improvement Agency as the agency with the responsibility for the administration of the plan throughout the State. It defines the covered occupational safety and health issues as defined by the Secretary of Labor in

V 40238 DEC 10 75 XUM

§ 1902.2(c)(1) of Title 29, Code of Federal Regulations, and includes legislation enacted in 1972 and amending legislation which was enacted on April 10, 1975. In addition, the State has adopted Federal occupational safety and health standards as of June 1975, the OSHA Field Operations Manual, and contains regulations adopted August 8, 1975, which are substantially identical to 29 CFR Parts 1903, 1904 and 1905. A further description of the plan and the schedule for its development are summarized in a new Subpart DD of 29 CFR Part 1952 appearing below.

2. *Issues.* The National Office review of the revised New Mexico plan revealed problems which were communicated to the State. The State responded to each of the National Office comments, as well as public comments submitted by the American Federation of Labor and Congress of Industrial Organizations, in a letter dated November 4, 1975, from Aaron Bond, Director of the Environmental Improvement Agency, to Barry J. White, Associate Assistant Secretary for Regional Programs. This letter clarified and expanded the plan and all outstanding problem areas of the plan were resolved. The major issues are discussed below:

(a) Section 59–14–16(D) of the amended legislation provides for employer or employee contests within 15 days after citation. However, a notice of contest results in an informal hearing, after which another notice of contest must be filed (again within 15 days) to request a formal hearing. This procedure was considered to be confusing and likely to lead to lengthy delays. In response to this criticism, the State submitted language for proposed amending legislation which will remove the requirement for a mandatory informal hearing completely, and substitute language identical to section 10 of the Federal Act. The State, in the November 1, 1975 letter gave assurances that until such amendment is enacted, an interim procedure whereby any delays would be minimized will be invoked. This will include prompt institution of informal hearings, usually within five days, and other procedures.

b. *Training.* The State Plan and proposed budget appeared to provide a minimal training program for employers and employees. In addition, more information was deemed necessary concerning the State's plans for the training of its compliance officers.

The State in its letter of assurances has offered adequate information and clarification about the program's goals for the employer-employee education program by pointing out the program's authorization under the State Plan, demonstrating its funding under the Technical Services section of the proposed grant, and noting the allocation of three full-time personnel to the Technical Services Program. Resources have also been programmed for the necessary visual and audio aid equipment, other supplies necessary for the presentation of the courses, and various associated expenses such as travel, rent, and utilities.

The State has offered adequate assurance that appropriate funding will be sought on a continuing basis "to make not only basic but also advanced and refresher training available to the State's program staff." Certain technical training will be obtained from various courses offered by the Occupational Safety and Health Administration's Training Institute and by the National Institute for Occupational Safety and Health. Adequate funding for the travel of the State's compliance officers to the various training sites is provided in the proposed grant.

c. *Recordkeeping and reporting.* The Bureau of Labor Statistics (BLS) in its comments objected to the lack of assurances that the State would seek prior approval for any additional employer recordkeeping and reporting required by the State, that the State would amend its recordkeeping and reporting requirements to reflect any change in 29 CFR Part 1904, and that the State would require public employers to meet the same recordkeeping and reporting requirements as the private sector.

The State of New Mexico, in its letter of November 4, 1975, provided all assurances as requested above.

3. *Decision.* After careful consideration of the New Mexico Plan, the plan is hereby approved under section 18 of the Act and 29 CFR Part 1902.

The decision incorporates requirements of the Act and implementing regulations applicable to State plans generally. It also incorporates our intentions as to continued Federal enforcement of Federal standards in areas covered by the plan and the State's developmental schedule as set out below.

Pursuant to § 1902.20(b)(1)(iii), the present level of Federal enforcement will not be diminished until the State has been determined to be operational under the meaning of 29 CFR 1954.3. Thereafter, Federal enforcement activity will continue to be exercised to the degree necessary to assure occupational safety and health protection to employees in the State of New Mexico.

The New Mexico plan is developmental. The following are the highlights of the schedule of developmental steps provided by the plan:

(a) Development of a complete and operating management information and control system by January 1, 1976.

(b) Submission of the State's occupational safety and health poster for approval by January 31, 1976.

(c) Promulgation of rules of procedures for administrative review by the New Mexico Occupational Health and Safety Review Commission by January 31, 1976.

(d) Enforcement program to achieve operational status by December 1, 1976.

(e) Amendments to basic legislation to become effective by July 1, 1977.

(f) Public employee program to become operational by July 1, 1977.

Pursuant to section 18 of the Occupational Safety and Health Act (29 U.S.C. 667), Part 1952 is hereby amended by adding a new Subpart DD as follows:

Subpart DD—New Mexico

Sec.
1952.360 Description of the plan.
1952.361 Where the plan may be inspected.
1952.362 Level of Federal enforcement.
1952.363 Developmental schedule.

AUTHORITY: Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667).

Subpart DD—New Mexico

§ 1952.360 Description of the plan.

(a)(1) The plan identifies the New Mexico Environmental Improvement Agency, with its subordinate organization, the Occupational and Radiation Protection Division, as the State agency designated to administer the plan throughout the State. It adopts the definition of occupational safety and health issues expressed in § 1909.2(c)(1) of this chapter. The State has adopted the Federal Field Operations Manual and all the Federal standards except those found in 29 CFR Parts 1915, 1916, 1917, and 1918 (ship repairing, shipbuilding, shipbreaking, and longshoring). In addition, the Occupational and Radiation Protection Division will be enforcing State standards under the Radiation Protection Act (Chp. 284, Laws of 1971, 12–9–1 through 12–9–11, New Mexico Statutes Annotated). However, since this Act provides protection to the general public, in the event of conflict between Radiation Protection Act standards and occupational safety and health standards, employees will receive the protection provided under the more stringent regulation.

(2) The plan provides a description of personnel employed under a merit system; the coverage of employees of political subdivisions; procedures for the development and promulgation of standards, including standards for the protection of employees against new and unforeseen hazards; and procedures for the prompt restraint of imminent danger situations.

(b)(1) The plan includes legislation enacted by the New Mexico Legislature during its 1975 legislative session amending Chp. 63, Laws of 1972, 59–14–1 through 59–14–23 of the New Mexico Statutes Annotated to bring them into conformity with the requirements of Part 1902 of this chapter. Under the legislation, the Environmental Improvement Agency will have full authority to enforce and administer laws respecting the safety and health of employees in all workplaces of the State.

(2) The legislation is intended, among other things, to assure inspections in response to employee complaints; give employer and employee representatives an opportunity to accompany inspectors in order to aid inspections; notify employees of their protections and obligations; protect employees against discharge or discrimination in terms and conditions of employment; provide adequate safeguards to protect trade secrets; impose sanctions against employers for violations of standards and orders; insure employer right of review to an Occupational Health and Safety Review Commission and then the courts, and employee participation in the review proceedings. The plan also proposes a program of voluntary compliance by employers and employees, including a provision for on-site consultation. The State's consultation program will not detract from its enforcement program and the State's consultation program will meet the conditions set forth in the Washington Decision (38 FR 2421, January 26, 1973).

(c) The New Mexico Plan includes the following documents as of the date of approval:

(1) The plan description documents, in one volume.

(2) A copy of the enabling legislation as amended by the State legislature in its 1975 session.

(3) A letter from Aaron Bond, Director of the New Mexico Environmental Improvement Agency, to Barry J. White, Associate Assistant Secretary for Regional Programs, dated November 4, 1975, submitting information, clarification, and revisions on several issues raised during the review process, including proposals to be submitted to the New Mexico Legislature prior to the close of its 1977 legislative session.

§ 1952.361 Where the plan may be inspected.

A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, New Department of Labor Building, Room N3608, 200 Constitution Ave., N.W., Washington, D.C. 20210; The Technical Data Center, Occupational Safety and Health Administration, New Department of Labor Building, Room N3620, 200 Constitution Ave., N.W., Washington, D.C. 20210; Assistant Regional Director, Occupational Safety and Health Administration, 555 Griffin Square Building, Griffin and Young Streets, Dallas, Texas 75202; and the Director, Environmental Improvement Agency, State of New Mexico, P.O. Box 2348, PERA Building, Room 506, Santa Fe, New Mexico 87503.

§ 1954.362 Level of Federal enforcement.

Pursuant to § 1902.20(b)(1)(iii) of this chapter, the present level of Federal enforcement in New Mexico will not be diminished until the State has been determined to be operational under the meaning of 29 CFR 1954.3. Thereafter, the level of Federal enforcement will continue to be exercised to the degree necessary to assure occupational safety and health protection to employees in the State of New Mexico.

§ 1952.363 Developmental schedule.

The New Mexico State Plan is developmental. The following is the developmental schedule as provided by the plan:

(a) Development of a complete and operating management information and control system by January 1, 1976.

(b) Submission of the State's occupational safety and health poster for approval by January 31, 1976.

(c) Promulgation of Rules of Procedures for administrative review by the New Mexico Occupational Health and Safety Review Commission by January 31, 1976.

(d) Enforcement program to achieve operational status by December 1, 1976.

(e) Amendments to basic legislation to become effective by July 1, 1977.

(f) Public employee program to become operational by July 1, 1977.

Signed at Washington, D.C., this 4th day of December, 1975.

MORTON CORN,
Assistant Secretary of Labor.

[FR Doc.75–33245 Filed 12–9–75;8:45 am]

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2602—DECLARATION AND PAYMENT OF PREMIUMS

Clarifications

On September 17, 1975, the Pension Benefit Guaranty Corporation (hereinafter "the PBGC") published in the FEDERAL REGISTER (40 FR 42876) a revision of Part 2602, Chapter XXVI, of Title 29, Code of Federal Regulations, which imposed the premiums to be paid for basic benefits guaranteed under § 4022(a) of the Employee Retirement Income Security Act of 1974 (hereinafter "the Act"), for plan years beginning on or after September 2, 1975, and which prescribed a new premium payment declaration form (Form PBGC–1 (Rev. Aug. 1975)). Subsequently, a number of comments and questions were received by the PBGC which indicated the need to adopt certain technical amendments to this regulation. It, therefore, has been revised, as set forth below, to clarify the obligations imposed thereunder.

This regulation has been modified in a number of respects. Section 2602.2 has been revised to clarify the definition of "participant" for premium payment purposes. This definition incorporates within the regulation itself the definition of participant previously contained in the preamble to the regulation adopted on September 17, 1975, as well as previously stated interpretations of the term.

Section 2602.3 has been modified so as to specify in one place the filing requirements previously imposed separately by the Act, the premium regulation adopted by the PBGC on September 17, 1974 (39 FR 33357) and the form of this regulation as adopted by the PBGC on September 17, 1975. Section 2602.3 also has been revised to specifically reserve to the PBGC the right to reject incomplete filings.

Section 2602.7 has been amended to take into account the recent decrease by the Internal Revenue Service (hereinafter "the IRS") of the interest rate generally imposed under the Internal Revenue Code (hereinafter "the Code"). Section 4007(b) of the Act provides that the interest imposed for a failure to pay premiums when due is that imposed by the IRS under section 6601(a) of the Code. Effective February 1, 1976, therefore, the interest imposed by § 2602.7 of this regulation will be at the rate of 7 percent per annum. Section 2602.7 also has been amended to provide that PBGC bills for interest will be deemed paid in full if paid no later than 30 days after the billing date.

Section 2602.9 of this regulation has been changed to permit the PBGC, on its own motion, to waive the imposition of late payment charges. Among other things, this change will permit the PBGC to treat late payment charges billed by the PBGC as paid in full if paid no later than 30 days after the billing date.

Finally, new §§ 2602.10 and 2602.11 have been added to clarify the date on which a premium filing will be considered to be due and the date on which a premium filing will be considered to be filed. The three day time period for determining the mailing date of mail not postmarked by the United States Postal Service will be applied by the PBGC only with respect to filings which are due and payments which are made after the date this regulation is published.

Because under the terms of this part, the premium declaration form and premium payments have been required to be submitted since October 2, 1975, the PBGC finds that there is a need to provide immediate, additional guidance to the public with respect to the requirements for filing the premium declaration form and the payment of premiums. Accordingly, the PBGC has determined that good cause exists for making this regulation effective less than 30 days after publication.

In consideration of the foregoing, Part 2602, Chapter XXVI of Title 29, Code of Federal Regulations, is revised (deletions are bracketed and additions are indicated by arrows) as set forth below, effective December 10, 1975.

[AUTHORITY: Sec. 4002, 4006, 4007; 88 Stat. 1004, 1010, 1013; (29 U.S.C. 1302, 1306, 1307)]

§ 2602.1 Purpose and scope.

(a) The purpose of this part is to impose the premiums applicable to plan years ►in progress on and◄ beginning on or after September 2, 197[5]►4◄.

(b) This part applies to all covered plans, as provided by section 4021 of the

§ 2602.2 Definitions.

As used in this part:

"Act" means the Employee Retirement Income Security Act of 1974.

"Participant" means [the individual defined as such under the terms of the

V40238 DEC 10 75 XUM

plan.]: ►(a) an individual currently accruing benefits or earnings or retaining credited service under the terms of the plan; (b) a former employee with vested rights to immediate or deferred benefits; (c) a retiree who is receiving or is eligible to receive benefits from the plan; (d) a retiree or former employee for whom a fully paid-up immediate or deferred annuity has been purchased if such individual retains a legal claim against the plan for benefits or if the plan retains a participating interest in the annuity policy; (e) a deceased participant whose survivors are receiving or are eligible to receive benefits from the plan; and, (f) any other individual who is defined as a participant under the terms of the plan.◄

"PBGC" means the Pension Benefit Guaranty Corporation.

"Plan Year" means the calendar, policy or fiscal year on which the records of the plan are kept.

§ 2602.3 Filing requirement.

►(a) No later than October 2, 1974, the plan administrator of each covered plan shall file in accordance with the instructions contained therein the premium declaration form prescribed by this part and any estimated premium payments due for any plan year beginning before and in progress on September 2, 1974.◄

►(b) No later than 30 days after the beginning of any plan year beginning on or after September 2, 1974, the plan administrator of each covered plan shall file in accordance with the instructions contained therein the premium declaration form prescribed by this part and any estimated premium payments due for such plan year.◄

[(a) ►(c)◄ [Within] ►No later than 2 years and◄ 30 days after the beginning of any plan year ►in progress on or◄ beginning on or after September 2, 197[5]►4◄, the plan administrator of each covered plan shall file in accordance with the instructions contained therein [: (1)] the premium declaration for prescribed by this part [,] ►and◄ [as well as any estimated premium payments due for any plan year beginning on or after September 2, 1975; and, (2)] any premium payments necessary, or request for refunds due, as a result of reconciling the estimated premium payments paid, with the actual premium payment due, for [any] ►such◄ plan year [beginning before and in progress on September 2, 1974].

[(b)]►(d)◄ A premium declaration revision, revising a previous estimate of premium payments, may be filed on the form prescribed by this part at any time prior to the filing of the reconciliation of the estimated premium with the actual premium due.

[(c)]►(e)◄ [Notwithstanding the provisions of paragraph (a) of this section,] The date prescribed for payment of premiums for plans not previously covered by section 4021 of the Act is 30 days after the later of the date the plan documents are signed or the date of the plan's effectiveness.

►(f) Any premium declaration filing not filed in accordance with this part, not filed in accordance with the instructions contained in the form, not accompanied by the required premium payment or otherwise incomplete may, in the discretion of the PBGC, be returned in whole or in part to the plan administrator and treated as not having been filed.◄

§ 2602.4 Coverage for guaranteed basic benefits.

(a) The failure by a plan administrator to pay the premiums due under this part will not result in that plan's loss of coverage for basic benefits guaranteed under section 4022(a) of the Act.

(b) The payment of the premiums imposed by this part will not result in coverage for basic benefits guaranteed under section 4022(a) of the Act for plans not covered under section 4021 of the Act.

§ 2602.5 Premium rate.

For plan years ►in progress on or◄ beginning on or after September 2, 197[5]►4◄, the premium rate for basic benefits guaranteed under § 4022(a) of the Act shall be as follows:

(a) Plans which are not multiemployer plans shall pay a premium of one dollar for each individual who is a participant in such plan at any time during the plan year;

(b) Multiemployer plans shall pay a premium of fifty cents for each individual who is a participant in such plan at any time during the plan year.

§ 2602.6 Forms

(a) The form prescribed by this part for the declaration ►,◄ [and] payment ►and reconciliation◄ of premiums is Form PBGC–1 (Rev. Aug. 1975).

(b) The form prescribed by this part for the revision of a previous estimate of premium payments is Form PBGC–1R.

§ 2602.7 Late payment interest charges.

►(a)◄ If any premium payment due under this part is not paid by the last date prescribed for payment in § 2602.3, an interest charge shall be imposed on the unpaid amount at the rate of 6 percent per annum through June 30, 1975 ►,◄ [and] 9 percent per annum ►through January 31, 1976 and 7 percent per annum◄ thereafter, for the period from the date payment is due to the date the payment is made.

►(b) PBGC bills for interest assessed by § 2602.7 will be deemed paid in full if paid no later than 30 days after the date of such bills.◄

§ 2602.8 Late payment penalty charges.

(a) If any premium payment due under this part is not paid by the last date prescribed for payment in § 2602.3, a late payment charge shall be assessed on the unpaid amount at the rate provided in the following table:

►LATE PAYMENT PENALTY CHARGES◄

►PREMIUM DUE DATE PRIOR TO OCT. 2, 1975◄

Days late from due date:	*Late payment charge (percent)*
1 to 60	0
61 to 90	25
91 to 120	50
121 to 180	75
More than 180	100

►PREMIUM DUE DATE ON OR AFTER OCT. 2, 1975◄

Days late from due date:	*Late payment charge (percent)*
1 to 30	5
31 to 60	10
61 to 90	20
91 to 120	40
121 to 150	60
151 to 180	80
More than 180	100

(b) For the purpose of [this section,] ►§ 2602.8,◄ if the premium paid is less than 80 percent of the actual premium due, the underpayment will be presumptively treated as a nonpayment subject to the appropriate late payment charges. When a late payment charge based upon this presumption is assessed, a plan administrator may request the PBGC to [reconsider] ►review◄ the applicability of this presumption by submitting a statement to the PBGC setting forth the reasons for such request.

§ 2602.9 Waivers

The late payment charges imposed by § 2602.8 will not be assessed ►in whole or in part◄:

(a) With respect to any premium payment made within 60 days after the last date prescribed for payment in § 2602.3 if, before such date, the PBGC grants a waiver upon a showing of substantial hardship arising from the timely payment of the premium and a showing that the premiums will be paid within such 60 day period[:] ►;◄ [or]

(b) Upon any other timely request and demonstration of good cause[.] ►; or◄

►(c) If the PBGC, on its own motion, waives the application of § 2602.8.◄

►§ 2602.10 Date of filing.◄

►(a) Any form required to be filed under the provisions of this part and any payment required to be made under the provisions of this part shall be deemed to have been filed or made on the date on which it is mailed.

►(b) A form or payment shall be presumed to have been mailed on the date on which it is postmarked by the United States Postal Service or three days prior to the date on which it is received by the PBGC if not postmarked by the United States Postal Service.◄

►§ 2602.11 Computation of time.◄

►In computing any period of time prescribed by this part, the first day shall not be included and the last day shall be included.◄

§ 2602.1[1]►2◄ Mailing address.

The mailing address of the Pension Benefit Guaranty Corporation is P.O. Box 7119, Washington, D.C. 20044.

Signed at Washington, D.C. this 5th day of December, 1975.

JOHN T. DUNLOP,
Chairman,
Board of Directors,
Pension Benefit Guaranty Corporation.

Issued on the date set forth above, pursuant to a resolution of the Board of Directors approving these regulations and authorizing its Chairman to issue same.

HENRY ROSE,
Secretary,
Pension Benefit Guaranty Corporation.

Pension, Compensation, and Dependency and Indemnity Compensation

DOMESTIC VOLUNTEER SERVICE PROGRAMS

At 40 FR 48143 and 48144 of the FEDERAL REGISTER of October 14, 1975, there was published a notice of proposed regulatory development to change provisions in Part 3 of Title 38, Code of Federal Regulations, relating to annual income. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

One written comment on the proposed change was received. This comment was directed to § 3.261(a)(34), Title 38, Code of Federal Regulations. It was a notification of another program funded by ACTION, income from which is to be excluded in the computation of income for VA purposes. The primary purpose of the proposed regulatory change was to clarify and publicize the status of the programs transferred to the Small Business Administration, and therefore, it was not deemed appropriate to delay promulgation pending an additional change to reflect the Senior Companion Program as an ACTION program since this can be accomplished in a later change.

For this reason the proposed amendment is hereby adopted without change and is set forth below.

***Effective date.* The amendments to VA Regulation 1261 are effective July 15, 1975, the effective date of Executive Order 11871.**

Approved: December 4, 1975.

[SEAL] R. L. ROUDEBUSH,
Administrator.

In § 3.261, paragraph (a)(33) is revised and (a)(34) is added so that the revised and added material reads as follows:

§ 3.261 Character of income; exclusions and estates.

• • • • • •

	Dependency (parents)	Dependency and indemnity compensation (parents)	Pension; protected (veterans, widows (widowers), and children)	Pension; Public Law 86–211 (veterans, widows (widowers), and children)	See
(a) Income:					
• • •					
(33) The following programs administered by the ACTION Agency:					
Foster grandparent program and older Americans community service programs payments (Pub. L. 93–29; 87 Stat. 55).	Excluded...	Excluded...	Excluded...	Excluded...	§ 3.262(q)(1)
Volunteers in Service to America (VISTA), University Year for ACTION (UYA), Program for Local Services (PLS), ACTION Cooperative Volunteers (ACV), Foster Grandparent Program (FGP) and Older American Community Service Programs, Retired Senior Volunteer Program (RSVP). PART 3—ADJUDICATION

Pension, Compensation, and Dependency and Indemnity Compensation

RATINGS AND EVALUATIONS

At 40 FR 50111 of the FEDERAL REGISTER of October 28, 1975, there was published a notice of proposed regulatory development to amend § 3.321(b)(3) to provide that the effective dates of extra-schedular evaluations in claims for increased benefits will be in accordance with § 3.400(o). This amendment reflects that extra-schedular evaluations are subject to the same effective date provisions as apply to schedular evaluations.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

No written comments have been received and the proposed regulation is hereby adopted without change and is set forth below.

***Effective date.* This VA Regulation is effective August 1, 1975, the effective date of Pub. L. 94–71 (89 Stat. 395).**

Approved: December 4, 1975.

[SEAL] R. L. ROUDEBUSH,
Administrator.

In § 3.321, paragraph (b)(3) is revised to read as follows:

§ 3.321 General rating considerations.

• • • • • •

(b) • • •

(3) *Effective dates.* The effective date of these extra-schedular evaluations granting or increasing benefits will be in accordance with § 3.400(b)(1) and (2) as to original and reopened claims and in accordance with § 3.400(o) in claims for increased benefits.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Pond Island National Wildlife Refuge

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

MAINE

POND ISLAND NATIONAL WILDLIFE REFUGE

Pond Island National Wildlife Refuge is closed to the general public during the nesting season from March 1 through July 31, 1976; however, it is open for environmental education, nature study, and photography from August 1 through February 28 during daylight hours. Camping is prohibited. Pets are permitted if on a leash not over 10 feet in length.

Information about the refuge is available from the Refuge Manager, Parker River National Wildlife Refuge, Newburyport, Massachusetts 01905 or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations govern-

V40238 DEC 10 75 XUM

ing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

WM. C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 3, 1975.

[FR Doc.75-33132 Filed 12-9-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Parker River National Wildlife Refuge

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

MASSACHUSETTS

PARKER RIVER NATIONAL WILDLIFE REFUGE

Entrance into those portions of the refuge not posted as closed is permitted for certain uses specified herein. Visitor hours are designated at the entrance gate at the north refuge boundary on Sunset Blvd. This gate is the only legal point of access on the island portion of the refuge. Visitor hours are generally dawn to dusk but, at times of high public use, the entrance gate may be closed and access denied by refuge officials to protect the wildlife habitat from overuse. Sightseeing, nature study, photography, hiking, snowshoeing, and cross-country skiing are permitted.

Vehicle parking is permitted only in designated lots. Parking may be restricted to certain purposes and conditions designated by special signs.

Boating is permitted on navigable tidal waters which lie within the refuge.

Public boat launching and landing is not permitted on the refuge except during the waterfowl hunting season (see Part 32.12—Hunting).

The entire refuge beach has no lifeguards. Swimming will be at the visitor's own risk.

A limit of 3 quarts of plums and cranberries per person per year may be picked from September 7 through October 31. Cranberry rakes or scoops are not permitted.

Access to clam flats for clamming is permitted across refuge marshes. Permits are required and may be obtained at the refuge.

Small cooking fires are permitted only on the ocean beach. No other fires are permitted at other locations on the refuge.

Alcoholic beverages, camping, tents, camping trailers, floating devices (including surfboards), and nudity in any form, are not permitted on the refuge. Nudity is defined as intentional failure by persons over 10 years of age to cover with fully opaque covering their own genitals, public areas, rectal area or female breasts below a point immediately above the top of the areola when in a public place.

Pets under full control on a leash not exceeding 10 feet in length are permitted on the refuge on week days only (excluding holidays) from January 1 through May 23 and from September 3 through December 31. Pets are not permitted on the refuge at any other time.

Organized group activities may be confined to the northern one-quarter mile of beach east of Lot. 1. Advance reservations and permits are required and there must be at least one adult supervisor for every 10 children.

The possession of any drugs or substances, or immediate precursors, identified in Schedules I, II, III, IV, or V of Part B of the Controlled Substances Act, 21 U.S.C. 812, or any drugs or substances added to these schedules pursuant to the terms of the Act is prohibited on the refuge, unless such drugs or substances were obtained in accordance with the law. Presence in the refuge when under the influence of a controlled substance to a degree that may endanger oneself, or another person, or property, or may cause interference with another person's enjoyment of the refuge is prohibited.

The possession of any device (clubs, knives, metal knuckles, etc.) prohibited by State law and/or deemed a dangerous weapon by refuge officials is prohibited.

Bicycles and registered motor vehicles are permitted only on the main refuge road and in numbered parking areas except when being used under the terms of a special permit for over-the-sand surf fishing vehicles (see Part 33—Sport Fishing).

Snowmobiles, air-cushion, all-terrain, hang-gliders or other similar vehicles deemed improper by refuge agents are not permitted on the refuge.

A map of the refuge is available from the Refuge Manager, Parker River National Wildlife Refuge, Northern Boulevard, Plum Island, Newburyport, Massachusetts 01950, or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

WM. C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 3, 1975.

[FR Doc.75-33133 Filed 12-9-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Trustom Pond National Wildlife Refuge

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

RHODE ISLAND

TRUSTOM POND NATIONAL WILDLIFE REFUGE

Entry on foot is permitted from sunrise to sunset on designated routes unless prohibited by posting for the purpose of nature study, photography, and sightseeing. Pets are permitted if on a leash not over 10 feet in length.

The entire refuge beach has no lifeguards. Swimming will be at the visitor's own risk. Access along designated routes on the refuge for surf fishing and shell fishing is permitted.

Fires are permitted only on the ocean beach. No other fires are permitted at other locations on the refuge. Camping, tents, floating devices and nudity are not permitted on the refuge. Nudity is defined as intentional failure by persons over 10 years of age to cover with fully opaque covering their own genitals, public areas, rectal area or female breasts below a point immediately above the top of the areola when in a public place.

Over-the-sand vehicles, snowmobiles, air cushion, all terrain, or other similar vehicles are not permitted on the refuge except for emergency and law enforcement purposes.

A map of the refuge is available from the Refuge Manager, Ninigret National Wildlife Refuge, Box 307, Charlestown, Rhode Island 02813 or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

WM. C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 3, 1975.

[FR Doc.75-33134 Filed 12-9-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Block Island National Wildlife Refuge

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

RHODE ISLAND

BLOCK ISLAND NATIONAL WILDLIFE REFUGE

Entry by foot or motor vehicle on designated roads and trails is permitted during daylight hours for the purpose of nature study, photography, hiking, shell collecting, shell fishing, and surf fishing.

The refuge area, comprising 28 acres, is delineated on maps available from the Refuge Manager, Ninigret National Wildlife Refuge, P.O. Box 307, Charlestown, Rhode Island 02813, and from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations which govern recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

WM. C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

DECEMBER 3, 1975.

[FR Doc.75-33135 Filed 12-9-75;8:45 am]

PART 28—PUBLIC ACCESS, USE, AND RECREATION

Ninigret National Wildlife Refuge

The following special regulations are issued and are effective during the period January 1, 1976 through December 31, 1976.

§ 28.28 Special regulations, public access, use, and recreation; for individual wildlife refuge areas.

RHODE ISLAND

NINIGRET NATIONAL WILDLIFE REFUGE

Entry on foot is permitted from sunrise to sunset on designated routes unless prohibited by posting for the purpose of nature study, photography, and sightseeing. Pets are permitted if on a leash not over 10 feet in length.

The entire refuge beach has no lifeguards. Swimming will be at the visitor's own risk. Access along designated routes on the refuge for surf fishing and shell fishing is permitted.

Fires are permitted only on the ocean beach. No other fires are permitted at other locations on the refuge. Camping, tents, floating devices, and nudity are not permitted on the refuge. Nudity is defined as intentional failure by persons over 10 years of age to cover with fully opaque covering their own genitals, public areas, rectal area or female breasts below a point immediately above the top of the areola when in a public place

Over-the-sand vehicles, snowmobiles, air cushion, all terrain or other similar vehicles are not permitted on the refuge except for emergency and law enforcement purposes.

A map of the refuge is available from the Refuge Manager, Ninigret National Wildlife Refuge, Box 307, Charlestown, Rhode Island 02813 or from the Regional Director, U.S. Fish and Wildlife Service, Post Office and Courthouse Building, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1976.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 280—YELLOWFIN TUNA

Revision of Incidental Catch Rate

Notice of revision of the incidental catch rate of yellowfin tuna for bait and jig boats is hereby given pursuant to § 280.7(b)(5), Title 50, Code of Federal Regulations, as follows:

At 0001 hours, local time, at port of departure on December 10, 1975, the incidental catch rate of yellowfin tuna for bait and jig boats will be increased to 50 percent (50%) of established carrying capacity. Since the catch and the present catch rate is falling short of the 2800 short tons allotted by § 280.7(b)(3), Title 50, Code of Federal Regulations, the incidental catch rate is increased to 50 percent (50%), to fully use this allotment.

Issued at Washington, D.C., and dated December 5, 1975.

JACK W. GEHRINGER,
Deputy Director.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

LIMITATIONS ON PERCENTAGE DEPLETION IN THE CASE OF OIL AND GAS WELLS

Public Hearing on Proposed Regulations Relating to limitations on Percentage Depletion in the Case of Oil and Gas Wells

Proposed regulations under sections 613 and 613A of the Internal Revenue Code of 1954, relating to limitations on percentage depletion in the case of oil and gas wells, appear in the FEDERAL REGISTER for October 17, 1975 (40 FR 48691). An extension of time to December 17, 1975, for submitting comments thereon appears in the FEDERAL REGISTER for November 17, 1975 (40 FR 53261).

A public hearing on the provisions of such proposed regulations will be held on January 22, 1976, beginning at 10 a.m. e.s.t. in the George S. Boutwell Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to such public hearing. Copies of these rules may be obtained by a request directed to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, or by telephoning (Washington, D.C.) 202–964–3935. Under such § 601.601(a)(3) persons who have submitted written comments or suggestions within the time prescribed in the notice of proposed rule making (or in the extension of time), and who desire to present oral comments at the hearing on such proposed regulations, should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by January 12, 1976. Such outlines should be submitted to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224. Under § 601.601(a)(3) (26 CFR Part 601) each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the Government and answers thereto.

Persons who desire a copy of such written comments or suggestions or outlines and who desire to be assured of their availability on or before the beginning of such hearing should notify the Commissioner, in writing, at the above address by January 16, 1976. In such a case, unless time and circumstances permit otherwise, the desired copies are deliverable only at the above address. The charge for copies is ten cents ($0.10) per page.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of this agenda will be available free of charge at the hearing, and information with respect to its contents may be obtained on January 21, 1976, by telephoning (Washington, D.C.) 202–964–3935.

JAMES F. DRING,
Director, Legislation and Regulations Division.

CIVIL AERONAUTICS BOARD

[14 CFR Part 241]

[EDR–291; Docket No. 28517]

UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Updating the Accounting Provisions; Notice of Proposed Rulemaking

Correction

In FR Doc. 75–31822 appearing at page 54813 in the issue for Wednesday, November 26, 1975, the following corrections should be made:

(1) On page 54819 in Sec. 5–7 (a), in the 17th line, the word "aition" should read "addition", and the 19th line reading "deduction from or addition to the face" should be deleted.

(2) On page 54820, in subaccount 1601, the 4th line reading "together with the full of instruments, ap–" should read "together with the full complement of instruments, ap–".

[14 CFR Part 378]

[SPDR–36A; Docket No. 26712; Dated: December 5, 1975]

INCLUSIVE TOUR CHARTERS; ADVERTISING AND MARKETING RESTRICTIONS

Termination of Rulemaking Proceeding

By Notice of Proposed Rulemaking, SPDR–36,[1] the Board invited comment on a proposal to amend Part 378 of its Special Regulations (14 CFR Part 378) to provide various controls over the manner in which ITC's are advertised to the general public. These controls were designed to reduce the possibility that direct carriers' participation in such advertisements might: (1) falsely suggest to the public that ITC's are operated by the direct carrier itself, rather than by the ITC operator; and (2) enable a direct carrier to give rebates to ITC operators—and unlawful preferences to some of them—by conferring real economic benefits in the guise of shared advertising costs.

The first proposed amendment (Section 378.12(b)) would prohibit the tour operator from advertising in a manner which sets forth the direct air carrier's name and role more prominently than that of the tour operator, or otherwise creates the impression that the tour is being offered by the direct air carrier rather than the tour operator. The second proposed amendment (Section 378.12(c)) would prohibit direct air carriers from furnishing money, labor, services, or other thing of value to a tour operator for the purpose of advertising or promoting inclusive tours, or from otherwise participating in the advertising or promotion of identifiable tour programs.

Pursuant to the Notice of Proposed Rulemaking, the Board received comments from AITS, the American Automobile Association, the American Society of Travel Agents, Inc. (ASTA), Anne Storch International-Asti Tours, Inc., (ASTI), a joint comment of certain trunkline carriers,[2] Golden Holiday Tours, Inc., the National Air Carrier Association (NACA), and Vacation Ventures, Inc.[3]

Generally speaking, the trunkline carriers objected to the proposed rules, the tour operators' comments favored their adoption, and the supplemental air carriers represented by NACA favored adoption of the proposed restrictions relating to ITC advertising so long as comparable restrictions would be imposed on the advertising of GIT's ("group inclusive tour" packages utilizing scheduled fares.)[4]

Subsequent to receipt of the comments in this proceding, the Board instituted a rulemaking proceeding to consider a new type of charter designed primarily for persons interested in purchasing an all-inclusive vacation package at a single destination.[5] That proposal culminated in our adoption of a new Part 378a of our Special Regulations, setting forth a

[1] May 14, 1974, 39 F.R. 17564, Docket 26712.

[2] Pan American World Airways, Inc., Trans World Airways, Inc., and Western Air Lines, Inc.

[3] Identical comments were filed on behalf of Golden Holiday Tours, Inc. and Vacation Ventures, Inc.

[4] Several petitions for rulemaking have been separately filed by several tour operators seeking adoption of rules on GIT advertising similar to those considered here for ITC's. In view of our termination of the instant proceedings, we are, by Order 75–12–30, issued contemporaneously herewith, denying those other petitions.

[5] EDR–281/SPDR–38/ODR–9, 39 F.R. 29672, November 8, 1974.

One-stop-inclusive Tour Charter (OTC) rule.[6] Like the ITC, the OTC is a form of charter intended to be sold to a tour operator for the ultimate resale of individual seats—albeit as part of a "package"—to members of the general public. The close similarity in underlying concept and basic design of these two "tour package" rules clearly require that both modes—despite their few technical differences—should be subject to the same regulatory approach with respect to the manner of their advertisement. Accordingly, we postponed our consideration of the instant rulemaking, which relates only to ITC's, until such time as the issues here involved could be examined in the context of their applicability to OTC's, since it "seem obvious that the advertising for these types of 'package' charters should be governed by the same requirements. . . ."[7]

Reflecting further on the issues involved in the instant proceeding, in light of the comments received and of the intervening introduction of OTC's into our charter regime, we have determined that there is not adequate justification at this time for adopting the types of regulations which have here been proposed.[8] In the absence of a demonstrated need, it appears to be neither necessary nor desirable to proscribe specific advertising practices with respect to charters designed for sale to members of the general public. Indeed, such regulatory proscriptions may do more harm than good. They would clearly inhibit the widest public dissemination of what would otherwise be regarded as lawful advertising of these charters. Yet, they may prove to be of only negligible efficacy in preventing violation of the statutory provisions whose objectives the proposed rules were intended to implement.

We have therefore determined to terminate this proceeding.

We wish to emphasize, however, that in abandoning at this time our attempt to formulate, by regulation, specific advertising practices whose proscription might facilitate enforcement of the general statutory prohibition against rebating, preferences and unfair competition, we are not in any way signaling an attitude of tolerance toward violations of those statutory prohibitions.

Similarly there is no doubt that section 411 of the Act forbids dissemination of advertising and promotional materials which create the impression that a charter tour is being offered by a direct carrier rather than the tour operator. Accordingly, it is our view that promotional and advertising materials which fail to display the tour operator's name prominently would violate this prohibition. Such materials included in a prospectus may properly be the subject of rejection by the staff on a case-by-case basis.

By way of further example, it should also be noted that, although we are not now adopting the proposed rule to specifically and categorically prohibit direct carriers from furnishing "money, labor, services or other thing of value" to a tour operator in connection with the advertising or promotion of identifiable charter tour programs, we do not thereby imply any doubt that the general prohibitions of section 403 and 404 of the Act forbid such payments and practices where they are used as vehicles for rebating to—or giving preferential treatment to—favored chartering tour operators.

In short, our termination of the instant rulemaking proceeding is intended to convey only our present view that: (1) any *truthful* advertisement of an ITC (or OTC) may be freely published, subject only to the statutory prohibition, in section 411 of the Act, against "unfair or deceptive practices or unfair methods of competition" in the sale of air transporation—whether by the direct carrier, the tour operator, or their agent; and (2) in placing—or sharing in the cost of—an advertisement or promotion naming one or more ITC (or OTC) operator,[9] the direct carrier must take heed of the statutory prohibitions, in sections 403 and 404 of the Act, against rebates or undue preferences and discrimination.

Finally, it should be emphasized that our termination of the instant proceedings is predicated on the absence of what we would consider persuasive reasons to adopt regulations restricting otherwise lawful advertising practices. Should our developing experience with these types of charters demonstrate that case-by-case enforcement of the underlying statutory prohibitions is not adequate, then we shall of course be free to exercise our responsibility to consider the adoption of such regulations as are needed to facilitate enforcement of these statutory proscriptions.

Accordingly, the Board hereby terminates the rulemaking proceeding in Docket 26712.

[6] SPR–85, 40 F.R. 34089, August 14, 1975.

[7] SPR–85, note 48.

[8] We also note that NACA, which qualifiedly supported the proposed ITC advertising restrictions, has recently indicated that it might now reconsider its position, in light of its belief that OTC advertising should be liberalized. See NACA's letter to Chairman Robson, dated September 5, 1975, a copy of which has been filed in the correspondence section of the proceeding.

[9] Since we are here expressing our views on the advertising of OTC's as well as ITC's, we take this occasion to clarify the significance of the provision in § 378a.43, insofar as it prohibits the payment of "commissions, fees, or other compensation" by a direct carrier to the OTC operator. That prohibition is merely declaratory of the statutory prohibition against rebates, *i.e.*, payments by the direct carrier to the chartering tour operator are forbidden only to the extent that they constitute "compensation," as distinguished from "reimbursement." There is thus no inconsistency between § 378a.43 and what we say here: so long as there is no more than a *bona fide* sharing of advertising costs, then no rebate is involved.

(Section 204(a), of the Federal Aviation Act, as amended, 72 Stat. 743; 49 U.S.C. 1324.)

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

[Rel. No. 34–11872; File S7–605]

FINGERPRINTING OF SECURITIES INDUSTRY PERSONNEL

Exemptions

The Securities and Exhange Commission today announced that it has under consideration the adoption of Rule 17f–2[1] under section 17(f)(2) of the Securities Exchange Act of 1934 (the "Act") [15 U.S.C. 78a *et seq.*, as amended by Pub. L. No. 94–29 (June 4, 1975)], to provide certain exemptions from the requirement that every member of a national securiies exchange, broker, dealer, registered transfer agent, and registered clearing agency require each of its partners, directors, officers, and employees to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General for identification and appropriate processing.

BACKGROUND

Losses due to missing, stolen, counterfeit and lost securities have become a substantial problem in recent years. Congressional inquiries and Commission analysis in the Study of Unsafe and Unsound Practiees of Brokers and Dealers indicated that one of the factors contributing to the increase in securities thefts was the inability to identify security-risk employees.

Section 17(f)(2) of the Securities Acts Amendments of 1975 provides that every member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency, shall require that each of its partners, directors, officers, and employees be fingerprinted and shall submit such fingerprints, or cause the same to be submitted, to the Attorney General of the United States for identification and appropriate processing.

The statute further provides that the Commission, by rule, may exempt from the provisions of this section upon specified terms, conditions, and periods, any class of partners, directors, officers, or employees of any such member, broker, dealer, transfer agent, or clearing agency, if the Commissioin finds that such action is not inconsistent with the public interest or the protection of investors.

[1] Rule 17f–1 is reserved.

V40238 DEC 10 75 XUM

PROPOSED RULE 17f-2

Proposed Rule 17f-2 provides that every partner, director, officer, and employee of a member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency shall be fingerprinted and shall submit, or have submitted, said fingerprints to the Attorney General of the United States for identification and appropriate processing, with certain stated exceptions. Subparagraph (a)(1) exempts persons who are not in any manner engaged in the sale of securities. Subparagraph (a)(2) exempts persons who do not have access to the handling or processing of securities or monies or original books and records relating thereto. Subparagraph (a)(3) exempts persons who have no direct supervisory responsibility over persons engaged in the activities enumerated above. Subparagraph (a)(4) exempts outside directors who do not participate in any of the enumerated activities. It bears emphasis that the exemptions provided for in Rule 17f-2 are permissive and not mandatory. An organization may, of course, require fingerprinting of any persons granted exemptions herein, as a matter of policy.

It should be noted that the words "do not have access to" in subparagraph (2) and "do not have direct supervisory responsibility over" in subparagraph (3) are given their ordinary meanings and are not used in a technical sense. For example, an officer of a large organization which acts as its own transfer agent might, by virtue of his position, have overall responsibility for, and potential access to, his company's transfer functions. Unless said officer regularly or routinely participates in some aspect of the processing of securities and, directly or indirectly, has actual, physical access to the securities themselves, he would ordinarily not fall within the purview of subparagraphs (a)(2) and (a)(3). A lack of adequate physical security may cause any exempted person in any entity to lose such status if he has access to monies, securities or records as set forth in paragraph (a).

In order to avoid unnecessary duplication and to reduce administrative burdens, paragraph (b) exempts persons who, pursuant to any other law, rule, or regulation, are fingerprinted and have their fingerprints processed by the Attorney General. Therefore, persons whose fingerprints are submitted to the Attorney General through state or Federal agencies, or otherwise, are not expected to be refingerprinted, in order to be in compliance with the rule. Included herein would be employees of banks whose fingerprints are submitted to the Attorney General for appropriate processing. Similarly, the rule provides an exemption in paragraph (c) for those persons who submit their fingerprints to a self-regulatory organization which forwards the prints to the Attorney General pursuant to a plan filed with and approved by the Commission.

Every member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency is required under paragraph (d) to make and keep records pertaining to fingerprinting of its partners, directors, officers and employees. Paragraph (e) of the rule provides for the submission of a statement to be entitled "Notice Pursuant to Rule 17f-2," containing information with respect to those classes of persons which, because of the nature of the duties performed, the organization feels would not be required to be flingerprinted under paragraph (a) of the rule. Classes of persons identified in the statement as falling within one of the exemptive categories listed in paragraph (a) shall be considered exempt unless the Commission indicates otherwise. It is the duty of the organization under paragraph (e) to inform the Commission, by means of an amendment to its submission, of any significant change in its internal structure which would alter the status of exempted personnel. A copy of the statement is required to be kept and made available for inspection by the Commission or other examining authority at the principal office of the organization.

Paragraph (g) provides exemptive power to the Commission when the Commission finds that the granting of an exemption is not inconsistent with the public interest or the protection of investors.

The Commission has determined that the rule and accompanying amendments impose no burden on competition not necessary or appropriate in furtherance of the purposes of the Act and are not inconsistent with the public interest or the protection of investors.

1. Commission Action: Pursuant to sections 17(a), 17(f)(2), and 23(a) of the Securities Exchange Act of 1934, the Securities and Exchange Commission proposes to adopt section 240.17f-2 and to amend sections 240.17a-3(a) and 240.17a-4(e) in Chapter II of Title 17 of The Code of Federal Regulations as follows:

Section 240.17f-2 is added to 17 CFR as follows:

§ 240.17f-2 Fingerprinting of securities industry personnel.

(a) Every person who is a partner, director, officer or employee of a member of a national securities exchange, broker, dealer, registered transfer agent, or registered clearing agency is required to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General of the United States for identification and appropriate processing *except:*

(1) Persons who are not engaged in the sale of securities;

(2) Persons who do not have access to the handling or processing of securities or monies or original books and records relating thereto;

(3) Persons who do not have direct supervisory responsibility over persons engaged in the above activities; and

(4) Persons who serve solely as directors and are not otherwise engaged in any of the above activities.

(b) Those persons not exempted under paragraph (a) of this section, who are fingerprinted pursuant to any other law, rule, or regulation of any state, the Federal government, or respective agencies thereof, and submit, or cause to be submitted, such fingerprints to the Attorney General of the United States for identification and appropriate processing, may satisfy the requirements of this section by compliance with such other law, rule, or regulation.

(c) Those persons not exempted under paragraphs (a) or (b) of this section may satisfy the requirements of this section by submitting their fingerprints to a registered national securities exchange or a registered national securities association which forwards said fingerprints to the Attorney General for identification and appropriate processing pursuant to a plan filed with the Commission by a registered national securities exchange or a registered national securities association. Such plan shall not become effective unless the Commission, having due regard for the public interest and the protection of investors, ueclares the plan to be effective. Furthermore, the Commission, in declaring any such plan effective, may impose such terms and conditions relating to the provisions of the plan and the period of its effectiveness as may be deemed necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

(d) Every member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency shall maintain, with regard to every person required to be fingerprinted under paragraph (a) of this section, the processed fingerprint card, or other record when the card it not returned after processing, with notations indicating who rolled the fingerprints, when the card was received by the Attorney General, and any information received from the Attorney General, as a result of this process, for a period of three years after termination of employment or association of such person. Such records shall be kept in an easily accessible place and shall be made available to the Commission or other examining authority upon request.

(e) Every member of a national securities exchange, broker, dealer, registered transfer agent, and registered clearing agency shall submit to the Commission's principal office in Washington, D.C. and to the regional office of the Commission for the region in which the organization has its principal place of business, not later than April 1, 1976, a statement, to be entitled "Notice Pursuant to Rule 17f-2," of those classes of persons who fall within the exemptions listed in paragraph (a) of this section, and hence are sought to be exempted from the fingerprinting requirements of section 17(f)(2) of the Act. Such statement shall indicate the nature of the duties performed by such classes of persons and shall describe the measures which the organization has employed to ensure that only persons complying with the requirements of this section have access to the handling or processing of securities or monies or original books and records relating thereto. Classes of persons so identified shall be exempt from the requirements of section 17(f)(2) of the Act unless the Commission notifies the organization to the contrary. A copy of such statement shall be available for inspection by the Commission or other examining authority at the principal office of the member, broker, dealer, registered transfer agent, or registered clearing agency. The statement shall be amended whenever there is a substantial change in the organizational structure of the entity affecting the status of classes of persons who may be exempt under paragraph (a).

(f) Every person who is a partner, director, officer, or employee of a member of a national securities exchange, broker, dealer, registered transfer agent, or registered clearing agency, and who is required to be fingerprinted pursuant to paragraph (a) of this section, and who was employed by or associated with such organization prior to April 1, 1976, shall be exempt from the provisions of paragraph (a) until January 1, 1977.

(g) The Commission, upon specified terms, conditions, and periods, may grant exemptions to any class of partners, directors, officers, or employees of any member of a national securities exchange, broker, dealer, registered transfer agent, or registered clearing agency, if the Commission finds that such action is not inconsistent with the public interest or the protection of investors.

2. Rules 17a-3(a) and 17a-4(e) [17 CFR 240.17a-3(a) and 240.17a-4(e)] would also be amended to address the recordkeeping and retention requirements set forth in Proposed Rule 17f-2(d) and (e).

Paragraph (a)(13) is added as follows:

§ 240.17a-3 Records to be made by certain exchange members, brokers and dealers.

(a) • • •

(13) Records required to be maintained pursuant to § 240.17f-2, paragraph (d).

• • • • •

Paragraph (e) is revised as follows:

§ 240.17a-4 Records to be preserved by certain exchange members, brokers, and dealers.

(e) Every such member, broker and dealer shall maintain and preserve in an easily accessible place:

(1) all records required under paragraph (a)(12) of § 240.17a-3 until at least three years after the "associated person" has terminated his employment and any other connection with the member, broker, or dealer.

(2) all records required under paragraph (a)(13) of § 240.17a-3 until at least three years after the termination of employment or association of those persons required by § 240.17f-2 to be fingerprinted; and all records required pursuant to § 240.17f-2(e) for three years.

EFFECTIVE DATES

Persons who would be required to be fingerprinted pursuant to Proposed Rule 17f-2 and who are employed by or associated with an organization prior to April 1, 1976 would be exempt from said requirements until January 1, 1977. All other persons would be fingerprinted commencing on April 1, 1976. The proposed amendments to Rules 17a-3 and 17a-4 would become effective on April 1, 1976.

SOLICITATION OF PUBLIC COMMENT

All interested persons are invited to submit written statements of views and comments on the adoption of Proposed Rule 17f-2 to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 on or before February 1, 1976. They should refer to File No. S7-605. All comments will be available for public inspection.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

NOVEMBER 26, 1975.

[FR Doc.75-33237 Filed 12-9-75;8:45 am]

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1108]

[Ex Parte No. MC-82 (Sub-No. 1)]

PROCEDURES IN MOTOR CARRIER REVENUE PROCEEDINGS

Intercity Bus Industry

NOVEMBER 11, 1975.

The Interstate Commerce Commission, in the exercise of its power to prescribe just and reasonable fares for the transportation of passengers by common carriers by motor vehicle, gives due consideration to, among other factors, the need, in the public interest, of adequate and efficient transportation service by such carriers at the lowest cost consistent with the furnishing of such service; and, to the need for revenues sufficient to enable such carriers under economical and efficient management, to provide such service.

In Ex Parte No. MC-82, *New Procedures in Motor Carrier Rev. Proc.*, 339 I.C.C. 324, 341, the Commission, in noting the purpose of the proposed procedures therein, stated:

They (the proposed procedures) are not intended to limit the type of evidence which motor carrier respondents might wish to introduce, but are designed to reduce the time required for ultimate disposition, achieve greater uniformity in data submitted, avoid the service of detailed orders in individual proceedings, and provide adequate notice to the carriers and to the public of the evidence required.

It now appears that the same objectives and purposes for which the Ex Parte No. MC-82 proceeding was instituted, relative to motor common carriers of general freight, may also be applicable to motor common carriers of passengers in the so called intercity bus industry. Accordingly, there are set forth hereto proposed procedures governing the type of evidence to be submitted in proposed general rate increases filed by the National Bus Traffic Association, Inc., for and on behalf of its members.

On or before January 26, 1976, any interested party may file with the Secretary of the Commission comments regarding the proposed procedures. A signed original and 15 copies should be submitted. After comments have been considered the Commission will determine whether to require compliance with these procedures, or with some variation thereof.

All written submissions will be available for public inspection during regular business hours in the Offices of the Interstate Commerce Commission, 12th Street and Constitution Avenue NW., Washington, D.C. 20423.

[SEAL] ROBERT L. OSWALD,
Secretary.

Accordingly, it is proposed to amend Chapter X of 49 CFR by adding Part 1108 to read as follows:

PART 1108—PROCEDURES TO BE FOLLOWED IN MOTOR CARRIER REVENUE PROCEEDINGS—INTERCITY BUS INDUSTRY

Sec.

1108.1 Application.
1108.2 Study carriers.
1108.3 Revenue data for study carriers.
1108.4 Revenue need.
1108.5 Official notice.
1108.6 Service.
1108.7 Availability of underlying data.
Schedule A
Schedule B
Schedule C
Schedule D
Schedule E
Schedule F
Schedule G
Appendix A

§ 1108.1 Application.

(a) Upon the filing by the National Bus Traffic Association, Inc., (NBTA) on behalf of its carrier members, or by such other agencies as the Commission may by order otherwise designate, of agency tariff schedules which contain proposed general increases in fares or charges where such proposal would result in an increase of $1 million or more in the annual operating revenues on the traffic affected by the proposal, the motor common carriers of passengers on whose behalf such schedules are filed shall, concurrently with the filing of those tariff schedules, file and serve, as provided hereinafter, a verified statement presenting and comprising the entire evidential case which is relied upon to support the proposed general increase. Carriers thus required to submit their evidence when they file their schedules are hereby notified that sepcial permission to file those schedules shall be conditioned upon the publishing of an effective date at least 45 days later than the date of filing, to enable proper evaluation of the evidence presented. Data to be submitted in accordance with §§ 1108.2–1108.4 of

V40238 DEC 10 75 XUM

this part represent the minimum data required to be filed and served, and in no way shall be considered as limiting the type of evidence that may be presented at the time of filing of the schedules. If a formal proceeding is instituted, the carriers are not precluded from updating the evidence submitted at the time of filing of the schedules to reflect the current situation.

(b) When filing tariff schedules other than those described hereinabove, the carriers or their tariff publishing agencies shall be required to comply with such procedures as the Commission may direct in the event an investigation is instituted. Nothing stated in this part shall relieve the carriers of their burden of proof imposed under the Interstate Commerce Act.

§ 1108.2 Study carriers.

(a) For the purposes of this proceeding the "study carriers" shall consist of those Class I motor common carriers of passengers which are members of NBTA and which, during the latest calendar year available preceding the filing date of the proposed increase in fares and/or charges, derived $500,000 or more in annual operating revenues from the issue traffic, or 1 percent or more of the total annual operating revenues received by all carriers from the issue traffic. Issue traffic is defined as that traffic (services) directly affected by the proposed increases in fares and/or charges.

(b) To corroborate the selection of the above study carriers, and to provide a data base for a continuing evaluation of the validity and usefulness of those carriers as a study group, respondents shall submit, as a part of their verified statement (justification), a list of all carriers participating in the issue traffic (services) and the amount of annual operating revenues received by each carrier from the total traffic at issued during the above specified calendar year. The dollar amounts of those revenues, for each carrier, shall be arrayed in descending order, and there shall be shown, among other things, the percentage distribution of those revenues in relationship to the total issue traffic revenues for all carriers. This list of carriers and the applicable carrier's revenues shall be referred to as Schedule A, Participating Carriers' Revenue Data, a sample of which is provided herein.

§ 1108.3 Revenue data for study carriers.

The study carriers, as identified above, shall submit the revenue data called for in Schedule B herein, the purpose of which is to determine the amount of increased revenues which might be expected under the proposed increase in fares and/or charges on the issue traffic, and to evaluate the revenue aspects of the non-issue traffic, including that traffic subject to Interstate Commerce Commission rate regulation but not here at issue, and that traffic which is intrastate in character and under the jurisdiction of state public utility commissions.

§ 1108.4 Revenue need.

The "study carriers" shall submit evidence of the sum of money, in addition to operating expenses, including that needed to attract debt and equity capital, which they require to insure financial stability and the capacity to render service. This evidence, shall include data required by Schedules C through G.

§ 1108.5 Official notice.

The Commission will take official notice of all of the proponent carriers' annual and quarterly reports on file with the Commission.

§ 1108.6 Service.

The detailed information called for herein shall be in writing and shall be verified by a person or persons having knowledge thereof. The original and 16 copies of each verified statement for the use of the Commission shall be filed with the secretary, Interstate Commerce Commission, Washington, D.C. 20423. One copy of each statement shall be sent by first-class mail to each of the regional offices of the Commission in the area affected by the proposed increase, where it will be open to public inspection. A copy of each statement shall be mailed by first-class mail to each party of record in the last formal proceeding concerning a general increase in bus passenger fares in the affected area or territory. Otherwise, the service requirements of Rule 22 of the Commission's General Rules of Practice shall be obesrved.

§ 1108.7 Availability of underlying data.

All underlying data used in preparation of the material outlined above shall be made available in the office of the party serving such verified matter during usual office hours for inspection by any party of record desiring to do so, and shall be made available to the Commission upon requests therefor. The underlying data shall be made available also at the hearing, but only if, and to the extent, specifically requested in writing and required by any party for the purpose of cross-examination.

EXPLANATORY—SCHEDULE A

Purpose—The purpose of Schedule A is to corroborate the selection of the "study carriers", as defined in § 1108.2 of the prescribed procedures, and to provide a data base for the continuing evaluation of the validity and usefulness of the "study carrier" group.

Calendar Year—For the purpose of this schedule use the latest calendar year available preceding the filing date of the proposed increased fares and/or charges.

Column (a)—The annual report number is that number assigned to the carrier by the Bureau of Accounts, Interstate Commerce Commission, for identification purposes.

Column (b)—List carrier members of National Bus Traffic Association and other interested carriers participating in the tariffs of NBTA which will be affected by the proposal.

Column (c)—Use designation in Code of Federal Regulations, § 1240.4. For example, Class I carrier insert "I".

Column (d)—Use the following code for this column. For study carriers (as defined in § 1108.2) insert "S". For non-study carriers insert "NS".

Column (e)—Use amount shown in carrier's Annual Report, Schedule 2998, Line 9.

Column (f)—Issue traffic is defined as that traffic (services) directly affected by the proposed increase in fares and/or charges.

Columns (g) and (h)—These columns are self explanatory and obtained by calculations using columns (e) and (f).

EXPLANATORY—SCHEDULE B

Purpose—The purpose of this schedule is to obtain—for each study carrier and by totals for all study carriers.—(1) total operating revenues, (2) revenues attributable to the various types of traffic at issue, (3) revenue attributable to the total non-issue traffic, and (4) miscellaneous station and other operating revenues. These data shall be provided for the specified study periods, namely: base year actual, pro forma year based on current revenues, and pro forma year based on proposed revenues.

The pro forma year based on proposed revenues for the traffic at issue will be compared to the issue traffic revenues for the pro forma year based on current revenues and for the base year actual to determine the amount of the proposed revenue increase being sought over these two periods. In addition, the revenue data for the total issue traffic (column (h)), will also be used in Schedule C, Part II as a basis for allocating increased costs, i.e., the increased operating expenses and the increased "sum of money" costs.

Base Year Actual—Data to be reported in this and other schedules herein for the base year actual shall be based on the 4-quarter calendar year periods identified below:

Filing month of verified statement	*4-quarter calendar year period ending—*
January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, filing-month year.
August	Do.
September	Do.
October	June 30, filing month year.
November	Do.
December	Do.

The 4-quarter calendar year periods identified above represent the minimum requirement. However, in event a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable then that more current quarter may be used in the base year actual. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year is obtainable, then the base year actual ending December 31 may be used in lieu of the base year actual ending September 30.

Pro Forma Year Data—Revenue data for the pro forma year shall be reported in two ways, namely: based on current revenues and based on proposed revenues. Separate schedules are required for each pro forma year. These data do not represent a forecast but reflect the results of 12 months of operation at particular rate levels. Thus, data for the *pro forma year based on current revenues* should be based on a restatement of the revenue data for the *base year actual* to reflect fares and/or charges which are currently in effect. Similarly, data for the *pro forma year based on proposed revenues* should reflect a restatement of the base year actual data but at levels reflecting the proposed fares and/or charges.

Column (a)—Insert in this column the company name of each "study carrier" as defined in § 1108.2 of the prescribed procedures.

Column (b)—Use source comparable to that in the carrier's Annual Report, Schedule 2998, Line 9. The dollar amount in this column, for each study carrier, should equal the total of columns (h), (i) and (j).

Columns (c) through (h)—As defined in § 1108.2, "issue traffic" means that traffic (service) affected by the proposed increase in fares and/or charges, and is limited to the fares and/or charges published by NBTA in schedules and tariffs filed with the Interstate Commerce Commission. For the purpose of the proposed increases filed under the prescribed procedures of this proceeding, the services indicated in columns (c) through (g) shall be defined as follows:

Intercity Passenger (Column (c))—This passenger transportation service consists of a regular route, daily scheduled, intercity bus service performed under published time schedules, and irrespective of the number of passengers.

Express (Column (d))—This service consists of the transportation of baggage, express matter, newspapers, etc., in the same vehicle with passengers on a space-available basis conducted as an *incident* to the regular route daily scheduled passenger transportation service.

Charter (Column (e))—This passenger transportation service consists of chartering a bus by a bona-fide group, at a published rate for the exclusive use of the bus by the chartered party. This service includes service performed under tariffs which provide that, upon the purchase of a specified minimum number of individual tickets, the persons purchasing that number of tickets will be afforded exclusive occupancy of a particular bus.

Special (Column (f))—This passenger transportation service involves passengers to whom individual tickets have been sold for transportation to a specific destination or special event, or for a particular tour, or the like.

Other (specify) (Column (g))—In this column specify and explain the nature of the traffic (service) involved, which would be separate and distinct from that identified for columns (c) through (f).

Total Issue Traffic Revenues (Column (h))—The total issue traffic revenues in this column should equal the sum of columns (c) through (g).

Column (i)—The revenues to be reported in this column shall consist of those revenues other than "total issue traffic revenues" (Column (h)), and "miscellaneous station and other operating revenues" (column (j)). Thus, "nonissue traffic revenues" mean those revenues accruing from providing the types of services indicated in columns (c) through (g) but which may be "intrastate" in nature, "exempt" as provided under Section 22 of the Interstate Commerce Act, or which are otherwise not at issue in a proposed fare and/or charge increase. Such non-issue traffic may also include a commuter or mass transportation service, which is the transportation of passengers generally performed within a city or town and the suburban areas contiguous thereto. However, in some instances this service may also be intercity in character where the cities involved are within relatively short distances of each other and the primary purpose is the mass transportation of commuter passengers to and from these cities.

Column (j)—For the purpose of this schedule the revenues to be reported in this column shall consist of those in Account 3600, Miscellaneous Station Revenue, and in Account 3900, Other Operating Revenue. (See 49 CFR 1206).

Presentation of Statement on Revenue Sample Studies—Historically, in order to separate interstate from intra-state revenues, it has been necessary for annual report purposes for each carrier to conduct sample studies of its traffic operations. Hereafter, in order to expedite the evaluation of such samples, and of the evidence derived therefrom, each respondent shall submit, in connection with its sample or samples, a statement in conformance with the staff report entitled "Guidelines for the Presentation of the Results of Sample Studies," February 1, 1971, the pertinent portion of which is attached as Appendix A to these proposed procedures.

EXPLANATORY—SCHEDULE C (PART I)

Purpose—The purpose of Schedule C, Part I, is to develop income statement data, including system operating expenses, and the system sum of money above operating expenses assigned to transportation service, for the study carriers and for the study periods specified. These costs are used in Schedule C, Part II, to measure the cost increases over specified time periods, which are then allocated to the traffic at issue and compared to the increased revenues.

Study Carrier Groupings—A separate Schedule C, Part I, shall be prepared for each of the following:

1. Greyhound Lines, Inc.
2. All study carriers combined (excluding Greyhound Lines, Inc.).
3. All study carriers combined (including Greyhound Lines, Inc.).

Column (b)—The annual report sources in this column refer to the 1974 Annual Report Form MP-1. For years prior or subsequent to 1974, use comparable annual report sources.

Column (c)—Data reported in column (c) shall be based on that four-quarter period immediately preceding the base year actual. If, for example, the base year actual begins on July 1, 1975, the data reported in column (c) shall be based on the 12 months ended June 30, 1975.

Column (d)—Data to be reported in this column for the *base year actual* shall be based on the 4-quarter calendar year periods identified below:

Filing month of verified statement	*4-quarter calendar year period ending—*
January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, filing-month year.
August	Do.
September	Do.
October	June 30, filing-month year.
November	Do.
December	Do.

The 4-quarter calendar year periods identified above represent the minimum requirement. However, in the eventt a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable, the more current quarter may be used in the *base year actual*. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year is obtainable then the *base year actual* ending December 31, may be used in lieu of the *base year actual* ending September 30.

Columns (e) *and* (f)—Columns (e) and (f) shall contain the pro forma year data. These data do not represent a forecast, but the results of 12 months of operations at cost and fare/charge levels existing at a specific time.

The data reported in column (e) shall be the base year actual (column (d)) restated to reflect conditions (wage, price, and productivity, etc.) prevailing on or near the effective date of the proposed increase. Revenues in column (e) shall be based on fares and charges which are currently in effect.

The data reported in column (f) shall also be the base year actual (column (d)) restated to reflect conditions (wage, price and productivity, etc.) prevailing on or near the effective date of the proposed increase. Unlike column (e), however, revenues in column (f) shall be based on the proposed fares and charges.

Columns (g) *and* (h)—Columns (g) and (h) shall contain the forecast year data. The data reported in column (g) shall be a forecast for that four-quarter period immediately following the base year actual. The forecast year will always begin on either Jan. 1, April 1, July 1 or Oct. 1. If, for example, the base year actual ends on June 30, 1975, the forecast year will begin on July 1, 1975. Revenues in column (g) shall be based on fares and charges currently in effect.

The data reported in column (h) shall, like column (g), be a forecast for the four-quarter period immediately following the base year actual. Unlike column (g), however, the revenues in column (h) shall be calculated on the basis of the proposed fares and charges.

Pro Forma and Forecast Year Data—Data for these time periods shall be appropriately explained and supported. Each of the dollar figures called for in these columns shall be accompanied by an explanation of the bases

V 40 238 DEC 10 75 XUM

or methods of restatement and explicit identification of all assumed or forecasted changes in income statement data, including changes in revenues, expenses, wage rates, price levels and productivity, as compared with the base year actual results. This evidence should be adequate to enable the Commission to find that the proposed fare/charge increase:

(a) Is cost justified and does not reflect future inflationary expectations;

(b) Takes into account expected and reasonable productivity gains;

(c) Is not excessive in that it does not exceed those operating expenses and "sum of money" costs needed to provide adequate and safe service or to provide for necessary expansion to meet future requirements for transportation services; and

(d) Is not excessive in that it does not exceed that rate of return needed by the carriers to attract debt and equity capital at reasonable costs.

EXPLANATORY—SCHEDULE C (PART II)

Purpose—The purpose of Schedule C, Part II, is threefold: *First*, to develop the percentage relationship between total issue traffic revenues and total system operating revenues (less miscellaneous station, and other operating revenues) (Line 3); *Second*, to allocate the increased system operating expenses and "sum of money" items to the traffic at issue (Line 7); and, *Third*, to make a comparison of the increased expenses and sum of money items on the issue traffic with the increased revenues on this traffic (Line 8). Four time periods are used to measure the increase in expenses, sum of money items, and revenues, namely: (a) 4-quarter period preceding base year actual, (b) base year actual, (c) pro forma year, and (d) forecast year. These time periods are identified in Schedule C, Part I.

The critical procedure in Part II is the allocation of increased system operating expenses and sum of money items to the traffic at issue based on *revenue* relationships, i.e., based on the percentage relationship of the total issue traffic revenues to the total system revenues with minor deletions. This procedure is necessary *at this time* because of the absence of regulatory or managerial accounting systems designed for "costing" purposes, or, in the alternative, a "cost formula" which, together with appropriate data from engineering and traffic studies, could be used to "cost out" the particular bus transportation services that may be at issue in a given general increase proceeding. The fallacy in using revenues as an allocation factor is the assumption that there is a direct relationship between revenues and costs, or, in other words, that revenues bear the same relationship to costs regardless of the type of transportation services provided. However, differential charging is an economic fact, and cost of service is not the sole factor to be considered in rate making.

Notwithstanding the deficiency in using revenues as an allocation factor, it is necessary to obtain some expression of how the increased system-wide operating expenses, and sum of money items may be impacting on the traffic at issue. An evaluation of this impact is essential to determine whether, in fact, the issue traffic is bearing "too much" or "too little" of the increased costs and the overall burden vis-a-vis the "non-issue" traffic which may include traffic which is interstate or intrastate in character—with the latter traffic being regulated by state utility commissions.

Study Carrier Groupings—The study carrier groups for Part II shall be the same as those designated for Part I.

Time Periods—The time periods shown in Part IIA, *Revenue Distribution*, are the same as those indicated for Part I. In Part IIB, *Allocation to Traffic at Issue*, although the time periods are the same as in Part IIA they serve a different purpose, i.e., they serve to measure the increases in operating expenses, sum of money, and revenues, as explained in the following:

Line 1, Revenues Applicable to Traffic at Issue—Data applicable to columns (c) through (h) on this line should be obtained from records or special studies of the individual carriers and appropriately combined into the study carrier groups required for Schedule C. Since there are no industry-wide studies or uniform procedures for obtaining revenue data applicable to the issue traffic, the study carriers should be careful to maintain proper records of the underlying data in the event the Commission should request their submission. (See proposed rules Section 1105.7).

Lines 2 and 3—These lines are self-explanatory.

Lines 4, 5 & 6—These lines represent the increased system operating expenses (Line 4), increased system sum of money (Line 5), and the total of these items (Line 6). For example, for Part II, Line 4, Column (d), base year actual over preceding 4-quarter period, the increased system operating expenses are obtained by subtracting the total expenses shown in Schedule C, Part I, Line 10, *Column* (c), from the comparable total expenses shown in Schedule c, Part I, Line 10, *Column* (d). The increased sum of money items to be shown on Line 5 are obtained in a similar matter but using Schedule C, Part I, Line 29. Part II, Line 6 then represents a total of Lines 4 and 5.

For Lines 4, 5 and 6, Columns (e) and (f), it should be noted that the amounts reported in Columns (e) and (f) should be the same. In other words, there should be no change in the increased expenses, sum of money, and total because the subheadings of Columns (e) and (f), (i.e., based on current revenues, and based on proposed revenues, respectively) apply only to the revenues to be shown on Line 8. The same situation also applies with respect to Columns (g) and (h).

Line 7—This line represents an allocation of the total increased system operating expenses and sum of money (Line 6) to the traffic at issue, and is obtained by multiplying the amounts on Line 6 by the respective column percentages shown on Line 3.

Line 8—The increases in revenues on the traffic at issue are obtained from Part II, Line 1, by using the time periods specified. For example, the increased revenues on the issue traffic for the base year actual over the preceding 4-quarter period (Line 8, Column (d)) is obtained by subtracting the revenues shown on Line 1, Column (c) from the revenues shown on Line 1, Column (d).

Line 9—This line represents the ratio of increased revenues to increased costs and is obtained by dividing Line 8 by Line 7.

V40238 DEC 10 75 XUM

EXPLANATORY—SCHEDULE D (PART I)

Purpose—The purpose of Schedule D (Part I) is to ascertain the financial posture of the individual study carriers and study carrier groupings by an analysis of certain key financial data, with a view to determining revenue needs.

Study Carrier Groupings—A separate Schedule D (Part I) shall be prepared for each of the following:

(1) Individual study carriers.
(2) All study carriers combined (excluding Greyhound Lines, Inc.)
(3) All study carriers combined (including Greyhound Lines, Inc.)

Column (b)—The annual report sources in this column refer to the 1974 Annual Report Form MP-1. For years prior or subsequent to 1974, use comparable sources.

Column (c)—If the fare/charge increase is filed during the first six months of the calendar year, the data reported in column (c) shall be based on the 3rd calendar year preceding the filing year. For example, if the rate increase was filed on May 15, 1975, column (c) shall report data for calendar year 1972.

If the fare/charge increase is filed during the last six months of the calendar year, the data reported in column (c) shall be based on the 2nd calendar year preceding the filing year. If, for example, the rate increase is filed on Nov. 15, 1975, column (c) should report data for calendar year 1973.

Column (d)—If the fare/charge increase is filed during the first six months of the calendar year, the data reported in column (d) should be based on the 2nd calendar year preceding the filing year. For example, if the rate increase is filed on May 15, 1975, column (d) should report data for calendar year 1973.

If the rate increase is filed during the last six months of the calendar year, the data reported in column (d) shall be based on the 1st calendar year preceding the filing year. If, for example, the fare/charge increase is filed on Nov. 15, 1975, column (d) should report data for calendar year 1974.

Column (e)—Data to be reported in this column for the *base year actual* shall be based on the 4-quarter calendar year periods identified below:

Filing month of certified statement	*4-quarter calendar year period ending—*
January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, filing-month. year.
August	Do.
September	Do.
October	June 30, filing-month. year.
November	Do.
December	Do.

The 4-quarter calendar year periods identified above represent the minimum requirement. However, in event a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable, the more current quarter may be used in the *base year actual*. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year is obtainable, the base year actual ending December 31, may be used in lieu of the base year actual ending September 30.

EXPLANATORY—SCHEDULE D (PART II)

Purpose—Schedule D (Part II) is designed to further facilitate an assessment of the carriers' financial posture by segregating the impact of the Commission's deferred tax accounting rule change on their financial statements.

If the financial data reported in either column (c), (d) or (e) of Schedule D (Part I) apply to periods subsequent to Jan. 1, 1974 (the effective date of the deferred tax rule change), it will be necessary to complete the corresponding column of Schedule D (Part II). For example, if the data reported in column (d) of Schedule D (Part I) is based on calendar year 1974, it will be necessary for the carriers to complete column (d) of Schedule D (Part II).

Study Carrier Groupings—The study carrier groups for Part II shall be the same as those designated for Part I.

Column (b)—The annual report sources in this column refer to the 1974 Annual Report Form MP-1. For years prior or subsequent to 1974, use comparable sources.

[1] Show average of beginning and end-of-year figures.

[2] Multiply the percent of net operating property to total net tangible property (Line 22÷Line 23) by the amount on Line 30. Add the resulting amount to Line 22.

( ) Greyhound Lines, Inc.
( ) All study carriers combined (excluding Greyhound Lines, Inc.)

	Application of funds:			
27	Investment in transportation property			
28	Investment in miscellaneous physical property			
29	Investments and advances, affiliated ICC regulated carriers			
30	Investments and advances, other affiliated companies			
31	Total investments and advances, affiliated companies			
32	Investments in nonaffiliated companies			
33	Advances, notes and other debts repaid to other companies			
34	Capital stock of own issue reacquired			
35	Funded debt and other obligations paid or reacquired (except equipment obligations)			
36	Equipment obligations paid or reacquired			
37	Net increase in sinking and other special funds			
38	Payment of dividends (other than stock dividends)			
39	Net increase in working capital			
40	Other applications (specify)			
41				
42				
43				
44	Total application of funds (should be same as line 26)			

EXPLANATORY—SCHEDULE E

Purpose: Schedule E is designed to provide the Commission with an indication of the carriers' sources and uses of funds over the recent past.

Study Carrier Groupings—A separate Schedule E shall be prepared for each of the following:

(1) Greyhound Lines, Inc.
(2) All study carriers combined (excluding Greyhound Lines, Inc.).
(3) All study carriers combined (including Greyhound Lines, Inc.).

"Funds"—The term "funds" for the purpose of this schedule shall include all assets or financial resources even though a transaction may not directly affect cash or working capital. For example, the purchase of property in exchange for bonds or shares of stock would be an application of funds for investment in property provided by the issue of securities.

Sources and uses of funds should be individually disclosed. For example, outlays for fixed assets should not be reported net of retirements.

Column (b)—Data reported in Column (b) should be based on the 3rd calendar year preceding the effective year of the proposed rate increase.

Column (c)—Data reported in Column (c) should be based on the 2nd calendar year preceding the effective year of the proposed rate increase.

Column (d)—Data reported in Column (d) should be based on the 1st calendar year preceding the effective year of the proposed rate increase.

The time frame requirements outlined above apply only if the proposed rate increase is effective during the last six months of the calendar year. If the proposed rate increase is effective during the first six months of the calendar year, the data in columns (b), (c), and (d) should be based on the fourth, third, and second calendar years, respectively, preceding the effective year of the proposed rate increase.

11	Total Affiliate Revenues for Services Rendered to Respondent (lines 1 through 10)			
12	Total Affiliate Revenues for Services Rendered to Other Than Respondents			
13	Total Affiliate Revenues (Lines 11 and 12)			
14	Total Affiliate Income From Operations Before Income Taxes			

EXPLANATORY—SCHEDULE F

Purpose—Schedule F is designed to facilitate an assessment of the effect on the carriers' profits of transactions with affiliates.

Instructions:

Schedule F should be prepared on a composite basis for all applicable study carriers (including Greyhound Lines, Inc. and Continental Trailways, Inc.).

Affiliate transactions aggregating less than $30,000 need not be reported in this Schedule.

Study Carrier Groupings—A separate Schedule F shall be prepared for each of the following:

1. Greyhound Lines, Inc.
2. All study carriers combined (excluding Greyhound Lines, Inc.).
3. All study carriers combined (including Greyhound Lines, Inc.).

Column (b)—If the fare/charge increase is filed during the first six months of the calendar year, the data reported in column (b) shall be based on the 3rd calendar year preceding the filing year. If the fare/charge increase is filed during the last six months of the calendar year the data reported in column (b) shall be based on the 2nd calendar year preceding the filing year.

Column (c)—If the fare/charge increase is filed during the first six months of the calendar year the data reported in column (c) shall be based on the 2nd calendar year preceding the filing year. If the fare/charge increase is filed during the last six months of the calendar year the data reported in column (c) shall be based on the 1st calendar year preceding the filing year.

Column (d)—Data to be reported in this column for the *base year actual* shall be based on the 4-quarter calendar year periods identified below:

Filing month of verified statement	*4-quarter calendar year period ending—*
January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, filing-month year.
August	Do.
September	Do.
October	June 30, filing-month year.
November	Do.
December	Do.

The 4-quarter calendar year periods identified above represent the minimum requirement. However, in event a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable, the more current quarter may be used in the *base year actual*. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year is obtainable then the *base year actual* ending December 31, may be used in lieu of the *base year actual* ending September 30.

V40238 DEC 10 75 XUM

EXPLANATORY—SCHEDULE G

Purpose—The objectives of this schedule are to determine changes in labor expenses, and to evaluate past changes in productivity and estimate future changes.

Study Carrier Groupings—A separate Schedule G shall be prepared for each of the following:

1. Greyhound Lines, Inc.
2. All study carriers combined (excluding Greyhound Lines, Inc.)
3. All study carriers combined (including Greyhound Lines, Inc.)

Column (b)—The annual report sources in this column refer to the 1974 Annual Report Form MP-1. For years prior or subsequent to 1974 use comparable annual report sources.

Columns (c) *and* (d)—Data reported in columns (c) and (d) shall be based on the 2 four-quarter periods immediately preceding the base year actual. If, for example, the base year actual begins on July 1, 1975, the data reported in column (c) shall be based on the 12 months July 1, 1972 through June 30, 1973; and the data in column (d) shall be based on the 12 months July 1, 1973 through June 30, 1974.

Column (e)—Data to be reported in this column for the base year actual shall be based on the 4-quarter calendar year periods identified below:

Filing month of verified statement	*4-quarter calendar year period ending—*
January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, Filing-Month Year.
August	Do.
September	Do.
October	June 30, filing-month year.
November	Do.
December	Do.

The 4-quarter calendar year periods identified above represent the minimum requirement. However, in the event a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable, the more current quarter may be used in the *base year actual*. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year are obtainable then the *base year actual* ending December 31, may be used in lieu of the *base year actual* ending September 30.

Columns (f) *and* (g)—Columns (f) and (g) shall contain the pro forma year data. These data do not represent a forecast, but the results of 12 months of operations at cost and fare/charge levels existing at a specific time.

The data reported in column (f) shall be the base year actual (column (e)) restated to reflect conditions (wage, price, and productivity, etc.) prevailing on or near the effective date of the proposed increase. Revenues in column (f) shall be based on fares and charges which are currently in effect.

The data reported in column (g) shall also be the base year actual (column (e)) restated to reflect conditions (wage, price and productivity, etc.) prevailing on or near the effective date of the proposed increase. Unlike column (f), however, revenues in column (g) shall be based on the proposed fares and charges.

Columns (h) *and* (i)—Columns (h) and (i) shall contain the forecast year data. The data reported in column (h) shall be a forecast for that four-quarter period immediately following the base year actual. The forecast year will always begin on either January 1, April 1, July 1 or October 1. If, for example, the base year actual ends on June 30, 1975, the forecast year will begin on July 1, 1975. Revenues in column (h) shall be based on fares and charges currently in effect.

The data reported in column (i) shall, like column (h), be a forecast for the four-quarter period immediately following the base year actual. Unlike column (h), however, the revenues in column (i) shall be calculated on the basis of the proposed fares and charges.

Pro Forma and Forecast Year Data—Data for these time periods shall be appropriately explained and supported. Each of the dollar figures called for in these columns shall be accompanied by an explanation of the bases or methods for restatement and explict identification of all assumed or forecasted changes in revenues, expenses, wage rates, price levels and productivity as compared with the base year actual results. This evidence should be adequate to enable the Commission to find that the proposed fare/charge increase: a) is cost justified and does not reflect future inflationary expectations; and, b) takes into account expected and reasonable productivity gains:

APPENDIX A—GUIDELINES FOR THE PRESENTATION OF THE RESULTS OF SAMPLE STUDIES

INTRODUCTION

These *Guidelines*, while adaptable to any application of probability sampling, are intended primarily to furnish a general method of presenting the basic information about a sample study or survey when used in connection with evidence submitted in proceedings before the Interstate Commerce Commission. They call for a full explanation of a sample including its purpose, design, proceduras and management, estimates based thereon and interpretations and tests of the data.

An increasingly large volume of data collected through use of probability sampling techniques are being presented in rate, merger and other proceedings. Our experience in providing technical assistance to the Commission and its hearing examiners indicates that use of these *Guidelines*, when sample evidence is introduced, could save considerable time and money for all concerned. The specific and complete information about the sample plan in initial submissions should reduce significantly the time needed for cross-examination, for appraisal of the sample's technical soundness, and for evaluation of the evidence to which the sample data are related.

Preparation and submission of a statement as contemplated by the *Guidelines* should not impose an undue burden upon the witness since the information to be supplied would be known and readily available to those designing and managing the sample study.

Appended hereto is a list of reference books relating to the basic concepts, mathematical theory, methods, procedures and practical applications of statistics, probability sampling and quality control. No attempt has been made to list all available references. Omission of any specific reference does not imply disapproval.

SPECIFIC GUIDELINES

A. Purpose of the Sample Study

Every sample study or sample survey has a purpose or objective that can be stated simply and clearly in a layman's language. For example, the purpose may be to estimate how much traffic may be diverted from a railroad as a result of a proposed merger.

a. State what is intended to be proved by the sample study.

b. State specifically all major questions the sample data are expected to answer.

c. State the degree of precision desired from the sample study. In order to achieve the purpose of a sample study, a questionnaire or data sheet must be designed to collect necessary sample data.

d. Enclose a copy of the questionnaire or data sheet used to collect the sample data.

e. Describe how the data collected by the questionnaire contributes to the major purposes of the sample study.

f. Explain the need for including questions on the questionnaire that are not directly required by the major purposes of the sample study.

g. Keep the questionnaire brief. Irrelevant questions should be eliminated.

h. Avoid ambiguity. Questions should be phrased in such a way that the answers will be interpreted specifically.

B. Designing the Sampling Plan

After listing the objectives of a sample study and preparing a questionnaire to collect necessary sample data, the most important procedure to assure statistical validity in the sampling results is the "sampling plan". The sampling plan includes: (1) definitions of the population, frames, strata, sampling elements or units, and major characteristics to be derived from the sample elements; (2) a description of the source, age, gaps, and other factors concerning the data from which the sample is to be drawn; (3) the method of sample selection such as completely random from the entire population, stratified sampling by major groups and subgroups, or by diversified frames, and whether systematic or replicated sampling plans are to be used; (4) determining the sample size by frame, strata, group, or entire population in order to provide statistical validity for the sampling results with adequate confidence; (5) detailed instructions to the enumerators (*i.e.*, people who fill out the questionnaire); and (6) a pretest of the questionnaire to discover and correct weak faults in the basic questionnaire and instructions to the enumerators, before the major effort of collecting sample data begins.

Each of these steps is discussed in the following paragraphs.

1. *Population*. The population is the complete set of all data elements of one kind which are to be studied whether accessible or not. For example, the population may consist of railroad cars as of a certain date, or carload or truckload traffic, pickup and delivery trips, claims, revenues or expenses of a given kind within a period of time.

a. Define each population in terms of specific units, extent of boundaries, time, and any other factors that describe the elements comprising the population about which estimations are to be made on a sampling basis.

b. Distinguish between the total population and the study population when the latter does not include all of the former.

c. State the size (number of elements) of each population if it can be estimated.

d. Explain how the nature or size of the population influenced the design of the sampling plan.

2. *Frames*. The frame provides a way of getting at the population. It describes the items or materials in the form of maps, lists, directories, accounts, card files, computer tapes, etc., comprising the population, or an adequate portion of it, from which suitable sample units may be selected. Frames that are readily available usually require corrections. Sometimes the frame will have to be constructed from the beginning. For example, a frame might be a list of all class I railroads, all class II motor carriers, or all freight bills for one year for a particular motor carrier.

a. Define the frame in terms of the geographical and economic scope of the survey, the categories of material covered, and the number of elements in each frame.

b. State the date and source of the frame.

c. Describe the method used to correct available frames or to construct a new frame (see reference 15).

d. If the frame does not coincide with the study population, describe the cause and magnitude of the differences between them (see reference 13).

e. Explain how the size and scope of the frame influenced the design of the sampling plan.

3. *Stratification*. Whenever a population is divided into groups such that the elements in each group are more alike than are the elements in the population as a whole, and a random sample is drawn from each group, the sample is called a stratified sample, the groups are called strata, and the process of dividing the population into groups is called stratification. Stratified sampling provides a method for obtaining greater precision in the sample estimates (see reference 14). Key factors to consider in stratification are size, composition, location, type, source and classes of data.

a. If the frame was stratified before samples are drawn, state the number of strata and describe the distinguishing feature of each stratum.

b. State the frame size, the strata sizes, and the sample sizes for each stratum in terms of the number of sample units or elements.

c. If replication as well as stratification was used, explain the procedure used (see paragraph 7).

d. If the sample was stratified after sampling, describe the procedures and estimation methods that were used.

e. Briefly state why stratification was used, in terms of expected increases in statistical validity and reduced costs for conducting the sample study.

4. *Sampling Elements, Units and Clusters*. The elements of a population are the items for which information is sought. Elements of the study population are contained in the sampling units which are itemized in the frame. In element sampling, each sampling unit contains only one element; but in a cluster sampling, the sampling units contain two or more elements. For example, a sample *element* may be one employee at a freight station, and a cluster sample *unit* would be all employees at one station when stations are sampled in the survey.

a. Define the elements contained in the population, and state the number of elements in each sampling unit.

b. When using cluster sampling, describe the clusters and their sample elements. Indicate if all the sample elements are used in the clusters.

c. If multistage sampling is used, define the sampling units and the stages so that each element belongs uniquely to one sampling unit at each stage. For example, the sampling units of the first stage (primary sampling units) could be all class I railroads; the second-stage sampling units could be railroad freight stations of the selected railroads; and the third-stage sampling units could be the employees at the selected freight stations (see references 14 or 15).

5. *Source of Data*. It is very important to know the source, age and gaps in data for the population and the sample. This has a direct bearing on nonsampling errors and the total amount of uncertainty in the survey sampling results.

a. Describe the physical form and date of the data for the population from which the sample was drawn, the handling of documents over time periods or geographical areas, how the collection or filing of source data affected the sample selection, and other factors to validate the data sources.

b. Describe the actual physical source of data such as accounting numbers, geographic or chronological numbers, other kinds of control records, or reels of magnetic tapes by computer file number.

c. State whether the source data were readily available from current records, or whether a new data collection sheet was required.

d. State whether the source data were derived from judgments that might be subject to variation from one person to another. Give reasons why judgments were made rather than obtaining data by direct measurements. List the qualifications of persons making judgments. Describe the manner in which the judgments were made. State the criteria upon which judgments were made.

6. *Major Groups and Subgroups*. Sometimes important characteristics are estimated for major groups and subgroups. These groups and subgroups are usually quite different from the strata used. The size and nature of these groups and subgroups have considerable influence on stratification and sample size. For example, all railroads in the United States may be stratified into class I and class II in order to draw a sample for the purpose of determining the extent of boxcar shortages. After the shortage rates have been estimated from the sample study, they may be applied to a major group (U.S. total) and subgroups such as rate territories or States.

a. Describe the major groups and subgroups for which estimates of major characteristics are required.

b. Explain the relationships among major groups, subgroups, stratifications, and sample sizes.

c. Explain how the sample size or other aspects of the sampling plan were affected by considerations of evaluating the sampling results for major groups and subgroups.

7. *Replication*. A replicated sample design consists of two or more subsamples drawn and processed completely independent of each other from the same population. The main advantage of replication is ease in computing the estimated standard errors. Replication also makes it easier to evaluate the amount of bias in the estimating procedure (see reference 13).

a. If a replicated sample was used, state the number of replicates, zone width, number of zones, and sample size in each replicate. If thick zones are used, indicate how they were formed and state the number for each replicate.

b. Describe the method for making independent selections of sample units.

c. Explain how replicates were used to compute the estimated standard error, determine bias in a ratio estimate, discover large non-sampling errors, measure variability due to judgments or interviewers, or other applications.

8. *Determination of Sample Size*. The sample size should be sufficiently large for the sample results to be precise enough to make appreciable contributions to decisions about the population characteristics. Sample sizes are affected by the amount of desired precision (low variation) in the sampling results, and the economic factors of limited funds and time for conducting the sample study (see reference 15).

a. Explain how the sample size was determined. State formulas used for determining sample size, and explain all factors or values used in this determination.

b. Describe any relationships between the sample size and replication, stratification, major characteristics, major groups and subgroups, standard errors, or other factors.

9. *Instructions for Respondents or Enumerators*. After the data sheet or questionnaire has been designed to collect sample data on all major objectives of the survey, written instructions must be prepared to provide uniform guidance on how to fill out the questionnaire by the respondents or enumerators.

a. Submit a copy of the written instructions for the respondents or enumerators.

b. If any questions on the questionnaire were not covered in the instructions, explain why these questions did not require written instructions for the respondents or enumerators.

10. *Pretest of Questionnaire*. In all large scale sample surveys and in many sample studies of a smaller scale, a pretest of the questionnaire is desirable and usually necessary prior to ultimate implementation in order to insure the practicality and attainment of the survey objectives, as well as to improve the clarity and completeness of the questionnaire and instructions. This means the first draft of the questionnaire is given to a small number of respondents or enumerators who attempt to complete it in accordance with the first draft of the instructions. By this pretest procedure, weaknesses are usually found in both the questionnaire and the instructions. Corrections are then made to both documents before the major effort is begun for the sample survey.

a. If a pretest of the questionnaire was made, describe the pretest procedures and resulting improvements to the questionnaire and instructions for enumerators.

b. If no pretest was conducted, explain why not.

C. Data Collection

After designing the sampling plan which includes the questionnaire, instructions for enumerators, determining sample sizes for each frame, etc., the next phase is the actual collection of data by the enumerators who contact or interview the respondents. Although the sampling plan was properly designed, the final analysis of results might not be statistically valid if the collection of the sample data were not managed properly.

1. *Selecting Sample Units*. The manner in which the sample units are selected from the frame or population will have a definite effect on the validity of the study results. For example, probability sampling requires that the actual selection of units into the sample be made by a mechanical procedure that has predetermined the desired probabilities.

a. Describe how the sampling units in the frame were selected at random.

b. State the source of random numbers, and explain how the random numbers were used.

c. Indicate whether selection was from a two or more stage frame, and how selection was made at each stage.

d. Describe methods of random selection for each frame, and how sample selection sheets, computer tapes, or other similar devices were used.

e. If systematic or serial sampling was used, indicate the preliminary steps taken to avoid bias due to any periodicity in the data. Show evidence that the selected data are not significantly different from that which would be obtained by a simple random sample.

f. Attach copies illustrating sample selection sheets, computer printouts, and other significant materials relating to sample selection.

2. *Sample Management*. Management of the sample involves such things as pretesting the questionnaire or data sheet and the sampling plan; instituting various controls, checks and audits to minimize or eliminate nonsampling errors; using statistical quality

V40238 DEC 10 75 XUM

control procedures to measure and reduce error rates; preparing and using a sampling procedure manual; planning, programming and controlling the computer operations if a computer is used; resolving all questions and problems concerning the sampling plan; and giving special training or instructions as needed. Sample management means executing the sampling plan as designed.

a. State the amount of training given to all personnel, including supervisors, to implement the project according to the procedures required by the sampling plan.

b. Explain how technical sampling guidance was made available and was actually used to resolve sampling questions and problems during the collection of data.

c. Show evidence that properly trained personnel actually directed, managed and monitored the implementation of the sampling plan.

d. Explain the pretest or pilot run that was made to test sampling procedures and obtain estimates of variances if needed for the sampling plan design.

e. Describe the various controls that were used to minimize or eliminate nonsampling errors such as sample audits, statistical quality control charts, data reliability checks, and machine consistency checks.

3. *Data Tabulation.* One of the major sources of nonsampling errors occurs in the routine process of tabulating the sample data. Every precaution must be used to reduce or eliminate the errors in data tabulation. Specific and detailed written instructions must be given to those people who receive the completed questionnaire to review it for completeness and accuracy, to those people who code the sample data for card punching or other data processing, and to the data programmers for specific tabular printouts of the sample survey results. Copies of the written instructions to people who provide data tabulations should be submitted.

a. Describe how the sample data were edited, coded, reviewed and tabulated.

b. Explain the techniques of statistical quality control that were used to measure validity of the data tabulations.

c. State the kinds of errors that were discovered and the error rate for each step in processing the sample data.

D. Analysis of Sampling Results

A limited amount of preliminary analyses of the sampling results may be made while the data are being collected. However, a formal statistical analysis cannot be completed until after all the sampling data have been summarized in the form of tables or graphs.

1. *Major Characteristics Estimated from Sample.* The measurements of operational data, costs, revenues, etc., that are estimated from the sample study are called the major characteristics of the population. The number and complexity of these characteristics influence the statistical validity of the sample data and the methods of estimation. Examples are revenue ton-miles, average number of days for delivery delays, total amount or percent of rail traffic diverted, and revenue gains or losses due to merger.

a. Describe the major characteristics which were estimated from the sample.

b. Define each term or factor simply, precisely, and clearly in layman's language.

c. Explain how each characteristic is related to the objectives of the sample study.

2. *Types of Derived Estimates.* There are many types of estimates that can be derived from the sample data. They may include ratios, proportions or percentages, aggregates or totals, differences, means or averages, standard deviations, correlation coefficients, regression coefficients, and many others.

a. Explain the various types of estimates derived from the sample and state the estimating equations used for each, by replicate, by stratum, for the entire sample, or other groupings of data.

b. Relate the estimating equations to the sampling method used.

c. If ratio or regression estimates were used, state expressions for the estimates and how the sampling errors were derived.

3. *Standard Errors.* In the language of statisticians, the validity of sampling results is measured by the ability of the sample to describe the frame or population from which the sample was drawn (within the laws of probability). Based on the sample survey data, the statistician can claim the mean of the population (arithmetic average) is some number X, plus or minus a band of confidence based on the laws of probability. For example, the mean of the population (based on sample data) is computed to be $40, plus or minus $3 with a 67 percent confidence (one standard error each way). This is to say the true mean of the population is estimated to be between $37 and $43 with a 67 percent confidence. The band of confidence gets wider in dollars with higher levels of confidence. For the same survey sampling results, the statistician can state a 95 percent probability that the population mean is somewhere between $34 and $46; or a 99 percent probability that the population mean is between $31 and $49. The mean and standard error of the mean are only estimates, since they were derived from the sample results. The accuracy of these estimates can be increased by taking a larger sample size. Computation of the standard errors based on survey sample results is explained in most of the references in Appendix I.

a. State the standard errors of all population estimates (*e.g.*, mean, variance, etc.) derived from the sample survey data. Show how these standard errors were calculated for each sample size and for each sampling stratum.

b. State the size of sampling errors at one standard error. If confidence limits were computed for two or three standard errors to obtain 95 percent or 99 percent confidence limits (or another amount of confidence), indicate this and explain in detail.

4. *Nonsampling Errors.* Major sources of nonsampling errors in a sample include: incomplete frame or population from which the sample was drawn; errors of response, measurement or recording of data at the basic source where the data were collected or interviews performed; nonresponse or delinquent returns by some respondents; errors in data coding, card punching, etc., for electronic computer processing; errors in analyzing the computer printouts; errors of statistical analysis in the interpretation of the sample survey results.

a. List the major sources of nonsampling errors.

b. State what steps or procedures were taken to avoid, minimize, control or eliminate each type of nonsampling error.

5. *Statistical Analysis of Sample Data.* Various mathematical and statistical techniques can be used to analyze and interpret the sample data. These techniques may include the computation of standard errors, tests of significance, regression analysis, and analyses of variance or covariance. For example, statistical tests can be used to determine whether there is a significant difference between two sets of data.

a. Explain how the sample data were expanded to describe the population from which the sample was drawn.

b. Describe the techniques used when interpolations or extrapolations were made.

c. Describe the extent and nature of the statistical analyses. State to what extent conclusions, decisions or actions were based upon these analyses.

6. *Final Appraisal.* A brief statement should be made to summarize and appraise the results of the sample study.

a. Describe how the sample data achieved the objectives of the sample study.

b. Compare the derived estimates with their standard errors.

c. Compare the size of the sampling error with the nonsampling error, if known.

d. State how the total amount of uncertainty or error affected the derived estimates and inferences drawn therefrom.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ENVIRONMENTAL PROTECTION AGENCY

OPP—240001 (FRL 467–3)

NEW MEXICO, CALIFORNIA, AND WASHINGTON

Approval of Requests for Interim Certification To Register Pesticides To Meet "Special Local Needs"

On July 3, 1975, final regulations for the registration, reregistration, and classification of pesticides pursuant to section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), were published in the FEDERAL REGISTER (40 FR 28241). These regulations became effective August 4, 1975. Since that date, States have been prohibited from issuing new registrations for pesticide products or uses of pesticide products which are not registered by the Environmental Protection Agency (EPA), except pursuant to certification from the Administrator in accordance with section 24(c) of FIFRA.

On September 3, 1975, proposed regulations for State Registration of Pesticides to Meet Special Local Needs under section 24(c), FIFRA, were published in the FEDERAL REGISTER (40 FR 40538). Since it did not prove possible to promulgate final section 24(c) regulations prior to the effective date of the FIFRA section 3 regulations, some interruption in the authority of States to register pesticides has occurred. In order to prevent further disruption of State registration programs (particularly in relation to minor uses), a procedure has been established by which States may request interim certification to register pesticides to meet special local needs until such time as the final section 24(c) regulations are promulgated. If such a request is granted, a State may register pesticides subject to the terms of the certification and other limitations set out in the Preamble to the proposed regulations. Interim certification will expire if the State has not submitted a plan pursuant to the final section 24(c) regulations within 60 days after the effective date of these regulations, or, if such a plan is submitted and it is disapproved by the Administrator, on the effective date of the Administrators' disapproval.

A state may request interim certification to register pesticides to meet special local needs at any time by having the Governor or Chief Executive Officer or their designee submit a request in writing to the Administrator. The request shall satisfy the requirements set out in the FEDERAL REGISTER announcement of the Interim Certification program (40 FR 40542), and the statutory standard set forth in Section 24(c) of FIFRA.

The FEDERAL REGISTER announcement of the Interim Certification program provides that the Administrator shall notify the State of his approval or denial of a request for Interim Certification and publish notice of approval or denial in the FEDERAL REGISTER. The announcement further states that since the Agency expects Interim Certification to be of limited duration, it will not solicit public comment with respect to requests for Interim Certification. Adequate opportunity for public comment on State plans submitted pursuant to final Section 24(c) regulations is provided for in proposed Section 162.158(c).

The Agency has received Requests for Interim Certification to register pesticides to meet special local needs (Request(s)) from the States of New Mexico, California, and Washington. After reviewing the Requests, the Agency found that they satisfy the requirements set forth in the FEDERAL REGISTER announcement, and that they demonstrate that each of the States are capable of exercising adequate controls to assure that special local needs registrations issued by them pursuant to Interim Certification will be in accord with the purposes of FIFRA.

Accordingly, notice is hereby given that the Administrator has approved Requests for Interim Certification from the States of New Mexico, California, and Washington. Approval was subject to the terms and conditions set forth in the FEDERAL REGISTER announcement of the Interim Certification program, and other terms and conditions described below.

NEW MEXICO

The New Mexico Request for Interim Certification sought authority to register amendments to EPA registrations of pesticide products which do not involve "changed use patterns", as that term is defined in Section 162.152(c) of the proposed Section 24(c) regulations. Since the authority requested by New Mexico did not involve either "new products", as that term is defined in proposed Section 162.152(g), or amendments involving changed use patterns, a procedure for product hazard review was not required.

The Agency has determined that the New Mexico Request satisfied the requirements for Interim Certification. Therefore, on October 10, 1975, the Administrator notified the New Mexico Department of Agriculture that its Request for Interim Certification had been approved.

CALIFORNIA

The California Request for Interim Certification sought authority to register new products, amendments to EPA registrations which involve changed use patterns, and amendments to EPA registrations which do not involve changed use patterns. In addition, the Request asked for Interim Certification to issue California "Use Variance Authorizations" as special local needs registrations under Section 24(c), FIFRA. A "Use Variance Authorization" is an order issued by the California Department of Food and Agriculture, which permits the temporary use of a pesticide in a manner which conflicts with the California registered label for the pesticide.

The Agency found that the requirements for Interim Certification were satisfied by that part of the Request which asked for Interim Certification to issue California pesticide registrations as special local needs registrations. Procedures for produst hazard review and efficacy determination are part of the State registration program.

However, the Agency deferred action on that part of the Request which sought Interim Certification to issue California Use Variance Authorizations as special local needs registrations. This is to permit the development of additional information concerning such Authorizations. This information will permit the Agency to determine (1) whether the procedures utilized to issue these Authorizations satisfy the requirements of the Interim Program and the FIFRA, and (2) whether Use Variance Authorizations are sufficiently similar to FIFRA registrations to allow them to be accepted as FIFRA registrations under Setcion 24(c). To the extent there are significant differences, EPA and the State of California will consider whether appropriate conditions can be imposed to resolve compatibility problems which have been identified.

On October 10, 1975, the Administrator notifide the California Department of Food and Agriculture that its Request had been granted to the extent indicated in the discussion above.

WASHINGTON

The State of Washington Request for Interim Certification sought authority to register new products, amendments to EPA pesticide product registrations which involve changed use patterns, and amendments to EPA pesticide product registrations which do not involve changed use patterns.

The Agency reviewed the Request and determined that the requirements of the Interim Certification procedure had been satisfied. Procedures for product hazard review and efficacy determination are part of the State registration program. On October 22, 1975, the Administrator notified the State of Washington Department of Agriculture that its Request had been granted.

Copies of the Requests for Interim Certification from New Mexico, California, and Washington, along with letters reflecting the Agency's decision to approve these Requests, are available for public inspection at the following locations:

Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St., S.W., Washington, D.C. 20460.
Pesticide Branch, Hazardous Materials Control Division, EPA, 1600 Patterson Street, Suite 1100, Dallas, Texas 75201. (*New Mexico Request only*).
Pesticide Branch, Hazardous Materials Control Division, EPA, 100 California Street, Room 340, San Francisco, California 94111. (*California Request only*).
Pesticide Branch, Hazardous Materials Control Division, EPA, 1200 6th Avenue, Seattle, Washington 98101. (*Washington Request only*).

Dated December 3, 1975.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL MARITIME COMMISSION

[License No. 1601]

MARIA ESTELA ANDRADE

Order of Revocation

On December 1, 1975, the Federal Maritime Commission received notification that Maria Estela Andrade, 1861 Sherer Lane, Glendale, California 91208 wishes to voluntarily surrender her Independent Ocean Freight Forwarder License No. 1601 for revocation.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders Commission Order No. 201.1 (Revised) Section 5.01(b) (dated 6/30/75);

It is ordered, That Independent Ocean Freight Forwarder License No. 1601 issued to Maria Estela Andrade be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1601 be and is hereby revoked effective December 1, 1975, without prejudice to reapply for a license in the future.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Maria Estela Andrade.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

FEDERAL POWER COMMISSION

[Docket No. RP76–40]

ALABAMA-TENNESSEE NATURAL GAS CO.

Notice of Proposed PGA Rate Adjustment

DECEMBER 1, 1975.

Take notice that on November 14, 1975, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee) tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, Substitute Thirteenth Revised Sheet No. 3–A. Alabama-Tennessee requests that this revised tariff sheet become effective as of January 1, 1976.

Alabama-Tennessee states that the sole purpose of such revised tariff sheet is to adjust Alabama-Tennessee's rates pursuant to the PGA provisions of Section 20 of the General Terms and Conditions of its tariff to reflect increased rates to become effectvie on January 1, 1976, to be charged by its sole supplier, Tennessee Gas Pipeline Company.

Alabama-Tennessee states that the revised tariff sheet provides for the following rates:

Rate schedule:		*Substitute 13th revised sheet No.*
G–1:		3–A
	Demand ----------dollars--	3.38
	Commodity ----------cents--	63.06
SG–I:	Commodity---------do----	87.75
I–1:	Commodity---------do----	65.06

Alabama-Tennessee also tendered for filing First Revised Sheet No. 36–H to reduce the minimum notice period in Section 22(d) of the General Terms and Conditions of its tariff from 45 days to 30 days.

Alabama-Tennessee states that copies of the filing have been mailed to all of its juridictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on on before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of his filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75–33184 Filed 12–9–75;8:45 am]

[Docket No. RP74–99]

CASCADE NATURAL GAS CORP.

Order Approving Settlement

DECEMBER 2, 1975.

On June 17, 1974, Cascade Natural Gas Corporation, Colorado-Utah Division (Cascade) tendered for filing Fourth Revised Sheet No. 2 and First Revised Sheet Nos. 8 and 15 to its FPC Gas Rate Schedule Original Volume No. 1. Cascade also filed an Alternate Fourth Revised Sheet No. 2 and an Alternate First Revised Sheet No. 8. The filing proposed a $2.25 million increase in annual revenues, based on the twelve months ending April 30, 1974, from Cascade's sole customer under its Rate Schedule No. 1, Mountain Fuel Supply Company (Mountain Fuel).

The filing also proposed a modification of Cascade's present purchased gas adjustment clause to reflect a revision in the base period cost of gas and to provide for the combination of the Company's "old gas" and "incremental gas" rates into a single rate. Cascade proposed an effective date of August 2, 1974.

Notice of the filing was issued on June 26, 1974, with protests, and interventions due on or before July 8, 1974. On July 8, 1974, Mountain Fuel filed a timely petition to intervene, and on July 9, 1974, Rocky Mountain Natural Gas Company filed an untimely petition.

On August 1, 1974, we issued on order which accepted for filing the Fourth Revised Sheet No. 2 and First Revised Sheet Nos. 8 and 15. Accordingly, Cascade's Alternate Fourth Revised Sheet No. 2 and Alternate First Revised Sheet No. 8 were deemed withdrawn. We suspended the effectiveness of the filing for one day. Thus, Cascade's filed rates became effective on August 3, 1974, subject to refund. We set the matter for hearing, and accepted both petitions to intervene.

After settlement discussions and several extensions of procedural dates, a hearing was held on January 16, 1975. In order to allow for further settlement negotiations and exchange of data, the hearing was recessed to March 5, 1975. Following several subsequent postponements and recesses, on June 20, 1975, Cascade filed a proposed "Stipulation and Agreement of Settlement" and a corresponding motion for an order certifying the agreement, together with the record, to us for approval. On June 24, 1975, the Presiding Administrative Law Judge certified the agreement to us. The Staff filed a "Statement of Support for the Filed Settlement" on July 30, 1975.

The proposed settlement agreement provides as follows:

Article I, "Settlement Rates and Bases"—Within ten (10) days following issuance of the Commission's order approving the settlement agreement, Cascade will file revised tariff sheets which will recover for Cascade the settlement cost of service.[1] That cost of service reflects adoption of Cascade's claimed capitalization,[2] and a 13.8 percent rate of return on equity. The settlement cost of service includes $715,247 of depreciation and income taxes adjusted to accommodate other changes in the elements of cost of service as originally filed. Within ten (10) days of Commission approval of the settlement, Cascade will also file a modification of its minimum bill provision which is in accord with Article IV of the settlement.

Article II, "Refunds"—Within fifteen (15) days following effectiveness of the settlement agreement, Cascade will refund to Mountain Fuel the product of 2.40 cents per Mcf and the volume purchased by Mountain Fuel during the Refund Period. That Period shall be the period commencing on August 3, 1974, when Cascade's originally proposed increased rate became effective subject to refund, and ending on the date on which the settlement rates become effective, as determined by Article III. Refunds shall include simple interest at seven (7) percentum per annum.

Article III, "Effective Date and Term"—The settlement agreement shall become effective on the first day following the date on which the Commission's order approving the settlement becomes final and nonappealable. Tariff sheets reflecting the settlement rates

[1] The settlement cost of service is shown in Appendix A, attached hereto.
[2] The settlement capitalization is shown in Appendix B, attached hereto.

V40238 DEC 10 75 XUM

and reflecting the minimum bill provisions shall be filed by Cascade so as to become effective on the first day of the billing month following the date on which the Commission's order approving the settlement agreement becomes final and non-appealable.

The settlement rates shall remain in effect until lawfully changed pursuant to the Natural Gas Act. Docket No. RP74–99 shall terminate when refunds owned by Cascade have been paid and the Commission's order becomes final and non-appealable.

Article IV, "Resolution of Minimum Bill Issue"—In its original filing in Docket No. RP74–99, Cascade included a minimum monthly bill provision for service to Mountain Fuel. The provision required a minimum monthly payment equal to 40 percent of the average daily volume delivered to Mountain Fuel during the preceding twelve months times the currently effective unit rate times the number of days in the month for which deliveries are being billed. Mountain Fuel opposed the provision, fearing that the provision would lead to payments having to be made for gas which Cascade would be unable to deliver during any given month. Mountain Fuel has now agreed to the monthly bill provision on the condition that Cascade modify it by including express language stating that Mountain Fuel will not be required by the provision to pay for gas which Cascade is unable to deliver during any given month. All parties to the instant proceeding agree that the monthly bill provision, as thus modified, should be included in Cascade's Rate Schedule No. 1.

Article V, "Waiver of Rights"—The parties to the proceeding waive any and all rights to seek judicial review of the Commission's order in Docket No. RP74–99 which accepts the settlement agreement as to all its provisions.

Article VI, "Reservations"—The provisions of this agreement constitutes a dollar settlement of this proceeding and none of the parties shall be deemed to have consented to any rate of return, ratemaking principle, or any method of determining cost of service. The provisions of the agreement shall be deemed to apply to Cascade, and nothing shall apply to any successor except as the Commission may so order.

Cascade's concurrence in the settlement agreement particularly as regards rate of return and return on equity, is made in contemplation of purchase of the Colorado-Utah Division by Mountain Fuel during 1975. Accordingly, Cascade reserves the right to move for reopening of the rate of return issue and its decision on the merits in the event that the Colorado-Utah Division is not acquired by Mountain Fuel, with necessary approvals, on or before December 31, 1975.

This settlement agreement resolves all issues. It provides for a $137,992 decrease from the $2,263,286 in annual revenues which would have been allowed by the terms of Cascade's original filing. Thus, the presently effective rate of 63.81 cents per Mcf will be reduced by 2.4 cents effective August 3, 1974, and revenues in excess of the settlement rate will be refunded.

The rate reduction is attributable to the reduction in rate of return from 9.48 percent to 8.93 percent, a reduction in the depreciation rate from 6.96 percent to 6.6 percent, and related adjustments to income taxes.

Our review of the proposed settlement, Staff's comments and the related record indicates that the settlement is a reasonable and appropriate resolution of the issues raised in this proceeding and that the public interest would be served by our acceptance and approval of the settlement.

We conclude that the rate of return upon which the parties have agreed, as shown by Appendix B, is just and reasonable. If the proposed purchase of the Colorado-Utah Division by Mountain Fuel is not consummated with necessary regulatory approvals by December 31, 1975, Cascade may file pursuant to Section 4 of the Natural Gas Act and the Regulations, for such an increase in its rate of return as it may deem appropriate.

The Commission finds: (1) The proposed settlement of this proceeding as filed with the Commission by Cascade Natural Gas Corporation on June 20, 1975, is reasonable and proper and in the public interest in carrying out the provisions of the Federal Power Act. It accordingly should be approved as hereinafter ordered.

(2) If the proposed purchase of the Colorado-Utah Division by Mountain Fuel is not consummated with necessary regulatory approvals by December 31, 1975, Cascade may file, pursuant to Section 4 of the Natural Gas Act and the Regulations, for such an increase in its rate of return as it may deem appropriate.

The Commission orders: (A) The proposed settlement filed by Cascade Natural Gas Corporation on June 20, 1975, as a settlement of the issues involved in this proceeding is hereby approved and adopted.

(B) Cascade Natural Gas Corporation shall file within ten (10) days of the issuance of this order a rate schedule supplement which conforms with the settlement agreement approved herein.

(C) The proposed settlement agreement herein approved shall become effective on the first day following the date on which this order becomes final and non-appealable.

(D) Within fifteen (15) days following the effectiveness of the settlement agreement herein approved Cascade Natural Gas Corporation will refund to Mountain Fuel Supply Company the product of the Unit Refund of 2.40 cents per Mcf as shown in Appendix A to the settlement agreement and the volume purchased by Mountain Fuel Supply Company during the Refund Period. The Refund Period shall be the time commencing on August 3, 1974 and ending on the date on which the settlement agreement herein approved becomes effective. Refunds shall include simple interest at seven (7) percentum per annum.

(E) The Seventh Revised Sheet No. 2, reflecting the rates contained in the proposed settlement approved herein, and the Second Revised Sheet No. 8, reflecting the revised minimum bill language in the proposed settlement approved herein, shall be filed by Cascade Natural Gas Corporation so as to become effective on the first day of the billing month following the date on which this order becomes final and non-appealable.

(F) Docket No. RP74–99 shall terminate when refunds owed by Cascade Natural Gas Corporation by terms of this order have been paid and this order has become final and non-appealable.

(G) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against Cascade Natural Gas Corporation or any person or party.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

APPENDIX A.—*Cascade Natural Gas Corp., Colorado-Utah Division*

[Total cost of service by functions, 12 mos ended Apr. 30, 1974, as adjusted]

Line No.	Description	Total cost of service	Production	Transmission
		(1)	(2)	(3)
	Operation and maintenance expenses (excluding purchased gas costs):			
1	Natural gas production and gathering	$146,062	$146,062	
2	Products extraction	2,868	2,868	
3	Other gas supply expenses	(4,992)	(4,992)	
4	Total production expenses	143,938	143,938	
5	Transmission expenses	62,965		$62,965

[Docket No. RI75–112]

CERTAIN PRODUCER AND PIPELINE RESPONDENTS

Order Granting Interlocutory Appeal by Staff and Appeal of Associated Gas Distributors

DECEMBER 2, 1975.

The Commission Staff on October 7, 1975, submitted an appeal from the rulings of Presiding Administrative Law Judge Max L. Kane on the Staff's Economic Data Request in the above investigation of the status of nonproducing dedicated reserves. Specifically, the Staff objects (1) to the Judge's exclusion from its Economic Data Request of reference to January 1, 1978, as the target for accelerating development by drilling a new well, and rejection of the Staff's additional request for data on the availability of well-drilling equipment and (2) to the Judge's modification of the Staff's data request to provide that the data be required only from reservoirs that contain 8 Bcf or more gas rather than the Staff's cut-off figure of 4 Bcf.

The Staff also submits and requests that the Commission find that the Judge's rulings constitute extraordinary circumstances justifying its appeal. Answers were filed on October 15, 1975, by Mobil Oil Corporation on October 20, 1975, by Shell Oil Company, Amoco Production Company, Texaco Inc., and Placid Oil Company, on October 22, 1975 by The California Company, Tenneco Oil Company, and Union Oil Company of California, on October 23, 1975 by Kerr-McGee Corporation, and on October 24, 1975, by Continental Oil Company.

Associated Gas Distributors (AGD) on October 15, 1975, also appealed to the Commission requesting an order directing certain producer-respondents to file supplementary testimony. Briefly, as discussed below, AGD wants direct testimony from a witness qualified to discuss the economics of accelerated production for certain reservoirs which his company holds in nonproducing status including a determination of the price per Mcf. It also wants direct testimony from a witness authorized to speak for the policy-making management of the producer-respondent, which discusses factors that the company would consider in evaluating an acceleration recommendation. Answers to the AGD appeal were filed by Mobil on October 24, 1975, by Staff and Union Oil on October 30, 1975, by Kerr-McGee on October 31, 1975, and by Tenneco Oil Company on November 3, 1975.

These proceedings arose by the issuance of the Commission's order of February 20, 1975, instituting an investigation of all offshore dedicated nonproducing reserves in the Gulf of Mexico. The Judge was specifically instructed, among other things, to determine "(a) reasons why gas from nonproducing reservoirs is not being produced, (b) when, under current practices production from these reservoirs is anticipated, (c) the economic and engineering feasibility of accelerating the date for placing such nonproducing reserves on producing status, and (d) whether there is compliance with certificate obligations as to the rate of delivery of gas from the dedicated acreage of which these nonproducing reservoirs are a part."

Extensive hearings have been held. Rulings by the Judge on August 28, 1975 and a conference on September 10, 1975, are involved in the Staff appeal. When the Judge refused to clarify the questions raised by its objections, the Staff filed its appeal.

THE STAFF APPEAL

EXTRAORDINARY CIRCUMSTANCES

Under § 1.28(a) of the Commission's Rules, rulings of presiding officers may not be appealed from during the course of hearings or conferences except in extraordinary circumstances where prompt decision by the Commission is necessary to prevent detriment to the public interest. As developed below the issues involved here relate to the scope of and manner of responding to a data request of the Staff made as a part of this invetstigation of nonproducing gas reservoirs. This is an important matter and the issues should be settled promptly, so that the Commission can act decisively on a full record. While a number of the producer-respondents object, we think that the appeal was justified under our rules.

STAFF'S REQUEST FOR DATA IN RELATION TO THE SPECIFIC DATE JANUARY 1, 1978, AND ITS REQUEST FOR DATA ON THE AVAILABILITY OF WELL-DRILLING EQUIPMENT

At the hearing session on August 28, 1975, the Judge ruled that the assumption in the Staff's Economic Data Request that all equipment would be available as required would be stricken from the Staff's Economic Data Request (Tr. 4856). The Judge did not think such an assumption was justified on the basis of the record and refused to accept it. The Staff does not appear to have appealed from this ruling although it is discussed and supported by the respondents.

The Judge also ruled (Tr. 5482), in favor of Mobil's proposal to delete from the Data Request the reference to January 1, 1978, which the Staff had inserted as a limit on estimates for accelerating development by drilling a new well (Tr. 5475).[1] He did not accept (See Tr. 5482) Staff's further proposal with respect to Item 1 of its Data Request that the producers indicate the earliest date prior to January 1, 1978, that they anticipated that new investments could be made in order to initiate production from a nonproducing reservoir on or before January 1, 1978, or, if the respondent contends that the equipment required to allow production to commence on or before Janu ary 1, 1978, is not available, the respondent should provide information on the availability of equipment and efforts to secure it (Tr. 5456–57).

In its appeal the Staff argued that the purpose of its Economic Data Request was to elicit information needed to evaluate the economic feasibility of accelerating production of currently nonproducing reservoirs. The Staff repeated the above request that the respondents supply data on investments for production prior to January 1, 1978, and data on the availability of equipment. The Staff emphasized the importance of placing parameters on the economic analysis and criticized the producer respondents' "Mobil Proposal" as not being specific as to dates of production and as to when equipment would be available. Staff asserts that its proposed January 1, 1978 target date provides a reasonable reference point to use as a starting basis for

[1] The first sentence of the Economic Data Request read as follows: For each of the nonproducing reservoirs listed in attached Appendix B, please provide the following information regarding your company's *planned* development schedule *and* your best estimates for *accelerating* development by drilling a new well [from which production will commence on or before January 1, 1978]. Mobile proposed to strike the latter part of the sentence as indicated. The effect would the Sentence as indicated. The effect would be, Mobile says, that when the Respondents come down to Item I, where they are requested to give estimated date, month and year, under Column 2 ("Company Planned Development") they would insert whatever that might be, and under Column 3 they would insert the estimated date, months, and year under their then current assessment of the timing for investment to accelerate development by drilling a new well." (Tr. 5475–76).

V40238 DEC 10 75 XUM

the analysis of economic feasibility, and that the testing of economic feasibility on a near term basis should not be precluded by allowing producers to interject unsupported equipment availability assumptions.

Mobil argues that assumption in Staff's request as to availability of equipment is a self-defeating and hypothetical assumption and that it would have rendered the entire response meaningless. With the removal of this assumption and deletion of the reference to January 1, 1978, Mobil says that Respondents are required to prepare their responses on defensible, supportable bases, and not economic whimsy. Mobil adds that the Judge has approved a compromise on an issue that permits the submission of data that has a realistic, factual predicate and he has not barred further Staff inquiry.

The other producers likewise support the Judge's rulings and contend that the Staff's appeal should be denied. Amoco points out that the Staff never did appeal the deletion of its assumption as to the availability of equipment and objects to the staff proposal as to reporting the availability of equipment, and to a single arbitrary date. It further considers Staff's request as to documentation supporting availability of equipment as constituting an unreasonable burden that would unduly delay the proceeding. Shell supports the procedures presented by the Judge by which the initial response will not be constrained by the January 1, 1978 date, and Staff will have opportunity to request further information on any later date used. Texaco and Placid adopt Shell's discussion.

In like manner Tenneco argues that the Judge's modification of the data request permits meaningful data. It insures that the responses will bear some connection to reality. On the other hand, if the Staff's request is allowed, the Commission will have nothing but theoretical calculations. The California Company makes similar arguments. Union does not think it is possible to supply proof of equipment availability two years in advance. In general it finds the Staff's requests unduly burdensome. Kerr-McGee said that answering the data request based on best estimates as to when development of a particular reservoir can be accelerated will reflect a realistic date after taking into account availability of equipment.

In our opinion the Judge's view here would handicap the collection of meaningful data on the possibilities of obtaining near-term accelerated production from currently non-producing reserves and would prevent a comparable evaluation of the economic data submitted by the various producers for the reservoirs specified in the Staff's Economic Data Request. All of the producer-respondents should therefore comply with the Staff's "Economic Data Request" in its form with amended Item 1 as presented in the Staff's interlocutory appeal of October 7, 1975. Thus, Staff's reference point of January 1, 1978, production is upheld, and Item 1, which requests the estimated date, month, year and amount of investment required in thousands of dollars, should read as follows:

Indicate the earliest date, month and year prior to January 1, 1978, you anticipate that new investments could be made in order to initiate production from a non-producing reservoir on or before January 1, 1978. Total new investment is defined as the sum of those estimated expenditures required for the initial production, gathering, and total depletion of natural gas and gas condensate from a non-producing reservoir, (if a single completion), or non-producing reservoirs (if a dual completion). If allocated sunk costs are considered to be part of total investment, then itemize those costs.

In addition; if the respondent contends that the equipment required to allow production to commence on or before January 1, 1978, is not available, he should provide:

(a) A listing of the specific equipment (rigs and platforms, et cetera), supplies, and materials that would not be available and which would prevent production on or before January 1, 1978. He should also describe that equipment.

(b) The earliest date the producer contends the required equipment (rigs, platforms, et cetera), materials, and supplies could be obtained.

(c) Responses to the Staff's economic data request related to the producer's projected equipment availability date.

(d) A detailed account of the efforts the respondent has made to ascertain availability of the specific required equipment, supplies and materials. This includes documentation of companies contacted, the dates on which they were contacted, and responses received as to availability.

We are interested in determining what reservoirs could contribute to production in the comparatively near future. If no definite date limits the data presented, it will be difficult to determine what economic conditions are required to bring about production in the near future as well as showing the needed gas price as discussed below. For instance, for one reservoir, data may be submitted with respect to investment required and other details of a new well projected to go into production before January 1, 1978; for another reservoir the data might relate to January 1979, 1980 or a later year. We shall therefore grant the Staff's appeal and order the respondents to file their data in relation to the January 1, 1978, data with the option of filing supplemental data referring to a later date, as delineated in the modified Item 1 of the Staff Data Request.

SIZE OF RESERVOIR FOR REPORTING PURPOSES

The Judge rules in favor of the producer respondents that the gas reservoirs subject to the Economic Data Request should be those containing 8 Bcf or more rather than 4 Bcf or more as requested by the Staff (Tr. 5497). As the Staff says, there are 1,600 to 1,800 nonproducing reservoirs containing approximately 6.5 trillion cubic feet of natural gas covered by the investigation. Based on a 4 Bcf volumetric limitation Staff's Economic Data Request would gather information on only 167 of these reservoirs owned by twenty producer respondents. If the 8 Bcf volumetric limitation is upheld the number of reservoirs would be reduced to 58 and five of the producer respondents would be excused. The Judge's rationale was that there is a relationship between the amount of work required and the results to be achieved and that the work would be cut in half by adopting the 8 Bcf limitation.

The Staff disagrees that the computation and submission of the economic data for reservoirs with volumes of 4 Bcf and over would be unduly burdensome. Staff notes that it has been given a mandate to investigate and identify all possible natural gas supplies which are not being fully utilized.

Mobil argues that an 8 Bcf cut off would provide representative data and would avoid delay. Amoco points out that by including the smaller reservoirs the time when equipment will be available is necessarily extended. Shell contends that there is no record support for Staff's argument that a 4 Bcf reservoir produced to depletion over five years may yield a 15 percent rate of return on an assumed investment of $1,000,000 for drilling a new well and concludes that there is no public detriment in choosing an 8 Bcf cut-off. Texaco and Placid adopt Shell's argument. Similar arguments are made by Union, Tenneco, California Company, and Kerr-McGee.

In our opinion the Staff's contention for a 4 Bcf cut-off on nonproducing reservoirs should prevail. By our order of February 20, 1975, we instituted a proceeding to investigate the problem of nonproducing gas reservoirs including the reasons why the gas is not being produced and the means of accelerating the date for gas production from these reservoirs. It would be redundant here to dwell at length on the importance of this problem in this time of necessary gas curtailments. It is essential to take every possible step to ameliorate it. Our order recognized nonproducing reserves as a factor in this problem.

It is clear from the record that there is no mathematical way to determine the cut-off point, yet a choice must be made. The Staff would examine only 167 reservoirs out of 1,600 to 1,800 containing an estimated 23 percent of the gas. The producers would lower this to only 58 reservoirs containing about 14 percent of the gas. The Staff is asking for the material in order to obtain data it needs to provide evidence on the questions raised in the Commission order. We think it should have available almost a quarter of the possible data rather than only 14 percent.

AGD APPEAL

AGD contends that it needs additional testimony if the Commission's objectives are to be met. As noted above, it wants direct testimony from a witness qualified to discuss the economics of accelerated production including a specification of the earliest date on which the producer-respondents believe that accelerated production of a particular reservoir would be feasible and a determination of the price per Mcf at which accelerated production would be economically feasible.

It also wants a policymaking witness authorized to speak on other factors, if any, which the company would consider in evaluating an acceleration recommendation based on the price determination.

Arguing that the burden is on the producer-respondents AGD says that the record is sorely deficient. Most seriously, it contends that none of the producer-respondents has described for each of its nonproducing reservoirs the price or other conditions under which accelerated production would be feasible. Furthermore it contends: (1) two of the producer-respondents cross-examined by AGD have failed to present a witness qualified to discuss the economics of accelerating production, (2) where a qualified producer witness did appear, there has been no testimony as to the price or other conditions which would justify accelerated production, (3) the witness could not give key facts, (4) the witnesses have been unable to speak for management, and (5) rulings from the bench prevented discussion of costs and other input to a particular acceleration analysis as cumulative.

Further, AGD believes that Staff's Economic Data Request discussed earlier cannot lead to a record upon which the Commission can reliably determine either the economic feasibility of accelerating production or the measures the Commission might take because the producers will contend that they do not perform acceleration analyses as the Staff has preformed them. It adds that it is the producer-respondents themselves who know the input, assumptions, methodology, criteria and reasoning which they would employ in evaluating possible acceleration of a particular reservoir.

The Staff supports AGD. It contends that the information AGD seeks, particularly the price at which producers actually would accelerate production, is complementary and supplementary to the information sought by Staff in its Economic Data Request. Staff would compute the actual rate of return generated by an acceleration project and thereby determine economic feasibility by assessing a project on a stand alone basis and also by comparing the relative profitability of deferred versus accelerated projects. However, it believes that incentive price is important in determining economic feasibility from the standpoint of the producer-respondent. It also pointed out the importance of management witnesses responsible for making the decision. However, Staff believes that AGD's request should not be restricted to AGD members alone but should extend to all producer-respondents. Also AGD's 5 Bcf cut-off should be reduced to the 4 Bcf volumetric reserve limitation advocated by the Staff.

Mobil argues that AGD's appeal does not lie because of absence of extraordinary circumstances and because the questions AGD seeks to raise have not been presented to the Judge with adequate notice to respondents. On the other hand, we observe that the Judge in open hearing before counsel ruled against requiring the producer witness to make a price determination and refused to receive a motion or certify it to the Commission (Tr. 4226–28). Furthermore, we think that AGD's request went to the essentials of the investigation and that extraordinary circumstances therefore made its appeal permissible.

Mobil further argues that there is extensive evidence in the record on economic issues, and that AGD seeks to have all additional presentations and studies keyed to and based upon a pricing theory devised by AGD, which has not been clearly presented before the Judge. It complains that AGD would transform the present docket into a consolidated special relief proceeding. Mobil concludes that AGD seeks an unlawful order because the matter was not presented to the Judge in an orderly manner and required respondents to prepare extensive economic studies based upon amorphous unclear pricing theories. It points out that AGD admitted that it had presented a management representative. It asks that AGD's appeal be denied or remanded to the Judge.

Tenneco Oil makes similar arguments about the permissibility of an appeal. It adds that much of the data sought is proprietary and of a highly confidential nature, and the data request is unreasonably burdensome. It says the request would require Tenneco Oil to calculate hypothetical acceleration prices, a task which Tenneco Oil has no reason to undertake. Kerr-McGee uses a similar approach. It thinks that AGD should make its own presentations. As to price it notes its witness stated that whenever you assess feasibility, economically, of accelerating production of shut-in gas, the price plugged into the assessment is the currently allowed price under Commission regulations. Union Oil says a price that would trigger acceleration of production faster than a plan Union prepared does not exist. Union also thinks that the record is quite sufficient for the Commission's purposes and the AGD requests are very burdensome.

We have reviewed the record as noted by AGD and conclude that it does not in all respects comport with the requirements of the Commission's orders. Thus the order of February 20, 1975, calls for evidence on the economic and engineering feasibility of accelerating the date for placing non-producing reserves on a production status, and the order of March 28, 1975, clarifying, states that the operator of each reservoir shall be required to submit testimony and evidence on this matter. Yet it is clear that of the producer-respondents many have not presented or qualified witnesses able or willing to testify on economic matters. In some instances counsel for the company involved stated that such matters were beyond the scope of the company's witness.

In this connection we think that Staff as well as AGD were reasonable in inquiring as to the price which would encourage production from a given reservoir. In general, information on price was not available or not definite, or the producer merely assumed the price allowed by the Commission's regulations. We believe that more than this is required and that the price, or an estimate of the price, is a very important item in determining the economic feasibility of accelerated production. This does not mean that we are adopting any pricing theory of AGD, as certain producers contend, but for our own considerations we want to know what price the producers believe would be required to induce them to commence producing gas from these shut-in reservoirs. Thus, it is our opinion that the arguments of the producers objecting to use of AGD's pricing theories are not relevant. Regardless of what AGD believes as to the appropriate method of computing a price or the role of price in this investigation, we think that this is an item that the producer-respondents should be required to supply.

In our opinion AGD's appeal with certain modifications should be granted and will supplement and complement the data requested by the Staff. However, as suggested by the Staff, the request should not be restricted to AGD members alone, but all producer-respondents should be subject. Further, AGD's 5 Bcf cut-off should be reduced to the 4 Bcf volumetric reserve limitation which we are granting the Staff. This means that each producer-respondent, who has not already done so, shall supply testimony on the economics of accelerated production including date of acceleration, a determination of the price at which accelerated production would be economically feasible, together with evidence providing the assumptions and methodology utilized in determining the acceleration price.

Each producer-respondent, who has not already done so, shall also supply direct testimony from a witness who is authorized to speak for its policymaking management who can discuss the various factors, including price, which the company would consider in determining whether to accelerate production. In making this requirement we do not intend, as the Staff warns, to extend the inquiry into areas of general corporate decisions on the allocation of capital, company budgetary priorities and alternative investment opportunities. We would have the corporate witness assume these factors are favorable, and would testify as to what factors he would employ, including price, in deciding that production from a given reserve be accelerated. It is our fear that otherwise this inquiry could extend indefinitely a situation that would be contrary to the public interest at a time when determination of means of accelerating production is essential.

The Commission further finds: (1) With respect to the Staff's Interlocutory Appeal filed October 7, 1975, and the Appeal of AGD filed October 15, 1975, extraordinary circumstances exist where prompt decision by the Commission is necessary to prevent detriment to the public interest.

(2) The Interlocutory Appeal filed by the Staff should be granted with respect to its requirements as set forth herein, namely: a January 1, 1978, reference date for accelerated production data to be filed by producer-respondents; the option to file supplemental data that

V40I238 DEC 10 75 XUM

refers to production by dates after January 1, 1978, as required by modified Item 1 of Staff's Data Request; and a 4 Bcf cut-off volume for the size of gas reservoirs to be examined.

(3) The Appeal of AGD is granted to the extent set forth herein.

The Commission orders: (A) The motion of the Staff filed October 7, 1975, is hereby granted in all its respects. This means that the Staff Data Request shall be understood to include the following requirements:

(i) A January 1, 1978, reference date for accelerated production data to be filed by producer-respondents is specified, with amplification of this point appearing in the modified Item 1 of Staff's Data Request presented at pp. 5 and 6 of this order.

(ii) In form delineated by modified Item 1 of the Staff Data Request, producer-respondents may file additional and supplemental data that refers to production on dates after January 1, 1978.

(iii) A cut-off size of 4 Bcf is specified for the size of gas reservoirs on which producer-respondents are to submit data.

(B) Each producer-respondent who is an operator listed in Appendix B of the Commission's order of February 20, 1975, shall if it has not done so, provide:

(1) Direct testimony from a witness qualified to discuss the economics of accelerated production for the reservoirs which his company currently holds in non-producing status which contain 4 Bcf or more of natural gas which is not planned to come on production before January 1, 1978. Such testimony shall include a specification of the earliest date on which the producer-respondent believes that accelerated production of a particular reservoir would be feasible considering all factors, a determination of the price per Mcf at which accelerated production would be economically feasible, together with evidence providing the assumptions and methodology utilized in determining the acceleration price.

(2) Direct testimony from a witness who is authorized to speak for the policymaking management of the producer-respondent who can discuss the various factors, including price, which the company will consider in determining whether to accelerate production subject to the limitations set forth in the text above.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33214 Filed 12-9-75;8:45 am]

[Docket No. ER76-267]

CONNECTICUT LIGHT AND POWER CO., HARTFORD ELECTRIC LIGHT CO.

Notice of Termination

DECEMBER 4, 1975.

Take notice that on November 19, 1975, The Connecticut Light and Power Company (CL&P) and The Hartford Electric Light Company (HELCO) tendered for filing a notice of termination of Rate Schedule FPC Nos. CL&P 114 and HELCO 93. CL&P and HELCO state that this rate schedule was effective May 1, 1975. CL&P and HELCO state that this rate schedule was terminated in accordance with its terms effective October 31, 1975. CL&P and HELCO state that notice of the proposed termination has been served upon Vermont Electric Power Company, Inc.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 16, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33181 Filed 12-9-75;8:45 am]

[Docket No. ER76-274]

CONNECTICUT LIGHT AND POWER CO., ET AL.

Notice of Termination

DECEMBER 3, 1975.

Take notice that on November 21, 1975, The Connecticut Light and Power Company (CL&P), The Hartford Electric Light Company (HELCO), and Western Massachusetts Electric Company (WMECO) tendered for filing a notice of termination of an agreement in Docket No. 8105 that was effective March 1, 1973, and was amended by agreement dated February 28, 1974, according to CL&P, HELCO, and WMECO. CL&P, HELCO, and WMECO state that this agreement was terminated in accordance with its terms effective April 30, 1974. CL&P, HELCO, and WMECO state that notice of the proposed termination has been served upon New Bedford Gas and Edison Light Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 16, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a patry must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33193 Filed 12-9-75;8:45 am]

[Docket No. ER76-280]

CONSUMERS POWER CO.

Notice of Tariff Change

DECEMBER 3, 1975.

Take notice that Consumers Power Company (Consumers) on November 24, 1975 tendered for filing Supplemental Agreement No. 3 and Supplemental Agreement No. 4 to the Interconnection Agreement dated September 1, 1973, between Consumers Power Company and Northern Michigan Electric Cooperative, Inc., Wolverine Electric Cooperative, Inc., City of Grand Haven, Michigan, and City of Traverse City, Michigan, collectively denoted the "MMCPP members." Consumers states that the Interconnection Agreement is designated Consumers Power Company Rate Schedule FPC No. 34.

Consumers states that Supplemental Agreement No. 3, effective December 1, 1974, changes the status of the Redwood Interconnection Point (established by Supplemental Agreement No. 1 dated November 27, 1973) from temporary to permanent. Consumers states that Supplemental Agreement No. 3 also provides that Wolverine Electric Cooperative, Inc., shall no longer be required to pay to Consumers Power Company the annual carrying charges established by Supplemental Agreement No. 1, on the capital cost of certain 138 kV instrument transformers, billing meters and metering equipment located at Redwood Substation. Consumers states that these charges were approximately $3,100 annually.

Consumers states that Supplemental Agreement No. 4 modifies the rates to be charged by Consumers Power Company for transmission services rendered in transmitting 20 megawatts of capacity, provided by The Detroit Edison Company, to the MMCPP members. Consumers states that the effective date of Supplemental Agreement No. 4 is November 3, 1975. Consumers states that the effect of the rate changes would be to reduce revenues collected from the MMCPP members by $211,000, based on operations for the 12 months ending October 1975. Consumers states that this represents a 48% revenue reduction. Consumers states that this reduction is the net of a substantial increase ($68,000, or 52%) in the transmission service capacity charge, and a substantial decrease ($279,000, or 89%) in the transmission service energy charge.

Consumers states that copies of the filing were mailed to the MMCPP members and to the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 16, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33195 Filed 12-9-75;8:45 am]

[Docket No. RP71-15 and RP75-28 (PGA76-1)]

EAST TENNESSEE NATURAL GAS CO.

Notice of Proposed Rate Filing Pursuant to Tariff Rate Adjustment Provisions

DECEMBER 2, 1975.

Take notice that on November 14, 1975, East Tennessee Natural Gas Compnay (East Tennessee) tendered for filing proposed changes to Sixth Revised Volume No. 1 of its FPC Gas Tariff to be effective on January 1, 1976, consisting of the following revised tariff sheets:

Second Substitute Thirteenth Revised Sheet No. 4 and Substitute Thirteenth Revised Sheet No. 4.

East Tennessee states that the sole purpose of these revised tariff sheets is (1) to adjust East Tennessee's rates pursuant to the PGA provision in Section 22 of the General Terms and Conditions to reflect increased purchased gas costs resulting from a rate increase filed November 14, 1975, by its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and (2) to adjust East Tennessee's rates pursuant to § 24.8 of the General Terms and Conditions so as to reflect curtailment credits. East Tennessee further states that Second Substitute Thirteenth Revised Sheet No. 4 reflects Tennessee's filing of November 14, 1975, and that Substitute Thirteenth Revised Sheet No. 4 reflects Tennessee's alternate filing of November 14, 1975.

East Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33211 Filed 12-9-75;8:45 am]

[Docket Nos. RP72-151 and RP72-154]

EL PASO NATURAL GAS CO.

Notice of Tariff Filing and Proposed Refunds

DECEMBER 1, 1975.

Take notice that on November 14, 1975, El Paso Natural Gas Company (El Paso) filed, pursuant to Part 154 of the Commission's Regulations Under the Natural Gas Act, First Substitute Eleventh Revised Sheet No. 10 and Second Substitute Eleventh Revised Sheet No. 10 to its former FPC Gas Tariff, First Revised Volume No. 3.[1] Such substitute tariff sheets were submitted to correct the average purchased gas cost relating to El Paso's Purchased Gas Cost Adjustment Provision previously applicable to its Northwest Division System operations.[2]

El Paso states that as a result of an erroneous computation in the "current gas cost adjustment portion" of the overall adjustment to jurisdictional sales rates required to reflect changes in the cost of purchased gas, it was necessary to correct the average purchased gas cost reflected on the tendered tariff sheets, which average cost is reflected as an item of information on such sheets.

El Paso further states that the correction proposed is necessary in that, through error, an overaccrual in Account 191, applicable to El Paso's former Northwest Division, occurred, for the period April 1, 1973, through November 24, 1973, in the amount of $640,020. Accordingly, El Paso proposes to refund the said amount of $640,020 to its former Northwest Division System customers within 15 days of Commission approval of the instant tender.

El Paso has requested that waiver be granted of all applicable rules and regulations of the Commission in order to effectuate the instant filing and that the Commission accept the tendered substitute tariff sheets, to be effective as of the dates indicated on such sheets, in lieu of their respective counterparts currently on file with the Commission in Docket Nos. RP72-151 and RP72-154.

El Paso states that copies of the filing were served upon all of the affected former Northwest Division System customers of El Paso, interested state regulatory commissions and Northwest Pipeline Corporation.

Any person desiring to be heard or to make any protest with reference to this filing should, on or before December 8, 1975, file with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33205 Filed 12-9-75;8:45 am]

[1] First Revised Volume No. 3 contains the tariff provisions previously applicable to general natural gas service rendered by El Paso's Northwest Division System. Effective as of January 31, 1974, El Paso's Northwest Division System properties were divested to Northwest Pipeline Corporation pursuant to the Commission's order issued September 21, 1973, at Docket Nos. CP74-14, *et al.*

[2] By order issued February 6, 1975, at Docket Nos. RP72-155, RP73-104 and RP74-57, the Commission accepted and approved El Paso's filing of revised tariff sheets of January 6, 1975, which, similarly, were submitted to correct the average purchased gas cost relative to El Paso's Purchased Gas Cost Adjustment Provision applicable to its Southern Division System operations.

[Project No. 176]

ESCONDIDO MUTUAL WATER CO.

Notice of Application To Amend License

DECEMBER 3, 1975.

Public Notice is hereby given that the Escondido Mutual Water Company filed on February 8, 1967, an application with the Federal Power Commission to amend its license for Project No. 176 (Correspondence to: R. S. Harper; Secretary, Escondido Mutual Water Company; 620 North Ash Street, Escondido, California 92025). The project is located near the City of Escondido in Northern San Diego County, California.

Escondido Mutual would amend the license by removing from the license all steel towers, conductions, crossarms, and fixtures on its 12 kV transmission line which runs between its Rincon and Bear Valley powerplants. Mutual states that this proposed amendment is necessary and desirable because this transmission system is no longer required for the project. All energy generated at each power plant is now delivered directly to the San Diego Gas and Electric Company's transmission system rather than being transmitted over the 12 kV line running between the plants.

Any person desiring to be heard or to make protest with reference to the application filed by the Escondido Mutual Water Company, should on or before January 14, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Persons wishing to become parties to the proceedings or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's

V40I238 DEC 10 75 XUM

Rules. Escondido Mutual Water Company's application is on file with this Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75-33186 Filed 12-9-75;8:45 am]

[Project No. 176 etc]

ESCONDIDO MUTUAL WATER CO. ET AL.

Notice of Application

DECEMBER 3, 1975.

In the matter of Escondido Mutual Water Co., City of Escondido, California (Project No. 176); Secretary of the Interior acting in his capacity as trustee for the Rincon, La Jolla, and San Pasqual Bands of Mission Indians v. Escondido Mutual Water Co. and City Of Escondido, California (Docket No. E-7562); Vista Irrigation District (Docket No. E-7655); San Diego Gas & Electric Co. (Project No. 559).

Public Notice is hereby given that the City of Escondido, California on November 25, 1975, filed with the Federal Power Commission an application to become a Joint Applicant with the Escondido Mutual Water Company for a new license sought by Escondido Mutual for Project No. 176 (Correspondence to: Lorraine H. Boyce; Mayor; City of Escondido; Escondido, California). The project is located near the City of Escondido in Northern San Diego County, California.

The original 50-year license has expired and the Licensee, Escondido Mutual Water Company, is operating the project under a statutory annual license until a decision is reached in the proceeding. Escondido Mutual is seeking a new 50-year license. The United States Department of the Interior seeks take over of the project by the Federal Government, while the La Jolla, San Pasqual, Rincon, Pauma, and Pala Bands of Mission Indians have applied for a non-power license from the Commission to operate the project in lieu of take over of the issuance of a new license to Escondido Mutual. The City's application would result in Escondido Mutual and the City of Escondido becoming joint licensees for Project No. 176 should the final decision in the proceedings be favorable to these parties.

The Project No. 176 proceedings have been the subject of extensive hearings. The City of Escondido has been a party in these hearings since their outset. Renewed hearings are scheduled to begin on December 15, 1975, in Escondido and Pala, recessing for the holidays and continuing in Washington, D.C. on January 19, 1976.

Any person desiring to be heard or to make protests with reference to the City of Escondido's application, should on or before February 4, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.R.F. § 1.8 or § 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Persons wishing to become parties to the proceedings or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The City of Escondido's application is on file with this Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-136 (PGA76-1)]

FLORIDA GAS TRANSMISSION CO.

Notice of Proposed Changes in Rates and Charges Under Purchased Gas Adjustment Provision

DECEMBER 2, 1975.

Take notice that on November 14, 1975, Florida Gas Transmission Company (Florida Gas) tendered for filing First Substitute Eighth Revised Sheet No. 3-A to its FPC Gas Tariff, Original Volume No. 1, containing changes in rates to its Rate Schedules G and I for effectiveness on January 1, 1976. The changes in rates result from the application of the purchased gas cost adjustment provision in Section 15, General Terms and Conditions of the Tariff, which was approved by the Commission in Docket No. RP72-136. First Substitute Eighth Revised Sheet No. 3-A is proposed to supersede Substitute Eighth Revised Sheet No. 3-A which became effective on July 10, 1975.

A comparison between the currently effective rates and those to be made effective on January 1, 1976 under this filing is as follows:

	Cents per therm	
	Currently effective	Effective Jan. 1, 1976
Rate schedule G	7.632	8.185
Rate schedule I	6.091	6.644

The annual effect of the proposed changes is an increase of $4,062,000 based on sales for the twelve months ended September 30, 1975.

Florida Gas states that a copy of its filing has been served on all customers purchasing gas under its FPC Gas Tariff, Original Volume No. 1 and the Florida Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-9521]

GEORGIA POWER CO.

Notice of Filing of Revised Rates and Charges Pursuant to Commission Order

DECEMBER 2, 1975.

Take notice that Georgia Power Company (Georgia Power) on November 12, 1975, tendered for filing First Revised Sheet No. 6 to its FPC Electric Tariff, Original Volume No. 2, pursuant to Commission Order on September 11, 1975, in Docket No. E-9521. Georgia Power avers that the rates and charges contained in the tendered tariff sheet reflect the exclusion of construction work in progress from rate base as ordered by the Commission. Georgia Power states that the revised rates and charges would be made effective as of November 12, 1975.

Georgia Power states that it served copies of the filing on its jurisdictional customers and on all parties appearing on the official service list compiled in the captioned docket. Georgia Power claims that the revised tariff sheet is filed under protest and without prejudice to any rights it may have, upon judicial review of the September 11, 1975 Order, to continue collecting revenues pursuant to Original Sheet No. 6.

Any person desiring to be heard or to protest said filing should file a petition to intervene (if not previously filed herein) or to protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 30426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-275]

HARTFORD ELECTRIC LIGHT CO.

Notice of Purchase Agreement

DECEMBER 3, 1975.

Take notice that on November 21, 1975, The Hartford Electric Light Company (HELCO) tendered for filing a Purchase Agreement dated October 1, 1975, which provides for the sale of a specified percentage of capacity and energy from HELCO's Middletown Unit No. 4 to Green Mountain Power Corporation (Green Mountain) during the period October 1, 1975, through the earlier of (1) April 30, 1976, or (2) the day that the fossil Unit #2 of Canal Electric Company is declared in commercial operation by its owners. HELCO states that due to unforeseen delay in the commercial operation date of said Canal unit, Green Mountain needed additional capacity to meet its capability responsibility obligation pursuant to Section 9.1 of the New England Power Pool Agreement.

HELCO requests waiver of the thirty-day notice period to permit an effective date of October 1, 1975, stating that HELCO was not notified of Green Mountain's desire to purchase capacity until a date which prevented HELCO from filing the Purchase Agreement earlier.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 16, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secreary.

[Docket No. ER76-281]

MONTANA POWER CO.

Notice of Agreement for Short-Term Sale of Non-Farm Energy

DECEMBER 2, 1975.

Take notice that on November 24, 1975, the Montana Power Company (Montana) tendered for filing with the Commission an agreement between Montana and Southern California Edison Company (Edison) for the short-term sale of non-firm energy.

Montana states that under the terms of this agreement it will make available to Edison upon request such non-firm energy that Montana may in its sole judgment deem to be available from time to time. Montana states further that deliveries will be made into the Bonneville Power Administration's system for transfer to Edison or for credit to Edison's account with BPA, will be as scheduled by the schedulers and power dispatchers of the parties, and will be contingent upon the availability of non-firm energy and transmission capacity.

According to Montana the rate set forth in the agreement is the same as the rate in Service Schedule A-3 between Montana and Utah Power & Light Company dated February 14, 1975, (Supplement No. 16 to Rate Schedule FPC No. 3).

Montana has requested that the agreement be accepted for filing effective as of October 17, 1975, the date of the agreement and that prior notice be waived.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the approriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. CP74-160, CP74-207; CP75-83-3]

PACIFIC INDONESIA LNG CO. AND WESTERN LNG TERMINAL CO.

Order Setting Hearing Date

DECEMBER 3, 1975.

On September 30, 1975, Pacific Indonesia Company (Pac Indonesia) and Western LNG Terminal Company (Western Terminal) filed a motion requesting that the Commission set a date for the commencement of hearings in these consolidated proceedings.

Applications in Docket Nos. CP74-160 and CP74-207 were originally filed on November 30, 1973, and February 15, 1974, respectively. Applicants propose to import 546 Mcf/d of gas to be purchased from Pertamina, the state owned oil and gas company of the Republic of Indonesia. By order of April 8, 1974, we scheduled a conference for the purpose of enabling Staff to obtain further information necessary for Staff review of the applications. Shortly thereafer Pac Indonesia notified the Commission by letter of May 22, 1974, that the Minister of Mines, on behalf of the Government of the Republic of Indonesia did not approve of the gas supply contract. Pending the negotiation and submission of a new contract Pac Indonesia requested that the Commission proceed in the processing of the material previously filed. On March 31, 1975, Pac Indonesia filed amendments to Docket Nos. CP74-160 and CP74-207. On the same date, Western Terminal filed a supplement (Docket No. CP75-83-3)[1] to its application in Docket No. CP75-83 for a certificate of public convenience and necessity authorizing the construction and operation of facilities at three locations in Southern California. The Western Terminal supplement proposed to construct a facility at Oxnard, California to receive the LNG from Pac Indonesia. This facility would be in place of a facility originally proposed by Pac Indonesia in Docket No. CP74-207.

[1] Docket No. CP75-83-3 is a supplement to Docket No. CP75-83, and therefore, any intervenor in Docket No. CP75-83 is automatically an intervenor in Docket No. CP75-83-3 consolidated in this proceeding.

On September 23, 1975, pursuant to an order of the Commission, a conference was convened to allow Staff to obtain the data necessary for evaluation of the project. Information regarding the nature of the transportation arrangement has still not been supplied to Staff. Proper evaluation of this project requires that this data be submitted before any hearings are held. In this motion applicant stated that the necessary data would be submitted by October 31, 1975. Staff's reply states that on the date a letter was filed with the Commission indicating that the material would be filed within two weeks. The information has not yet been filed.

The motion points out that under the gas purchase contract Pertamina has an option to terminate on January 6, 1976, if necessary U.S. government authorizations have not been received. The motion states that Pertaminas' counsel confirmed that their action on that date will be dependent upon the progress made to that point.

Staff's response indicated that it had no objection to holding hearings on this matter once the necessary material was submitted and evaluated. Accordingly, we will set a date for hearings to commence, however the convening of this hearing is expressly made subject to the submission of information regarding the transportation arrangement, including the charter arrangements, contracts, the number, cost and design of LNG tankers to be employed.

The hearings which are herein scheduled to commence are required to examine whether the proposed importation is in the public interest. The construction and operation of the proposed facilities, as well as the sale and use of the gas must be examined to determine whether such importation is in the public interest. Among the issues which we deem relevant for consideration at this hearing are reliability of service of the foreign supply, the dependence of the distributor on foreign LNG to meet residential and commercial markets, environmental impact of any proposed facilities, the proper method of pricing of the LNG supply, shipping costs, overall economic feasibility of the project, end-use allocation of the proposed LNG supply, availability of alternative fuels for the markets to be served by the project, engineering feasibility of the project, overall project safety, and any such other issues as may be pertinent and appropriate. We note that the Applicant has filed evidence and exhibits to be supported by sponsoring witnesses to some extent on the above issues except for the shipping issues. In that regard, the information which we herein order to be supplied, the Applicants shall likewise provide witnesses from the shipping concerns and their own staffs to sponsor testimony and exhibits. This is not, however, to limit any forthcoming data requests by our Staff or any party, or to cut off examination of any issues important in determining the public interest.

In regard to the environmental issues, we note that Commission Order No. 415-C requires that the Staff Environmental Impact Statement, together with any comments received thereon, be presented at any hearing in a proposal. In keeping with this requirement, while still assuring that the Staff is afforded adequate time to prepare a thorough and meaningful environmental statement, we shall direct that, should hearing of all issues other than environmental be completed prior to the finalization of Staff's statement or the receipt of all environmental comments, the record shall remain open for purposes of receiving such environmental testimony in evidence and further trial of the issues involved therein. No decision by the Presiding Administrative Law Judge assigned to the case shall be issued prior to the completion of such testimony and subsequent closing of the record. Because our Staff has not yet issued the statement on the facilities, we note that the procedures established in our December 23, 1974, order in Docket No. CP75-83 are now rendered moot, the Staff shall include the appropriate siting evaluation in the statement to be submitted, and no separate hearing on siting shall be held.

The Commission finds: (1) Good cause exists to set for formal hearing the applications filed in the above-captioned dockets.

(2) Proper evaluation of this project requires that further information be filed with the Commission before the commencement of hearings.

The Commission orders: (A) Pac Indonesia and Western Terminal shall file with the Commission all information relating to the nature of the transportation arrangement, including but not limited to the charter arrangements, contracts, the number, cost, and design of the LNG tankers to be employed. This data shall be filed with the Commission on or before December 10, 1975.

(B) Pursuant to the authority contained in the Natural Gas Act and in accord with the Commission's Rules and Regulations under that Act, a public hearing shall be held commencing December 16, 1975, at 10:00 A.M. (EST) at a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, concerning the matters involved and the issues presented by these applications; *Provided, however,* That this hearing shall only commence if the requirements of Paragraph (A) have been compiled with.

(C) The record in these dockets shall remain open until the submission of the Commission Staff's final environmental impact statement and any comments received on the draft statement. No initial decision shall be issued prior to the submission of such environmental testimony.

By the Commission. Commissioner Watt not participating.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.75-33190 Filed 12-9-75;8:45 am]

[Docket Nos. CP71-237 and CI74-714]

PANHANDLE EASTERN PIPELINE CO. AND PAN EASTERN EXPLORATION CO.

Order Reopening Proceedings and Scheduling Formal Hearing on Limited Issues

DECEMBER 2, 1975.

By Opinion No. 626 and 626-A, issued September 20, 1972, and November 17, 1972, respectively, in the above-docketed proceedings, we granted a certificate of public convenience and necessity which authorized Panhandle Eastern Pipeline Company (Panhandle) to abandon all of its gas production properties and related production facilities and to transfer the same by sale to Pan Eastern Exploration Company (Pan Eastern), a newly formed and wholly owned subsidiary of Panhandle. Concurrently, we authorized the sale of gas by Pan Eastern back to Panhandle at the applicable area rate from fields located in Kansas, Oklahoma and Texas, rather than on the basis of Panhandle's individual cost of service. The authorization issued by Opinion No. 626, as affirmed by Opinion No. 626-A,[1] for the increase in rates was expressly conditioned to require that Pan Eastern expend the differential on an extensive exploration and development effort, which at a minimum would necessitate an expenditure of 3.0 cents per Mcf of all recoverable gas reserves and 50.0 cents per barrel of all recoverable oil reserves found resulting from the exploration and development programs funded by the rate increment. We also provided that Pan Eastern must dedicate 400,000,000 Mcf of new gas reserves to Panhandle within 7 years or reimburse Panhandle at the rate of 11.0 cents per Mcf for each Mcf short of 400,000,000.

On January 30, 1975, the United States Court of Appeals for the District of Columbia Circuit affirmed Opinion Nos. 626 and 626-A in *Cities of Fulton, Missouri, et al.* v. F.P.C., No. 73-1293, however, in so doing the court retained jurisdiction to allow the Commission to seek a remand in view of the effect that the establishment of the new national ceiling rate in Opinion No. 699 might have upon the order.

On May 19, 1975, we issued an order directing the Solicitor for the Commission to seek remand of the record in this proceeding for a re-examination of certain issues contained in the case. A motion for remand of the record to adduce additional evidence filed by the

[1] Opinion No. 626, 46 F.P.C. 518 (1972), rehearing denied, Opinion No. 626-A, 46 F.P.C. 1102 (1972).

V40238 DEC 10 75 XUM

Solicitor was granted by the Court of Appeals on June 19, 1975.

The remand sought and obtained by the Commission does not involve a reopening of these proceedings to consider the propriety of the transactions underlying these certificates, rather, the purpose is to re-examine, through adducement of additional evidence, the condition imposed on Pan Eastern's certificates in light of the following issues:

(1) Whether $43,609,250 constitutes the "full difference" between Panhandle's cost of service and the applicable area rates or whether such figure should be increased to reflect certain rate increases in the applicable area rates;

(2) Whether Panhandle should be required to maintain a certain level of expenditures for exploration and development in addition to the monies expended by Pan Eastern, and, if so, what the level should be;

(3) Whether, in addition to the refunds required should Pan Eastern fail to find and dedicate 400,000,000 Mcf in new gas reserves to Panhandle's system, Panhandle should be required to repay some portion of the full difference between the cost of service and the applicable area rates; and

(4) Whether some adjustment should be made to the amounts which Pan Eastern must credit to the fund to reflect the rates established by Opinion No. 699–H and other pending national rate proceeding, *i.e.*, Docket Nos. R–478 and RM75–14.

In view of the foregoing, we shall thus direct that the proceeding herein be reopened for the limited purpose of developing a further evidentiary record on the issues set forth above, and that a hearing be commenced for that purpose. The reopening of this proceeding should not be construed as implying the necessity for modification of the conditions imposed upon the certificates issued by Opinion No. 626. Rather, such modification will be made, if at all, after the submission of additional and substantial evidence by *all* parties which indicates the impact of the proposed modification upon the effectivenes of the Pan Eastern program as certificated.[2]

The Commission finds: That good cause exists for, and the public interest in administering the Natural Gas Act demands, that the record in the above-captioned proceeding be reopened for the purpose of developing an evidentiary record pertaining to the conditions imposed on Pan Eastern's certificates.

The Commission orders: (A) The record in the above-captioned proceeding is reopened to permit re-examination of the conditions imposed on Pan Eastern's certificates in light of the issues set forth above, which were remanded to the Commission by the United States Court of Appeals for the District of Columbia Circuit.

(B) Pursuant to the authority of the Natural Gas Act, the Commission's Rules of Practice and Procedure and the Regulations under the Natural Gas Act [18 CFR, Chapter 1] a formal hearing concerning the matters involved and the issues presented in this proceeding as hereinbefore set forth will be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C., on February 24, 1976, at 10:00 a.m. (EST). An Administrative Law Judge, to be designated by the Chief Administrative Law Judge for the purpose [See Delegation of Authority, 18 CFR 3.5(d)] shall preside at the hearing in this proceeding and shall prescribe relevant procedural matters not herein provided.

(C) Panhandle Eastern Pipeline Company and Pan Eastern Exploration Company shall file with the Secretary of the Commission, and serve on all parties including the Commission Staff, all testimony and exhibits addressing the specific issues set forth in this order, as well as any other testimony and exhibits which comprise their cases in chief, on or before January 8, 1976. The Commission Staff and all other parties shall file with the Secretary of the Commission and serve on all parties all testimony and exhibits addressing the specific issues set forth above in this order, any other testimony and exhibits which comprise their cases in chief and any answering testimony to that served on January 8, 1976, on or before February 11, 1976. After cross-examination of these direct cases, the Administrative Law Judge designated to preside in this proceeding may permit and set dates for the filing of answering cases to the direct cases previously filed.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP71–119 and RP76–32–1]

PANHANDLE EASTERN PIPE LINE CO.

Notice of Petition for a Declaratory Order or in the Alternative for Extraordinary Relief

DECEMBER 3, 1975.

Take notice that on October 30, 1975, the City of Roodhouse, Illinois filed a petition requesting that the Commission issue a declaratory order pursuant to § 1.7 of the Commission's Rules of Practice and Procedure that it be fully absolved from payment of a penalty assessed against it by Panhandle Eastern Pipe Line Company (Panhandle) in the amount of $51,130.00 for natural gas taken over and above its curtailment entitlement subject to its paying back the volumes taken in excess of its entitlement. The City of Roodhouse requests in the alternative that it be granted relief from such penalty.

The City of Roodhouse, Illinois, owns the municipal gas distribution system in that community and is provided with its full requirements of natural gas by Panhandle. It was advised by letters from Panhandle of its maximum daily volume for the months of April and May as well as the monthly cumulative volumes that it was entitled to take during those months.

In its petition the City of Roodhouse alleges that in the bills presented for each of the foregoing months, Panhandle specified the volumes taken over its maximum monthly cumulative entitlement. It also asserts that Panhandle indicated on its bill that such excess takes would have to be reduced from the subsequent months entitlement. It further states that Panhandle did not indicate that any overrun penalties were in fact assessed against it.

The City alleges that it attempted to communicate with Panhandle on this matter in June 1974 to determine whether or not the April overrun could be made up during a subsequent month and received no written response to its request.

Additionally, the Superintendent of Utilities for the City of Roodhouse was newly appointed and was of the belief that excess usages during curtailment could be deducted from future allocations. The City of Roodhouse urges that over-run volumes taken by it during April and May 1974 were the result of its not having telemetering equipment and the mistaken belief that any over-runs incurred could be worked off in future months in order to avert penalties.

It stresses that the penalty assessed by Panhandle is of such magnitude relative to the limited operating income of the City that it could force it to shut down its municipal gas distribution system to the hardship of all its residents. It further notes that the cost of a full blown evidentiary hearing to resolve this problem would be most oppressive to this small community.

The City of Roodhouse asserts that it has taken the necessary measures to avert taking gas in excess of its entitlement and requests that to the extent that it has not already paid back the overrun volume of 5,113 Mcf through the underruns that it has had since May 1974, that it be permitted to pay back the remaining excess volumes within a reasonable period of time and that the assessed penalty payment of $51,130.00 be thereby waived.

It would appear that interested persons may not desire to require that a full blown evidentiary hearing be conducted relative to the City of Roodhouse's petition but may desire to submit comments or protests to its proposed solution to its problem. In any event provision will be made for the receipt of comments, protests and requests for intervention relative to the aforementioned petition filed by the City of Roodhouse, Illinois.

Therefore, any person desiring to be heard or to protest said petition should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure 18 CFR 1.8, 1.10 on or before December 19, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene in accordance with the Commission's Rules. This filing which was made with the Commission is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E–9388]

PHILADELPHIA ELECTRIC CO.

Notice of Further Extension of Procedural Dates

DECEMBER 3, 1975.

On November 4, 1975, Staff Counsel filed a motion to extend the procedural dates fixed by order issued June 9, 1975, as most recently modified by notice issued October 8, 1975, in the above-designated proceeding.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Staff Testimony, December 12, 1975.
Service of Intervenor Testimony, December 26, 1975.
Service of Company Rebuttal, January 9, 1976.
Hearing, January 20, 1976 (10:00 a.m., e.s.t.).

KENNETH F. PLUMB,
Secretary.

[FR Doc.75–33185 Filed 12–9–75;8:45 am]

[Docket No. ER76–284]

SOUTHWESTERN ELECTRIC POWER CO.

Notice of Filing

DECEMBER 2, 1975.

Take notice that on November 24, 1975, Southwestern Electric Power Company (SWEPCO or the Company) tendered for filing two (2) copies of a Letter Agreement dated November 10, 1975, amending § 4.1 of Service Schedule RE dated March 23, 1971, also identified as Supplement No. 7 to SWEPCO Rate Schedule FPC No. 59 and Supplement No. 5 to Central Louisiana Electric Company (CLECO) Rate Schedule FPC No. 4.

SWEPCO also filed a Certificate of Concurrence, dated November 13, 1975, signed by CLECO in support of the Letter Agreement dated November 10, 1975.

SWEPCO states that the revision in § 4.1 of Service Schedule RE is in the add-on portion of the rate when energy being supplied by the seller is purchased from another supplier and passes through the seller's system to the buyer. The Company further states that the maximum add-on rate is 10% of the purchase price, not to exceed two mills per KWH.

Additionally, SWEPCO states that transactions of energy purchased by seller for sale under Schedule RE have been infrequent, but as fuel availability becomes more acute, it is expected that use of this schedule will be more numerous provided the revised add-on feature is reasonable and compensatory to the parties.

The Company requests that the Letter Agreement amending Schedule RE become effective January 1, 1976.

Any person desiring to be heard or to protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.75–33208 Filed 12–9–75;8:45 am]

[Docket Nos. RP73–114, RP74–24 and RP74–73; (PGA 76–1), (DCA 76–1), (R&D 76–1)]

TENNESSEE GAS PIPELINE CO.

Notice of Proposed Rate Change Under Tariff Rate Adjustment Provisions

DECEMBER 2, 1975.

Take notice that on November 14, 1975, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing proposed changes to Ninth Revised Volume No. 1 of its FPC Gas Tariff to be effective on January 1, 1976, consisting of the following revised tariff sheets:

Second Substitute Ninth Revised Sheet Nos. 12A and 12B and Substitute Ninth Revised Sheet Nos. 12A and 12B.

Tennessee states that the purpose of Second Substitute Ninth Revised Sheet Nos. 12A and 12B is to adjust Tennessee's rates pursuant to Articles XXIII, XXIV and XXV of the General Terms and Conditions of its FPC Gas Tariff, consisting of a PGA rate adjustment, a rate adjustment to reflect curtailment demand charge credits and an R&D rate adjustment.

Tennessee also states that Second Substitute Ninth Revised Sheet Nos. 12A and 12B reflect rates which are based in part on small producer purchases at rates above the levels established by Opinion No. 742. In recognition of the Commission's past practice of suspending such rates, Tennessee states that it is also filing Substitute Ninth Revised Sheet Nos. 12A and 12B which reflect rates exclusive of increases due to small producer purchases above the levels set by Opinion No. 742. Substitute Ninth Revised Sheet Nos. 12A and 12B are to be effective on January 1, 1976, in the event the Commission suspends Second Substitute Ninth Revised Sheet Nos. 12A and 12B.

Tennessee states that copies of the filing have been mailed to all its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP76-3]

TRANSCO GAS SUPPLY CORP.

Order Granting Rehearing for Purposes of Further Consideration

DECEMBER 3, 1975.

On November 7, 1975, Transco Gas Supply Corporation (Gasco or Applicant) filed an application for rehearing of our order issued in this docket on October 14, 1975.

The October 14, 1975, order denied Gasco's application for a certificate of public convenience and necessity to sell natural gas to Transcontinental Gas Pipe Line Company (Transco). The application was described in the Commission's October 14, 1975, order as follows:

> Gasco states that it was formed for the primary purpose of contracting for supplies of natural gas from various suppliers pursuant to advance payment agreements and otherwise and then selling to Transco all gas purchased by Gasco under gas purchase contracts entered into by Gasco pursuant to advance payments agreements which Transco proposes to assign to Gasco or otherwise.
>
> Under a cost of service tariff to be filed with the Commission, Gasco proposes to charge Transco a cost of service rate including: (a) the actual cost of gas purchased by Gasco; (b) return and income taxes on Gasco's rate base (including, among other things, outstanding advance payments) determined by multiplying such rate base by 13.99% (the same percentage as the return and income tax component currently provided in Transco's pending rate settlement in Docket Nos. RP74-48 and RP75-3) or such later percentage as may be reflected in any Transco rate filing; and (c) all other costs of Gasco on a cost of service basis. Transco would include the gas cost component of Gasco's charge in its PGA clause, and would file to amend its advance payment tracking provision in Docket Nos. RP74-48 and RP75-3 to permit tracking of advance payments assigned to or made by Gasco in the same manner as if made by Transco. All other components of Gasco's charge would be included in future Transco rate proceedings.
>
> Gasco proposes to commence sales to Transco on October 1, 1975. Initially, Gasco would acquire gas for such sales from Shell Oil Company from Block 130, Ship Shoal Area, Offshore Louisiana.
>
> The application explains that under the proposed arrangement Gasco would have greater ability to obtain funds for financing advance payment agreements than Transco because Gasco would not be subject to the restrictions in Transco's debt instruments. The application represents that at May 31, 1975, Transco had advance payments outstanding of some $103,300,000 and commitments to make additional advances amounting to several hundred million dollars but that the restrictions in Transco's long term debt instruments are expected to prevent it from borrowing the additional funds to make further advances in 1976 and beyond. The application states that implementation of the proposal would assure the continued availability to Transco's customers of vitally needed gas supplies.

The Commission denied Gasco's application based upon the finding that it would give Transco the right to permanently track advance payments contrary to well established Commission policy.

Gasco's application for rehearing alleges that the October 14, 1975, order was in error in that, *inter alia*, the Commission denied Gasco's application for a certificate of public convenience and necessity without a hearing contrary to Section 7 of the Natural Gas Act; that the denial was based upon an erroneous construction of Gasco's application; that the Commission "must" approve innovative proposals to assist in raising capital required to meet outstanding advance payment commitments. More specifically, Gasco argues that the certificate application itself did not establish tracking authority for advance payments, but rather would use the tracking authority which was included in Transco's proposed settlement agreement which was then pending in Docket No. RP74-48 and RP75-3.[1]

Our review of Gasco's application for rehearing indicates that certain of the issues raised therein are closely related to, and may be substantially affected by, the Commission's ultimate determination in the current investigation of the advance payments program in Docket Nos. R-411 and RM74-4. Accordingly, we shall grant rehearing of our October 14, 1975, order in this proceeding for purposes of further consideration and we shall defer final action on Gasco's application until after issuance of an order determining the appropriate disposition of our investigation of the advance payment program in Docket Nos. R-411 and RM74-4.

The Commission finds: Good cause exists to grant rehearing of our October 14, 1975, order in Docket No. CP76-3 for purposes of further consideration as hereinafter ordered and conditioned.

The Commission orders: (A) Rehearing of our October 14, 1975, order in Docket No. CP76-3 is hereby granted for purposes of further consideration and we shall defer final action on Gasco's November 7, 1975, application for rehearing pending issuance of an order determining the appropriate disposition of our investigation of the advance payment program in Docket Nos. R-411 and RM74-4.

[1] By order issued November 13, 1975, in Docket Nos. RP74-48 and RP75-3, the Commission approved Transco's proposed settlement subject to the condition, *inter alia*, that its tracking authority for advance payments end as of October 1, 1975, the date the suspended rates in Docket No. RP75-75 became effective, subject to refund.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission. Commissioner Watt not participating.

[Docket No. ER76-150]

WISCONSIN PUBLIC SERVICE CORP.

Notice of Curing of Deficiency

DECEMBER 2, 1975.

Take notice that on November 21, 1975, Wisconsin Public Service Corporation (Public Service or The Company) tendered for filing Period I data to cure a deficiency.

On September 22, 1975, Wisconsin submitted for filing proposed rate schedules providing for increased rates applicable to the Company's eight wholesale customers. The Commission, by letter order of October 20, 1975, declared the submittal of September 22, 1975 to be deficient because the Period I test data were out of date. Public Service was instructed to submit actual data for the period ending no earlier than four months prior to the date of filing of the proposed increase.

Pursuant to that October 20, 1975, order, Public Service now tenders for filing data for a new Period I, August 1, 1974 through July 31, 1975.

Public Service requests that the new rates which were submitted for filing on September 22, 1975, be permitted to become effective as originally proposed on November 25, 1975, or at the earliest possible date thereafter.

Public Service states that a copy of the transmittal letter filed November 21, 1975, the new Period I data, revised testimonies, and comparative billing data have been mailed to each purchaser under a rate schedule proposed to be changed, the legal counsel of said purchasers, and to each State Commission within whose jurisdiction such purchasers distribute and sell energy at retail.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 15, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

NATIONAL GAS SURVEY

Meeting

In the matter of a meeting of Supply-Technical Advisory Task Force-Prospective Exploration & Development & Additions to Reserves.

Conference Room 5200, Federal Power Commission, Union Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426, January 13, 1976, 1:00 p.m.

Presiding: Mr. William J. McCabe, FPC Coordinating Representative and Secretary, National Gas Survey.

1. Call to Order and Introductory Remarks—Mr. William J. McCabe.

2. Introduction of Technical Advisory Task Force Chairman—

Prof. Edward Erickson, Department of Economics, North Carolina State University, Raleigh, North Carolina.

Introduction of Technical Advisory Task Force Vice Chairman—

Dr. Richard F. Meyer, U.S. Geological Survey, 12201 Sunrise Valley Drive, Reston, Virginia.

3. Discussion of Task Force Work Scope and Goals—Prof. Edward Erickson.

4. Assignment of Work to Task Force Members—Prof. Edward Erickson.

5. Establishment of Priorities and Completion for Work of the Task Force.—Prof. Edward Erickson.

6. Selection of Next Meeting Date.

7. Other Business.

8. Adjournment—Mr. William J. McCabe.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the committee.

Conference Room 5200, Federal Power Commission, Union Plaza Building, 825 North Capitol Street, NE., Washington, D.C. 20426, January 6, 1976, 9:30 am.

Presiding: Mr. Michael C. Bachman, EPC Coordinating Representative and Secretary, National Gas Survey.

1. Call to Order and Introductory Remarks—Mr. Michael C. Bachman.

2. Introduction of the Technical Advisory Task Force Chairman—

Mr. Frank F. Jestrab, Bjella & Jestrab, Williston, North Dakota.

Introduction of Technical Advisory Task Force Vice Chairman—

Mr. Martin N. Erick, Senior Counsel, Exxon Company, U.S.A., Houston, Texas.

3. Discussion of Task Force Work Scope and Goals—Mr. Frank F. Jestrab.

4. Assignment of Work to Task Force Members—Mr. Frank F. Jestrab.

5. Establishment of Priorities and Completion Dates for Work of the Task Force—Mr. Frank F. Jestrab.

6. Selection of Next Meeting Date.

7. Discussion of Other Matters.

8. Adjournment—Mr. Michael C. Bachman.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF DEFENSE

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON "ELECTRONIC TEST EQUIPMENT"

Advisory Committee Meeting

Pursuant to the provisions of Pub. L. 92–463, notice is hereby given that the Defense Science Board Task Force on "Electronic Test Equipment" will meet in open session on 13 and 14 January 1976 in Room 9W67, National Center Building #1, 2511 Jefferson Davis Highway, Arlington, Virginia.

The sessions will commence at 9:00 a.m. each day.

The mission of the Defense Science Board is to advise the Secretary of Defense and Director of Defense Research and Engineering on overall research and engineering and to provide long-range guidance in these areas to the Department of Defense.

The primary responsibility of the Task Force is to examine the greater use of the Department of Defense of privately-developed, commercially-available, off-the-shelf electronic test equipment, including modifications thereof, with the goal of achieving economy and reliability benefits for the several Armed Services and to recommend policies and procedures which will maximize these benefits.

This will be the tenth meeting of the Task Force. The planned agenda will cover three general areas:

1. Procurement.
2. Logistics.
3. Applications, Requirements and Equipment.

The detailed discussions and investigations into these general areas will be conducted by working groups made up of designated Task Force members or their designated representatives and selected Task Force Observers. Each working group will formulate proposals related to its general area of responsibility corresponding to one of the three specified above. The working group proposals as approved by the Task Force will form the basis for the ultimate Task Force recommendations.

Persons wishing to attend are advised that a reasonable quantity of seating for observers will be available on a first-come, first-seated basis. No specific arrangements or notification of desire to attend is necessary.

The Executive Secretary for the Task Force is Mr. Rudolph J. Sgro, OASD (I&L) WS, Room 2A318, Pentagon, Washington, D.C. 20301.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

DECEMBER 5, 1975.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

OUTER CONTINENTAL SHELF OFFSHORE THE MID-ATLANTIC STATES

Availability of Draft Environmental Impact Statement and Holding of Public Hearing Regarding Proposed Oil and Gas Lease Sale

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement relating to a proposed Outer Continental Shelf (OCS) oil and gas lease sale of 154 tracts of submerged lands on the Outer Continental Shelf offshore New Jersey and Delaware (OCS Sale No. 40).

Single copies of the draft environmental statement can be obtained from the Office of the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, Six World Trade Center, Suite 600D, New York, New York 10048 and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240.

Copies of the draft environmental statement will also be available for review in the main branches of the following public libraries: New York Public Library, 5th Avenue and 42nd Street, New York City; Nassau Library System, Garden City, Long Island, New York; Suffolk Cooperative Library System, Belport, Long Island, New York; Free Library of Philadelphia, Logan Square, Philadelphia, Pennsylvania; Wilmington Institute Free Library and New Castle Free Library, Wilmington, Delaware; Rehoboth Beach Public Library, Rehoboth Beach, Delaware; Enoch Pratt Free Library, Baltimore, Maryland; Eastern Shore Area Library, Salisbury, Maryland; Trenton Free Public Library, Trenton, New Jersey; Atlantic City Free Public Library, Atlantic City, New Jersey; and Norfolk Public Library System, Norfolk, Virginia.

In accordance with 43 CFR 3301.4, a public hearing will be held in Atlantic City, New Jersey, in January 1976 for the purpose of receiving comments and suggestions relating to the proposed lease sale. The exact location and dates of this hearing will be announced at a later date.

Review comments on the draft environmental statement will be accepted by the Department until February 12, 1976. These comments should be addressed to the Manager, New York Outer Continental Shelf Office, Bureau of Land Management, at the above listed address.

CURT BERKLUND,
Director, Bureau of Land Management.

Approved: December 4, 1975.

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

Fish and Wildlife Service

LOS ANGELES ZOO, ET AL.

Endangered Species Permits; Notice of Official Action

Notice is hereby given that the U.S. Fish and Wildlife Service has taken the following action with regard to permit applications received under section 10 of the Endangered Species Act of 1973; 16 U.S.C. 1539. Each permit was issued only after it was determined that it was applied for in good faith; that by granting the permit it will not be to the disadvantage of the endangered species; and that it will be consistent with the purposes and policy set forth in the Endangered Species Act of 1973.

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 11, 1975 (40 FR 24927–28)

Applicant: Los Angeles Zoo, 5333 Zoo Drive, Los Angeles, California 90027, Warren D. Thomas, D.V.M., Director.

Official Action: Issued permit August 4, 1975: "May acquire and transport one male RUFFED LEMUR (*Lemur variegatus*), from the St. Louis Zoological Park to the Los Angeles Zoo, for propagation."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 11, 1975 (40 FR 24928–29)

Applicant: Fort Worth Zoological Park, 2727 Zoological Park Drive, Fort Worth, Texas 76110, Elvie Turner, Jr., Director.

Official Action: Issued permit August 4, 1975, authorizing export of up to 34 ALLIGATORS (*Alligator mississippiensis*), hatched in captivity, as gifts to eight foreign zoos.

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" June 11, 1975 (40 FR 24923–24)

Applicant: Mr. William A. Barabino, 19 Sunset Avenue, North Reading, Massachusetts 01846.

Official Action: Issued permit August 4, 1975, to acquire, and transport, one pair of SWINHOE'S PHEASANTS (*Laphura swinhoii*), for propagation, from the L & L Pheasantry, Hegins, Pennsylvania, where they were hatched and raised in captivity.

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 27, 1975 (40 FR 27278–79)

Applicant: National Zoological Park, Smithsonian Institution, Washington, D.C. 20009, Dr. Theodore H. Reed, Director.

Offical Action: Issued permit August 11, 1975: "Authorized to transport 1/0 Golden Lion Marmoset (*Leontideus rosalia*)."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 13, 1975 (40 FR 25239–40)

Applicant: Alaska Area Director, U.S. Fish and Wildlife Service, 813 D Street, Anchorage, Alaska 99501.

Official Action: Issued permit August 12, 1975: "Permittee may conduct scientific research including inventory of aeries and determination of the nesting success of PEREGRINE FALCONS (*Falco peregrinus anatum* and *tundrius*)."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 11, 1975 (40 FR 24925–26)

Applicant: Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

Official Action: Issued permit August 12, 1975: "May conduct aerial surveys of nests of the SOUTHERN BALD EAGLE (*Haliaeetus leucocephalus leucocephalus*)."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 18, 1975 (40 FR 25732–33–34)

Applicant: Mr. Bob Dittrick, 8905 Weant Drive, Great Falls, Virginia 22066.

Official Action: Issued permit August 12, 1975: "Authorized to capture, band and release PEREGRINE FALCONS (*Falco peregrinus tundrius*)."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 16, 1975 (40 FR 25737–38)

Applicant: Santa's Land, Route 1, Box 134–A, Cherokee, North Carolina 28719, Mr. Danny Lyons, Owner and Manager.

Official Action: Issued permit August 14, 1975: "Permittee may transport from Canyonland Park, Fort Payne, Alabama, to Santa's Land, Cherokee, North Carolina, the following animals:

One BENGAL TIGER (*Panthera tigris*)
Two LEOPARDS (*Panthera pardus*)
Four SPIDER MONKEYS (*Ateles geoffroyi frontatus*)
One WOOLLY SPIDER MONKEY (*Brachyteles arachnoides*)

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JULY 3, 1975 (40 FR 28109–10)

Applicant: San Diego Zoological Garden, Post Office Box 551, San Diego, California 92112, Clyde A. Hill, Curator of Mammals.

Official Action: Issued permit August 15, 1975: "Authorized to import one (1) male SIBERIAN TIGER (*Leo tigris altaica*), from Russia through Holland."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 13, 1975 (40 FR 25236–37–38)

Applicant: Utah Cooperative Wildlife Research Unit, Utah State University UMC 52, Logan, Utah 84322, J. Juan Spillett, Acting Unit Leader.

Official Action: Issued permit August 19, 1975: "Authorized to trap, sex, weigh, tag, dye mark and release immediately not to exceed 400 PRAIRIE DOGS. Five prairie dogs (*Cynomys parvidens*) to be held for feeding studies."

NOTICE OF APPLICATION, PUBLISHED IN "FEDERAL REGISTER" JUNE 9, 1975 (40 FR 24544–45)

Applicant: Cape Romain National Wildlife Refuge, Route 1, Box 191, Awendaw, South Carolina 29429, Mr. George R. Garris.

Official Action: Issued permit August 19, 1975: "Authorized to study, band and attach auxiliary markings as authorized under Federal Bird Marking and Salvage Permit, collect not to exceed 50 eggs, and salvage BROWN PELICANS (*Pelecanus occidentalis*) and/or their parts. Eggs, parts and specimens may be transported to the Patuxent Research Center. All banded specimens must be released where taken."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 3, 1975 (40 FR 23900–01)

Applicant: San Antonio Zoological Gardens and Aquarium, 3903 North St. Mary's Street, San Antonio, Texas 78212, Louis R. DiSabato, Director.

Official Action: Issued permit August 19, 1975: "Authorized to export one female JAGUAR to Venezuela."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 18, 1975 (40 FR 25734–35–36)

Applicant: Oklahoma City Zoo, Rt. #1, Box 478, Oklahoma City, Oklahoma 73111, Lawrence Curtis, Director.

Official Action: Issued permit August 19, 1975: "Authorized to export two (2) female SIBERIAN TIGERS to Tel-Aviv, Israel."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 27, 1975 (40 FR 27275–76)

Applicant: Joseph A. Harmer, 144 Limekiln Pike, Chalfont, Pennsylvania 18914.

Official Action: Issued permit August 22, 1975: "Authorized to capture, band and release immediately at the capture site PEREGRINE FALCONS (*Falco peregrinus tundrius* and *anatum*)."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 27, 1975 (40 FR 27276–77–78)

Applicant: Jacksonville Zoological Society and Park, 8605 Zoo Road, Jacksonville, Florida 32218, Mr. John True, Curator of Birds.

Official Action: Issued permit August 22, 1975: "Authorized to receive, care for and

V40238 DEC 10 75 XUM

rehabilitate sick and injured endangered species of birds, and if possible to be returned to the wild."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 2, 1975 (40 FR 23774–75)

Applicant: David C. Smith, International Bird Rescue Research Center, 2701 Eighth Street, Berkeley, California 94710, J. M. Harris, D.V.M., Chairman.

Official Action: Issued permit August 22, 1975: "Permittee may salvage and care for injured and incapacitated birds and band and release to the wild."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 18, 1975 (40 FR 25738–39)

Applicant: Southwest Texas State University, Aquatic Station—Biology, San Marcos, Texas 78666, Glenn Longley, Ph.D., Assistant Professor.

Official Action: Issued permit August 22, 1975: "Authorized to trap TEXAS BLIND SALAMANDERS (*Typhlomolge rathbuni*) at locations listed in Item 10: Artesian wells at the SWTSU and 'Aquarena' at or near San Marcos, Texas."

NOTICE OF APPLICATION PUBLISHED IN "FEDERAL REGISTER" JUNE 11, 1975 (40 FR 24929–30)

Applicant: Mississippi State University, Department of Zoology, Mississippi State, Mississippi 39762, Dr. Jerome A. Jackson, Associate Professor of Zoology.

Official Action: Issued permit August 28, 1975: "Authorized to capture, band and apply auxiliary markings to RED-COCKADED WOODPECKERS as authorized under Federal Bird Marking and Salvage Permit."

NOTICE OF APPLICATION, PUBLISHED IN "FEDERAL REGISTER" JUNE 11, 1975 (40 FR 24924–25)

Applicant: Georgia Department of Natural Resources, Game and Fish Division, 270 Washington Street SW., Atlanta, Georgia 30334, Mr. Jack Crockford, Director.

Official Action: Issued permit August 28, 1975: "May capture, tag with radio telemetry equipment and relocate eight (8) ALLIGATORS (*Alligator mississipiensis*), from Blackbeard Island National Wildlife Refuge, for scientific research."

Each permit is available for public inspection during normal business hours at the U.S. Fish and Wildlife Service's office in Suite 600, 1612 K Street NW., Washington, D.C.

Dated: December 3, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

NEW MEXICO DEPARTMENT OF GAME AND FISH

Endangered Species Permit; Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93–205).

Applicant: New Mexico Department of Game & Fish, State Capitol, Santa Fe, New Mexico 87503, Ladd S. Gordon, Director.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

OMB NO. 42-R1670

1. APPLICATION FOR (*Indicate only one*)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.
To carry out activities involved in the management and the protection of endangered species in New Mexico, including survey, banding and collecting (only as necessary and later specified), transplanting, propagation, laboratory research, and related work. Permit to be issued to Department to be used by its employees and designees.

3. APPLICANT. (*Name, complete address and phone number of individual, business, agency, or institution for which permit is requested*)
New Mexico Department of Game & Fish
State Capitol
Santa Fe, New Mexico 87503
Telephone: 505-827-2923

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING: N/A

	HEIGHT	WEIGHT
☐ MR. ☐ MRS. ☐ MISS ☐ MS.		
DATE OF BIRTH	COLOR HAIR	COLOR EYES
PHONE NUMBER WHERE EMPLOYED	SOCIAL SECURITY NUMBER	
OCCUPATION		

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT
N/A

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
The Department is the state wildlife conservation agency, and as such it has the responsibility for management and protection of endangered species.

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.
Ladd S. Gordon

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED
N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED
State of New Mexico

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☐ NO
(*If yes, list license or permit number*)
Bird Marking and Salvage, No. 6747

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(*If yes, list jurisdictions and type of documents*)
Wildlife Conservation Act, 1973 (N.M.S. 53-2-50 to 53-2-59)

9. CERTIFIED CHECK OR MONEY ORDER (*if applicable*) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF
$N/A

10. DESIRED EFFECTIVE DATE
Sept. 1, 1975

11. DURATION NEEDED

Ladd S. Gordon, Director — August 15, 1975

OCTOBER 20, 1975.

MR. LYNN A. GREENWALT,
U.S. Fish and Wildlife Service,
Washington, D.C. 20240

DEAR LYNN:

Enclosed is our application for the permit to carry out activities involved in management and protection of endangered species in New Mexico. The permit covers all of the federally listed endangered species that we believe to occur regularly in New Mexico, or in the case of the whooping crane, which we expect to soon occur here. The species in our application are the blackfooted ferret, Mexican duck, southern bald eagle, American peregrine falcon, whooping crane, Pecos gambusia, Gila topminnow, Colorado River squawfish, and Gila trout. Species on the federal list that do not occur regularly in New Mexico or are unsubstantiated here, are not listed in our application; these are the brown pelican, eskimo curlew and jaguar.

I realize that the procedure for issuing this permit involves a thirty-day review in the Federal Register and that initial issuance of the permit may be delayed until next year. Inasmuch as some of our activities are already under way, I am requesting that we have interim authority to continue the work that we have begun under previous understanding that such work is legitimate, justified, and compelling if we are to benefit our endangered species in the best and most prompt manner.

A further point that I wish to make is that we wish the eventual permit to be issued to the Department to be used by our employees and our authorized designees, inasmuch as we will have from time to time people operating with us on endangered species that are not our direct employees, but are under our supervision.

Very truly yours,

LADD S. GORDON,
Director.

(By William S. Huey, Acting Director).

13. Species information relevant to processing this application to fulfill requirements of 50 CFR 17, § 17.23(a), follows:

(1) Common and scientific names of species to be covered, thus brief resumes of ongoing or anticipated research;

a. Black-footed ferret—*Mustela nigripes.* Survey of prairie dog colonies and areas where ferrets have been recorded will be initiated in September 1975.

b. Mexican duck—*Anas diazi.* Survey of range in New Mexico, breeding, numbers, ecology, interactions with mallards, and similar work undertaken in September 1974, will be continued and intensified in the near future. Banding and marking of some birds is contemplated.

c. Southern bald eagle—*Haliaeetus leucocephalus leucocephalus.* Survey of range in New Mexico, possible breeding, numbers, and ecology begun in September 1974, will continue. In addition, eagle carcasses will be sexed and measured to determine subspecies, and some banding and marking of trapped birds may be done.

d. American peregrine falcon—*Falco peregrinus anatum.* Survey of range in New Mexico, breeding, numbers, and ecology begun in September 1974, will continue. In addition, possible propagation and enhacement of reproduction of wild pairs is contemplated, in conjunction with Rocky Mountain peregrine recovery team. Young and adult peregrines may be banded and/or color-marked to study range and other aspects of the biology.

e. Whooping crane—*Grus americana.* Monitoring of young whoopers that may be produced by foster-parent sandhill cranes and that are expected to migrate to New Mexico will begin in October 1975, and continue through departure of these birds in spring 1978. Data to be gathered will involve range, numbers, ecology, behavior, and related information.

f. Pecos gambusia—*Gambusia nobilis.* Surveys of range, numbers, habitats, competitive relationships, and breeding began in June 1975, will continue. Also contemplated are capture for marking, specimens for taxonomic and food habits studies, aquarium research, transplantation, and propagation.

g. Gila topminnow—*Poeciliopsis occidentalis occidentalis.* Efforts will continue to locate populations for study in New Mexico, where last record in the 1950's; some specimen collection is also contemplated. Also contemplated is possibility of importation of live specimens from Arizona, for purposes of aquarium research, propagation, and possibly transplantation.

h. Colorado River squawfish—*Ptychocheilus lucius.* Survey will continue to locate populations in the state, where the only records to date are from the San Juan drainage in the northwest. Located populations would be subjected to studies of numbers, breeding, ecology and other facets of their biology, plus some specimen collection.

i. Gila trout—*Salmo gilae.* Surveys of range, numbers, breeding, habitats, taxonomy and relationships with other fish species, begun in May 1974, (and earlier) will continue, with some fish being collected as specimens and others marked and released. In addition, transplant and propagation work is contemplated, the former in connection with a detailed study of populational characteristics as part of work conducted by the Gila trout recovery team.

Other endangered species which are extirpated, unsubstantiated, or otherwise not considered residents of New Mexico could be met with by Department personnel and are listed here in case duties would involve some contact with these.

j. Brown pelican—*Pelecanus occidentalis.*

k. Eskimo curlew—*Numenius borealis.*

l. Jaguar—*Felis onca* sspp.

APPENDIX No. 1

By-species list of persons with special knowledge of endangered species in New Mexico and adjacent areas.

a. Black-footed ferret, Dr. James Findley, Department of Biology, University of New Mexico, Albuquerque, New Mexico 87106.

b. Mexican duck, Mr. William S. Huey, N.M. Dept. of Game and Fish, State Capitol, Santa Fe, New Mexico 87503. Dr. Charles Davis, Dept. of Wildlife, New Mexico State University, Las Cruces, New Mexico 88001. Mr. Richard Rigby, Bosque del Apache, N.W.R., San Antonio, New Mexico.

c. Southern bald eagle, Mr. James L. Sands, N.M. Dept. of Game and Fish, Albuquerque, New Mexico 87108.

d. American peregrine falcon, Mr. Frank Bond, 540 Camino Rancheros, Santa Fe, New Mexico 87501. Mr. Tom Smylie, U.S. Fish and Wildlife Service, Albuquerque, New Mexico.

e. Whooping crane, Mr. Huey, Mr. Sands, Mr. Rigby.

f. Pecos gambusia, Dr. James Subiette, Dept. of Biology, Eastern New Mexico University, Portales, New Mexico 88130. Dr. Robert R. Miller, Museum of Zoology, University of Michigan, Ann Arbor, Michigan. Dr. Clark Hubbs, Dept. of Zoology, Univ. of Texas, Austin, Texas 78712. Dr. William J. Koster, Dept. of Biology, Univ. of New Mexico, Albuquerque, New Mexico 87106.

g. Gila topminnow, Dr. Miller, Dr. Hubbs, Dr. W. L. Minckley, Dept. of Zoology, Arizona St. University, Tempe, Arizona. Dr. Koster.

h. Colorado River squawfish, Dr. Koster, Dr. Minckley.

i. Gila trout, Dr. Miller, Dr. Koster, Dr. Robert J. Behnke, Div. of Research, Colorado State University, Ft. Collins, Colorado 80521. APPENDIX No. 2

Permit Requirements and Research Plans.

Black-footed ferret. Permit requirements:

a. No collections or captures are contemplated, but occasional dead animals have been found in the past that were salvaged as specimens; this circumstance could be repeated in the future, and a salvage permit is needed for indeterminate numbers.

b. In addition, removal of nuisance, injured, or threatened individuals could be required, so that a permit to capture, maintain, and transplant such animals is needed for indeterminate numbers.

Research plans—A summary of specimen and reliable sight records shows this species to have occurred in New Mexico in all parts of the state except the extreme southwest. Counties of occurrence are as follows (* indicates specimen record): Sandoval, *McKinley, Colfax, *Valencia, *Santa Fe, *Guadalupe, Curry, DeBaca, *Catron, *Chaves, and *Lea. The most recent records are in the late 1960's and in 1970, and there is reason to believe that the species persists in New Mexico. The animals have been found from 3500 to over 9000 feet in grasslands or similar open habitats. Most have been in or near colonies of blacktailed (*Cynomys ludovicianus*) or white-tailed (*C. gunnisoni*) prairie dogs. Survey efforts will be increased in prairie dog and other areas of ferret reports, and a public-questionnaire approach may also be implemented. The handling of live or dead specimens is a possibility, and it should be anticipated in the event that it materializes.

Mexican duck. Permit requirements:

a. No collections are contemplated, but hunter-killed or wounded birds or other chances for speciment procurement may arise, including of deserted nests or eggs. Hence, a salvage permit is needed for indeterminate numbers.

b. In addition, birds may be caught in duck or goose-trapping operations that would be subject to marking and banding, and in the future a program specifically with Mexican ducks may be initiated. Numbers not to exceed 200 per year in 1975–1977.

Research plans—Mexican ducks occur regularly in New Mexico in the lower Rio Grande Valley and in the southwest, north at least sporadically on the Mogollan Plateau. Survey work has already begun on these populations to determine range, numbers, movements, habitats, and other such data. In addition, interactions with mallards plus hybridity are also being monitored, particularly with the view of determining how extensive the interface is between the two forms and to attempt to identify those populations that are the best goals for management. Trapping of Mexican ducks was done for several years by the Department in Dona Ana County, and much experience in this procedure resides among its personnel.

Southern bald eagle. Permit requirements:

a. Occasional injured, incapacitated, or dead specimens have been procured, and this trend is likely to continue. A permit to possess, maintain, and analyze these specimens is needed, with the aim of rehabilitating injured birds and of determining the causes of death or disability and the subspecies identity of all birds (numbers indeterminate).

b. Rehabilitated birds will need to be marked and banded before release, and for this a permit is required. In addition, in the future the Department may embark on a capture program, in which measuring, aging, marking, and banding would be objectives. Captures not to exceed 100 birds per year in 1975–1977.

Research plans—From time to time injured or dead bald eagles are found, turned over to, or otherwise come into the hands of personnel of the Department. In order to gather data on subspecies and the biology of the species in New Mexico, these specimens need to be examined by members of the Department's **Endangered Species Program**, particularly with reference to determining sex and age and making measurements on the specimens. In the event that a salvageable injured bird is obtained, such studies can still be done at some appropriate time. Dead birds will be subsequently turned over to the U.S. Fish and Wildlife Service or other designated agent. In regard to injured birds that can be salvaged, the Department would turn such birds over to the U.S.F.W.S. or, preferably, to qualified caretakers until recovery is achieved. Recovered birds can be released into the wild by such caretakers or the U.S.F.W.S. In addition, concentrations of eagles occur on larger reservoirs and streams in the state, and a program of live-trapping, marking, and banding at such sites should yield valuable data.

American peregrine falcon. Permit requirements:

a. To allow importation from Colorado, New York, or other U.S. states the eggs, young, and adults of *anatum* peregrines for propagation purposes or for release into the wild. Numbers not to exceed 10 eggs and 20 birds per year in 1976 and 1977.

V40238 DEC 10 75 XUM

b. To allow the maintenance of captive breeding stock for propagation and release purposes.

c. To allow capture, marking, and banding of young and adult peregrines in New Mexico; typically these would be *anatum*, but *tundrius* may also occur. Numbers not to exceed 50 per year through 1975–1977.

d. To salvage injured or dead peregrines for scientific purposes, including (1) treatment of live birds and release if possible, and (2) autopsy and preservation of dead birds (numbers indeterminate).

Research plans—The Rocky Mountain—Southwest Peregrine Recovery Team and the Department contemplate programs to enhance reproductive success in wild peregrines through such methods as adding additional eggs or young to eyries for the parents to raise. Such eggs or young can be from captive or wild sources, with double-clutching the probable device in the latter case. Such manipulations are to be extremely closely controlled and monitored, and at no time would the entire wild population be subject to manipulation. In addition, carefully selected captive stock will be maintained for breeding purposes, both in New Mexico and elsewhere in the Rocky Mountain Southwest or other U.S. region. Eggs and progeny of this stock, to be rejuvenated by birds taken from the wild from time to time, will be used in restoration efforts involving wild populations. All of these birds would be subject to marking and banding, and a program may be initiated to capture, mark, and band other peregrines in the state. Finally, occasionally incapacitated birds are found in the wild, and these need the immediate attention of the Department when found.

Pecos gambusia. Permit requirements:

a. To allow for taking of specimens for taxonomic, food habit, growth, age, and other studies in the Pecos Valley. Numbers not to exceed 500 per year in 1975–1977.

b. To allow for taking of live specimens for aquarium and propagation studies, in numbers not to exceed 1000 per year in 1975–1977.

c. To allow for taking of live specimens to be marked and replaced for gathering of data on the biology of wild populations. Numbers not to exceed 2000 per year in 1975–1977.

d. To allow for capture of live specimens for release in other suitable areas in the native range of the species in New Mexico. Stock for release could also come from propagation sources outlined in (b) above. Capture not to exceed 2000 per year and release not to exceed 50,000 per year in 1975–1977.

Research plans: Investigations are currently underway in the Pecos River drainage to determine the distribution and numbers of all fish species, including the endangered Pecos gambusia. Specimen verification of the range of this species is needed particularly as *Gambusia affinis* is widespread there and is a potential source of confusion without such collections. In addition, life history data are needed on the species, including the marking of fish in the wild and the maintenance of others in captivity. This phase has also begun and progress is being made. Finally, propagation studies are anticipated with this species, which has the potential of being used for mosquito control. Hence, a release program could be undertaken, restoring the species to much of its native range in the state.

Gila topminnow. Permit requirements:

a. Voucher specimens to determine areas of occurrence may be needed, not to exceed 100 for preservation each year and 1000 for maintenance in captivity per year in 1975–1977.

b. In view of the likelihood that this species is extirpated in New Mexico, we anticipate a need to import specimens from Arizona, where there are several thriving populations. These specimens would be maintained for aquarium and propagation studies and for release into the native range of the species in New Mexico. Numbers not to exceed 10,000 per year imported each year in 1975–1977, with other figures indeterminate due to reproduction that will probably occur.

Research plans: This species was last collected in New Mexico at Frisco Hot Springs, San Francisco River, Catron Co., in 1955. Subsequent surveys have failed to disclose the species in either that river or the overall Gila system; however, the possibility exists that one or more populations still exist in the state, and voucher specimens would be necessary to verify this. In addition, wild stock should be taken into captivity to gather life history data and to attempt propagation of the species, which should aid in its restoration perhaps including into selected areas for mosquito control. Importation of Arizona specimens is a definite possibility if the species no longer persists in New Mexico.

Colorado River Squawfish. Permit requirements:

a. To capture, salvage, or maintain voucher specimens substantiating the continued occurrence of the species in the state. Numbers not to exceed 10 specimens captured per year in 1975–1977; numbers of salvaged or maintained specimens indeterminate.

Research plans: This species was last verified as occuring in New Mexico in 1965, in the San Juan drainage. It has never been reported in the Gila drainage in New Mexico, although it occurred farther west in Arizona. Surveys of both the streams are a continuing operation, and voucher specimens would be necessary for verification of the occurrence of the species, which when young closely resembles chubs of the genus *Gila*. In the past, fisherman and game-fishery surveys have yielded most New Mexico specimens, and these incidental sources are probably the most likely to yield records in the future in the state.

Gila trout. Permit requirements:

a. Voucher specimens are a continuing requirement to determine range, taxonomy, growth rate, age, and other factors in the Gila-like trout of southwestern New Mexico. Numbers not to exceed 20 per stream per year, with the aggregate not to exceed 500 fish per year in 1975–1976.

b. Captures for propagation, marking for release, and transplantation are an integral part of the recovery plan, and the most likely sources for large-scale captures are Main Diamond and Spruce creeks. Numbers not to exceed 2000 fish per year in 1975–1977.

c. Biological studies in Little Creek, to begin when present exotic brown trout are eliminated, a stream barrier erected, and Gila trout are introduced, will require extensive handling of Gila trout, including measuring, marking, and other studies (numbers indeterminate).

d. To probe the suitability of Gila trout as a fishery species, a simulated angling study of a segment of the Main Diamond Creek population is contemplated. Captured fish would be marked and largely released in the same area or elsewhere, with some being kept for preservation or captive work. Numbers not to exceed 500 fish per year in 1976–1977.

Research plans: At present Gila trout are known from Main and South Diamond, McKenna, Iron, McKnight, Sheep Corral, and Spruce creeks in New Mexico, all streams in the Gila National Forest or Wilderness. A complete survey of all trout waters has been undertaken by this Department and New Mexico State University, in conjunction with the U.S. Forest Service and other agencies and individuals. It is felt that such survey is basic to management efforts for this species, with emphasis on identifying what kinds of trout, if any, are present now in the study area. Future work is planned to include controlled transplanting and detailed followup study of Gila trout in Little Creek, probably in 1976.

Propagation work is also a future goal and will probably be carried out at the Glenwood Hatchery, a Department facility devoted to trout-rearing. In addition, it is felt that the suitability of Gila trout for supporting a sport fishing needs to be probed, and this could be done by a study simulating angling on a segment of the large population in Main Diamond Creek. Fish would be largely marked and released, but some would be retained. A major aim would be to probe methods of arriving at population structures that avoid stunting and offer sustained yields, while at the same time maintaining a viable population of this endangered species.

All of these activities will be under the direct supervision and control of the Department's Endangered Species Program, which is represented along with the above named agencies on a functioning interim recovery team for the Gila trout.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or befort January 9, 1976 will be considered.

Dated: December 4, 1975.

C. R. BAVIN,
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

Geological Survey

[Revision of OCS Order No. 8]

PLATFORMS, STRUCTURES, AND ASSOCIATED EQUIPMENT

Gulf of Mexico Area

A proposed revision to OCS Order No. 8, "Platforms, Structures, and Associated Equipment," was published in the FEDERAL REGISTER on June 3, 1974, with a solicitation for comments. In addition, a further revision of the Order was published on January 21, 1975, and a public meeting held on February 25, 1975, to discuss the technical aspects of the proposed revisions. All comments received from these solicitations have been considered and included in the proposed Order as appropriate.

Inasmuch as the latest proposed revision of Order No. 8 has been modified to some extent from the earlier versions, it is believed that an additional comment period should be offered. In particular, the Geological Survey is interested in receiving comments on the use of the Recommended Practice developed by a committee of the American Petroleum Practice for Analysis, Design, Installation, and Testing of Basic Surface Safety Systems on Offshore Production Platforms." This document has been reviewed by a subpanel of the Marine Board of the Assembly of Engineering of the National Research Council which recommended its use. The Geological Survey has found the document to be applicable to the design of production facilities on off-shore platforms with certain modifications. The necessary modifications are included in OCS Order No. 8.

Interested persons may submit written comments and suggestions to the Director, U.S. Geological Survey, National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, by January 5, 1976.

W. A. RADLINSKI,
Acting Director.

OCS ORDER NO. 8

Effective (Date) ----------

PLATFORMS, STRUCTURES, AND ASSOCIATED EQUIPMENT

This order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.19(a). Section 250.19(a) provides as follows:

(a) The supervisor is authorized to approve the design, other features, and plan of installation of all platforms, fixed structures, and artificial islands as a condition of the granting of a right of use or easement under Paragraphs (a) and (b) of § 250.18 or authorized under any lease issued or maintained under the Act.

The operator shall be responsible for compliance with the requirements of this Order in the installation and operation of all platforms and structures, including all facilities installed on a platform or structure, whether or not operated or owned by the operator. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b). *All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor.* References in this Order to approvals, determinations, or requirements are to those given or made by the Area Oil and Gas Supervisor or his delegated representative.

Following approval of applications, installations and operations shall be performed as approved. If deemed advisable, changes to approved applications may be proposed; however, approval of such proposals shall be required prior to implementation.

The following requirements are applicable to all platforms and structures approved and installed subsequent to the effective date of the Order. When structural or equipment modifications to existing platforms and structures are proposed, only requirements relevant to the modifications shall be applicable.

1. *Platform Design.* A. *General Design.* A platform or structure shall be designed for safe installation and operation for its intended use and service life at a specific site. Steel structures shall be designed in accordance with those provisions of API RP 2A, "Planning, Designing and Constructing Fixed Offshore Platforms," January 1975. The design of structures other than steel shall be evaluated on an individual basis. Consideration shall be given to conditions which may contribute to structural damage such as:

(1) Wind, wave, and current forces and other environmental loading forces.

(2) Functional loading conditions including the weight of the structure and all permanently fixed equipment, and the effects of static and dynamic functional load conditions during installation and the design operational service period.

(3) Water depth, bottom topography, surface and subsurface soil conditions, slope stability, scour conditions, and other pertinent geologic conditions based on information from on-site investigations.

2. *Application.* Prior to installation of a fixed platform or structure, *the operator shall submit for approval,* in duplicate, an application showing essential features of the platform or structure and supporting design information as follows:

A. *General Information.* (1) Identification data, which shall include the platform or structure designation, lease number, area name, block number, and operator.

(2) Location data, including plat showing the distance from the nearest two block lines.

(3) Primary use and other intended functions, including planned drilling, production, and storage operations.

(4) Personnel facilities, personnel access to living quarters, boat landings, and heliports.

(5) A description of each planned phase of operation, including simultaneous operations for the service life of the platform or structure.

(6) Drawings and plats to clearly illustrate essential parts, including number and location of well slots, water depth, nominal size and thickness of jacket and deck column legs, nominal size, thickness, and design penetration of piling.

(7) A description of the method of corrosion protection.

B. *Environmental Information.* (1) List of pertinent environmental data which have a bearing on the installation, operation, or design of the platform or structure, including wave height, current, wind velocity, water depth, storm and astronomical tide data, and factors considered in subparagraph 1.A.(3).

(2) Listing of total design functional loads and wind, wave, and current forces for the following approaches: longitudinal, transverser, and diagonal.

C. *Foundation.* (1) A listing on on-site investigations and tests, including the results.

(2) A description of foundation loads for environmental and functional forces listed in subparagraphs 2.B(1) and (2).

(3) In areas susceptible to soil movement, an analysis of slope and soil stability in relation to the foundation design loads.

D. *Installation.* Procedures for installation of the platform or structure shall be submitted. The recommendations contained in API RP 2A, "Planning, Designing, and Constructing Fixed Offshore Platforms," January 1975, are acceptable.

E. *Exception to Supporting Design Information Submittal.* The following information shall be developed and utilized in platform design; however, *submittal with the construction application is not required.* This information shall be made available to the appropriate District Supervisor upon his request.

(1) A description of the critical design loading and design criteria, taking into consideration maximum environmental and operational loading conditions expected over the service life of the platform or structure. This shall include those conditions considered under subparagraphs 1.A (1), (2), and (3) above.

(2) For steel structures, a description of the materials, specifications, strength analyses, and allowable stresses over the service life.

The recommendations of API publications API RP 2A, "Planning, Designing, and Constructing Fixed Offshore Platforms," January 1975, are acceptable practice concerning subparagraphs (1) and (2) above.

(3) For concrete structures, a description of the materials, specification, and strength and serviceability requirements and analyses of the reinforcing systems.

3. *Certification.*

A. Detailed structural plans certified by a registered professional engineer shall be on file and maintained by the operator or his designee.

B. The following certifications, signed and dated by a company representative, shall accompany the application:

(1) "(Operator) certifies that this platform has been certified by a registered professional engineer and the structure will be constructed, operated, and maintained as described in the application and any approved modification thereto. Certified Plans are on file at ----------."

(2) Certification that the mechanical and electrical systems of the facility will be designed and installed under the supervision of a registered professional engineer. Maintenance of these systems will be by qualified personnel.

4. *Design, Installation, and Operational Features of Production Facilities.* A. All production facilities, including separators, treaters, compressors, headers, and pipelines, shall be designed, installed, and maintained in a manner which will facilitate efficient, safe, and pollution-free operation.

B. As soon as practicable, but not later than three months after the effective date of this Order, new platform production facilities shall be protected with a basic and ancillary surface safety system designed, analyzed, installed, tested, and maintained in operating condition in accordance with the provisions of API RP 14C "Analysis, Design, Installation, and Testing of Basic Surface Safety Systems on Offshore Production Platforms," June 1974, as amended November 1975, and the additional requirements of this Order. For this application, the words "should" contained in API RP 14C shall be read "shall" except for those contained in explanatory statements, paragraphs 3.4(c), page 11 and 4.3(4)(a)–(f), pages 19–20. In the event that processing components are to be utilized other than those for which Safety Analysis Tables (SAT's) and Safety Analysis Checklists (SAC's) are included in API RP 14C, the analysis technique and documentation specified therein shall be utilized to determine the effects and requirements of such components upon the safety system.

Operators may utilize the options contained in API RP 14C during Safety Systems Design; however, options selected and deployed on the schematic flow diagram and Safety Analysis Function Evaluation (SAFE) Chart are subject to approval by the appropriate District Supervisor.

C. Prior to installation, *the operator shall submit for approval,* in duplicate, information relative to design and installation features, as indicated in subparagraphs (1) through (6) below. This information shall also be maintained at the operator's onshore field engineering office.

(1) A flow schematic showing size, capacity, and design working pressure of separators, treaters, storage tanks, compressors, pipeline pumps, and metering devices.

(2) A schematic flow diagram (Reference API RP 14C, Example Figure E1, page 79) and the related Safety Analysis Function Evaluation (SAFE) Chart (Reference API RP 14C, paragraph 4.3(C), page 20.) These shall be developed with consideration of the pro-

V40238 DEC 10 75 XUM

visions of API RP 14C and the additional requirements of this Order.

(3) A schematic piping diagram showing the size and design working pressure with reference to welding specification(s) or code(s) used.

(4) A diagram of the fire-fighting system.

(5) Electrical system information including the following:

(a) Plan view of each platform deck outlining any nonhazardous area; i.e., areas which are unclassified with respect to electrical equipment installations, and areas in which potential ignition sources, other than electrical, are to be installed. The area outline should include the following information:

(i) Any surrounding production or other hydrocarbon source and a description of deck, overhead, and firewall.

(ii) Location of generators, control rooms, panel boards, major cabling—conduit routes and identification of wiring method.

(b) Elementary electrical schematic of any platform safety-shutdown system with functional legend.

(6) An application for the installation and maintenance of all gas detection systems. The application shall include the following:

(a) Type, location, and number of detection heads.

(b) Type and kind of alarm, including emergency equipment to be activated.

(c) Method used for detection of combustible gases.

(d) Method and frequency of calibration.

(e) Name and qualifications of organization or personnel to be perform system inspection and calibration.

(f) A functional block diagram of the gas detection system, including the electric power supply.

(g) Other pertinent information.

D. *Additional Safety and Pollution Control Requirements.* The following requirements modify, or are in addition to, those contained in API RP 14C. For platforms *installed after the effective date of this Order* compliance is required as soon as practicable, but not later than three months after the effective date. Operators of platforms and structures *installed prior to the effective date of this Order* shall comply with these requirements at the earliest practicable date, but not later than one year from the effective date, unless otherwise specified herein.

(1) *Design and Installation.* (a) *Pressure Vessels.*

(i) In addition to the protection specified in API RP 14C, Section A.4.2.b(1)(a), (b) (part), and (c), page 34, hydrocarbon-handling pressure vessels other than separators and pressure or surge tanks shall be equipped with high- and low-liquid level shut-in controls.

(ii) Pressure relief valves shall be designed, installed, and maintained in accordance with applicable provisions of Sections I, IV, and VIII of the ASME Boiler and Pressure Vessel Code, July 1, 1974. All relief valves and vents shall be piped in such a way as to minimize the possibility of fluid striking personnel or ignition sources.

(iii) Steam generators shall be equipped with low-water-level controls in accordance with applicable provisions of Sections I and IV of the ASME Boiler and Pressure Vessel Code, July 1, 1974.

(iv) All relief valves shall be set to start relieving at the design working pressure of the vessel and shall be sized to prevent the pressure from rising more than 10 percent above the design working pressure of the vessel or as otherwise provided by Section VIII of the ASME Boiler and Pressure Vessel Code, July 1, 1974. The high-pressure shut-in sensor shall activate sufficiently below the design working pressure to positively insure operation before the relief valve starts relieving. The low-pressure shut-in sensor shall activate no lower than 15 percent or 5 psi, whichever is greater, below the lowest pressure in the operating range.

(v) Pressure sensors may be of the automatic or nonautomatic reset type, but where the automatic reset types are used, a nonautomatic reset relay shall be installed. All pressure sensors shall be equipped to permit testing with an external pressure source.

(vi) All pressure or fired vessels used in the production of oil or gas, installed after the effective date of this Order, shall conform to the requirements stipulated in the edition of the ASME Boiler and Pressure Vessel Code, Sections I, IV, and VIII, as appropriate, in effect at the time the vessel is installed. Uncoded vessels now in use shall have been hydrostatically tested to a pressure 1.5 times their normal working pressure. The test date, test pressure, and working pressure shall, within six months after the effective date of this Order, be marked on the vessel in a prominent place. A record of the test shall be maintained by the operator.

(b) *Flowlines.* (i) All flowlines from wells shall be equipped with high- and low-pressure shut-in sensors located downstream of the well choke. If there is more than 10 feet of line between the wellhead wing valve and the primary choke, an additional low-pressure shut-in sensor shall be installed in this section. The high-pressure shut-in sensor shall be set no higher than 10 percent above the highest operating pressure of the line, but in all cases, it shall be set sufficiently below the maximum shut-in pressure of the well or the gas-lift supply pressure to assure actuation of the surface safety valve. The low-pressure shut-in sensor shall be set no lower than 10 percent or 5 psi, whichever is greater, below the lowest operating pressure of the line in which it is installed.

(ii) In the event a well flows directly to the pipeline before separation, the flowline and valves from the well located upstream of and including the header inlet valve(s), shall be able to withstand the maximum shut-in pressure of the well, unless 1: protected by a relief valve connected to either the platform flare scrubber or some other approved location other than into the departing pipeline, or 2: the flowline is equipped with an additional automatic shutdown valve controlled by an independent high-pressure sensor. The platform flare scrubber shall be designed to handle, without liquid hydrocarbon carryover to flare, the maximum anticipated flow of liquid hydrocarbons which may be relieved to the vessel.

(c) *Remote Shut-in Systems.* (i) Remote shut-in controls shall be quick-opening valves, except those on the boat landing(s), which may be a plastic loop.

(d) *Engine Exhausts.* (i) All engine exhausts with temperatures greater than 440°F. (205°C.) shall be insulated and piped away from fuel sources. Exhaust piping from diesel engines shall be equipped with spark arrestors.

(e) *Glycol Dehydration Units.* (i) A hydrocarbon separator shall be installed in the glycol return line on all glycol dehydration units.

(f) *Compressors.* (i) Each compressor installation existing as of the effective date of this Order shall be protected by high-liquid-level shut-in controls and a pressure relief valve installed on each interstage scrubber. High-temperature shutdown controls shall be installed on the compressor cylinders unless interstage scrubbers are protected by high- and low-pressure shut-in controls.

All compressor installations initiated as of the effective date of this Order shall be protected by high- and low-pressure and high-liquid-level shut-in controls and a pressure relief valve installed on each interstage scrubber.

All compressor interstage scrubbers shall be protected by low-liquid-level shut-in controls unless dump is through a choke restriction to another pressure vessel.

(ii) In addition to the provisions of API RP 14C, paragraphs A8.3a and A8.3d, high- and low-pressure shut-in sensors and low-liquid-level shut-in controls protecting compressors suction and discharge piping and associated suction and interstage scrubbers shall be designed to actuate automatic isolation valves located in each compressor suction and fuel gas line so that the compressor unit and associated vessels can be isolated from all input sources.

For compressors installed after the effective date of this Order, those compressor units installed in a building shall have the isolation valves located outside the building. Each suction and interstage high-liquid-level shut-in control shall, as a minimum, be designed to shut down the compressor prime mover.

As an alternative, low-liquid-level shut-in control(s) installed in suction and interstage scrubber(s) may be designed to actuate automatic shutoff valve(s) installed in the scrubber dump line(s).

(iii) Compressor installations of 1,000 horsepower or less are excluded from those requirements of API RP 14C, A8.3d, page 54, which provide for installation of a blowdown valve on the discharge line.

(iv) Compressor installations existing prior to the effective date of this Order, and which are installed in a building, are excluded from the requirement of API RP 14C, A8.3b, which prescribes that the check valve be located outside of the building.

(v) The automatic isolation valves installed in compressor suction and fuel gas piping shall also be actuated by shutdown of the prime mover.

(g) *Curbs, Gutters, and Drains.* (i) Curbs, gutters, and drains shall be installed in all deck areas in a manner necessary to collect all contaminants, unless drip pans or equivalent are placed under equipment and piped to a sump which will automatically maintain the oil at a level sufficient to prevent discharge of oil into Gulf waters. Sump piles or open-ended sumps shall be used to collect only produced water and liquids from drip pans and deck drains.

(h) *Fire-fighting Systems.* (i) A fire-fighting water system of rigid pipe with fire hose stations shall be installed and may include a fixed water spray system. Such a system shall be installed in a manner necessary to provide needed protection in areas where production-handling equipment is located. A fire-fighting system using chemicals may be used in lieu of a water system if determined to provide equivalent fire protection control.

An alternate fuel or power source shall be installed to provide continued pump operation for the system during platform shutdown, unless as alternate fire-fighting system is provided.

Portable fire extinguishers shall be located in the living quarters and other strategic areas.

A diagram of the fire-fighting system showing the location of all equipment shall be posted in a prominent place on the platform or structure.

(i) *Gas Detection System.* (i) A diagram of the gas detection system showing the location of all gas detection points shall be posted in a prominent place on the platform or structure.

(ii) All gas detection systems shall be capable of continuously monitoring for the presence of combustible gas in the areas in which the detection devices are located. The gas detector power supply shall be from a continually energized power source.

(iii) The use of fuel gas odorant is an acceptable alternate to an automatic gas detection and alarm system in enclosed, continuously manned areas of the facility.

(j) *Electrical Equipment.* The following requirements shall be applicable to all electrical equipment and systems installed:

(i) All engines shall be equipped with a low-tension ignition system of a low-fire-hazard type and shall be designed and maintained to minimize release of sufficient electrical energy to cause ignition of an external combustible mixture.

(ii) All electrical generators, motors, and lighting systems shall be installed, protected, and maintained in accordance with the edition of the National Electrical Code and API RP 500 B in effect at the time of installation.

(iii) Wiring methods which conform to the National Electrical Code or to IEEE 45, "Recommended Practice for Electric Installations on Shipboard," in effect at the time of installation, are acceptable.

(iv) An auxiliary power supply shall be installed to provide emergency power capable of operating all electrical equipment required to maintain safety of operations in the event of a failure in the primary electrical power supply.

(k) *Erosion.* A program of erosion control shall be in effect for wells having a history of sand production. The erosion control program may include sand probes, X-ray, ultrasonic, or other satisfactory monitoring methods. An annual report, by lease, on the results of the program shall be submitted by the first of September to the appropriate District Supervisor.

(2) *Operations.* (a) Any device on wells, vessels, or flowlines temporarily out of service shall be flagged. Safety devices and systems on wells which are capable of producing shall not be bypassed or blocked out of service unless necessary during start-up or maintenance operations and then only with personnel on duty aboard the platform.

(b) When wells are disconnected from producing facilities and blind flanged or equipped with a tubing plug, compliance is not required with provisions of API RP 14C and of this Order concerning (a) installation of automatic fail-close surface safety valves on wellhead assemblies, (b) installation of high- and low-pressure shut-in sensors downstream of the well choke in flowlines from wells, and (c) installation of check valves in header individual flowlines. All open-ended lines connected to producing facilities shall be plugged or blind-flanged.

(c) *Simultaneous Operations.* Prior to conducting activities, simultaneously with production operations, which could increase the possibility of occurrence of undesirable events such as harm to personnel or to the environment, or damage to equipment, *an operator's Contingency Plan shall be filed for approval* by the appropriate District Supervisor. The plan shall be filed within 90 days after the effective date of this Order. Activities requiring the plan are drilling, workover, wireline, and major construction operations. The plan shall include:

(i) A narrative description of operations.

(ii) Schematic plans showing areas of activities.

(iii) Identification of critical areas of simultaneous activities.

(iv) Procedures for mitigation of potential undesirable events including:

(a) The guidelines the operator will follow to assure coordination and control of simultaneous activities.

(b) Indication as to the person having overall responsibility, as person in charge at the site, for safety of platform operations.

(c) An outline of any additional safety measures that are required for simultaneous operations.

(d) Specification of any added or special equipment or procedural conditions imposed when simultaneous activity is in progress.

(d) *Welding Practices and Procedures.* The following requirements shall apply to all platforms and structures, including mobile drilling and workover structures. These requirements shall apply to fixed structures after the drilling out of the drive or structural casing for the first well drilled on the structure, entry into a well to be tied back to the structure, or first flow of combustible fluids to the structure. The period of time during which these requirements are considered applicable to mobile drilling structures is the interval from the drilling out of the drive or structural casing until the blowout-preventer stack and riser are pulled in the final abandonment, suspension, or completion. These requirements shall apply to workover rigs when such rigs are performing remedial work on any wells open to hydrocarbon-bearing zones.

For the purpose of this Order, the term "welding and burning" is defined to include arc or acetylene cutting and arc or acetylene welding.

Each operator shall file for approval by the appropriate District Supervisor a Welding and Burning Safe Practices and Procedures Plan. The plan shall be filed within 90 days after the effective date of this Order and shall include company qualification standards or requirements for personnel and the methods by which the operator will assure that only personnel meeting such standards or requirements are utilized. A copy of this plan shall be available in the field. Any person designated as a welding supervisor shall be thoroughly familiar with this plan.

Prior to welding or burning operations, the operator shall establish approved safe welding areas. Such areas shall be constructed of noncombustible or fire-resistant materials free of combustible or flammable contents and be suitably segregated from adjacent areas. National Fire Protection Association Bulletin No. 51B, "Cutting and Welding Processes," 1971, shall be used as a guide to designate these areas. All welding which cannot be done in the approved safe welding area shal be performed in compliance with the procedures outlined below:

(i) Such welding and burning as are necessary on a structure shall adhere to the following practices:

(a) Prior to the commencement of any welding or burning operations on a structure, the operator's designated welding supervisor at the installation shall personally inspect the qualifications of the welder or welders to assure that they are properly qualified in accordance with the approved company qualification standards or requirements for welders. The designated welding supervisor and welders shall personally inspect the area in which the work is to be performed for potential fire and explosion hazards. After it has been determined that it is safe to proceed with the welding or burning operation, the welding supervisor shall issue a written authorization for the work.

(b) All welding equipment shall be inspected prior to beginning any welding or burning. Welding machines located on production or process platforms shall be equipped with spark arrestors and drip pans. Welding leads shall be completely insulated and in good condition; oxygen and acetylene bottles secured in a safe place; and hoses leak-free and equipped with proper fittings, gauges, and regulators.

(c) During all welding and burning operations, one or more persons as necessary shall be designated as a Fire Watch. Persons assigned as a Fire Watch shall have no other duties while actual welding or burning operations are in progress.

(d) Prior to any welding or burning, the Fire Watch shall have in his possession fire-fighting equipment in a condition ready to use.

(e) No welding shall be done on containers, tanks, or other vessels which have contained a flammable substance unless the contents of the vessels have been rendered inert and determined to be safe for welding or burning by the designated welder supervisor.

(f) In the event drilling, workover, or wireline operations are in progress on the platform, welding operations in other than approved safe welding areas may be conducted only if the well(s) on which work is being done contain noncombustible fluids, and entry of formation hydrocarbons into the wellbore is precluded by a positive overbalance toward the formation. Also, all other provisions of this section shall be applicable.

(g) All other producible wells shall be shut-in at the surface safety valves while welding or burning in the well-head or production area.

(3) *Testing.* The safety system devices required by this Order shall be tested by the operator at the interval specified below or more frequently if operating conditions warrant. Records shall be maintained at the field office for a period of one year, showing the present status and component history of each device, including dates and details of inspection, testing, repairing, adjustment, and reinstallation. Such records shall be available to any authorized representative of the Geological Survey. Records shall be analyzed, equipment or system problems areas identified, and action taken to preclude recurrence of problems.

Testing and reporting shall be accomplished in accordance with API RP 14C, Appendix D, and the following:

(a) All pressure relief valves shall be tested for operation annually. Pressure relief valves shall be either bench-tested or equipped to permit testing with an external pressure source.

(b) All pressure sensors shall be tested at least once each calendar month, but at no time shall more than six weeks elapse between tests.

(c) All automatic wellhead safety devices and check valves on all flowlines shall be checked for operation and holding pressure once each calendar month, but at no time shall more than six weeks elapse between tests. If any wellhead safety valve indicates leakage, it shall be reparied or replaced.

(d) All liquid-level shut-in controls shall be tested at least once within each calendar month, but at no time shall more than six weeks elapse between tests. These tests shall be conducted by raising or lowering the liquid level across the level-control detector.

(e) All automatic inlet shutoff vales actuated by a sensor on a vessel or a compressor shall be tested for operation at least once within each calendar month, but at no time shall more than six weeks elapse between tests.

(f) All automatic shutoff valves located in liquid discharge lines and actuated by vessel low-level sensors shall be tested for operation once within each calendar month, but at no time shall more than six weeks elapse between tests.

(g) The high-temperature shutdown controls installed in all compressors which are protected against abnormal pressures solely by such temperature safety devices shall be tested annually and repaired or replaced as necessary.

(h) All pumps for fire-fighting water systems shall be inspected and test-operated

V 40 238 DEC 10 75 XUM

weekly. A record of the tests shall be maintained at the field office for a period of one year.

(i) The Automatic Gas Detection System shall be tested for operation and recalibrated every six months.

(4) *Training.* Not later than two years after the effective date of this Order, the operator shall ensure that all personnel engaged in installing, inspecting, testing, and routinely maintaining these safety devices will have been qualified under a program as recommended by API RP T-2, September 1974, amended November 1975, or an equivalent program, *approved by the Geological Survey.* Documented evidence of qualification of individuals performing these functions shall be maintained at the work site and shall be available to any authorized representative of the Geological Survey.

Not later than one year after the effective date of this Order, *the operator shall submit for approval,* a description of the training to be conducted and the methods the operator will utilize to ensure that only persons qualified as above perform these functions. The description shall include:

(a) The operator organizational element responsible for training and to interface with the Geological Survey in training program matters.

(b) Categories of personnel to be qualified.

(c) Training organizations and courses to be utilized.

(d) Method for ensuring qualification of third-party personnel, if utilized.

(e) Method for determining when additional training or requalification is required and for obtaining same.

(f) Method of monitoring operations to ensure that only qualified personnel perform functions.

(g) Method of maintaining documented evidence of qualification at work site.

5. *Crane Operations.* Cranes shall be operated and maintained in a manner necessary to ensure the safety of facility operations in accordance with the provisions of API RP 2D, "Operation and Maintenance of Offshore Cranes," October 1972.

Records of inspection, testing, and maintenance shall be kept in the field office for a period of one year.

API Specification 2C, "Specification for Offshore Cranes," February 1972, shall be used as a guideline for the selection of cranes to be used offshore.

6. *Employee Orientation and Motivation Programs for Personnel Working Offshore.* The operator shall make a planned, continuing effort to eliminate accidents due to human error. This effort shall include the training of personnel in operational aspects of their functions and a program to instill in each individual working offshore a conscious desire to achieve safe and pollution-free operations. Minimum training of personnel going offshore for the first time shall include an orientation per API RP T-1, "Orientation Program for Personnel Going Offshore the First Time," January 1974, or equivalent. API Bulletin T-5, "Employee Motivation Programs for Safety and Prevention of Pollution in Offshore Operations," September 1974, shall be used as a guide in developing employee safety and pollution-prevention motivation programs.

7. *Requirements for Drilling Rigs.* The requirements of subparagraphs 4.D.(1)(g), 4.D.(1)(j), 4.D.(2)(d), and paragraphs 5. and 6. above shall apply to all drilling rigs used to conduct drilling or workover operations on Federal leases in the Gulf of Mexico.

D. W. SOLANAS,
Oil and Gas Supervisor, Field Operations, Gulf of Mexico Area.

APPROVED:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

[FR Doc.75-33173 Filed 12-9-75;8:45 am]

[Revision of OCS Order No. 71]

POLLUTION AND WASTE DISPOSAL

Gulf of Mexico Area

By Notice in the FEDERAL REGISTER dated December 3, 1974, (39 FR 41877) comments were solicited on a proposed revision of OCS Order No. 7, Pollution and Waste Disposal, for the Gulf of Mexico Area. As a result of these comments and additional input from field office personnel of the Geological Survey, a modified revision of this Order is now proposed and included herein.

The proposed revision reflects developments in pollution control and is cross referenced with a revision of OCS Order No. 8, Platforms, Structures, and Associated Equipment. Waste disposal standards which were formerly included in OCS Order No. 8 are now appropriately included in OCS Order 7. Interested persons may submit written comments and suggestions to the Director, U.S. Geological Survey, National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092, on or before January 5, 1976. Comments will be considered and included in the final version of the Order as appropriate.

W. A. RADLINSKI,
Acting Director.

[OCS Order No. 7]

Effective

POLLUTION AND WASTE DISPOSAL

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.43. The operator shall comply with the following requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Pollution Prevention.* In the conduct of all oil and gas operations, the operator shall prevent pollution of the Gulf. Furthermore, the disposal of waste materials into the Gulf shall not create conditions which will adversely affect the public health, life or property, aquatic life or wildlife, recreation, navigation, or other uses of the Gulf.

A. *Liquid Disposal.* (1) Drilling mud containing oil shall not be disposed of into the Gulf.

(2) The operator shall submit with the Application for Permit to Drill (Form 9-331C) a detailed list of drilling mud constituents and their concentrations, including the chemical composition of trade name components, and a list of the drilling mud additives which might be used to meet special drilling requirements. Drilling mud containing toxic substances shall be neutralized prior to disposal.

(3) Curbs, gutters, and drains on platforms and structures shall be installed and maintained in accordance with the provisions of OCS Order No. 8.

(4) Produced waste water disposal systems shall be designed and maintained so that the oil content of the effluent shall meet applicable requirements promulgated by the Environmental Protection Agency pursuant to the Federal Water Pollution Control Act as amended.

(a) A copy of the results of all analyses submitted to the Environmental Protection Agency shall be similarly submitted to the Area Supervisor, and a copy of the most recent analysis shall be maintained at the discharge site or field production headquarters and be available for inspection by Geological Survey personnel.

(b) Should an analysis indicate that the effluent does not meet the above requirements, corrective action shall be taken immediately. Approval to continue operations to aid in the identification and remedy of the problem shall be obtained from the Area Supervisor. Such approval shall be contingent upon submittal of a follow-up report to the Area Supervisor within 10 days.

(5) The disposal of produced waste water other than into the Gulf shall have the method and location approved by the Area Supervisor.

B. *Solid Waste Disposal.* (1) Drill cuttings, sand, and other solids containing oil shall not be disposed of into the Gulf unless all of the free oil has been removed.

(2) Mud containers and other solid waste materials shall be incinerated or transported to shore for disposal in accordance with Federal, State, or local requirements.

(3) All sewage shall be treated so that effluent shall meet applicable requirements promulgated by the Environmental Protection Agency pursuant to the Federal Water Pollution Control Act as amended.

(a) A copy of the results of all analyses submitted to the Environmental Protection Agency shall be similarly submitted to the Area Supervisor, and a copy of the most recent analysis shall be maintained at the discharge site or field production headquarters and be available for inspection by Geological Survey personnel.

(b) Should an analysis indicate that the effluent does not meet the above requirements, corrective action shall be taken immediately. Approval to continue operations to aid in the identification and remedy of the problem shall be obtained from the Area Supervisor. Such approval shall be contingent upon submittal of a follow-up report to the Area Supervisor within 10 days.

2. *Personnel, Inspections, and Reports.* A. *Personnel.* The operator's personnel shall be thoroughly instructed in the techniques of equipment maintenance and operation for the prevention of pollution. Nonoperator personnel shall be informed in writing, prior to executing contracts, of the operator's obligations to prevent pollution.

B. *Pollution Inspections.* (1) Manned facilities shall be inspected daily.

(2) Unattended facilities, including those equipped with remote control and monitoring systems, shall be inspected at frequent intervals. The district supervisor may prescribe the frequency of inspections for these facilities.

(3) All production facilities, such as separators, tanks, treaters, and other equipment shall be such as are necessary to control the maximum anticipated pressures and production of oil and gas. Maintenance or repairs as are necessary to prevent pollution of the Gulf shall be undertaken immediately.

C. *Pollution Reports.* All pollution reports required shall be submitted on Form 9-1880, entitled, *Pollution Report.* (1) All spills of oil and liquid pollutants shall be recorded showing the cause, size of spill, and action taken, and the record shall be maintained and available for inspection by the District Supervisor. All spills of less than 2.4 cubic metres (15 barrels) shall be reported orally to the District Supervisor within 12 hours and shall be confirmed in writing.

(2) All spills of oil and liquid pollutants of 2.4 to 7.9 cubic metres (15 to 50 barrels) shall be reported orally to the District Supervisor immediately and shall be confirmed in writing.

(3) All spills of oil and liquid pollutants of a substantial size or quantity, which is defined as more than 7.9 cubic metres (50 barrels), and those of any size or quantity which cannot be immediately controlled, shall be reported orally without delay to the District Supervisor, the Coast Guard, and the Regional Administrator, Environmental Protection Agency. All oral reports shall be confirmed in writing.

(4) Operators shall notify each other upon observation of equipment malfunction or pollution resulting from another's operation.

3. *Pollution Control Equipment and Oil Spill Contingency Plan. A. Equipment.* Standby pollution control equipment and materials shall be maintained by, or shall be available to, each operator at an offshore or onshore location. This shall include containment booms, skimming apparatus, clean-up materials and chemical agents, and shall be available prior to the commencement of operations. No chemicals shall be used without prior approval of the Area Supervisor. The equipment and materials shall be inspected monthly and maintained in good condition for use. The results of the inspections shall be recorded and maintained at the site.

B. *Oil Spill Contingency Plan.* The operator shall submit an oil spill contingency plan for approval by the Area Supervisor before consideration can be given to approval of an application for permit to conduct operations. This plan shall contain the following:

(1) Provisions to assure that full resource capability is known and can be committed during an oil discharge situation including the identification and inventory of applicable equipment, materials, and supplies which are available locally and regionally, both committed and uncommitted, and the time required for deployment.

(2) Provisions for varying degrees of response effort depending on the severity of the oil discharge.

(3) Establishment of notification procedures for the purpose of early detection and timely notification of an oil discharge including a current list of names, telephone numbers, and addresses of the responsible persons and alternates on call to receive notification of an oil discharge, as well as the names, telephone numbers, and addresses of regulatory organizations and agencies to be notified when an oil discharge is discovered.

(4) Provisions for well defined and specific actions to be taken after discovery and notification of an oil discharge including:

(a) Specification of an oil discharge response operating team consisting of trained, prepared and available operating personnel.

(b) Predesignation of an oil discharge response coordinator who is charged with the responsibility and delegated commensurate authority for directing and coordinating response operations.

(c) A preplanned location for an oil discharge response operations center and a reliable communications system for directing the coordinated overall response operations.

4. *Spill Control and Removal.* Immediate corrective action shall be taken in all cases where pollution has occurred. Corrective action taken under the Oil Spill Contingency Plan shall be subject to modification when directed by the Area Supervisor. The primary jurisdiction to require corrective action to abate the source of pollution and to enforce the subsequent clean-up by the lessee or operator shall remain with the Area Supervisor pursuant to the provisions of this Order and the memorandum of understanding between the Department of Transportation (U.S. Coast Guard) and the Department of the Interior (U.S. Geological Survey) dated August 16, 1971.

5. *Annual Contingency Plan.* Annual contingency plan assessments will be conducted in conjunction with Plan of Development review. Upon request of the Area Supervisor, revised contingency plans reflecting changes in personnel, equipment, and methods shall be submitted.

D. W. SOLANAS,
Area Oil and Gas Supervisor.

Approved:

RUSSELL G. WAYLAND,
Chief, Conservation Division.

DEPARTMENT OF AGRICULTURE

Forest Service

COOPERATIVE GYPSY MOTH SUPPRESSION AND REGULATORY PROGRAM 1976 ACTIVITIES

Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, and Animal and Plant Health Inspection Service, Department of Agriculture, have prepared a Draft Environmental Statement for 1976 Activities which is an addendum to the 1974 Final Environmental Statement on the Cooperative Gypsy Moth Suppression and Regulatory Program, USDA-FS-APHIS (Adm.) 76-04.

The Draft Environmental Statement concerns a cooperative suppression program with the States of Pennsylvania, New York, New Jersey and Rhode Island to treat approximately 116,200 acres of high-value forest land. Two insecticides will be used. Some areas will be treated with carbaryl and some with trichlorfon to protect forest resources from damage by the gypsy moth. The cooperative regulatory program is to prevent artificial, long-distance spread and to eradicate remote infestations in the United States.

This Draft Environmental Statement was filed with CEQ on December 4, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.

USDA, Animal and Plant Health Inspection Service, Administration Bldg., Room 302-E, 12th St. & Independence Ave., SW., Washington, D.C. 20250.

USDA Forest Service, 6816 Market Street, Upper Darby, Pa. 19082.

A limited number of single copies are available upon request to John R. McGuire, Chief, U.S. Forest Service, South Agriculture Building, 12th Street and Independence Ave., SW., Washington, D.C. 20250.

Copies of the Draft Environmental Statement 1976 Gypsy Moth Suppression and Regulatory Program have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Mr. John R. McGuire, Forest Service, So. Agriculture Bldg., 12th St. and Independence Ave., SW., Washington, D.C. 20250. Telephone 703/235-1560. Comments must be received by February 4, 1976, in order to be considered in preparation of the final Environmental Statement.

Dated: November 24, 1975.

R. MAX PETERSON,
Deputy Chief, Forest Service.

SUPERIOR NATIONAL FOREST

Transfer of Certain Lands; Correction

In FR Document 75-26173 appearing at page 45211 in the FEDERAL REGISTER of October 1, 1975, the following corrections should be made in the land descriptions for St. Louis County:

1. On page 45212, column 1, on line 14 following subheading T. 69 N., R. 18 W., add "33," immediately after "Sec."

2. On the same page, column 3, line 8 following subheading T. 71 N., R. 21 W., add "inclusive," immediately after "lots 11 to 14,".

Dated: December 5, 1975.

EARL L. BUTZ,
Secretary.

Soil Conservation Service

POLLARD CREEK WATERSHED PROJECT, TEXAS

Availability of Final Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a final

V 40 N 238 DEC 10 75 XUM

environmental impact statement (EIS) for the Pollard Creek Watershed Project, Palo Pinto County, Texas, USDA–SCS–EIS–WS–(ADM)–75–2 (F) TX.

The EIS concerns a plan for watershed protection and flood prevention. The planned works of improvement provide for conservation land treatment and 2 floodwater retarding structures.

The final EIS has been filed with the Council on Environmental Quality.

A limited supply is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, First National Bank Building, Temple, Texas 76501.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

JOSEPH W. HAAS,
Deputy Administrator for Water Resources, Soil Conservation Service.

DEPARTMENT OF COMMERCE

Bureau of the Census

SURVEY OF RETAIL SALES, PURCHASES, AND INVENTORIES

Notice of Determination

In accordance with Title 13, United States Code, sections 181, 224, and 225, and due notice of consideration having been published October 24, 1975, (40 FR 49811) I have determined that certain 1975 annual data for retail trade are needed to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data are also applicable to a variety of public and business needs. This annual survey is a continuation of similar surveys conducted each year since 1951. It provides, on a comparable classification basis, data covering 1975 year-end inventories, annual sales, and purchases. These data are not publicly available on a timely basis from nongovernmental or other governmental sources.

Reports will be required only from a selected sample of retail firms in the United States. The sample will provide, with measurable reliability, statistics on the subjects specified above. Reports will be requested from a sample of stores on the basis of their sales size, selection in existing census list (mail) sample panels, and location in census designated sample areas. Certain of the largest firms, in terms of number of retail stores, will be requested to report their sales and number of stores by county. Other firms which provide this type of information in the Bureau's monthly survey will be asked only to report figures for the entire United States.

Report forms will be furnished to the firms covered by the survey and will be due 20 days after receipt. Copies of the forms are available on written request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that an annual survey be conducted for the purpose of collecting these data.

Dated: December 5, 1975.

VINCENT P. BARABBA,
Director,
Bureau of the Census.

Notice of Applications For Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before December 30, 1975.

Amended regulations issued under cited Act (40 FR 12253 et seq., 15 CFR 701, 1975), prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number 76–00205–33–46040. Applicant: Cornell University, Sect. Biochemistry, Mol., and Cell Biology, Wing Hall, Ithaca, N.Y. 14853. Article: Electron Microscope, Model EM 301 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used in studies of the following:

i. Molecular structure of RNA-protein nucleocapsid of RNA tumor viruses particularly Rous Sarcoma Virus and Avian Myeloblastosis Virus.

ii. Atomic structure of pseudomonad cytochrome oxidase.

iii. Further investigations into molecular assembly, subunit assembly of rabbit muscle phosphofructokinase and acetylcholinesterase from housefly brain.

iv. Attachment of bovine heart muscle mitochondrial F, ATPase to the membrane of isolated submitochrondrial particles.

v. Structure of helical fibers and handedness of helix: Sickle Cell Hemoglobin fibers.

vi. Membrane studies of symmetry and assymmetry of bilayer membranes using artificial phospholipids in the presence and absence of proteins (enzymes).

In addition, the article will be used to provide individual instruction to graduates and faculty members wishing to learn how to use the instrument or how to prepare tissue samples used in their various research projects. Application received by Commissioner of Customs: November 11, 1975.

Docket Number: 76–00206–01–07500. Applicant: Southern Illinois University at Carbondale, Carbondale, Illinois 62901. Article: "Picker" Dynamic Flow Microcalorimeter, and acessories. Manufacturer: Sodev Inc., Canada. Intended use of article: The article is intended to be used to study biologically important reactions including interactions of small molecules with proteins, nucleic acids, membrane components and other biological macromolecules. (Ligand or small molecule binding to macromolecules will include both aqueous solutions as well as dissolved aqueous gaseous mixtures.) However, a primary use for the article will be for the study of denaturation of bimacromolecules by solutes and solvents. The primary aim of this work is to elucidate in as much detail as possible the free energy, enthalpy, and entropy profile for α-chymotrypsin catalysis of 3-(2-Furyl) Acryloylimidazole to imidazole and furylacrylic acid. Enthalpy and free energy values of some individual contributions will be sought which are exceedingly difficult to measure by noncalorimetric means and in most cases have never been evaluated. The article is intended to be used for educational purposes in the following courses: Chemistry 598, Graduate Research and Chemistry 600, Dissertation. Application received by Commissioner of Customs: November 11, 1975.

Docket Number: 76–00207–33–46040. Applicant: Amherst College, Amherst, MA 01002. Article: Electron Microscope, Model EM 9S2, and accessories. Manufacturer: Carl Zeiss, West Germany. Intended Use of Article: The article is intended to be used for research in embryology in which the development of the heart, the lateral line, and olfactory organs of frog and salamander embryos will be studied in order to gain an understanding of the cellular and subcellular mechanisms and structures involved in the formation of these organs. Another line of research will be in the field of neurobiology, specifically studies of the pattern of connections between and among nerve cells in the brain, particularly between the nerves from the eye and the brain cells with which they make contact. The article will also be used for educational purposes by enhancing student interest in biology, expanding the areas of biology in which undergraduate students can do research (thus enhancing students involvement with research and their sophistication about research), and by preparing students for further professional training. A summer program of training in techniques of electron microscopy is planned. Application received by Commissioner of Customs: November 12, 1975.

Docket Number: 76–00208–33–90000. Applicant: The Milton S. Hershey Medical Center of The Pennsylvania State University, 500 University Drive, Hershey, Pennsylvania 17033. Article: EMI Scanner with Magnetic Tape System. Manufacturer: Emitronics Ltd., United Kingdom. Intended Use of Article: The article is intended to be used for educational purposes which include the training of resident physicians in Diagnostic Radiology which is a required rotation for residents in Neuro-Radiology to familiarize them with the modality of computerized axial tomography. Other educational purposes include the instruction of medical students rotating through Radiology to familiarize them with the applications of the new diagnostic modality. The article will also be used for investigations of fluid balance in the brain following trauma, or accompanying surgery for brain tumors. Application Received by Commissioner of Customs: November 13, 1975.

Docket Number: 76–00209–33–90000. Applicant: Scripps Clinic & Research Foundation, 476 Prospect Street, La Jolla, California 92037. Article: EMI Scanner with Magnetic Tape System. Manufacturer: Emitronics Ltd., United Kingdom. Intended use of Article: The article is intended to be used in the diagnosis and the response of trigenimal neurologia, demyelinating disease, specifically amyotrophic lateral sclerosis (ALS), multiple sclerosis (MS), and associated sclerosis in various new approaches of treatment currenting being researched. It is hoped this will aid in more effective medical mangement of patients suffering from these associated diseases. The article will also be used to expose residents and students to the computerized axial tomography system and the interpretation of the results. Application Received by Commissioner of Customs: November 13, 1975.

Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before December 30, 1975.

Amended regulations issued under cited Act (40 FR 12253 et seq., 15 CFR 701, 1975) prescribe the requirements applicable to comments.

A copy of each aplication is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76–00210–33–46040. Applicant: U.S.C. School of Medicine, Veterans Administration Hospital, Columbia, S.C. 29201. Article: Electron Microscope, Model JEM–100B 7 and accessories. Manufacturer: JEOL Inc., Japan. Intended Use of Article: The article is intended to be used to morphologically and histologically examine neuroendocrine cells maintained *in vivo* and/or *in vitro*. Neurosecretory cells of the brain of *Manduca sexta* which has been reared under different photoperiodic conditions will also be examined to establish whether the neurohormones are synthesized on a circadian rhythm. In addition, the article is intended to be used in teaching medical and graduate students in the courses: Microanatomy and Techniques in Electron Microscopy. Application received by Commissioner of Customs: November 13, 1975.

Docket Number: 76–00211–33–46070. Applicant: U.S.C. School of Medicine, Veterans Administration Hospital, Columbia, S.C. 29201. Article: Scanning Electron Microscope, Model JSM 35U. Manufacturer: JEOL Inc., Japan. Intended Use of Article: The article is intended to be used to investigate normal and pathological conditions on the cell surface in studies which include:

(1) Diagnostic studies of viral transformed cells.

(2) Diagnostic studies of the renal, muscle and hepatic biopsies.

(3) Diagnostic studies of excised neurosecretory cells to determine changes in the surface during secretion of neurohormones.

(4) Studies to determine the effects of pharmaceutical substances before and after treatment to cell surface.

The article will also be used for education purposes in medical and graduate programs which include teaching of Cell Biology and graduate elective in techniques in electron microscopy. Application received by commissioner of customs: November 13, 1975.
